Finally, the Agency solicited public comment on a stay of § 57.22601 which requires blasting from the surface in Subcategory I-A mines. Comments and information on the stay received from an association of mine operators and the Bureau of Mines requested that the stay continue in effect until cooperative research to develop safe procedures for underground blasting in oil shale mines can be completed. The research is expected to be completed in 1989. MSHA will therefore continue the stay until further notice. Future action to lift the stay or revise § 57.22601 will be subject to public rulemaking procedures.

List of Subjects in 30 CFR Part 57

Chemicals, Fire prevention, Gases, Mine safety and health.

Date: March 17, 1988.

David C. O'Neal,

Deputy Assistant Secretary for Mine Safety and Health.

Accordingly, Subpart T, Part 57, Subchapter N, Chapter I, Title 30 of the Code of Federal Regulations is amended as follows:

PART 57—[AMENDED]

1. The authority citation for Subpart T continues to read as follows:

Authority: 30 U.S.C. 811.

2. Section 57.22228(e) is revised to read as follows:

§ 57.22228 [Amended]

* * * * *

(e) Except in Subcategory I-C or Category III mines, vehicles used for transportation when examining the mine shall be approved by MSHA under the applicable requirements of 30 CFR Parts 18 through 36.

3. The first sentence of § 57.22234(a) is revised to read as follows:

§ 57.22234 [Amended]

(a) If methane reaches 1.0 percent in the mine atmosphere, ventilation changes shall be made to reduce the methane. * * *

* * * * *

§ 57.225601 [Stayed]

4. Section 57.22601 is stayed until further notice.

[FR Doc. 88-6378 Filed 3-23-88; 8:45 am]

BILLING CODE 4510-43-M

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Parts 316, 342, and 351

[Department of the Treasury Circulars No. 653, Tenth Revision; Public Debt Series No. 3-67, Second Revision; and No. 1-80, Second Revision]

U.S. Savings Bonds and Notes; Tables Reflecting Investment Yields and Maturity Periods

AGENCY: Bureau of the Public Debt, Fiscal Service, Department of the Treasury.

ACTION: Notice providing update of tables showing the redemption values and investment yields of United States Savings Bonds/Notes.

SUMMARY: This notice updates the tables set forth in the offering circulars for Series E/EE savings bonds and savings notes. The tables reflect the redemption values and investment yields for accrual dates occurring April 1, 1988 through October 1, 1988, for Series E/EE savings bonds and savings notes.

EFFECTIVE DATE: March 24, 1988.

FOR FURTHER INFORMATION CONTACT: Jacqueline L. Jackson, Attorney Adviser, Office of the Chief Counsel, Bureau of the Public Debt, Washington, DC 20239-0001, (202) 376-4320.

SUPPLEMENTARY INFORMATION: This notice updates the tables reflecting the investment yields of Series E/EE savings bonds and savings notes. Department of the Treasury Circulars No. 653 (Series E), Public Debt Series No. 1-80 (Series EE) and No. 3-67 (Saving Notes) are hereby supplemented by the addition of tables showing the redemption values and investment yields for accrual dates occurring April 1, 1988 through October 1, 1988. It should be noted that the tables reflect the market-based variable yields described in the offering circulars at 31 CFR 316.8(b)(2)(C)(iii) for Series E savings bonds, 31 CFR 351.2(f)(2) for Series EE savings bonds, and 31 CFR 342.2a(b)(2) for savings notes. The values shown apply only where the securities are actually paid. They do not form the basis for future accruals.

Procedural Requirements

This notice is not considered a "major rule" for purposes of Executive Order 12291. A regulator impact analysis, therefore, is not required.

The notice and public procedures of the Administrative Procedure Act are inapplicable, pursuant to 5 U.S.C. 553(a)(2). As no notice of proposed rulemaking is required, the provisions of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) do not apply.

List of Subjects in 31 CFR Parts 316, 342, and 351

Banks and banking, Federal Reserve System, Government securities.

Dated: March 10, 1988.

Gerald Murphy,

Fiscal Assistant Secretary.

Accordingly, pursuant to the authority of Department of the Treasury Circular No. 653, Tenth Revision (31 CFR, Part 316), Public Debt Series No. 3-67, Second Revision (31 CFR Part 342), and No. 1-80, Second Revision (31 CFR Part 351), the following updated tables are provided:

BILLING CODE 4810-40-C

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR 117

[CGD5-88-004]

Drawbridge Operation Regulations; Anacostia River, Washington, DC

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of CONRAIL, the Coast Guard is changing the regulations governing the operation of the vertical lift railroad bridge across the Anacostia River, at mile 3.4, in Washington, DC. The change is being made in order to eliminate the need to have a person constantly available to open the draw during times of the year when few vessels transit the river. This action provides for the reasonable needs of navigation.

EFFECTIVE DATE: These regulations become effective on April 25, 1988.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, at (804)-398-6222.

SUPPLEMENTARY INFORMATION: On December 29, 1987, the Coast Guard published a notice of proposed rulemaking (52 FR 49031) regarding this bridge. The Commander, Fifth Coast Guard District, also published the proposal in a Public Notice, dated July 16, 1987. In the Federal Register notice, interested persons were given until February 12, 1988, to submit comments. Interested persons were given until August 17, 1987, to submit comments in the Public Notice.

Drafting Information

The drafters of these regulations are Linda L. Gilliam, project officer, and CDR Robert J. Reining, project attorney.

Discussion of Comments

In December 1986, CONRAIL requested that the regulations for the railroad bridge be amended to restrict the openings of the bridge at all times between October 1 through March 31 and between 11:00 p.m. and 7:00 p.m. between April 1 through September 30. During these timeframes the bridge would only open if eight hours advance notice was given.

The requested change increases the hours on weekdays during the boating season when the bridge is required to open on signal.

No comments were received as a result of the notice of proposed rulemaking nor the public notice. The proposal is being adopted with minor editorial changes. The current provision in 33 CFR 117.253(b)(5) relating to clearance gages that was erroneously left out of the notice of proposed rulemaking have been retained in the final rule as paragraph (b)(2).

Economic Assessment and certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. Because of the infrequent bridge openings during the winter months and the evening hours of the boating season, the economic impact should be minimal. The Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Regulations

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.253(b) is revised to read as follows:

§ 117.253 Anacostia River.

* * * * *

(b) CONRAIL bridge, mile 3.4.

(1) The draw of the shall open on signal:

(i) At all times for public vessels of the United States, state and local government vessels, commercial vessels, and any vessels in an emergency involving danger to life or property.

(ii) On Saturdays, Sundays, and Federal Holidays from April 1 through September 30.

(iii) On weekdays, which are not Federal Holidays, between 7:00 a.m. and 11:00 p.m., from April 1 through September 30.

(iv) At all other times, if at least eight hours notice is given.

(2) The owners of the bridge shall provide and keep in good legible condition two board gages painted white with black figures not less than six inches high to indicate the vertical clearance under the closed draw at all stages of tide. The gages shall be placed on the bridge so that they are plainly visible to the operator of any vessel approaching the bridge from either upstream or downstream.

Dated: March 14, 1988.

A.D. Breed,

Rear Admiral, U.S. Coast Guard Commander, Fifth Coast Guard District.

BILLING CODE 4910-14-M

VETERANS ADMINISTRATION

38 CFR Part 17

Eligibility for Medical Benefits; Evidence of Inability To Defray Necessary Medical Expenses

AGENCY: Veterans Administration.

ACTION: Final rule; correction.

SUMMARY: On pages 25061–25068 Federal Register of July 10, 1986 (51 FR 25061), the Veterans Administration (VA) published a final rule amending its medical series to conform with changes to several sections of Title 38, United States Code, enacted with passage of Title XIX of Pub. L. 99–272, "The Veterans' Health Care Amendments of 1986," significantly affecting veterans eligibility for health care benefits. In the process of amending § 17.47 introductory text language was inadvertently left in paragraph (e). This notice corrects that error; the proper language for § 17.47(e) is set forth below.

EFFECTIVE DATE: July 1, 1986.

FOR FURTHER INFORMATION CONTACT: Stuart E. Mount, Acting Chief, Policies and Procedures Division (136F), Medical Administration Service, Department of Medicine and Surgery, Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20402, (202) 233-2143.

SUPPLEMENTARY INFORMATION:

List of Subjects in 38 CFR Part 17

Health care, Health care facilities, nursing homes, Veterans.

38 CFR Part 17 is amended as follows:

PART 17—[AMENDED]

1. The authority citation for § 17.47(e) continues to read as follows:

Authority: 38 U.S.C. 610(b), 621.

§ 17.47 [Amended]

2. In § 17.47, paragraph (e) is amended by removing the introductory text.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6667

[OR–943–07–4220–10–GP–07–293; OR–36236]

Withdrawal of Public Land for John Day Administrative Site; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order withdraws 5 acres of public land from surface entry and mining for a period of 20 years for the Bureau of Land Management to protect the John Day Administrative Site. The land has been and remains open to mineral leasing.

EFFECTIVE DATE: March 24, 1988.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM, Oregon State Office, P.O. Box 2965, Portland, Oregon 97208, 503–231–6905.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described public land is hereby withdrawn from settlement, sale, location, or entry under the general land laws, including the United States mining laws (30 U.S.C. Ch. 2), but not from leasing under the mineral leasing laws, to protect a Bureau of Land Management administrative site:

Willamette Meridian

T. 16 S., R. 27 E.,
  Sec. 29, S½.SE¼SW¼NW¼.

The area described contains 5 acres in Grant County.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

3. This withdrawal will expire 20 years from the effective date of this order unless, as a result of a review conducted before the expiration date pursuant to section 204(f), of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f), the Secretary determines that the withdrawal shall be extended.

Dated: March 10, 1988.

J. Steven Griles,

Assistant Secretary of the Interior.

43 CFR Public Land Order 6668

[ID–943–08–4220–10; I–22814]

Withdrawal of Public Land for the Dworshak Dam and Reservoir Project, ID

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order withdraws 764.61 acres of public land from surface entry and mining for a period of 84 years for the U.S. Army Corps of Engineers and transfers jurisdiction of the land to the Corps to protect big game habitat that was lost by filling the Dworshak Dam and Reservoir. The lands have been and will remain open to mineral leasing.

EFFECTIVE DATE: March 24, 1988.

FOR FURTHER INFORMATION CONTACT: Larry R. Lievsay, Idaho State Office, 3380 Americana Terrace, Boise, Idaho 83706, 208–334–1735.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following-described public lands are hereby withdrawn from settlement, sale, location, or entry under the general land laws, including the United States mining laws (30 U.S.C. Ch. 2), but not from leasing under the mineral leasing laws:

Boise Meridian

T. 41 N., R. 5 E.,
  Sec. 19, NW¼SE¼NE¼;
  Sec. 25, lots 3, 4, S½SW¼NW¼;
  Sec. 26, lot 2 except NW¼, lot 9, SE¼SE¼NE¼, NW¼NE¼SW¼, S½NE¼SW¼;
  Sec. 27, S½N½SW¼;
  Sec. 28, S½SE¼SW¼;
  Sec. 31, S½SE¼SE¼;
  Sec. 32, lots 2, 3, E½NE¼NE¼, SE¼SW¼NE¼, SE¼NE¼, S½NE¼SW¼, SW¼SW¼, NW¼SE¼;
  Sec. 33, lots 6 and 7;
  Sec. 34, N½N½NE¼, NE¼SW¼NW¼, W½SW¼NW¼, NW¼SE¼NW¼;
  Sec. 35, N½NW¼NE¼, SW¼NW¼NE¼, N½N½NW¼, SE¼NE¼NW¼.

The areas described aggregate 764.61 acres in Clearwater County.

2. Jurisdiction of the lands described in this order is hereby transferred to the U.S. Army Corps of Engineers.

3. This withdrawal will expire 84 years from the effective date of this order unless, as a result of a review conducted before the expiration date pursuant to section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f), the Secretary determines that the withdrawal shall be extended.

43 CFR Public Land Order 6669

[MT–930–08–4220–10; M–21943]

Withdrawal of National Forest Land for Lincoln Gulch Historic Site; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order withdraws 90 acres of national forest land from mining for 20 years to protect the Lincoln Gulch Historical Site. The lands have been and remain open to appropriate forms of surface entry and to mineral leasing.

EFFECTIVE DATE: March 24, 1988.

FOR FURTHER INFORMATION CONTACT: James Binando, BLM, Montana State Office, P.O. Box 36800, Billings, Montana 59107, 406–657–6090.

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2151; 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described national forest lands are hereby withdrawn from location and entry under the mining laws (30 U.S.C. Ch. 2) to protect the Lincoln Gulch Historical Site.

Principal Meridian

T. 14 N., R. 9 W.,
  Sec. 8, W½SE¼NW¼, W½NE¼SW¼, SE¼SW¼, and SW¼SW¼SE¼.

The area described contains 90 acres in Lewis and Clark County.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the national forest lands under lease, license or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

3. This withdrawal will expire 20 years from the effective date of this order unless, as a result of a review conducted before the expiration date, pursuant to section 204(f) of the Federal

Land Policy and Management Act of 1976, 43 U.S.C. 1714(f), the Secretary determines that the withdrawal shall be extended.

J. Steven Griles,

Assistant Secretary of the Interior.

March 15, 1988.

BILLING CODE 4310-DN-M

FEDERAL MARITIME COMMISSION

46 CFR Parts 550 and 580

[Docket No. 85–19]

Tariff Publication of Free Time and Detention Charges Applicable to Carrier Equipment Interchanged With Shippers or Their Agents

AGENCY: Federal Maritime Commission.

ACTION: Final rule; extension of effective date.

SUMMARY: In response to requests from affected conferences, the Federal Maritime Commission has determined to extend the effective date of the final rule in Docket No. 85–19.

DATE: Effective June 26, 1988.

FOR FURTHER INFORMATION CONTACT: Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202) 523–5725.

SUPPLEMENTARY INFORMATION: The Commission served a final rule in this proceeding on February 18, 1988, with an effective date 30 days after publication in the Federal Register. The notice appeared on February 26, 1988 (53 FR 5770) with an effective date of March 28, 1988.

Various conferences have filed requests for a 90-day stay of the effective date. The conferences stress the magnitude of complying with the new filing requirements imposed by the rule and indicate that the current 30-day period is insufficient to achieve compliance.

Upon consideration of the requests, the Commission has determined to grant a 90-day extension of the effective date of the final rule in Docket No. 85–19. The date the rule will become effective is established as June 26, 1988. By the Commission.

Tony P. Kominoth,

Assistant Secretary.

GENERAL SERVICES ADMINISTRATION

48 CFR Parts 525 and 552

[APD 2800.12 CHGE 53]

General Services Administration Acquisition Regulation; Buy American Act Construction Materials

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Final rule.

SUMMARY: The General Services Administration (GSAR) Chapter 5, is amended by adding section 525.202 to provide specific policy concerning the use and approval of foreign construction materials; to add section 525.203 to provide a method to evaluate offers when foreign construction materials are proposed; to add section 525.204 to provide for the documentation of the contractor's failure to comply with the Buy American Act; to add section 525.205 to prescribe a provision entitled "Buy American Act Notice—Construction Materials;" and by adding section 552.225–75 to provide the text of the provision entitled "Buy American Act Notice—Construction Materials." The intended effect is to improve the regulatory coverage and to provide uniform procedures for contracting under the regulatory system.

EFFECTIVE DATE: March 31, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. John Joyner, Office of GSA Acquisition Policy and Regulations on (202) 523-4916.

SUPPLEMENTARY INFORMATION:

Background

The General Services Administration published GSAR Notice 5–131 in the Federal Register (52 FR 42125) on November 3, 1987, inviting comments from interested parties. No comments were received from the public. Comments received from various offices within GSA have been reviewed, reconciled, and incorporated when appropriate, in this final rule.

Impact

The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain procurement regulations from Executive Order 12291. The exemption applies to this rule. A final regulatory flexibility analysis has been prepared, in accordance with the Regulatory Flexibility Act (5 U.S.C. 604), and provided to the Chief Counsel for Advocacy, Small Business Administration. Copies of the final regulatory flexibility analysis may be obtained by contacting Marjorie Ashby on (202) 523–3822 or writing the Office of GSA Acquisition Policy and Regulations (VP), 18th & F Streets NW., Washington, DC 20405. The information collection requirements contained in this rule have been approved by OMB under the Paperwork Reduction Act and assigned OMB Control Number 3090–0240.

List of Subjects in 48 CFR Parts 525 and 552

Government procurement.

1. The authority citation for 48 CFR Parts 525 and 552 continues to read as follows:

Authority: 40 U.S.C. 486(c).

PART 525—FOREIGN ACQUISITION

2. The table of contents for Part 525 is amended by adding Subpart 525.2 and related sections to read as follows:

Subpart 525.2—Buy American Act—Construction Materials

Sec.
525.202 Policy.
525.203 Evaluation of offers.
525.204 Violations.
525.205 Solicitation provision.

3. Subpart 525.2 is added to read as follows:

Subpart 525.2—Buy American Act—Construction Materials

525.202 Policy.

The HCA is authorized to make determinations required by FAR 25.202(a). The HCA may not redelegate authority to make determinations under FAR 25.202(a)(3) when the cost of the materials is estimated to exceed $100,000. Authority to make other determinations may be redelegated.

525.203 Evaluation of offers.

(a) The HCA or a designee may authorize the use of a particular foreign construction material when the use of a comparable domestic construction material would unreasonably increase the cost of the contract. The cost of a particular domestic construction material shall be determined to be unreasonable when the cost of such material exceeds the cost of foreign material by more than 6 percent. The cost of construction material includes all delivery costs to the construction site and any applicable duty (whether or not a duty-free entry certificate is issued).

(b) The evaluation process described in paragraph (a) above, does not apply to excepted materials listed in FAR 25.108 or in the solicitation. (See paragraph (a) of the provision at

552.225–75). See FAR 25.201 for computing cost of components.

(c) The provision at 552.225–75, Buy American Act Notice—Construction Materials, requires offerors proposing to use foreign construction materials provide adequate information for Government evaluation under paragraph (a) above, and permits alternate offers for comparable domestic construction materials at stated prices. When a foreign construction material is not authorized under (a) above, evaluation of the offer must be based on the stated price, if any, for comparable domestic construction material. If an offer proposing to use foreign construction material does not furnish data on the cost of comparable domestic construction material, and use of the foreign construction material is not authorized, the offer of foreign material must be rejected, unless the contracting officer is able to obtain prices on comparable domestic material which verifies that domestic prices are unreasonable.

(d) The contracting officer shall add 6 percent of the cost of all foreign construction materials authorized for use in accordance with paragraph (a) above, to price(s) offered, if applicable, for evaluation purposes only.

525.204 Violations.

If a contractor fails to comply with the clause at FAR 52.225–5, Buy American Act—Construction Materials, the contracting officer shall document the failure in a report and forward the report to the debarring official for consideration for debarment action in accordance with Subpart 509.4.

525.205 Solicitation provision.

The contracting officer shall insert the provision at 552.225–75, Buy American Act Notice—Construction Materials, in solicitations for construction inside the United States. This provision supplements the Buy American Act—Construction Materials clause at FAR 52.225–5.

PART 552—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

4. The Table of Contents for Part 552 is amended by adding section 552.225–75 to read as follows:

Subpart 552.2—Text of Provisions and Clauses

Sec.
552.225–75 Buy American Act Notice—Construction Materials.

5. Section 552.225–75 is added to read as follows:

552.225–75 Buy American Act Notice—Construction Materials.

As prescribed in 525.205, insert the following provision in solicitations and contracts:

Buy American Act Notice—Construction Materials (Mar 1988)

(a) The Buy American Act (41 U.S.C. 10) generally requires that only domestic construction material be used in the performance of this contract (See the clause entitled "Buy American Act—Construction Materials"). This requirement does not apply to the excepted construction material or components listed either below or in FAR 25.108:

(List applicable excepted materials not listed in FAR 25.108 or indicate "none.")

(b) Offers based on the use of other foreign construction material may be acceptable for award if the Government determines that—

(1) Comparable domestic construction material in sufficient and reasonably available quantities, of a satisfactory quality, is unavailable; or

(2) Use of comparable domestic construction material is impracticable or would unreasonably increase the cost of this contract.

(c) Any offer based on the use of one or more other foreign construction materials shall include current data, based on a reasonable canvass of suppliers, in the format listed in paragraph (h) below, clearly demonstrating that the cost of each foreign construction material, plus 6 percent, is less than the cost of each comparable domestic construction material. The cost of construction material shall include all delivery costs to the construction site and any applicable duty (whether or not a duty-free entry certificate may be issued).

(d) For evaluation purposes, the Government will add to the offer, 6 percent of the cost of foreign construction material that qualifies for acceptance under paragraph (c) above.

(e) When offering foreign construction material, offerors may also offer, at stated prices, any available comparable domestic construction material, so as to avoid the possibility that failure of a foreign construction material to be acceptable, under (c) above, will cause rejection of the entire offer.

(f) If any foreign construction material does not qualify for acceptance under paragraph (c) above, the Government will evaluate the offer on the basis of the stated price for comparable domestic construction material, and the Offeror shall be required to furnish such domestic construction material at that price. Therefore, if the Offeror does not state a price for a comparable domestic construction material, and the foreign construction material does not qualify for acceptance under paragraph (c) above, the offer will be rejected in sealed bid procurements and may be rejected in negotiated procurements.

(g) If the foregoing procedure results in a tie between a foreign offer as evaluated and a domestic offer, award shall be made on the domestic offer. In such case, offers proposing to use any foreign construction material will be considered to be foreign offers.

(h) For evaluation purposes under paragraph (c) above, the following information and any applicable supporting data based on the canvass of suppliers shall be included in the offer for the use of one or more foreign construction materials:

FOREIGN AND DOMESTIC CONSTRUCTION MATERIALS COST COMPARISON

Construction material description	Unit of measure	Quantity	Cost (dollars) [1]
Item 1:			
Foreign construction material			
Comparable domestic construction material			$
Item 2:			
Foreign construction material			$
Comparable domestic construction material			$

[1] Include all delivery costs to the construction site and any applicable duty.

(End of Provision)

Dated: March 11, 1988.

Patricia A. Szervo,

Associate Administrator for Acquisition Policy.

BILLING CODE 6820-61-M

VETERANS ADMINISTRATION

48 CFR Part 836

Acquisition Regulations; Specifications

AGENCY: Veterans Administration.

ACTION: Correction; final rule.

SUMMARY: On page 7755 of the **Federal Register** of March 10, 1988 (53 FR 7755), the Veterans Administration (VA) published a final rule amending the VA Acquisition Regulations (VAAR) to provide Agency guidance on the use of specifications, standards, and other purchase descriptions in the acquisition process. In section 836.202(b) a series of words was inadvertently omitted. This notice corrects that error by setting forth the language below.

FOR FURTHER INFORMATION CONTACT: Marsha J. Grogan, Acquisition Policy (93), Office of Acquisition and Materiel Management, Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233–3784.

Dated: March 17, 1988.

Priscilla Carey,

Chief, Directives Management Division.

Section 836.202 is amended by correctly revising paragraph (b) to read as follows:

836.202 Specifications.

* * * * *

(b) The use of "brand name or equal" or other restrictive specifications by contract architect-engineers is specifically prohibited without the prior written approval of the contracting officer during the design stage. The contracting officer shall inform the prospective architect-engineers of this requirement during the negotiation phase, prior to award of contract for design.

BILLING CODE 8320-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 23

Export of Bobcat Taken in 1987 and Subsequent Seasons

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final findings and rule.

SUMMARY: The Convention on International Trade in Endangered Species of Wild Fauna and Flora (Convention) regulates international trade in certain animal and plant species. As a general rule, exports of animals and plants listed in Appendix II of the Convention may occur only if a Scientific Authority has advised a permit-issuing Management Authority that such exports will not be detrimental to the survival of the species, and if the Management Authority is satisfied that the animals or plants were not obtained in violation of laws for their protection.

This document announces final findings by the Scientific Authority and the Management Authority of the United States on the export of bobcats harvested in Kentucky and on the Fort Apache Indian Reservation by the White Mountain Apache Tribe. This document also stipulates that monitoring procedures previously established for other States and Indian Nations be extended to include Kentucky and the White Mountain Apache Tribe. The Service intends these findings to span a period not limited to a single harvest season.

In the January 5, 1984, **Federal Register** (49 FR 590), the Service published a rule granting export approval for bobcats (*Lynx rufus*) and certain other Convention-listed species from specified States and Indian Nations for the 1983–84 and subsequent harvest seasons. This document adds the State of Kentucky and the White Mountain Indian Tribe to the list of States and Indian Nations for which the export of bobcats is approved.

DATES: This rule is effective March 24, 1988.

ADDRESSES: Please send correspondence concerning this document to the Office of Scientific Authority; Mail Stop: Matomic Building, Room 527; U.S. Fish and Wildlife Service, Washington, DC 20240. Materials received will be available for public inspections from 8:00 a.m. to 4:00 p.m., Monday through Friday, at the Office of Scientific Authority, Room 537, 1717 H Street NW., Washington, DC or at the Office of Management Authority, U.S. Fish and Wildlife Service Room 400, 1375 K Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT:

Scientific Authority Finding—Dr. Charles W. Dane, Office of Scientific Authority, U.S. Fish and Wildlife Service, Washington, DC 20240, telephone (202) 653–5948

Export Permits—Mr. Richard K. Robinson, Office of Management Authority, U.S. Fish and Wildlife Service, Washington, DC 20240, telephone (202) 343–4955

State Export Programs—Mr. S. Ronald Singer, Office of Management Authority, U.S. Fish and Wildlife Service, Washington, DC 20240, telephone (202) 343–4963

SUPPLEMENTARY INFORMATION:

Background

The Convention regulates import, export, reexport, and introduction from the sea of certain animal and plant species. Species for which trade is controlled are included in three appendices. Appendix I includes species threatened with extinction that are or may be affected by trade. Appendix II includes species that although not necessarily now threatened with extinction may become so unless trade in them is strictly controlled. It also lists species that must be subject to regulation in order that trade in other currently or potentially threatened species may be brought under effective control (e.g., because of difficulty in distinguishing specimens of currently or potentially threatened species from those of other species). Appendix III includes native species that any Party nation identifies as being subject to regulation within its jurisdiction for purposes of preventing or restricting exploitation, and for which it needs the cooperation of other Parties in controlling trade.

In the January 5, 1984, and the August 18, 1983 (48 FR 37494) **Federal Register** documents, the Service announced the decision from a review of listed species concluded at the Fourth Meeting of the Conference of the Parties in Botswana that each of the species or geographically separate populations addressed in those export findings, including the bobcat, should be regarded as listed in Appendix II because of its similarity in appearance to other listed species or populations. As indicated in those documents, the Conference of the Parties adopted a resolution accepting the report of the Central Committee on the 10-year review of species listed in Appendices I and II. The report included recommendations that these populations or species should be considered as listed in Appendix II only because of similarity in appearance, if they were to be retained in that appendix.

The January 5, 1984, document described how the Service, as Scientific Authority, planned to monitor the status of these species and their trade on an annual basis so that it could detect any significant downward trends in populations and, where necessary, institute more restrictive export controls in response to them. The document also described how the Service, as Management Authority, would determine if specimens had been lawfully acquired on the basis of tagging requirements.

This is the second **Federal Register** document concerning the Service's findings on export of bobcats taken in Kentucky and on the Fort Apache Indian Reservation in 1987 and subsequent seasons. The first document (52 FR 45469; November 30, 1987) announced the Service's intention to develop findings on export of 1987 and subsequent seasons' harvest of bobcats taken in Kentucky and on the Fort Apache Indian Reservation by the White Mountain Apache Tribe.

The purpose of this rule is to add Kentucky and the White Mountain Apache Tribe to those States and Indian Tribes and Nations from which the Service has approved the export of bobcats in the 1983–84 and subsequent seasons. This list was identified in the January 5, 1984, **Federal Register** (49 FR 590) and is listed in 50 CFR 23.52.

Comments and Information Received

The Service received comments on the proposed findings and rule from the Defenders of Wildlife and from the Wildlife Legislative Fund of America.

The Wildlife Legislative Fund supported a decision to approve export of bobcats harvested in the 1987 and subsequent seasons in Kentucky and the Fort Apache Indian Reservation. The Defenders of Wildlife, while not commenting specifically on bobcat status and harvest programs in Kentucky or the Fort Apache Indian Reservation, recommended to the Service "that it: (1) Make the 'no detriment' finding required by CITES prior to authorizing export of bobcats; and (2) describe specifically how it 'monitors' that status of the bobcat and bobcat exports."

The issue that the Defenders of Wildlife appears to raise is that the language of the Convention does not specifically provide different criteria to be used in determining no detriment for those species listed in Appendix II under the rationale of Article II paragraph 2(a), as opposed to those listed in Appendix II under Article II paragraph 2(b) because of their similarity of appearance to those listed based on paragraph 2(a).

In the August 18, 1983, **Federal Register** document (48 FR 37494), the Service indicated that when a species is listed only to enable trade in other species to be effectively controlled, the Scientific Authority should focus on this control aspect when advising on nondetriment. The marking of pelts with tags bearing the name of the species and the issuance of export permits naming the species being traded should suffice to address problems of identification due to similarity of appearance between any of these furbearers and the other species they were listed to protect. The States and the Service have continued to implement improvements in this marking system.

Although the Service did not adopt the view that the export standard for species listed in Appendix II under Article II paragraph 2(b) should be the same as if listed under paragraph 2(a), the Service in the January 4, 1984, **Federal Register** document did provide information that helped to illustrate that export under State programs at the time was not detrimental to the survival of the species involved. The Service also established a procedure for monitoring and review to establish if the determination that the bobcat is properly listed under Article II paragraph 2(b) remains correct.

Furthermore, as part of this monitoring program, the States that have been approved for export of bobcats have annually certified that the harvest of bobcats will not be detrimental to survival of the species and have provided information and/or the basis for support of this assessment. In addition to the Service's annual request for the above certification from each State, the Service indicated that it would continue to monitor export trade and would conduct more comprehensive reviews of accumulated information whenever available information from the States or other sources indicates a possible problem. The review procedure includes a provision for limiting trade where necessary to avoid detriment to the species involved.

The Service has recorded the annual export of bobcat specimens and has recorded the number of bobcat pelt tags issued by State programs. However, inasmuch as these parameters do not indicate the total harvest, the Scientific Authority has considered the information from the States to be the most meaningful for determining whether the species remains correctly listed. These States have professionally-run management and research programs for the bobcat and information from these programs serves to indicate whether similarity in appearance treatment remains suitable.

Management Authority Determinations

Exports of Appendix II species are to be allowed under the Convention only if the Management Authority is satisfied that the specimens were not obtained in contravention of laws for the protection of wildlife or plants. The Service, therefore, must be satisfied that the pelts, hides, or products of the furbearer in question were not obtained in violation of State or Federal law, in order to allow export. A system to determine whether specimens have been lawfully acquired on the basis of tagging requirements was stipulated in the January 5, 1984, **Federal Register** (49 FR 590). The Service has continued to monitor the implementation of these regulations, and considers that these programs provide reasonable assurance that bobcat specimens being exported were not obtained in violation of laws established for their protection.

Scientific Authority Advice

The State of Kentucky provided current information on population density based on home range studies conducted in these portions of the State in which the taking of bobcats will be permitted, an evaluation of available habitat with regard to distribution of the bobcat, and possible trends in habitat conditions. The State also informed the Service that they had contracted for the analysis of age structure, sex ratio, placental scar counts, food habits, body size and condition measurements and that this information would be incorporated into the bobcat simulation model being developed.

The White Mountain Indian Tribe provided information on bobcat populations based on density in the various habitat types and harvest. The tribe reported a total harvest of only 34 bobcats in the 1986–87 season. Nevertheless, it is important to address the White Mountain Indian Tribe separately in order to document all entities involved in tagging programs. The area of the Fort Apache Indian Reservation is relatively small, and information on the status of bobcats throughout Arizona provides a more comprehensive assessment of harvest effects on State-wide survival of the species. The State of Arizona prior to the 1987–88 trapping season stipulated that "there is no reason to believe that the 1987–88 bobcat harvest will be detrimental to the survival of the bobcat in Arizona," and provided information on bobcat harvest (both from trapping and hunting), population age structure data, number of trappers, and trapping success.

The Service continues to believe that the bobcat is properly listed for reasons of similarity of appearance, and that with the tagging of pelts as described in Management Authority Determinations (49 FR 590), the export of those animals will not reduce the effectiveness of the Convention in controlling trade in other listed species. The State of Kentucky and the White Mountain Apache Tribe have established programs to properly mark the specimens so the export will not be detrimental to the species that the bobcat is listed to protect, and to provide information to indicate whether harvest will not threaten the survival of the species.

Export Approval

The Service approves exports of bobcats harvested in the 1987 and subsequent seasons in Kentucky and on the Fort Apache Indian Reservation by the White Mountain Apache Tribe on the basis that both the Scientific Authority and the Management Authority criteria have been satisfied.

This approval is subject to revision prior to any subsequent taking season in any particular State or Indian Nation if a review of information reveals that Management Authority or Scientific Authority findings in favor of export must be changed. The Service does not grant general approval for export of specimens of this species originating in any State or Indian Nation not named for one or more of the following reasons: (1) The species does not occur there, (2) no harvest of the species is allowed by the State or Indian Nation, or (3) the Service does not have current information needed for Scientific Authority and Management Authority findings.

The Department has determined, within the meaning of 5 U.S.C. 553(d) (1) and (3) of the Administrative Procedure Act, to make these findings and rule effective immediately. By making this rule effective immediately, a restriction on international trade will be lifted from individual trappers and fur dealers within Kentucky and the Indian Reservation. Furthermore, this document represents the final administrative step in authorizing the export of bobcats from the approved State and Indian Nations in accordance with the Convention. It is the Department's opinion that a delay in the effective date of the regulations after this rule is published could affect the export of pelts taken in the harvest season that already has begun in the State and Indian Reservation. It could also adversely affect the species by reducing compliance with State tagging requirements. Furthermore, good cause exists for making these findings effective as soon as possible to avoid economic injury to individual trappers, dealers, or other small entities that are directly affected by the findings. It should be noted that making this finding and rule effective immediately wll not adversely affect the species involved, in view of the findings on nondetriment contained herein.

Note.—The Department has determined that final findings on the export of certain Appendix II animals taken in the 1983–84 and subsequent harvest seasons are not a major Federal action that would significantly effect the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act and therefore, the preparation of an Environmental Impact Statement is not required (48 FR 37494). The Department also has determined that this is not a major rule under Executive Order 12291 and does not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601). The findings will allow export of specimens taken in accordance with other State budget programs that have operated for several years without adversely affecting the resource. The findings do not contain any information collection or recordkeeping requirements that require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

This document was prepared by Mr. S. Ronald Singer, Office of Management Authority, and Dr. Charles W. Dane, Office of Scientific Authority, under the authority of the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*)

List of Subjects in 50 CFR Part 23

Endangered and threatened wildlife, Exports, Fish, Imports, Plants (agriculture), Treaties.

Regulation Promulgation

For reasons set out in the preamble of this document, Part 23 of Title 50, Code of Federal Regulations is amended as follows:

PART 23—ENDANGERED SPECIES CONVENTION

1. The authority citation for Part 23 continues to read as follows:

Authority: Convention on International Trade in Endangered Species of Wild Fauna and Flora, TIAS 8249, and Endangered Species Act of 1973, 87 Stat 884, 16 U.S.C. 1531 *et seq.*

2. Amend § 23.52 by revising paragraph (h) to read as follows:

§ 23.52 Bobcat (Lynx rufus).

* * * * * *

(h)(1) *1983–84 and subsequent harvests (in addition to those listed above):* Alabama, Arizona, Arkansas, California, Colorado, Florida, Georgia, Idaho, Kansas, Klamath Tribe, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Navajo Nation, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Oregon, Penobscot Nation, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

(2) *1987 and subsequent harvests (in addition to those listed above):* Kentucky, White Mountain Apache Tribe.

Condition on export: Each pelt must be clearly identified as to species, State or Indian Nation of origin and season of taking by a permanently attached, serially numbered tag of a type approved by and attached under conditions established by the Service. Exception to tagging requirement: finished furs and fully manufactured fur products may be exported from the United States when accompanied by the State or Indian Nation export tags removed in a manner described by the Service from pelts contained in the products; such tags must be removed by cutting the tag strap on the female side next to the locking socket of the tag so that the locking socket and locking tip remain joined, and such tags must be surrendered to the Service prior to export.

Date: February 25, 1988.

Susan Recce,

Acting Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310-55-M

Proposed Rules

Federal Register

Vol. 53, No. 57

Thursday, March 24, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 917

Fresh Pears, Plums, and Peaches Grown in the State of California; Amendment to the Direct Sales Exemption Regulations for Pears

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule invites comments on a change in the direct home use sales exemption regulations established under the pear, plum, and peach marketing order. The change would bring the quantity of pears that can be handled free of certain program requirements under that exemption more in line with the quantity that would normally be used for home use.

DATE: Comments must be received by April 25, 1988.

ADDRESS: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2065–S, Washington, DC 20090–6456. Comments should reference the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Jerry Brown, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456; telephone 202–475–5464.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Order No. 917 (7 CFR Part 917), regulating the handling of fresh pears, plums, and peaches grown in California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statues have small entity orientation and compatibility.

There are approximately 45 handlers of pears subject to regulations under the marketing order, and approximately 2,800 pear, plum, and peach producers in California. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers may be classified as small entities.

Section 917.143 of the regulations for pears, plums, and peaches specifies conditions which must be followed to handle pears, plums, and peaches exempt from certain requirements, including grade, size, inspection, container, marking, and assessment regulations. Among other things, maximum weight limitations are specified. For pears, plums, and peaches, the quantity shipped cannot exceed 200 pounds to any one person during any one day. These purchases also must be for home use and cannot be resold.

Under these exemption requirements, a handler could sell a family of four 800 pounds of pears in any one day. The Pear Commodity Committee asserts that that amount of pears is excessive for home use sales in view of the intent of these exemption provisions. The intent is to help small growers by permitting them to sell such fruit directly to the consumers at the premises where the fruit is grown, at a nearby packing house, retail stand, or at certified farmers' markets.

Under the committee's recommendation, the poundage limitation would be determined on a per vehicle basis rather than on a per person basis. Hence, a family of four using the family car could purchase only 200 pounds of pears in a day, rather than 800 pounds each under the current exemption requirements.

For perspective concerning the adequacy of the recommended poundage limitation, it should be noted that the annual per capita consumption in 1985 of fresh pears was 2.84 pounds. Hence, according to the committee, the recommendation would still provide more than enough fruit to meet the home use needs of local consumers and would not have an adverse impact on those growers who find handling fruit for home use under this exemption attractive. The proposed change to a poundage limitation of 200 pounds based on one vehicle per day is consistent with the intent of the minimum quantity exemption authority.

Therefore, the Department's view is that the proposed quantity limitation for pears is more than adequate for home usage, it would not lessen the use of the roadside sales exemption by local consumers and growers, and that the proposal would have little, if any, impact on industry operations. Based on the above, the Administrator of the AMS has determined that the issuance of this proposed rule would not have a significant economic impact on a substantial number of small entities.

A similar proposal concerning such sales of nectarines under Marketing Order No. 916 (7 CFR Part 916), and plums and peaches under Marketing Order No. 917 (7 CFR Part 917) was published in the **Federal Register** on February 26, 1988 (53 FR 5776), with a comment period ending March 28. This proposed rule would amend § 917.143(b)(3) and reflects the proposed changes in the February 26, 1988 **Federal Register** publication. It is anticipated that any changes, if adopted, would be in place when the 1988 shipping season for each of these commodities begins. Shipments of peaches are expected to start in mid-April. Shipments of nectarines are expected to start in late April and shipments of plums in early

May. Pear shipments are not expected to start until late June.

List of Subjects in 7 CFR Part 917

Marketing agreement and order, Pears, Plums, Peaches, California.

For the reasons set forth in the preamble, 7 CFR Part 917 is proposed to be amended as follows:

PART 917—FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 917 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 917.143 is amended by revising paragraph (b)(3) to read as follows:

§ 917.143 Exemption.

* * * * *

(b) * * *

(3) The shipment does not exceed 200 pounds of pears, 200 pounds of plums, and 200 pounds of peaches to any one vehicle during any one day.

* * * * *

Dated: March 21, 1988.

William J. Doyle,

Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

7 CFR Part 1007

Milk in the Georgia Marketing Area; Notice of Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed suspension of rule.

SUMMARY: The proposed suspension would make inoperative for the months of March through August 1988 the order's base and excess plan for paying producers for their milk. Southern Milk Sales, Inc., has requested the suspension action due to a substantial increase in Class I sales by a plant supplied by the cooperative. The bulk of the Class I sales increase occurred after the start of the base-making period. As a consequence, the members of the cooperative have not earned enough base to cover the increased fluid milk requirements of the plant.

DATE: Comments are due on or before March 31, 1988.

ADDRESS: Comments (two copies) should be filed with the USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 447–2089.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on dairy farmers and would not affect milk handlers.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under the criteria contained therein.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), the suspension of the following provisions of the order regulating the handling of milk in the Georgia marketing area is being considered for the months of March through August 1988:

1. Section 1007.32(a)
2. In § 1007.61(a) the words "September through January".
3. In § 1007.61(a)(5) the words "for the months of September through January".
4. Section 1007.61(b)
5. In § 1007.73(a)(2) the words "or base milk and excess milk".
6. In § 1007.75(a) the words "and the uniform price for base milk".
7. Sections 1007.90 through 1007.93.

All persons who want to send written data, views or arguments about the proposed suspension should send two copies of them to the Dairy Division, Agricultural Marketing Service, Room 2968, South Building, U. S. Department of Agriculture, Washington, DC 20250, by the 7th day after publication of this notice in the **Federal Register**. The period for filing comments is limited to 7 days because a longer period would not provide the time needed to complete the required procedures and include March 1988 in the suspension period.

The comments that are sent will be made available for public inspection in the Dairy Division during normal business hours (7 CFR 1.27(b)).

Statement of Consideration

The proposed suspension would make inoperative for the months of March through August 1988 the order's base and excess plan for paying producers for their milk.

Suspension of the base-excess plan was requested by Southern Milk Sales, Inc. The cooperative indicates that continuation of the base-excess plan for 1988 will impose a severe hardship on its dairy farmer members.

Southern Milk Sales supplies the Heritage Farms plant at Murfreesboro, Tennessee. In November of 1987, the plant began supplying fluid milk products to the Kroger stores in Florida. Such sales by the Kroger stores have increased each succeeding month through January 1988. Because these increased sales occurred during the latter part of the base-building period of September through January, the member producers currently supplying the fluid milk requirements of the Kroger plant have not earned sufficient base to cover the increased demand for fluid milk during the base-paying months. Unless the suspension action is granted, member producers of Southern Milk Sales will receive the excess price for the milk supplied for the new Class I sales while other producers receive the benefit of the increased Class I distribution.

A further reason advanced by the cooperative as a basis for the suspension is that the vast majority, if not all, of the member producers of cooperative associations supplying plants regulated by the Georgia order are not now being paid on a base-excess plan. Southern Milk Sales contends that cooperative associations pool the base-excess returns of their members and pay individual producers of their association a uniform price for their milk. The cooperative requests that the base-excess plan be suspended since it is not being utilized to achieve its primary purpose of providing a better balance in the seasonal variation of milk production.

7 CFR Part 1065

Milk in the Nebraska-Western Iowa Marketing Area; Notice of Proposed Temporary Revision of Diversion Limitation Percentages

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed temporary revision of rule.

SUMMARY: This notice invites written comments on a proposal to continue to relax temporarily certain provisions of the Nebraska-Western Iowa Federal milk order. The proposed action would relax for the months of April through August 1988 the limits on the amount of milk not needed for fluid (bottling) use that may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. The action was requested by a cooperative association representing producers supplying the market in order to prevent uneconomic movements of milk.

DATE: Comments are due no later than March 31, 1988.

ADDRESS: Comments (two copies) should be sent to: USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington DC 20090–6456, (202) 447–7183.

FOR FURTHER INFORMATION CONTACT: Constance M. Brenner, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 447–7183.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. Such action would provide greater assurance that handlers will not engage in uneconomic movement of the market's reserve milk supplies in qualifying such milk for pricing status under the order. The action would also tend to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the provisions of § 1065.13(d)(4) of the order, the temporary revision of certain provisions of the order regulating the handling of milk in the Nebraska-Western Iowa marketing area is being considered for the months of April through August 1988.

All persons who desire to submit written data, views or arguments about the proposed revision should send two copies of their views to the USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, by the 7th day after publication of this notice in the **Federal Register**. The period for filing comments is limited to seven days because a longer period would not provide the time needed to complete the required procedures and include April 1988 in the temporary revision period.

All written submissions made pursuant to this notice will be made available for public inspection in the Dairy Division during regular business hours (7 CFR 1.27(b)).

Statement of Consideration

The provisions proposed to be revised are the diversion limitation percentages set forth in § 1065.13(d). The revisions would be applicable for the months of April through August 1988. The specific revisions would increase the diversion limitation percentages for the months of April through August 1988 by 15 percentage points from the present 50 percent to 65 percent. The order's diversion limits were revised temporarily from 50 to 60 percent for the months of May through August 1986, from 40 to 60 percent for the months of September through December 1986, from 40 to 55 percent for the months of January through March 1987, from 50 to 60 percent for the months of July and August 1987, and from 40 percent to 55 percent for the months of September 1987 through March 1988.

Section 1065.13(d) of the Nebraska-Western Iowa milk order allows the Director of the Dairy Division to increase the diversion limitation percentages by up to 20 percentage points during any month to prevent uneconomic shipments merely for the purpose of assuring that dairy farmers will continue to have their milk priced under the order and thereby receive the benefitrs that accrue from such pricing.

National Farmers Organization (NFO), a cooperative association which represents producers supplying the Nebraska-Western Iowa market, requested that for the months of April through August 1988, the percentage of allowable diversions be increased 15 percentage points.

The cooperative states that the percentage of producer milk used in Class I sales under the Nebraska-Western Iowa order during January 1988 declined to 35 percent from a January 1987 level of 42 percent. During the same time period, according to NFO, the amount of producer milk pooled under the order increased 13 percent. The cooperative predicts that this pattern of increasing production and the resulting decline in the percentage of producer milk used in Class I is likely to continue in 1988. NFO states that keeping the order's diversion allowance at a level approximately equal to the marketwide Class II and Class III useage is quite appropriate.

According to NFO, the milk surplus to the fluid needs of the market must be diverted to manufacturing facilities. In order to comply with the order's 50-percent diversion limits, the cooperative states that the required percentage of its members' milk must be delivered to pool plants. However, a significant amount of its members' milk is not needed at pool plants. In order to qualify for pooling, some of the cooperative's members' milk must be unloaded at a pool plant, then reloaded and shipped to a nonpool plant to be used. NFO states that such uneconomic milk shipments will be necessary for the months of April through August 1988 if the milk of its member producers customarily pooled under the Nebraska-Western Iowa order is to continue to be priced under the order and receive the benefits of such pricing. According to NFO, the proposed temporary increase of the diversion limits is necessary to prevent uneconomic shipments merely for the purpose of assuring that dairy farmers historically associated with the market will continue to have their milk priced under the order.

Therefore, it may be appropriate to relax the aforementioned provisions of § 1065.13(d) for the months of April through August 1988 to prevent uneconomic shipments of milk.

7 CFR Part 1210

[WRPA Docket No. 1]

Proposed Watermelon Research and Promotion Plan; Recommended Decision and Opportunity To File Written Exceptions

AGENCY: Agricultural Marketing Service (AMS), USDA.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice invites written exceptions to a proposed Watermelon Research and Promotion Plan (Plan). The proposed Plan is designed to improve the position of watermelons in the marketplace through coordinated programs of research and promotion. The proposal was submitted by the National Watermelon Association, Inc. The proposed Plan would provide for a national research and promotion program for watermelons financed by assessments paid by producers who grow five or more acres of watermelons annually and by handlers who first handle such watermelons. The proposed Plan would establish a maximum assessment rate of two cents per hundredweight of watermelons for both producers and handlers. A 29 member board composed of watermelon producers, handlers and a representative from the general public would administer the program.

DATE: Written exceptions must be received by May 23, 1988.

ADDRESSES: Four of comments should be sent to the Hearing Clerk, United States Department of Agriculture, Room 1079, South Building, Washington, DC, 20250. The copies will be available for public inspection during regular business hours. Comments on the proposed Plan's information and recordkeeping requirements should be submitted to Lisa Grove, Desk Officer for the Agricultural Marketing Service, Office of Management and Budget, Room 3228, New Executive Office Building, Washington, DC, 20503.

FOR FURTHER INFORMATION CONTACT: Tom Tichenor, Marketing Order Administration Branch, P.O. Box 96456, Room 2531–S, Washington, DC 20090–6456; telephone 202–475–3930.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding include the following. The Notice of Hearing was published in the February 4, 1987, issue of the **Federal Register** (52 FR 3568). A correction to the Notice was published on February 17, 1987 (52 FR 4783). A seven day Extension of Time for Receipt of Post Hearing Briefs was requested by proponents and granted on April 17, 1987. Notice of the extension was published on April 21, 1987 (52 FR 13086).

Preliminary Statement

This action is governed by the provisions of sections 556 and 557 of Title 5 of the U.S. Code, and therefore is excluded from the requirements of Executive Order 12291.

This notice is issued pursuant to the applicable rules of practice and procedure governing proceedings to formulate and amend an order (Plan) (7 CFR Part 1200). Any Plan that may result from this proceeding would be effective pursuant to the provisions of the Watermelon Research and Promotion Act, hereafter referred to as the "Act," (Pub. L. 99–198, 99th Congress, effective January 1, 1986, 7 U.S.C. 4901–4916).

The proposed Plan was formulated on the record of a public hearing with sessions in Las Vegas, Nevada, on February 18 and 19, 1987, and Atlanta, Georgia, on February 24 and 25, 1987.

The national Plan would authorize the collection of equal assessments on producers and handlers of watermelons. Handlers would be responsible for collecting assessments from producers and submitting the assessments, and for maintaining appropriate records. Refunds of collected assessments could be obtained by producers and handlers who do not support the Plan. Assessment funds would be used to promote watermelons through a variety of market research and product promotion programs. These programs would be developed and administered by a Board composed of watermelon producers and handlers by their peers throughout the country. Daily administration of the Plan would be carried out by a staff of employees directly responsible to the Board. All administrative rules and regulations as well as research and promotion programs developed by the Board must be submitted to the Secretary of Agriculture for approval.

Small Business

In accordance with the Regulatory Flexibility Act (RFA), (5 U.S.C. 601 *et seq.*), the Administrator has determined that this action would not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of businesses subject to such action so that small businesses will not be unduly or disproportionately burdened. The Act requires the application of uniform rules to persons covered under the proposed Plan. Promotion plans and their administering rules are unique because they are normally brought about through group action of essentially small businesses for their mutual benefit. Therefore, both the RFA and the Act are compatible with respect to small business entities.

Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having average annual gross revenues for the last three years of less than $500,000. Small agricultural service firms, which would include handlers under this proposed Plan, are defined as those with gross annual revenues of less than $3.5 million.

The majority of watermelon producers and handlers may be classified as small entities. Testimony indicates that the industry is composed mostly of small entities engaged in the production and marketing of watermelons. Hearing evidence also indicates that watermelons are produced on almost 12,000 farms in the United States. There are a significant number of small farms, particularly in the northern States, where less than five acres of watermelons are produced for sale. Producers of less than five acres would not have to pay assessments under the Plan because the term "producer" would be defined as any person engaged in the growing of five or more acres of watermelons. The industry also includes a few large farms in excess of 400 acres.

The proposed Plan would assess both producers and handlers at equal rates, not to exceed two cents per hundredweight. The record indicates a unanimous agreement by those testifying that this amount would be relatively insignificant and should not impose a financial burden on large or small producers and handlers. The benefits of the proposed program are expected to exceed the costs. Based upon 1981 production of watermelons, it is estimated that collection of assessments could be as much as $1,122,000 if the maximum assessment rate of two cents per hundredweight of watermelons were implemented for both producers and handlers. This would represent less than 1 percent of producer income and less than 1 percent of handler income if watermelons were selling at 6 cents a pound (based upon 1979–81 average prices). Both producers and handlers have the right to request a refund of assessments.

While the proposed Plan imposes certain recordkeeping requirements on handlers, information required to be reported under the proposed Plan could be compiled from records currently maintained by the handlers. Thus, the record indicates that any added burden resulting from increased recordkeeping would not be significant when compared to benefits that should accrue to such businesses. All businesses, large and small, would be treated equally under the proposed Plan. The Plan would impose no disproportionate recordkeeping burdens on any group of small businesses within the industry. There are no reporting or recordkeeping requirements for producers in the proposed Plan.

Based on the above, the Administrator, Agricultural Marketing Service, has determined that the proposed Plan should have no significant adverse economic effect on small businesses in the industry.

In determining that the proposed Plan will not have a significant economic impact on a substantial number of small entities, all of the issues discussed above were considered. The Plan's provisions were carefully reviewed and every effort was made to minimize any unnecessary costs or requirements. Although the Plan would impose some additional costs and requirements on handlers, and possibly some producers, it is anticipated that the programs under the proposed Plan would help to increase demand for watermelons. Therefore, any additional costs should be offset by the benefits derived from expanded markets and sales benefiting handlers and producers alike. Accordingly, it is determined that the proposed provisions of the Plan would not have a significant impact on handlers or producers.

In compliance with Office of Management and Budget (OMB) regulations (5 CFR Part 1320) which implement the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) and section 3504(h) of that Act, the information collection and recordkeeping requirements contained in this proposed Plan have been submitted to OMB for review. Comments concerning these requirements should be directed to Lisa Grove, Desk Officer, Agricultural Marketing Service, Office of Management and Budget.

Material Issues

The material issues of record are as follows:

1. The movement of watermelons in the channels of interstate commerce;

2. The need for the proposed research and promotion Plan as a means of effectuating the declared policy of the Act;

3. The specific terms and provisions of the proposed Plan including:

(a) Definitions of the commodity, the persons to be assessed, and the other terms set forth in the Notice of Hearing, which are applicable to the provisions of the proposed Plan;

(b) The establishment, composition, maintenance, powers, duties and operation of a "National Watermelon Promotion Board" which shall serve as the administrative agency of the proposed Plan;

(c) The authority to establish research and promotion programs for watermelons;

(d) The authority for the National Watermelon Promotion Board to incur expenses and for the Secretary of Agriculture to levy assessments on watermelon producers and handlers who first handle watermelons;

(e) The authority to exempt from assessments a producer who produces watermelons for non-food uses;

(f) The procedure for making refunds of assessments to producers and handlers who request them;

(g) The authority to establish an operating monetary reserve and to set aside funds in the reserve to defray any authorized expenses;

(h) The authority to establish reporting, record keeping and confidentiality requirements, and

(i) The establishment of other miscellaneous provisions which are set forth in the Notice of Hearing as §§ 1210.360 through 1210.367.

Findings and Conclusions

The following findings and conclusions on the material issues are based on the Record of Hearing.

1. The 1982 Census of Agriculture, the most recent census with watermelon statistics, shows that watermelons were grown in 44 of the 48 contiguous States in 1981. That census tallied nearly 12,000 farms producing approximately 28 million hundredweight of watermelon. Florida alone produced about 30 percent of the annual crop. Florida and three other States, Texas, Georgia and California, produced almost 63 percent of the nation's annual watermelon crop.

The record indicates that similar varieties of watermelons grown throughout the United States are generally uniform in appearance. Consumers cannot generally distinguished between, for instance, a watermelon from Georgia and one of the same variety from north Texas or Oklahoma. Thus, watermelons are homogeneous products competing for similar national markets. At peak periods in mid-summer, it is not unusual for handlers across most of the southern States to compete for the same markets in northern cities.

Watermelons are a warm weather crop. The season runs from late May to mid-September. For instance, Florida and south Texas producers begin harvesting watermelons in late spring and are more than halfway through their crops' harvest as States further north begin harvests later in June.

The relatively few, small producers in the Northeast, Midwest, West and Northwest meet only a portion of their local demand. The large volume of interstate commerce of watermelons is from the southern producing rgions to the metropolitan areas in the northern States. Highest consumption periods fall around the major summer holidays of Memorial Day, the Fourth of July and Labor Day.

Watermelons are put into the current of commerce in several different ways. Small producers may utilize roadside stand and local farmers' markets, usually performing all of the handling and marketing themselves. On a larger scale, watermelons are collected in the field, sorted, graded and weighed before being shipped to market. Contract carriers are often used for distant hauling.

Handlers, or "shippers" as they are called in the industry, usually carry out these functions, purchasing truckloads at a per-pound price. They add costs and a commission before selling to large buyers such as food store chains, usually outside the local market area. While most all producers have a choice of handlers to whom to sell their watermelons, testimony indicates that most producers use the same handler from season to season.

There are also watermelon "brokers" who do not take possession or ownership of the watermelons. "Pure" brokers, according to the record, act simply as sales agents for producers, finding buyers and arranging sales in distant markets. They do not arrange transportation for the watermelons or carry out monetary transactions. These brokers would not be considered handlers under the Plan. According to the record, "buying" brokers who arrange sales, ship and handle the monetary transaction between the producer and the buyer would be considered handlers.

Testimony indicates that watermelons are sold at the retail level by the piece and by the pound. Piece pricing is generally used for smaller production amounts and for sales in local markets. Truckload shipments to distant markets are generally priced by weight.

Imports come almost exclusively from Mexico. Record evidence indicates imports in 1981 were less than three percent of the national watermelon producion. The record shows that from 1975 to 1985, less than half of annual watermelon imports arrived during the summer production season in the United States. Therefore, imports do not appear to present a competitive challenge to the industry.

U.S. exports of watermelons are mostly to Canada. However, this market is relatively small compared to the corresponding summer market in the United States. Approximately 2 percent of U.S. watermelon production in 1981 was exported.

There is ample evidence in the record to show that watermelons produced in the United States are shipped in intrastate, interstate and foreign commerce, and that the intrastate and interstate handling is so inextricably intermingled that all such handling burdens, obstructs or affects the handling of watermelons in interstate or foreign commerce. In addition, Congress has found that watermelons move in the channels of interstate commerce, and those watermelons that do not move in such channels directly affect interstate commerce.

2. The majority of watermelons are produced for fresh market sales, with only a small percentage being used for processed products or for non-human use such as seed production or animal feed.

At the hearing, proponents of the proposed Plan testified that the watermelon industry is in serious trouble because of an apparent decrease in demand. Record exhibits indicate a significant and steady decline in per capita consumption of watermelons between 1960 and 1981. During that period total production declined 16 percent from 31 million hundredweight in 1960 to 26 million hundredweight in 1981 while population increased 27 percent. Record evidence shows the U.S. per-capita consumption was 17.2 pounds in 1960 and 12.3 pounds in 1981, a 30 percent decline. The record also shows that this per capita consumption pattern has not changed in recent years.

No testimony was provided that would explain the decline in per capita consumption of watermelons. However, proponents testified that under the proposed research and promotion Plan, this issue would be studied, possible causes identified, and corrective programs initiated.

Although watermelons production declined during the 1960's and 1970's, total value of the crop increased from $38.1 million in 1960 to $158.9 million in 1981. Most of this increase in value reflected inflationary changes rather than rises in real dollar income. In adjusted, constant 1977 dollars, the total crop value of watermelons increased from $102.4 million in 1960 to $117.7 million in 1981. This is an increase in crop value of only 15 percent for the entire 21 year period. The comparable value of 28 vegetables and melons increased three and a half times over the same period. Fresh fruit market prices increased threefold during the same period, as did fresh vegetable prices and the consumer price index for all foods.

As objective of the Plan is to increase industry revenue by increasing sales of watermelons. The record indicates that producers could respond to such increases in demand by putting more acreage into watermelons. Because most watermelon producers raise other crops, production resources could be shifted to meet increases in demand.

The record identifies five general categories of watermelon producers. The first is home gardeners whom raise small garden patches for personal consumption. The second category is small acreage producers who sell their watermelons retail at roadside stands. The third category is composed of small acreage producers who market their watermelons through farmers' markets. Many producers in these latter two categories are part-time farmers who hold other jobs. A fourth category is the medium volume, full-time producers who normally sell their field-run watermelons through handlers. Finally, there are large volume producers, many of whom act as their own handler and market the watermelons they produce. They are often handlers for smaller producers in the area.

Acreage planted on individual farms may vary from season to season depending on the producers' projected needs for a ready cash crop and on their projections of the demand and supply of the product for the next growing season.

Watermelons are a second, third or even fourth crop for almost all producers. It is considered a "cash crop" in that most sales are direct from producers to handlers and often entail an immediate cash payment. Testimony indicates that watermelons are a favorite crop for producers in some areas because they are reliable, relatively easy to produce and usually provide a quick cash return.

The record indicates that the national average f.o.b. shipping point price, as reported by the USDA's Agricultural Statistical Board in 1981, was $6.09 a hundredweight. The three-year average from 1979 to 1981 was $5.74 per hundredweight and has not varied significantly since them. Thus, the average price would be approximately six cents a pound.

Testimony indicates that price has very little to do with the quality of watermelons in a shipment. Rather, prices are very sensitive to supply, and vary on a daily basis during the entire summer production season. Prices early in the season, when suppy is low, are considerably higher than prices later in the summer. Record evidence indicates that May prices for Florida and south Texas watermelons can be almost double the amount that watermelons from those two areas will bring in July when other areas are harvesting. Prices also increase prior to the three-day summer holiday weekends.

According to the record, special varieties such as seedless or orange-skinned watermelons often demand double the price of common watermelon varieties, and can bring 10 to 15 cents a pound on the market.

Hearing witnesses were unanimous in their belief that coordinated, national, promotion programs, including paid advertising and public relations, would eventually result in an increase in demand and thus an increase in per capita watermelon consumption. Cooperative advertising with compatible products would also be a possibility. In addition, several possible market research programs were mentioned that could result from such an effort. For example, research might develop new handling or packaging methods that could improve distribution efficiency and save marketing costs. Improvements in protective packaging and containerization could improve the product's condition on arrival at retail outlets, thus presenting a more favorable image to improve its competitive position.

It is also recognized that over the last 25 years, changes have taken place in consumer eating habits, as well as in the marketing of food products. Witnesses suggested that market research and consumer preference studies could be conducted to determine what these changes are and what the industry and its individual producers and handlers might do to improve their product in the eyes of consumers. Efforts could be made to increase the consumer's confidence in judging the quality and ripeness of watermelons. The record indicates that much research could be done to improve the product's presentation at the point of purchase with attractive displays coordinated with national promotional campaigns. Nutritional values and the variety of uses for fresh watermelons would be likely focal points of national promotional efforts. Menus showing creative new ways to serve watermelons could be developed and distributed nationally. Testimony indicates that programs such as these would increase the demand for watermelons throughout the summer production season, thus raising demand and increasing per capita consumption. Testimony indicates that promotional campaigns would benefit both the industry and the consuming public.

The watermelon industry has never attempted a national effort to promote its product. The proposed Plan appears to be the only practical method for individual producers or handlers, or groups of producers or handlers, to sponsor such a national program. No watermelon association has a broad enough membership base, or sufficient financial resources, to carry out its own program. Testimony indicates that only through the combined efforts of all watermelon producers and handlers can such a program be developed and carried out.

The Act requires that in such a national program, promotional material would be generic in nature and would not feature individual producers, handlers, States or regional production areas. However, there should be no limitation on individual producers and handlers who want to promote their own watermelons through additional promotional efforts.

The record indicates that a national program could also be very helpful in counteracting negative publicity that might be damaging to the industry. Given that demand is so dependent on consumer attitudes, it could be beneficial for the watermelon industry to have a central organization to represent it to the news media and to consumers.

The National Watermelon Association (NWA) is the only industry association that is national in scope. In addition, there are State watermelon associations in Florida, Georgia, South Carolina, North Carolina, Mississippi, Missouri and Virginia. Producers and handlers in Maryland and Delaware and in Texas and Oklahoma have formed two bi-State organizations. Producers and handlers in California, one of the largest watermelon producing States, are in the process of organizing a State association. All State associations are voluntary in nature and most carry out limited Statewide and regional promotional activities usually centered around the watermelon queen tours and point of purchase materials. None of the voluntary associations have the resources to carry out extensive market research and promotion activities and none have mandatory assessments on watermelon production.

In addition to the voluntary association which exists in South Carolina, South Carolina has the only State government statute authorizing a State watermelon board. Its expressed purpose is to promote watermelon consumption in the State and in regional markets. The South Carolina Watermelon Board is unique in the watermelon industry in that it has State government authority to collect mandatory assessments from watermelon producers in South Carolina.

Under the proposed Plan, a great deal of statistical information on watermelon production and marketing would be accumulated through handler reports to the Board. Handler testimony is unanimous that such reporting requirements would not impose undue burdens on their operations. Testimony indicates that individual producers could find this information very helpful in determining the next year's production level and handlers could use marketing information to expand or redefine their marketing efforts. In general, the industry would be in a better position to operate efficiently and serve consumers if it had a recent data base of information on which to evaluate its current performance. Because annual production figures are no longer compiled by USDA, there is no other systematic collection of such national statistical information.

The record indicates unanimous agreement of those testifying at the hearing that the proposed maximum assessment rate of two cents per hundredweight would be acceptable to producers and handlers. At an average selling price of six cents per pound, the maximum assessment rate would be less than 1 percent of the producers' and handlers' incomes from watermelons. An assessment of two cents per hundredweight on both producers and handlers could result in the collection of over $1 million, based on 1981 production figures. This amount would be the Board's annual budget.

Testimony was unanimous that the watermelon industry needs one unified, representative body to carry out research and promotion programs across the country. Not one witness testified in opposition to the proposed Plan. The record supports the proposed research and promotion Plan as a means of providing a method of increasing U.S. per capita consumption of watermelons and for improving the watermelon industry's position in the marketplace. The proposed Plan would provide a means of effectuating the declared policy of the Act.

3(a) Definitions

Certain terms are used frequently throughout the plan. These terms are defined as follows to clarify their meaning and to simplify the subsequent provisions in which they are used:

"Secretary" should be defined to include not only the Secretary of Agriculture of the United States, but also, any other officer or employee of the U.S. Department of Agriculture who is, or who may be, authorized to act for the Secretary.

The definition of "Act" refers to the Watermelon Research and Promotion Act of 1985 (7 U.S.C. 4901–4916), the statute pursuant to which the proposed Plan may be put into effect and operated. The use of the word "Act" avoids the need to refer to the full citation each time it is used.

"Plan" should be defined as the Watermelon Research and Promotion Plan issued by the Secretary pursuant to the Act.

The term "Board" should be synonymous with "National Watermelon Promotion Board" and should be defined to identify the administrative agency established under the Plan. The Board is authorized by the Act.

"Watermelon" should be defined as all varieties of watermelons of the Family Curcubitaceae, Genus and Species; Citrullus Lanatus, grown by producers in the 48 contiguous States of the United States. The term has been revised to include a reference to varieties. Delegates from the South Carolina Watermelon Board testified at the hearing and submitted a brief that added "or handled by handlers" to the definition of watermelon. This proposed change would apply to all watermelons that are handled in the United States but are not produced in this country. It was intended to make imported watermelons subject to the assessment provisions of the Plan. It was noted that since generic promotional activities will apply to all watermelons, imported watermelons would also benefit from such promotion, and should thus be assessed. However, the Act specifically defines watermelons as all varieties of watermelons grown by producers in the 48 contiguous States. Since this definition does not include imported watermelons, such imports are not subject to provisions of the proposed Plan.

The term "watermelon products" has been deleted from the definitions which appeared in the Notice of Hearing. The proposed Plan would apply to only watermelons in order to conform with the provisions of the Act.

"Producer" should be defined to mean any person engaged in the growing of five acres or more of watermelons, and should include any person who owns or shares in the ownership and risk of loss of such watermelon crop such as a land owner, landlord, tenant or sharecropper. The record indicates that the person who owns and farms land resulting in the ownership of the watermelons produced on such land should be considered a producer. The same is true with respect to the person who rents and farms land resulting in ownership of all or part of the watermelons produced on that land. Likewise, a person who owns land and does not farm it, but may obtain ownership of a portion of the watermelons produced on the land as all or part of the rental agreement, should be regarded as the producer of that portion of watermelon production specified in the rental agreement. A person who receives only a fixed sum of rent on land which is used to produce watermelons should not be considered a producer.

"Handle" should be defined in the Plan to mean those activities which place, or cause to be placed, watermelons in the current of commerce. It is not meant to apply to a harvest crew operation, or a common carrier who simply collects and transports watermelons from the field to a handler. It is also not meant to apply to the activities of a broker or commission agent who has not taken title to, or possession of, the watermelons.

The term "handler" should be defined in the Plan to mean any person who places or causes watermelons to be placed in the current of commerce. For the purposes of assessment payments and reporting and recordkeeping, the handler who first introduces watermelons into the current of commerce is responsible for the payment of assessments and for the reporting and recordkeeping requirements of the Plan.

Buying brokers, a term commonly used in the industary to refer to those who purchase watermelons and make arrangements with others for resale, should be considered handlers, according to record evidence. The term should also apply to auction market buyers and farmers' market wholesalers who purchase watermelons from producers and sell to the retail trade.

Any producer who handles all or part of this or her own watermelon production should be considered a handler of that production and should pay both the producer and handler assessments and meet all reporting requirements. A producer who also acts as a handler, when taking part in the Board's nomination process, should be considered a handler and can serve on the Board only in the capacity of a handler. The term "handler" should apply to any individual, group of individuals, partnership, corporation, association, cooperative or any other business unit which receives watermelons from producers or causes watermelons to be handled for the first time.

"Person" is defined in the Plan to mean any individual, group of individuals, partnership, corporation, association, cooperative or other entity. Such an entity defined in the Plan as a "person" should be considered as one producer or one handler for the purposes of nominating and voting on members as part of the Board selection process.

"Processor" is a term that is not used in the proposed Plan and has been deleted.

The terms "fiscal period" and "marketing year" should be defined to mean the twelve month period beginning on January 1 and ending on December 31 of the same year, or any other such period which may be approved by the Secretary.

"Programs and projects" should be defined to mean those activities established pursuant to § 1210.331 of the proposed Plan. These programs and projects refer to, but are not limited to, research, development, advertising or promotion activities developed by the Board.

"Promotion" should be defined as any action taken by the Board, pursuant to the Act, to present a favorable image of watermelons to the public with the expressed intent of improving the competitive position and stimulting the sale of watermelons. This would encompass all promotional activities, including paid advertising. The Plan permits only generic advertising carried out using assessment funds. In addition, cooperative advertising with compatible products must make only generic reference to watermelons.

"Research" should be defined as any type of systematic study or investigation and/or evaluation of any study or investigation designed to advance the image, desirability, usage, marketability, production, or quality of watermelons. While scientific or varietal "research" can be included within the scope of the Plan, the main focus of the program would be market research.

3(b) National Watermelon Promotion Board

An administrative agency known as the "National Watermelon Promotion Board" is authorized by the Act. The Board would administer the Plan, recommend rules and regulations to carry out terms and conditions of the Plan, ensure its compliance, and recommend amendments of the Plan to the Secretary.

As provided for in the Plan, the Board should be composed of 28 members from the watermelon industry and one representative from the general public. The 28 members should be selected by the Secretary from nominations submitted by separate nominating conventions, meetings, or caucuses held in seven districts in the contiguous 48 States. The public representative should be nominated by the Board and approved by the Secretary of Agriculture. Composition of the Board should reflect the fact that watermelons could be grown commercially in all 48 contiguous States.

The size of the Board should be large enough to assure adequate representation of the nationwide industry and yet small enough to keep costs to a minimum. This would be accomplished through a district representation plan that should be based on watermelon production volume. Based upon production volume of the States, seven districts should be created in this Plan, each with an annual production volume of approximately 400 million pounds. Each district should have two producer and two handler representatives on the Board.

To establish the initial district alignment, production statistics were taken from the USDA Crop Production Annual Summary Reports for 1979, 1980, and 1981—the latest such statistics available. The districts should be aligned as follows:

District #1—South Florida including all areas south of State Highway 50.
District #2—North Florida including all areas north of State Highway 50.
District #3—The States of Alabama and Georgia.
District #4—The States of South Carolina, North Carolina, Virginia, Delaware, Maryland, West Virginia, Pennsylvania, New Jersey, New York, Ohio, Michigan, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, and Maine.
District #5—The States of Mississippi, Kentucky, Tennessee, Louisiana, Arkansas, Missouri, Illinois, Indiana, Iowa, Kansas, Nebraska, Oklahoma, Wisconsin, Minnesota, North Dakota, South Dakota, Colorado, and New Mexico.
District #6—The State of Texas.
Disctrict #7—The States of Arizona, California, Nevada, Utah, Oregon,

Idaho, Wyoming, Washington, and Montana.

Florida should be divided into two districts because it produces nearly one third of the total national production. The east-west dividing line along State Highway 50 is recommended by the Florida Watermelon Association because it would divide, as closely as possible, the production volume of the State in half. Texas produces enough watermelons to stand alone as one district. The remaining four districts are multi-State districts and together produced just over half of the total national volume based on the USDA Crop Production Annual Summary Reports of 1979, 1980, and 1981.

Testimony of representatives of the South Carolina Watermelon Board suggested changing the time period from five years to two years for reviewing this initial district alignment. Because the above district alignment plan is based on statistics that are already six to nine years old, it should be subject to review and realignment by the Board two years after its implementation, rather than waiting five years as proposed in the original Plan published in the Notice of Hearing. Section 1210.320(c) has been changed to reflect this earlier district realignment review. Review of subsequent district alignments should be carried out by the Board at least every five years thereafter.

In making its recommendation to the Secretary for district realignment, the Board should use production statistics compiled from reports submitted to it by handlers as part of their reporting requirements under the Plan. The Board should also use any other recent, verifiable production reports from USDA, and if available, other documented shifts and trends in quantities of watermelons produced, or other relevant information.

In order to help ensure that district realignments are as fair, equitable and timely as possible, any realignment must be submitted to the Secretary at least six months prior to the "call for nominations" for new Board members. The Secretary must approve such realignment at least 30 days prior to the call for nominations. The original Plan, as published in the Notice of Hearing, proposed that realignment recommendations should be made six months prior to the start of new Board member terms. However, this sequence of events would not take into account the nominations process which would begin at least five months earlier. As originally provided in the Notice of Hearing, district realignment would have been made after the nominations process using the old alignment had already begun, and thus would not have been timely. As part of its responsibilities, the Board should clearly define the time frames, schedules and procedures for district realignment in the Plan's rules and regulations.

Only watermelon producers and handlers who pay assessments should be eligible to serve as members of the Board. Watermelon producers, as defined in the Plan, should be the only ones to take part in the nomination process to select producer members on the Board. In like manner, watermelon handlers, as defined in the Plan, should take part in the nomination process to select handler members to the Board. In cases where producers are also handlers, those producers should be considered as handlers and should participate in the nomination process as handlers and serve as handler members on the Board.

The Act mandates that there should be an equal number of watermelon producers and handlers on the Board. The term of office for Board members should be three years beginning on January 1. Normally, the term of office would begin the year after they were nominated and appointed by the Secretary. The Plan provides that no Board member may serve more than two consecutive terms of office. Testimony indicates that limiting the number of consecutive terms should permit a regular rotation of members with different points of view and should facilitate the infusion of new ideas in the administration of Board activities.

It would be in the interest of the industry that the Board be appointed by the Secretary as soon as possible after the Plan is issued. Thus, it is possible that the initial Board would be appointed several months before January 1 as prescribed above. The term of office of the initial Board members should begin immediately upon appointment by the Secretary and should continue until the scheduled end of their term of office. Any interim period between their appointment and the following January 1 should not be considered part of their prescribed term of office. Testimony at the hearing and briefs filed after the hearing included changes to § 1210.322(b) to this effect.

The 29 initial Board members (including the public member) should serve staggered terms of office so that continuity of the Board will be ensured. According to the Plan as published in the Notice of Hearing, staggered terms of office should be determined by lot. However, the Secretary must appoint Board members for specified terms of office, which, under the lot system, would not be determined until after their appointment by the Secretary. In addition, a random determination of staggered terms could mean that some or all districts would have members whose terms would expire in each of the three years, and those districts would be obligated to hold district conventions every year thereafter. This would be time consuming, difficult to administer and financially burdensome on watermelon producers and handlers in those districts.

A practical method for determining staggered term lengths would be as follows. The two producers and two handlers from District 1 (south Florida) and the two producers and two handlers from District 6 (Texas) would serve initial terms of one year. The two producers and two handlers from District 2 (north Florida) and District 3 (Alabama and Georgia) would serve initial terms of two years. Initial Board members in the remaining three districts (4, 5 and 7) would serve three year terms of office. Thus, § 1210.322(a) of the proposed Plan as published in the Notice of Hearing should be revised to reflect this change.

Consistent with testimony presented at the hearing, the four producer and four handler initial Board members from south Florida and Texas who serve only one-year first terms should be eligible to serve two additional terms if so nominated in their districts and appointed by the Secretary. All other initial members would be eligible for only one additional term of office.

The Act and the Plan do not provide for alternate Board members. Section 1210.322(d) of the Plan published in the Notice of Hearing referred to "alternates" on the Board. This reference has been removed.

Definitions written in the proposed Plan should be used to determine eligibility of producers and handlers. Only producers and handlers of watermelons may take part in the selection process and serve on the Board. Producers of less than five acres are not considered producers under the Act and therefore do not pay assessments and cannot participate in the nomination process or sit on the Board.

Testimony was received on § 1210.321 concerning nominations and selection of Board members. The principal vehicle for such nominations should be nomination conventions. In the Notice of Hearing, § 1210.321 only contained provisions for nominations by the Board. A new paragraph should be added to

that section to provide that the nomination of the initial Board members should be conducted by the Secretary. In addition, the terms meetings and caucuses have been removed as unnecessary.

The nomination process for Board members would follow procedures described below.

The Board should issue a call for nominations by February 1 of each year in which an election is to be held. The call should include at a minimum, the following information:

(1) A list of the vacancies and qualification as to producers and handlers by district for which nominees may be submitted;

(2) The date by which the nominees should be submitted to the Secretary for consideration;

(3) A list by district of those States entitled to participate in the nomination process; and

(4) The date, time, and location of any known next scheduled meeting of the Board, national and State producer or handler associations, and district conventions if any.

Nominations for positions that will become vacant should be made by district convention in the district entitled to nominate. Notice of such convention should be publicized to all producers and handlers within such district, and to the Secretary at least ten days prior to said event. The notice should have the call for nominations from the Board attached to it. The responsibility for convening and publicizing the district convention should be that of the then members of the Board from that district.

All producers and handlers within the district may participate in the convention. However, if a producer or handler is engaged in the production or handling of watermelons in more than one State or district, the producer or handler should participate within the State or district in which the producer or handler so elects in writing to the Board. Such election should remain controlling until revoked in writing to the Board.

The district convention should conduct the selections process for the nominees in accordance with procedures to be adopted at each such convention, subject to the following requirements:

(1) There should be two individuals nominated for each vacant position. Each nominee should meet the qualifications set forth in the call and in § 1210.323.

(2) No single State in multi-State districts (currently Districts 3, 4, 5 and 7) should have more than three representatives concurrently on the Board.

(3) Each State represented at the district convention should have one vote which should be determined by the producers and handlers from that State by majority vote. Each State should further have an additional vote for each 500,000 hundredweight volume as determined by the three-year average annual crop production summary reports of the USDA. If such reports are not published, the three year average of the Board assessment reports should be used. For the first two calls for nominees, the USDA Crop Production Annual Summary Reports for 1979, 1980, and 1981 should be used.

Vacancies that may occur on the Board should be filled through the procedures for nominations. The Plan uses the term "category of members" to distinguish between producer Board members and handler Board members. A vacancy on the Board should only be filled by a person qualifying in the same producer or handler category as the departing member. As suggested in record testimony, if a vacancy occurs within six months of the scheduled end of the term, then a replacement Board member does not have to be named for the remaining period of the term.

Witnesses suggested that fifteen members of the Board should constitute a quorum at an assembled meeting of the Board. In accordance with testimony, the Plan should provide that action taken by the Board requires the concurrence of a majority of the votes cast, and all such votes should be cast in person. No proxy voting should be allowed. The Board should be authorized to vote by mail, telephone, telegraph or other means of communication when a matter to be considered is so routine that it would be unnecessary or not cost-effective to call an assembled meeting, or when rapid action is necessary because of an emergency. Any votes cast by telephone should be confirmed promptly in writing to provide a written record of the votes so cast.

The Act requires that Board members serve without compensation. However, they should be reimbursed for reasonable expenses incurred in performance of their duties as members of the Board.

The Act lists certain powers and responsibilities of the Board. The Board should have the authority to develop and recommend to the Secretary rules and regulations needed to implement and carry out the terms of the Plan. The Board's authority should be broad and flexible, providing it with efficient and effective management tools to administer the program. Such administration should include the development and recommendation to the Secretary of all fiscal matters, programs or projects, rules and regulations, reports and other substantive actions.

The rules and regulations issued under the Plan should include procedures on how assessment provisions would be administered and how violations of such provisions of the Plan would be handled. It is the responsibility of the Board to promptly investigate alleged violations of the Plan. In cases where the Board cannot attain payment of assessments, it should report those violations to the Secretary for appropriate action.

Finally, the Board should have the power to make, and recommend to the Secretary, amendments to the Plan and to the rules and regulations issued under its authority. Such amendments or changes may be brought before the Board during its meetings. Amendments may reflect refinements to existing provisions of the Plan that are necessitated by changing conditions in the industry.

The duties of the Board should be set forth in the Plan to enable it to discharge its responsibilities. They should be reasonable and necessary if the Board is to function in the manner prescribed under the Act.

The Board should meet, organize and select from among its members a president and such other officers as may be necessary to conduct its business. The Board should be authorized to appoint ad hoc committees and subcommittees as it may deem necessary. Only Board members may serve on such ad hoc committees. The creation of ad hoc committees should allow the Board to ask for help and seek the advice of knowledgeable persons or consultants in all segments of the industry. The record indicates that the term "working committee" should be substituted for the term "advisory committee" used in Notice of Hearing § 1210.328(a). The term "working committee" more accurately describes the nature and authority of such committees. Any actions taken by committees and subcommittees should be subject to the approval of the Board.

Since day-to-day administration of the Plan cannot be performed by the Board, another duty of the Board should be to employ such persons as necessary to administer the daily operations of the program. The Board should establish the duties of these employees and the compensation for each person on the staff. The record indicates that designated employees of the Board will have access to assessment information that would not be distributed to the Board members for confidentiality reasons, as provided for under § 1210.352. The employees of the Board should also be bonded to ensure that the Board would be protected against loss of funds through wrongful action by its employees:

In order to plan and conduct activities, it should be the Board's duty to prepare a fiscal budget that would cover anticipated administrative and program expenses. This budget would have to be approved by the Secretary and should include a recommended rate of assessment.

The Board should have the duty to develop programs and projects, and to enter into contracts for conducting market research, development, advertising or promotion campaigns. Such programs, projects and contracts must be approved by the Secretary and should be paid for with assessment funds collected under the proposed Plan.

The Board should ensure that minutes, books and records are kept that clearly reflect all acts and transactions of the board. "Minutes" should include points of discussion, motions, results of vote taking and resolutions adopted. Copies of such minutes should be provided to the Secretary and to all Board members as soon as practical after each meeting. "Books" refers pricipally to financial records. Such financial records must account for the receipt and disbursement of funds and should be audited by a certified public accountant at least once each fiscal period and at other times as may be necessary. Such financial records should be reported to the Secretary at least on an annual basis, and from time to time, as may be required for the appropriate accounting of funds entrusted to the Board. The audit report should also be submitted to the Secretary and made available to the producers and handlers in the industry, except that information on assessments paid and amounts refunded to individual producers and handlers would be maintained in a confidential manner. "Records" refers to all other transactions engaged in by the Board.

The Board should have the authority to enter into contracts or agreements, with the Secretary's approval, for the development and execution of programs and projects of research and promotion. Payment of contract costs should be made with assessment funds collected under the Plan.

It was pointed out in the hearing that under the provisions of § 1210.328 on Duties, as published in the Notice of Hearing, paragraph (p) essentially repeats the second half of paragraph (d). Both paragraphs authorize the Board to enter into contracts in order to carry out research and promotion projects as authorized by the Act. Therefore, paragraph (p) is deleted in this recommended decision.

3(c) Program Authorities

The Board should have the authority to determine the types of research and promotion programs to be carried out under the Plan, and to administer such programs. These programs should include market research and product promotion activities designed to strengthen watermelons' competitive position in the marketplace, maintain and expand existing markets and develop new markets. The Board should have the responsibility of recommending all such programs to the Secretary of Agriculture for approval.

The record indicates many areas for market research activities. One research effort could try to improve conventional methods of handling, distributing and packaging watermelons. Improved handling methods might reduce product bruising and therefore the loss of product and profits. Other market research might indicate more efficient market distribution and ways of getting the product to the marketplace. Market research might lead to technological improvements in protective shipping containers.

A second market research effort could determine why the per capita consumption of watermelon has declined over the last 20 to 25 years. Studies of consumer buying habits regarding watermelons have never been conducted. Such studies could help identify changes in consumer tastes and buying habits and could explore how watermelon promotion efforts might adjust to changing market conditions. Market research might determine segments of the market that need to be strengthened. Such research could lead to more competitive point of purchase displays or packaging of watermelons to meet new consumer preferences for ease of handling and gourmet product lines.

Promotional efforts could also be made to educate the consumer on the desirability of eating fresh watermelons. Consumer education campaigns could be conducted on how to judge the quality and ripeness of watermelons. Watermelons could be promoted for their nutritional value and natural wholesomeness. Nationwide promotional campaigns could be developed giving new recipes and ways to use watermelon in traditional recipes.

Both the Act and the proposed Plan provide for expansion of sales to foreign markets for watermelons produced in the United States. While watermelons are currently exported to Canada, additional marketing opportunities exist in that country and in other countries.

As noted above, there are no noticeable variations in watermelons of the same variety grown in different regions of the United States. Consumers are not able to distinguish between similar varieties of watermelons grown in the Southeast from watermelons grown in the West. The Board should be able to conduct national promotion and advertising campaigns featuring major watermelon varieties without favoring one production region against another. However, because watermelon is a distinctly warm weather crop, each State's peak production period varies with the summer heat. Therefore, timing and geographic focus of promotional and advertising campaigns must be carefully considered and controlled by the Board to insure fairness and equity for all production regions.

Both the Act and the proposed Plan give contractual authority to the Board so that it may carry out promotional and advertising programs. Prior to such contracting, the approval of the Secretary should be obtained to ensure that the programs are consistent with the terms and conditions of the Plan.

The Act prohibits the use of false or unwarranted promotional or advertising claims on behalf of watermelons. It also prohibits false or unwarranted statements about the attributes or use of any products that compete with watermelons in the marketplace.

All such promotion and advertising programs and their projected budgets should be submitted by the Board to the Secretary for approval. The costs for such promotion programs should be paid for with assessment funds, as authorized by the Act. After a program has been initiated, it should be evaluated periodically by the Board to ensure that it continues to be effective. If the Board or the Secretary finds that a program does not further the purposes of the Act, that program should be terminated.

This Plan deals exclusively with research and promotion programs and does not authorize any grade standards, supply management or other programs that limit the right of the individual watermelon producer to produce or sell watermelons.

The Board should have a wide choice of different market researh and promotion programs to use in its promotion efforts. The use of various research and promotional techniques, including paid advertising and public relations activities, should stimulate sales, increase consumption, and enhance returns to producers and handlers. Therefore, the use of these program activities, as contemplated under the Plan, should be authorized. Such authority should be broad and flexible to the extent permitted under the Act. However, the record indicates that the Board, in its advertising or other promotion efforts, should treat all watermelon production fairly and equitably. Since references to private brand or trade names could serve to further the interest of individual producers, handlers, States or production regions, such references are prohibited by the Plan.

3(d) Assessments

The Board should have the authority to incur expenses in the process of developing and administering the program. The primary source of funds to cover these expenses should come from assessments collected from the watermelon producers and handlers required by the Act.

It is the Board's responsibility to prepare a fiscal budget that carefully details anticipated administrative and program funding needs. The budget should include a rate of assessment that would provide adequate funds to meet these expenses, finance operations and provide for reserve funds. The rate of assessment would thus be reviewed and established on an annual basis. The Secretary would have the responsibility for approving the rate of assessment based on the Board's recommendation.

The assessment would be paid on all fresh market watermelons and watermelons intended for watermelon products as defined in the Plan. If exempted, assessments would not be collected on watermelons produced for non-human ue such as animal feed and for watermelons produced as seed stock. Producers and handlers should pay equal assessments based on the volume of watermelons produced by producers and first handled by handlers. Through its authority to establish rules and regulations, the Board should issue, and the Secretary approve, provisions outlining how and when the assessments would be paid.

The Plan provides that the same assessment rate should be paid by both producers and handlers. The assessment should not exceed two cents per hundredwight for each party. This assessment rate could be increased above two cents per hundredweight by an amendment to the Plan. As proposed in the Plan, the total maximum assessment collected by the Board may be four cents per hundredweight on any quantity of watermelons. This maximum rate was recommended in testimony at the hearing and was entered in the proposed Plan after considerable deliberation in the industry. The hearing record indicates a unanimous agreement by those testifying that this amount is relatively insignificant compared to total production costs, and should not present a financial burden on large and small producers or on handlers. However, the record also indicates that two cents a hundredweight is about as high a rate as could be assessed without meeting opposition from the average producer. Thus, a two cent assessment applied to a trailer loaded with 40,000 to 45,000 pounds of watermelons would mean a $8.00 or $9.00 payment by the producer.

The record indicates that, based on a national average selling price of $8.00 per hundredweight of watermelon, the maximum assessment rate would be less than one half of one percent for each producer. The record indicates that this assessment rate would be adequate to collect funds needed by the program. Such funds would be used for research, development, advertising and promotion of watermelons. The assessment funds would also pay for the administrative expenses incurred by the Board and for administrative and referenda costs incurred by the Department of Agriculture in its oversight capacity. In order to assure the continuance of the Board, the payment of assessments should continue even if particular provisions of the Plan are suspended or otherwise become inoperative.

The handler should be responsible for the collection of producer assessments. The handler should remit to the Board the producer's assessment along with the handler's assessment for the same watermelon. The handler may collect the producer's assessment, or deduct the producer's assessment from the amount paid to the producer. The timing of such payments to the Board should be included in the rules and regulations that should be developed by the Board. Separate records for each producer should be kept by the handler.

In cases where a producer is also the handler of watermelons, the producer would pay both the producer and the handler assessment on those watermelons. Any producer who is a handler of watermelons produced by others, would pay the handler assessments on such watermelons handled. Testimony gathered at the hearing of producers who also acted as handlers indicates that paying the full four cent per hundredweight assessment would not impose a financial burden on their businesses. Regardless of the selling price or the variety, the assessment rate on watermelons should not exceed the maximum provided for in the proposed Plan.

Marketing practices for watermelons differ across the United States. Testimony shows that differences depend upon several things: the producer's individual production volume and local marketing traditions; the number and types of handlers operating in an area; and the proximity to major markets outside the producing area. Some producers may utilize two or three different marketing methods during the same crop year. The Board should recommend, subject to approval by the Secretary, rules and regulations concerning the collection of assessments to account for such differences when appropriate.

The record shows that there are two categories of watermelon "brokers" who are involved in the transaction of watermelons between the producer and the marketplace. Witnesses indicated that the "pure" broker simply arranges sale of watermelons between the producer and a buyer. The producer then deals with the buyer, handles the transfer of the watermelons and pays a small fee to the pure broker. In this case, the producer carried out the transaction and benefitted from a delivered price on the watermelons. In such cases, the producer should be considered both a producer and a handler and should pay both the producer and the handler assessments.

A "buying" broker, on the other hand, takes possession of the watermelons, does the invoicing and handling of money and remits payment to the producer. Such a buying broker would be considered a handler and should pay the appropriate handler assessment fee and meet handler recordkeeping requirements of the proposed Plan.

In those cases where producers sell their watermelons by the piece, the weight of watermelons sold should be estimated and assessments paid by the producers and handlers based on that estimate.

If a producer sells watermelons to a sales agent already operating in the market, or auctions them off to an agent at an auction market, then that producer would be responsible for the producer's assessment. The agent purchasing such watermelons would assume the handler responsibilities for collection of the producer's assessment and for paying the handler's assessment fee on those watermelons.

If a group of producers organize a farmers' cooperative to market the group's watermelons, then that cooperative entity should be considered the handler and should pay the handler assessment fees and abide by all recordkeeping and reporting requirements required of handlers.

Section 1210.341(e) in the Notice of Hearing provided that the Board could authorize other organizations to collect assessments on its behalf. However, the Act provides for collection of assessments by the Board. Accordingly, § 1210.341(e) has been removed from the proposed Plan.

An amendment to the Plan was offered by representatives from the South Carolina Watermelon Association. In testimony they proposed that those States with existing State marketing orders for watermelons be allowed to collect both the producer and handler assessment fees in their States on behalf of the national Board. Such State boards would be paid, or would retain as a collection fee, up to 50 percent of the amount of assessment the State boards could collect. However, this proposed amendment is not consistent with the Act because it would allow for collection agents other than the Board. The South Carolina amendment is therefore denied.

It is possible that violations of the proposed Plan's assessment provisions may occur. The Board should promptly investigate any suspected violations and should report all violations to the Secretary for appropriate action.

The Board may charge: (1) Late payment charges imposed on handlers who are delinquent in paying their assessment fees; and (2) interest charges on such outstanding assessments. Such charges should only be levied on handlers since they are mandated under the Act to be the ones to send both producer and handler assessment fees to the Board. All such funds should be made available to pay Board expenses, and should be subject to the same fiscal, audit and accountability requirements that are placed on assessment funds under the control of the Board. The Board should recommend, subject to the approval of the Secretary, such rates and payment or repayment periods as part of its rules and regulations.

There will be an initial period, when the Board's administrative employees are being hired or when the office is being established. Since assessments may not be collected in time to cover such start-up expenses, according to the record evidence, the Board may: (1) Accept advance payment of assessments from producers and handlers, and (2) borrow money from commercial institutions to pay for initial administrative expenses. Such voluntarily advanced assessment payments from producers and handlers should be based on their best estimates of future quantities to be produced and handled, and should, for accounting purposes, be limited to one season's assessment. These funds should only be used for administrative expenses and should not be used to pay for research, promotion or advertising programs.

All such funds should be subject to the same fiscal, audit and accountability requirements that are placed on assessment funds under the control of the Board. Accepting advanced payment of assessments and borrowing from commercial institutions should not be limited to the first fiscal period of operation of the proposed Plan. However, the Board may not borrow an amount greater than one year's fiscal budget.

The Board should prepare a budget at the beginning of each fiscal period showing estimates of the income and expenditures necessary for the administration of the Plan during that period. Each such budget should be submitted to the Secretary with a written analysis of its components. The record evidence shows that the Board should reimburse the Secretary for administrative costs incurred by the Department for administering the Plan and for the conduct of the referendum.

3(e) Exemptions

Watermelons are usually marketed as fresh fruit. Very little production is sent to the processed market. The Act and the Plan provide for exemption from assessments for all watermelons produced for non-human consumption such as animal feed and seed stocks. The Board may, with the approval of the Secretary, exempt such watermelons from the provisions of the Plan.

It is the responsibility of the Board to ensure that all valid exemption requests are acted on in a timely manner. The Board should establish, as part of its rules and regulations, detailed guidelines on how this exemption procedure would work. In recommending exemption rules and regulations, the Board should ensure that procedures do not unfairly treat or burden those producers entitled to and seeking exemptions. It should be the handler's responsibility to verify the exemption status of all watermelons they handle, and to collect the producer's assessment from any producers of five or more acres who do not have exemptions.

The record indicates that producers should be assessed only on watermelons marketed and not on watermelons that are not harvested. If a producer cannot market a field of watermelons, and therefore plows that field under or opens it up to foraging cattle, those watermelons should not be assessed.

The proposed Plan, as published in the Notice of Hearing, stated that producers of less than five acres of watermelons would be subject to assessments, unless they first applied to the Board for exemption prior to the beginning of the production season. However, the term "producer," as defined by the Act, automatically excludes producers of less than five acres of watermelons. Therefore, watermelon producers of less than five acres are not subject to the Act or the Plan, and are not required to pay assessments under the Plan.

3(f) Refunds

Provisions for making refunds of assessments to producers and handlers who request them should be included in the proposed Plan. The Act provides for refunds to producers and handlers who are not in favor of supporting the research and promotional activities carried out under the Plan. Producers are eligible for a full refund on any quantity of watermelons on which the producer either paid an assessment or had an assessment deducted from the proceeds of sale. Handlers are eligible for a full refund on any quantity of watermelons on which the handler handled and paid assessments.

A refund request should be made to the Board by individual producers and handlers in accordance with regulations and on a form prescribed by the Board. Proof of the producer's or handler's assessment payment should accompany the refund request and should be mailed to the Board. The receipt of sales provided by the handler to the producer should contain sufficient information so that the producer may use it to verify assessments paid and thus qualify for refunds, if so desired.

Rules and regulations recommended by the Board, and approved by the Secretary, should establish procedures for those seeking refunds. The Board should ensure that these procedures are not unduly burdensome. Producers and handlers seeking refunds should be able to easily request necessary forms and complete them with information that is available on sales receipts commonly used in the industry.

In accordance with the Act, a refund request must be made within 90 days of the date of assessment payment. The Board must pay documented refund requests within 60 days of the receipt of the request. The proposed Plan in the Notice of Hearing specified the refund period as 45 days, instead of the 60 days

specified in the Act. The proposed Plan has been changed accordingly.

The proposed Plan mandates that refund applications may be made by any watermelon producer or handler who paid watermelon assessments. A producer may request refunds only for the producer's portion of assessments on any quantity of watermelons. Likewise, a handler may request refunds only for the handler's portion of the assessments. A handler may not make refund applications on behalf of the producers that the handler represents. State associations, cooperatives, or other groups that may represent several watermelon producers may not make joint application for group or corporate refunds on behalf of the producers or handlers that the organizations may represent. Thus, the evidence does not support that portion of the South Carolina representatives' testimony and brief which proposed that its State board apply for and keep one cent per hundredweight of its State's assessments on behalf of all the producers and handlers in the State.

Furthermore, it should be the Board's responsibility to ensure that confidentiality of all refund information is maintained.

3(g) Monetary Reserves

The Board should have the authority to establish an operating monetary reserve and set aside funds in the reserve to defray expenses authorized by the Plan. The purpose of these funds is to add stability to long term program operations by having funds available for periods when actual assessments are lower than the amount projected in the budget. It is also recognized that research and promotion activities in any given year will be financed, at least in part, by funds collected in the previous year. The operating reserve should provide the funds necessary for such financing.

Assessment shortages could be caused by unforseen production failure due to bad weather or to unforseen circumstances. Reserve funds may be used in such emergency situations to carry out promotional and consumer awareness activities that would strengthen watermelons' competitive position in the marketplace.

The Board should include an item in its budget to set aside funds for the operating reserve. In addition, any unexpended funds at the end of the fiscal period should be included in the operating reserve. However, reserves should not be accumulated in excess of approximately two fiscal period budgets, as required by the Act. If the reserve exceeds this amount, even while meeting regular program and administrative costs, the Board should lower the assessment rate until the reserve is again at or below the two fiscal year period.

3(h) Reports and Records

The Board should have the authority, with the approval of the Secretary, to require each handler to submit to the Board such reports and information as the Board may need for the performance of its duties under the Plan. While it is difficult to anticipate every type of report or kind of information the Board may need, there was general agreement in testimony at the hearing that the information should include data on the quantity and dates of watermelons handled, the amount of assessment collected, the names and addresses of the producers involved, including those that claim exemptions. This information can be gathered from invoices, field records, scale tickets, bills of lading or other business records currently used in the industry. Most handlers already provide such data in their receipts to the producers they represent. As part of its rules and regulations, the Board should develop a simple report format that identifies the needed information.

In order for the Board to effectively investigate and verify compliance to this Plan, each handler should be required to maintain, by fiscal period, complete records on that handler's acquisition and disposition of fresh watermelons. Producers who also act as handlers should maintain such records. Such records should be kept for two years beyond the production season, as required by the Act. A two-year period should afford the Board's employees adequate and reasonable time for examination of such records. This requirement should not impose an undue burden on handlers since testimony indicates such records are generally retained for a similar period under current business practices. Record evidence indicates that the Board's staff should have the authority during this period to audit handler books to determine compliance with provisions of the Plan. The Board should report the results of such reviews to the Secretary for necessary action.

The Plan should require that the handlers submit both the producer's assessment and the handler's assessment to the Board. The record indicates that the producer's assessment would, in most instances, be deducted from the purchase price and should be recorded on the sales receipt provided by the handler to the producer.

In cases where a producer is also the handler, the producer acting as a handler would submit the required reports to the Board and would thus be responsible for payment of both the producer's and handler's assessment.

The Board and its employees would have the responsibility for safeguarding the confidentiality of producer and handler records submitted as part of this proposed Plan. Such reports and records would remain confidential and would be disclosed to no person other than the Secretary or persons authorized by the Secretary to review such records unless disclosure is required by law. This restriction is necessary to prevent the disclosure of information that may affect the trade, financial position or business operations of individual producers and first handlers. Under certain circumstances, the release of composite information compiled from reports may be helpful to the Board and the industry in planning operations under the Plan. However, such composite information should not disclose the identities of the persons referred to or their separate business operations.

The Act and the Plan provide that the Secretary may direct publication of the name of any person violating the Plan and the provision or provisions violated by such person.

3(i) Miscellaneous Provisions

The proposed Plan should require the submission to the Secretary for approval of all fiscal matters, programs or projects, rules or regulations, reports or other substantive actions proposed and prepared by the Board. These submissions to the Secretary are necessary and appropriate because the Secretary is charged with oversight of the proposed Plan's administration to assure that it is in accordance with the policies and provisions of the Act.

Board members and employees should not be held personally responsible for honest mistakes or errors of judgment that were unintentionally committed during the time of their service to the Board. However, Board members and employees should be accountable for intentional acts of willful misconduct. The record shows that the Board should report any known, willful misconduct of Board members or employees to the Secretary for appropriate action.

Consistent with the Act, the Plan should prohibit the use of assessment funds to influence government policy or action at any level of government. Funds collected under the Plan may be used in recommending to the Secretary amendments to the proposed Plan. The Board cannot enter into contracts with organizations that engage in efforts to influence government action or policy.

BEST COPY AVAILABLE

Both the Act and the Plan provide that the Secretary may conduct a national referendum at any time to determine if all known, affected watermelon producers and handlers continue to support the Plan or favor termination of the Plan. The Secretary should hold such a referendum at the request of 10 percent or more of the watermelon producers and handlers. A favorable vote of a majority of those voting and at least 50 percent of the volume of watermelons represented by those voting would be needed to continue the Plan.

The provisions §§ 1210.363 through 1210.367 which involve program suspension, termination, separability, patents and copyrights are usually included in research and promotion programs of this type. The provision concerning patents and copyrights has been modified for clarity and to eliminate unnecessary language. These provisions set forth certain rights, obligations, privileges and procedures that are necessary and appropriate for the effective operation of the proposed Plan. All provisions are incidental to and consistent with the terms and conditions of the Act; and they are necessary to effectuate the other provisions of the proposed Plan. Testimony at the hearing supported these provisions, and they should be included in the proposed Plan.

Miscellaneous changes have been made to the provisions of the proposed Plan for clarity.

Rulings on Briefs of Interested Parties

At the conclusion of the hearing the Administrative Law Judge fixed April 20, 1987, as the final date for interested parties to file proposed findings, conclusions, and written arguments or briefs based upon the evidence received at the hearing. At the request of the National Watermelon Association the filing deadline was extended to April 30, 1987, and notice of the extension was published in the **Federal Register** (52 FR 13086, April 21, 1987).

Four briefs were received. Every point in each of the briefs was carefully considered in making the findings and reaching the conclusions set forth in this Recommended Decision. These briefs, proposed findings and conclusions, and the testimony in the record were considered in making the findings and conclusions set forth in this recommended decision. To the extent that any suggested findings and conclusions filed by interested persons are inconsistent with the findings and conclusions of this recommended decision, the requests to make such findings or to reach such conclusions are denied.

One brief was from the proponents of the Plan, the National Watermelon Association. It contained clarifications of several provisions that were discussed during the hearing. The brief also included a formal resolution in support of the proposed Plan which was passed unanimously by the Executive Committee of the association.

A second brief was submitted by the South Carolina Watermelon Board. This brief also supported the proposed Plan but advanced several modifications to the proposed Plan. These amendments are noted and discussed in appropriate provisions above.

A brief was received from the Central Valley Watermelon Growers Association, of Lathrop, California, which opposed South Carolina's proposed amendment to permit chartered State watermelon entities to receive a collection fee of up to 50 percent of the assessment fees collected in the State. The association otherwise gives full support to the proposed Plan as it was presented and modified during the hearing.

A final brief was received from the Georgia Watermelon Association, Inc. which expressed support for the proposed Plan as presented and modified during the hearing.

General Findings

Based upon evidence introduced at the hearing, and on the record of the hearing, it is found that:

(1) The proposed Plan, and all of its terms and conditions as now written, will tend to effectuate the declared policy of the Act;

(2) The proposed Plan regulates the marketing of fresh watermelons and watermelon products in the contiguous 48 States in the same manner as proposed in the hearing, and as such, is limited in its application only to the marketing area which is practicable and consistent with carrying out the declared purposes of the Act;

(3) The handling of fresh watermelons and watermelon products as defined in the proposed Plan is in the current of interstate and foreign commerce, or directly burdens, obstructs or affects such commerce, and

(4) The proposed Plan is applicable only to persons in the production of and first handling of watermelons as specified in the Act.

List of Subjects in 7 CFR Part 1210

Watermelon, Agricultural research, Agricultural promotion, Market development.

Recommended Plan

The following Plan is recommended as the detailed means by which the foregoing conclusions may be carried out:

It is proposed that Chapter XI of Title 7 be amended by adding Part 1210 to read as follows:

PART 1210—NATIONAL WATERMELON RESEARCH AND PROMOTION PLAN

Definitions

Sec.
1210.301 Secretary.
1210.302 Act.
1210.303 Plan.
1210.304 Board.
1210.305 Watermelon.
1210.306 Producer.
1210.307 Handle.
1210.308 Handler.
1210.309 Person.
1210.310 Fiscal period and marketing year.
1210.311 Programs and projects.
1210.312 Promotion.
1210.313 Research.

National Watermelon Promotion Board

1210.320 Establishment and membership.
1210.321 Nominations and selection.
1210.322 Term of office.
1210.323 Acceptance.
1210.324 Vacancies.
1210.325 Procedure.
1210.326 Compensation and reimbursement.
1210.327 Powers.
1210.328 Duties.

Research and Promotion

1210.330 Policy and objectives.
1210.331 Programs and projects.

Expenses and Assessments

1210.340 Budget and expenses.
1210.341 Assessments.
1210.342 Exemption from assessment.
1210.343 Producer and handler refunds.
1210.344 Operating reserve.

Reports, Books, and Records

1210.350 Reports.
1210.351 Books and records.
1210.352 Confidential treatment.

Miscellaneous

1210.360 Right of the Secretary.
1210.361 Personal liability.
1210.362 Influencing governmental action.
1210.363 Suspension or termination.
1210.364 Proceedings after termination.
1210.365 Effect of termination or amendment.
1210.366 Separability.
1210.367 Patents, copyrights, inventions, and publications.

Authority: 7 U.S.C. 4901–4916.

Definitions

§ 1210.301 Secretary.

"Secretary" means the Secretary of Agriculture of the United States or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in the Secretary's stead.

§ 1210.302 Act.

"Act" means the Watermelon Research and Promotion Act of 1985, (Title XVI, Subtitle C of Pub. L. 99–198, 99th Congress, effective January 1, 1986, 99 Stat. 1622).

§ 1210.303 Plan.

"Plan" means this watermelon research and promotion Plan issued by the Secretary pursuant to the Act.

§ 1210.304 Board.

"Board" means the National Watermelon Promotion Board, hereinafter established pursuant to § 1210.320.

§ 1210.305 Watermelon.

"Watermelon" means all varieties of the Family Curcubitaceae; Genus and Species; Citrullus Lanatus popularly referred to as watermelon grown by producers in the 48 contiguous States of the United States.

§ 1210.306 Producer.

"Producer" means any person engaged in the growing of five acres or more of watermelons including any person who owns or shares the ownership and risk of loss of such watermelon crop.

§ 1210.307 Handle.

"Handle" means to grade, pack, process, sell, transport, purchase, or in any other way to place or cause watermelons to which one has title or possession to be placed in the current of commerce. Such term shall not include the transportation or delivery of field run watermelons by the producer thereof to a handler for grading, sizing or processing.

§ 1210.308 Handler.

"Handler" means any person (except a common or contract carrier of watermelons owned by another person) who handles watermelons, including a producer who handles watermelons of the producer's own production. For the purposes of regulation and statute, the term "handler" means the "first" person who performs the handling functions.

§ 1210.309 Person.

"Person" means any individual, group of individuals, partnership, corporation, association, cooperative, or other entity.

§ 1210.310 Fiscal period and marketing year.

"Fiscal period" and "marketing year" mean the 12-month period from January 1 to December 31 or such other period which may be approved by the Secretary.

§ 1210.311 Programs and projects.

"Programs" and "projects" mean those research, development, advertising, or promotion programs or projects developed by the Board pursuant to § 1210.331.

§ 1210.312 Promotion.

"Promotion" means any action taken by the Board, pursuant to the Act, to present a favorable image for watermelons to the public with the express intent of improving the competitive position of watermelons in the marketplace and stimulating sales of watermelons, and shall include, but not be limited to, paid advertising.

§ 1210.313 Research.

"Research" means any type of systematic study or investigation, and/or the evaluation of any study or investigation designed to advance the image, desirability, usage, marketability, production, or quality of watermelons.

National Watermelon Promotion Board

§ 1210.320 Establishment and membership.

(a) There is hereby established a National Watermelon Promotion Board, hereinafter called the "Board." The Board shall be composed of producers and handers and one public representative appointed by the Secretary. An equal number of producer and handler representatives shall be nominated by producers and handlers pursuant to § 1210.321. The public representative shall be nominated by the producer and handler Board members in such manner as may be prescribed by the Secretary. If producers and handlers fail to select nominees for appointment to the Board, the Secretary may appoint persons on the basis of representation as provided in § 1210.324. If the Board fails to adhere to procedures prescribed by the Secretary for nominating a public representative, the Secretary shall appoint such representative.

(b) Membership on the Board shall be determined on the basis of two handler and two producer representatives for each of seven districts in the contiguous States of the United States. Such districts as hereby established have approximately equal production volume according to the three-year average production as set forth in the USDA Crop Production Annual Summary Reports for 1979, 1980, and 1981. They are:

District #1—South Florida including all areas south of State Highway 50.
District #2—North Florida including all areas north of State Highway 50.
District #3—The States of Alabama and Georgia.
District #4—The States of South Carolina, North Carolina, Virginia, Delaware, Maryland, West Virginia, Pennsylvania, New Jersey, New York, Ohio, Michigan, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, and Maine.
District #5—The States of Mississippi, Kentucky, Tennessee, Louisiana, Arkansas, Missouri, Illinois, Indiana, Iowa, Kansas, Nebraska, Oklahoma, Wisconsin, Minnesota, North Dakota, South Dakota, Colorado, and New Mexico.
District #6—The State of Texas.
District #7—The States of Arizona, California, Nevada, Utah, Oregon, Idaho, Wyoming, Washington, and Montana.

(c) After two years, the Board shall review the districts to determine whether realignment of the districts is necessary and at least every five years thereafter the Board shall make such a review. In making such review, it shall give consideration to:

(1) The most recent three years USDA production reports or Board assessment reports if USDA production reports are unavailable;

(2) Shifts and trends in quantities of watermelon produced, and

(3) Other relevant factors.

As a result of this review, the Board may realign the districts subject to the approval of the Secretary. Any such realignment shall be recommended by the Board to the Secretary at least six months prior to the date of the call for nominations and shall become effective at least 30 days prior to such date.

§ 1210.321 Nominations and selection.

The Secretary shall appoint the members of the Board from nominations to be made in the following manner:

(a) Except for initial Board members whose nomination process should be conducted by the Secretary, the Board shall issue a call for nominations by February first of each year in which an election is to be held. The call shall include at a minimum, the following information:

(1) A list of the vacancies and qualifications as to producers and handlers by district for which nominees may be submitted.

(2) The date by which the nominees shall be submitted to the Secretary for consideration to be in compliance with § 1210.323 of this subpart.

(3) A list of those States by district entitled to participate in the nomination process.

(4) The date, time, and location of any next scheduled meeting of the Board, national and State producer or handler associations, and district conventions if any.

(b) Nominations for positions that will become vacant shall be made by district convention in the district entitled to nominate. Notice of such convention shall be publicized to all producers and handlers within such district, and the Secretary at least ten days prior to said event. The notice shall have attached to it the call for nominations from the Board. The responsibility for convening and publicizing the district convention shall be that of the then members of the Board from that district.

(c) All producers and handlers within the district may participate in the convention: *Provided,* That, if a producer or handler is engaged in the production or handling of watermelons in more than one State, or district, the producer or handler shall participate within the State or district in which the producer or handler so elects in writing to the Board and such election shall remain controlling until revoked in writing to the Board.

(d) The district convention shall conduct the selection process for the nominees in accordance with procedures to be adopted at each such convention, subject to the following requirements:

(1) There shall be two individuals nominated for each vacant position. Each nominee shall meet the qualifications set forth in the call.

(2) No State in Districts 3, 4, 5 and 7 as currently constituted shall have more than three representatives concurrently on the Board.

(3) Each State represented at the district convention shall have one vote which vote shall be determined by the producers and handlers from that State by majority vote. Each State shall further have an additional vote for each five hundred thousand hundredweight volume as determined by the three year average annual crop production summary reports of the USDA, or if such reports are not published, then the three year average of the Board assessment reports: *Provided,* That for the first two calls for nominees, the USDA Crop Production Annual Summary Reports for 1979, 1980, and 1981 will be controlling as to any additional production volume votes.

§ 1210.322 Term of office.

(a) The term of office of Board members shall be three years, except that the members of the initial Board shall serve terms as follows: the four producers and four handlers from districts 1 (south Florida) and district 6 (Texas), and the public member shall serve one-year initial terms; four producers and four handlers from district 2 (north Florida) and district 3 (Georgia and Alabama) shall serve two-year initial terms; and the remaining six producers and six handlers from districts 4, 5 and 7 shall serve three-year initial terms.

(b) The term of office for the initial Board shall begin immediately following appointment by the Secretary. Time in the interim period, from appointment until the term begins pursuant to this section, shall not count towards the initial "term of office". In subsequent years, the term of office shall begin on January 1 or such other period which may be approved by the Secretary.

(c) Board members shall serve during the term of office for which they are selected and have qualified, and until their successors are selected and have qualified.

(d) No member shall serve more than two successive terms: *Provided,* That those members serving initial terms of one year may serve two additional consecutive three-year terms.

§ 1210.323 Acceptance.

Each person nominated for membership on the Board shall qualify by filing a written acceptance with the Secretary. Such written acceptance shall accompany the nominations list required by § 1210.321.

§ 1210.324 Vacancies.

(a) In the event any member of the Board ceases to be a member of the category of members from which the member was appointed to the Board, such position shall automatically become vacant.

(b) If a member of the Board consistently refuses to perform the duties of a member of the Board, or if a member of the Board engages in acts of dishonesty or willful misconduct, the Board may recommend to the Secretary that the member be removed from office. If the Secretary finds the recommendation of the Board shows adequate cause, the Secretary shall remove such member from office. Further, without recommendation of the Board a member may be removed by the Secretary upon showing of adequate cause, if the Secretary determines that the person's continual services would be detrimental to the purposes of the Act.

(c) To fill any vacancy caused by the failure of any person selected as a member of the Board to qualify, or in the event of the death, removal, resignation, or disqualification of any member, a successor shall be nominated and selected in the manner specified in § 1210.321, except that said nomination and replacement shall not be required if the unexpired term of office is less than six months. In the event of failure to provide nominees for such vacancies, the Secretary may appoint other eligible persons.

§ 1210.325 Procedure.

(a) Fifteen Board members shall constitute a quorum and any action of the Board shall require the concurring votes of a majority of those present and voting. At assembled meetings all votes shall be cast in person.

(b) For routine and noncontroversial matters which do not require deliberation and the exchange of views, and for matters of an emergency nature when there is not enough time to call an assembled meeting, the Board may act upon a majority of concurring votes of its members cast by mail, telegraph, telephone, or by other means of communication: *Provided,* That each member receives an accurate, full, and substantially identical explanation of each proposition. Telephone votes shall be promptly confirmed in writing. All votes shall be recorded in the Board minutes.

§ 1210.326 Compensation and reimbursement.

Board members shall serve without compensation but shall be reimbursed for reasonable expenses incurred by them in the performance of their duties as Board members.

§ 1210.327 Powers.

The Board shall have the following powers subject to § 1210.363:

(a) To administer the provisions of this Plan in accordance with its terms and conditions;

(b) To make rules and regulations to effectuate the terms and conditions ot this Plan;

(c) To require its employees to receive, investigate, and report to the Secretary complaints of violations of this Plan; and

(d) To recommend to the Secretary amendments to this Plan.

§ 1210.328 Duties.

The Board shall, among other things, have the following duties:

(a) To meet, organize, and select from among its members a president and such other officers as may be necessary; to select committees and subcommittees of board members; to adopt such rules for the conduct of its business as it may deem advisable; and it may establish working committees of persons other than Board members.

(b) To employ such persons as it may deem necessary and to determine the compensation and define the duties of each; and to protect the handling of Board funds through fidelity bonds;

(c) To prepare and submit for the Secretary's approval, prior to the beginning of each fiscal period, a recommended rate of assessment and a fiscal period budget of the anticipated expenses in the administration of this Plan, including the probable costs of all programs and projects;

(d) To develop programs and projects, which must be approved by the Secretary before becoming effective, and enter into contracts or agreements, with the approval of the Secretary, for the development and carrying out of programs or projects of research, development, advertising or promotion, and the payment of the costs thereof with funds collected pursuant to this Plan;

(e) To keep minutes, books, and records which clearly reflect all of the acts and transactions of the Board. Minutes of each Board meeting shall be promptly reported to the Secretary;

(f) To prepare and submit to the Secretary such reports from time to time as may be prescribed for appropriate accounting with respect to the receipt and disbursement of funds entrusted to the Board;

(g) To cause the books of the Board to be audited by a certified public accountant at least once each fiscal period, and at such other time as the Board may deem necessary. The report of such audit shall show the receipt and expenditure of funds collected pursuant to this part. Two copies of each such report shall be furnished to the Secretary and a copy of each such report shall be made available at the principal office of the Board for inspection by producers and handlers;

(h) To investigate violations of the Plan and report the results of such investigations to the Secretary for appropriate action to enforce the provisions of the Plan;

(i) To periodically prepare, make public and make available to producers and handlers reports of its activities carried out.

(j) To give the Secretary the same notice of meetings of the Board and its subcommittees as is given to its members;

(k) To act as intermediary between the Secretary and any producer or handler;

(l) To furnish the Secretary such information as the Secretary may request;

(m) To notify watermelon producers and handlers of all Board meetings through press releases or other means;

(n) To appoint and convene, from time to time, working committees drawn from producers, handlers and the public to assist in the development of research and promotion programs for watermelons; and

(o) To develop and recommend such rules and regulations to the Secretary for approval as may be necessary for the development and execution of programs or projects to effectuate the declared purpose of the Act.

Research and Promotion

§ 1210.330 Policy and objective.

It shall be the policy of the Board to carry out an effective, continuous, and coordinated program of research, development, advertising, and promotion in order to:

(a) Strengthen watermelons' competitive position in the marketplace,

(b) Maintain and expand existing domestic and foreign markets, and

(c) Develop new or improved markets.

It shall be the objective of the Board to carry out programs and projects which will provide maximum benefit to the watermelon industry.

§ 1210.331 Programs and projects.

The Board shall develop and submit to the Secretary for approval any programs or projects authorized in this section. Such programs or projects shall provide for:

(a) The establishment, issuance, effectuation and administration of appropriate programs or projects for advertising and other sales promotion of watermelons designed to strengthen the position of the watermelon industry in the marketplace and to maintain, develop, and expand markets for watermelon;

(b) Establishing and carrying out research and development projects and studies to the end that the acquisition of knowledge pertaining to watermelons or their consumption and use may be encouraged or expanded, or to the end that the marketing and use of watermelons may be encouraged, expanded, improved, or made more efficient: *Provided,* That quality control, grade standards, supply management programs or other programs that would otherwise limit the right of the individual watermelon producer to produce watermelons shall not be conducted under, or as a part of, this Plan;

(c) The development and expansion of watermelon sales in foreign markets;

(d) A prohibition on advertising or other promotion programs that make any reference to private brand names or use false or unwarranted claims on behalf of watermelons or false or unwarranted statements with respect to the attributes or use of any competing product;

(e) Periodic evaluation by the Board of each program or project authorized under this Plan to insure that each program or project contributes to an effective and coordinated program of research and promotion and submission of such evaluation to the Secretary. If the Board or the Secretary finds that a program or project does not further the purposes of the Act, then the Board or the Secretary shall terminate such program or project; and

(f) The Board to enter into contracts or make agreements for the development and carrying out of research and promotion and pay for the costs of such contracts or agreements with funds collected pursuant to § 1210.341.

Expenses and Assessments

§ 1210.340 Budget and expenses.

(a) Prior to the beginning of each fiscal period, or as may be necessary thereafter, the Board shall prepare and recommend a budget on a fiscal period basis of its anticipated expenses and disbursements in the administration of this Plan, including probable costs of research, development, advertising, and promotion. The Board shall also recommend a rate of assessment calculated to provide adequate funds to defray its proposed expenditures and to provide for a reserve as set forth in § 1210.344.

(b) The Board is authorized to incur such expenses for research, development, advertising, or promotion of watermelons, such other expenses for the administration, maintenance, and functioning of the Board as may be authorized by the Secretary, and any referendum and administrative costs incurred by the Department of Agriculture. The funds to cover such expenses shall be paid from assessments collected pursuant to § 1210.341.

§ 1210.341 Assessments.

(a) During the effective period of this subpart, assessments shall be levied on all watermelons produced and all watermelons first handled for consumption as human food. No more than one assessment on a producer nor more than one assessment on a handler shall be made on any lot of watermelons. The handler shall be assessed an equal amount on a per unit basis as the producer. If a person performs both producing and handling functions, both assessments shall be paid by such person.

(b) Assessment rates shall be fixed by the Secretary in accordance with § 1647(f), of the Act: *Provided,* That the maximum assessment shall not exceed two cents per hundredweight for producers and two cents per hundredweight for handlers. No assessments shall be levied on watermelons grown by producers of less than five acres of watermelons.

(c) Each handler, as defined, is responsible for payment to the Board of both the producer's and the handler's assessment pursuant to regulations issued hereunder. The handler may collect producer assessments from the producer or deduct such assessments from the proceeds paid to the producer on whose watermelons the assessments are made. The handler shall maintain separate records for each producer's watermelons handled, including watermelons produced by said handler. In addition, the handler shall indicate the total quantity of watermelons handled by the handler, including those that are exempt under this Plan, and such other information as may be prescribed by the Board.

(d) Assessments shall be paid to the Board at such time and in such manner as the Board, with the Secretary's approval, directs pursuant to regulations issued hereunder. Such regulations may provide for different handlers or classes of handlers and different handler payment and reporting schedules to recognize differences in marketing practices or procedures used in any State or production area.

(e) There shall be a late payment charge imposed on any handler who fails to remit to the Board the total amount for which any such handler is liable on or before the payment due date established by the Board under paragraph (d) of this section. The amount of the late payment charge shall be set by the Board subject to approval by the Secretary.

(f) There shall also be imposed on any handler subject to a late payment charge, an additional charge in the form of interest on the outstanding portion of any amount for which the handler is liable. The rate of such interest shall be prescribed by the Board subject to approval by the Secretary.

(g) The Board is hereby authorized to accept advance payment of assessments by handlers that shall be credited toward any amount for which the handlers may become liable. The Board shall not be obligated to pay interest on any advance payment.

(h) The Board is hereby authorized to borrow money for the payment of administrative expenses subject to the same fiscal, budget, and audit controls as other funds of the Board.

§ 1210.342 Exemption from assessment.

The Board may exempt watermelons used for nonfood purposes from the provisions of this Plan and shall establish adequate safeguards against improper use of such exemptions.

§ 1210.343 Producer and handler refunds.

Any producer or handler against whose watermelons an assessment is made and collected under this Plan and who is not in favor of supporting the research, development, advertising, and promotion program provided for under this Plan shall have the right to demand and receive from the Board a refund of such assessment upon submission of proof satisfactory to the Board that the producer or handler paid the assessment for which refund is sought. Any such demand shall be made personnally by such producer or handler on a form which the producer or handler shall sign and within a time period prescribed by the Board pursuant to regulations. Such time period shall give the producer or handler at least 90 days from the date of collection to submit the refund request form to the Board. Any such refund shall be made within 60 days after demand therefore.

§ 1210.344 Operating reserve.

The Board may establish an operating monetary reserve and may carry over to subsequent fiscal periods excess funds in a reserve so established: *Provided,* That funds in the reserve shall not exceed approximately two fiscal periods' expenses. Such reserve funds may be used to defray any expenses authorized under this subpart.

Reports, Books, and Records

§ 1210.350 Reports.

Each handler shall maintain a record with respect to each producer for whom watermelons were handled and for watermelons produced and handled by the handler. Handlers shall report to the Board at such times and in such manner as the Board may prescribe by regulations whatever information as may be necessary in order for the Board to perform its duties. Such reports may include, but shall not be limited to, the following information:

(a) Total quantity of watermelons handled for each producer and by the handler, including those which are exempt under this Plan;

(b) Total quantity of watermelons handled for each producer and by the handler, on which the producer assessment was collected;

(c) Name and address of each person from whom an assessment was collected, the amount collected from each person, and the date such collection was made; and

(d) Name and address of each person claiming exemption from assessment and a copy of each such person's claim of exemption.

§ 1210.351 Books and records.

Each handler subject to this Plan shall maintain, and during normal business hours make available, for inspection by employees of the Board or Secretary, such books and records as are necessary to carry out the provisions of this Plan and the regulations issued thereunder, including such records as are necessary to verify any required reports. Such records shall be maintained for two years beyond the fiscal period of their applicability.

§ 1210.352 Confidential treatment.

(a) All information obtained from the books, records, or reports required to be maintained under §§ 1210.350 and 1210.351 shall be kept confidential and shall not be disclosed to the public by any person. Only such information as the Secretary deems relevant shall be disclosed to the public and then only in a suit or administrative hearing brought at the direction, or on the request, of the Secretary, or to which the Secretary or any officer of the United States is a party, and involving this Plan: Except that nothing in this subpart shall be deemed to prohibit:

(1) The issuance of general statements based on the reports of a number of handlers subject to this Plan if such statements do not identify the information furnished by any person; or

(2) The publication by direction of the Secretary of the name of any person violating this Plan together with a statement of the particular provisions of this Plan violated by such person.

(b) Any disclosure of confidential information by any employee of the Board, except as required by law, shall be considered willful misconduct.

Miscellaneous

§ 1210.360 Right of the Secretary.

All fiscal matters, programs or projects, rules or regulations, reports, or other substantive actions proposed and prepared by the Board shall be submitted to the Secretary for approval.

§ 1210.361 Personal liability.

No member or employee of the Board shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, as such member or employee, except for acts of dishonesty or willful misconduct.

§ 1210.362 Influencing governmental action.

No funds collected by the Board under this plan shall in any manner be used for the purpose of influencing governmental policy or action, except for making recommendations to the Secretary as provided in this subpart.

§ 1210.363 Suspension or termination.

(a) Whenever the Secretary finds that this Plan or any provision thereof obstructs or does not tend to effectuate the declared policy of the Act, the Secretary shall terminate or suspend the operation of this Plan or such provision thereof.

(b) The Secretary may conduct a referendum at any time, and shall hold a referendum on request of the Board or of 10 percent or more of the watermelon producers and handlers to determine if watermelon producers and handlers favor termination or suspension of this Plan. The Secretary shall suspend or terminate this Plan at the end of the marketing year whenever the Secretary determines that the suspension or termination is favored by a majority of the watermelon producers and handlers voting in such referendum who, during a representative period determined by the Secretary, have been engaged in production or handling of watermelons and who produced or handled more than 50 percent of the volume of watermelons produced or handled by those producers and handlers voting in the referendum. Any such referendum shall be conducted at county extension offices.

§ 1210.364 Proceedings after termination.

(a) Upon the termination of this Plan, the Board shall recommend not more than five of its members to the Secretary to serve as trustees for the purpose of liquidating the affairs of the Board. Such persons, upon designation by the Secretary, shall become trustees of all funds and property then in possession or under control of the Board, including claims for any funds unpaid or property not delivered or any other claim existing at the time of such termination.

(b) The said trustees shall:

(1) Continue in such capacity until discharged by the Secretary;

(2) Carry out the obligations of the Board under any contracts or agreements entered into by it pursuant to § 1210.328(d);

(3) From time-to-time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the Board and of the trustees, to person or persons as the Secretary may direct; and

(4) Upon the request of the Secretary execute such assignments or other instruments necessary or appropriate to vest in such person or persons full title and right to all the funds, property, and claims vested in the Board or the trustees pursuant to this section.

(c) Any person to whom funds, property, or claims have been transferred or delivered pursuant to this section shall be subject to the same obligation imposed upon the Board and upon the trustees.

(d) A reasonable effort shall be made by the Board or its trustees to return to producers and handlers any residual funds not required to defray the necessary expenses of liquidation. If it is found impractical to return such remaining funds to producers and handlers, such funds shall be disposed of in such manner as the Secretary may determine to be appropriate.

§ 1210.365 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary, the termination of this Plan or any regulation issued pursuant thereto, or the issuance of any amendment to either thereof, shall not:

(a) Affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this Plan or any regulation issued thereunder, or

(b) Release or extinguish any violation of this Plan or any regulation issued thereunder, or

(c) Affect or impair any rights or remedies of the United States, or of the Secretary, or of any other person with respect to any such violation.

§ 1210.366 Separability.

If any provision of this Plan is declared invalid or the applicability thereof to any person or circumstance is held invalid, the validity of the remainder of this Plan or applicability thereof to other persons or circumstances shall not be affected thereby.

§ 1210.367 Patents, copyrights, inventions, and publications.

Any patents, copyrights, inventions, product formulations, or publications developed through the use of funds collected under the provisions of this Plan shall be the property of the United States government as represented by the Board. Funds generated by such patents, copyrights, inventions, product formulations, or publications shall be considered income subject to the same fiscal, budget, and audit controls as other funds of the Board. Upon termination of this part, § 1210.364 shall apply to determine the disposition of all such property.

Signed at Washington, DC, on March 18, 1988.

William T. Manley,

Deputy Administrator, Marketing Programs.

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

14 CFR Part 241

[Docket No. 45529; Notice No. 88-5]

Uniform System of Accounts and Reports for Large Certificated Air Carriers; Updating the Accounting Provisions for Changes in GAAP

AGENCY: Research and Special Programs Administration, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule solicits comments on certain modifications to the accounting provisions applicable to large certificated air carriers that are contained in Part 241 of the Department's Economic Regulations (14 CFR Part 241). The Department proposes to revise its accounting provisions in accordance with generally accepted accounting principles.This will relieve an air carrier from the burden of maintaining its accounting system so as to differentiate between two sets of principles—generally accepted and regulatory.

DATE: Comments on the proposed rule must be received on or before May 23, 1988.

ADDRESS: Comments should be directed to the Docket Clerk, Docket 45529, Room 4107, Office of the Secretary, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590. Comments should identify the regulatory docket number and be submitted in duplicate to the address listed above. Commenters wishing the Department to acknowledge receipt of their comments must submit with those comments a self-addressed stamped postcard on which the following

VOL. 53 ISS 57 MR 24 988 MI

statement is made: Comments on Docket No. 45529. The postcard will be dated/time stamped and returned to the commenter. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with DOT personnel concerned with this rulemaking will be filed in the docket.

FOR FURTHER INFORMATION CONTACT: M. Clay Moritz, Jr. or Jack M. Calloway, Office of Aviation Information Management, DAI-1, Research and Special Programs Administration, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590, (202) 366-4385 and 366-4383, respectively.

SUPPLEMENTARY INFORMATION:

Background

In adopting Economic Regulation ER-980 (42 FR 19 January 3, 1977), the Civil Aeronautics Board (CAB) announced its intention to reduce the time lag for incorporating generally accepted accounting principles (GAAP) in Part 241, *Uniform System of Accounts and Reports* (USAR) of its Economic Regulations, which applied to certificated air carriers. Prior to ER-980, the air carrier uniform system of accounts (USOA) provisions in Part 241 had been modified, from time to time to include changes in GAAP to assure compatibility of the CAB's accounting requirements with the numerous policy pronouncements being issued by professional organizations and governmental bodies responsible for molding accounting principles and disclosure standards for American business. This action was designed to make it easier for the CAB and the air carriers to maintain a single accounting system, based on generally accepted accounting principles, that could be used for both managerial and regulatory reporting purposes.

Under ER-980, updates of the USOA for changes in GAAP were to be accomplished as expeditiously as possible by appropriate regulatory action, except to the extent such action might be precluded by the CAB's statutory duties. The goal of this policy was to minimize the carrier burden associated with maintaining different accounting records needed to reflect any difference between the USOA and generally accepted accounting principles. As a result, the CAB began issuing periodic rulemaking proposals (and subsequent final rules) to revise the accounting provisions contained in the USAR. Several of these actions were initiated and completed by the CAB between 1977 and 1979.

The Airline Deregulation Act of 1978 (ADA), Pub. L. No. 95-504, caused the CAB to reorder its regulatory agenda to provide for the orderly transition of the airline industry to a deregulated environment and for transfer of the CAB's remaining regulatory functions to the Department of Transportation. This revised agenda effectively suspended the routine use of the regulatory process to modify the USOA for changes in GAAP.

The ADA, as amended by the Civil Aeronautics Board Sunset Act of 1984, Pub. L. No. 98-443, October 4, 1984, transferred to the Secretary of Transportation the authority of the former Civil Aeronautics Board to prescribe the forms of any and all accounts, records and memoranda to be kept by air carriers. Since the assumption of this authority on January 1, 1985, the Department has been comprehensively reviewing the uniform system of accounting and reporting requirements that are applicable to large certificated air carriers (Part 241 of the Department's Economic Regulations, 14 CFR Part 241) in order to identify what information the Department requires to administer its aviation responsibilities as well as any potential burden reduction areas. "Large certificated air carriers" include all section 401 carriers that either: (1) Operate aircraft designed to have a maximum payload capacity of more than 60 seats or a maximum payload capacity of more than 18,000 pounds or (2) conduct operations where one or both terminals of a flight stage are outside the 50 states of the United States, the District of Columbia, the Commonwealth of Puerto Rico and the United States Virgin Islands. To date, the Department has focused its attention on air carrier reporting burden and now turns its attention to the air carrier accounting provisions contained in Part 241.

Need for Uniform Accounting System

Before addressing the issue of a GAAP-based uniform accounting system, the Department conducted a comprehensive policy level review to determine if there was a need for an air carrier uniform accounting system. This review disclosed that a regulatory need does exist which requires the continuation of the USOA to enable the Department to effectively and efficiently administer its mandated aviation responsibilities. These responsibilities include, but are not limited to, the following Departmental programs: air carrier fitness; international fares and rates; international routes; safety surveillance and inspection; and airline industry status evaluations.

Air Carrier Fitness

One component of the initial fitness evaluation that is conducted before a carrier can commence operations is a test of the reasonableness of the applicant's financial operating plan. In analyzing a proposed operating plan, the Department compares the forecasted level of expenses with those of air carriers currently conducting a similar type of operation (average length of haul/same or similar type(s) of aircraft).

In monitoring continuing air carrier fitness the Department uses various balance sheet and profit and loss accounts to determine the financial status of specific air carriers. For example, the specific accounts included in the ratio of current assets to current liabilities (working capital ratio) provide a measurement of the degree of carrier solvency. Other examples of the use of air carrier accounting information include computing carrier net worth and aircraft inventory book value.

International Fares and Rates

The Department is legislatively charged with (1) determining the fair and reasonable rates of compensation to be paid by the United States Postal Service for the transportation of mail by aircraft in both intra-Alaska and foreign services; and (2) establishing and updating the cost-based Standard Foreign Fare Level (SFFL) and Standard Foreign Rate Level (SFRL). SFFL and SFRL form the basis for zones of fare and rate flexibility in international markets. The regulatory process for establishing and updating fares and rates involves significant usage of the system of air carrier accounts in solving equations which detail the precise cost/volume relationships upon which the Department's cost of service methodology and cost updating technique are based. Specific accounts are used to determine amounts of the various operating revenues, operating expenses, cost trends, and in the case of setting mail rates, investments upon which a carrier is entitled to receive a rate of return.

International fares for passengers and rates for cargo and mail are adjusted according to cost trends for each of several designated air carrier operating entities. For example, a passenger fare cost index is calculated for each of four ratemaking entities: Atlantic, Pacific, Latin American and Canadian. It should be noted that financial data from the domestic entity are used to adjust fares and rates for Canadian operations.

Determining the adjustment factor for fares and rates requires the use of the system of accounts to allocate revenues and expenses among the various ratemaking entities as well as calculating the costs of service applicable to each product: Passenger, cargo, and/or mail. The allocation of costs to the products utilizes the functional account classification system contained in Part 241 of the Department's Economic Regulations. Each functional account describes a basic area of financial activity or functional operation of the air carrier. Some examples of functional accounts (activities) are: 5100, "Flying Operations," 5400, "Maintenance," 5500, "Passenger Service," and 6400, "Aircraft and Traffic Servicing." Each function includes those expenses which are incurred in pursuit of the specific financial activity. An example would be the charges to the "Flying Operations" functional account for the salaries recorded in objective account 23, "Pilots and Copilots." Objective accounts are two digit accounts that denote the nature of the specific revenue or expense objective recorded in the functional account. The account numbering system is based on a four digit account; the first two digits identify the functional activity to which the recorded item is related and the second two digits identify the nature (objective) of revenue or cost item. Using the above accounts, account 5123 would be used to record the salaries of pilots and copilots that are charged to "Flying Operations."

This system of accounts has served the former CAB and now the Department well in administering its aviation program responsibilities.

International Routes

The uniform air carrier accounting system facilitates the evaluation of applications for international route authority. This use includes verifying air carrier operating revenue and cost estimates by individual entity as well as cost estimates for each aircraft type proposed for use in providing the service in question. The system of functional accounts allows the analyst to group expenses by functional operation. Thus, aircraft operating expenses can be compared by reviewing the various objective accounts summarized by functional account—Flying Operations (5100), Direct Maintenance (5200), and Depreciation (7000).

Safety Surveillance and Inspection

The Department is responsible for evaluating the adequacy of aviation safety regulations, standards, policies, and procedures; and identifying aviation safety problem areas and recommending/developing appropriate solutions. In order to effectively and efficiently administer this responsibility, the Department has established and used indicators for monitoring the safety of the National Airspace System, including the individual air carriers operating within the system. The Department also has a statutory responsibility to make findings concerning the effects of airline deregulation on safety and submit periodic reports of those findings to Congress.

The Department uses certain specific accounts, in conjunction with a variety of other nonfinancial information, to carry out the above regulatory functions. The accounts are utilized in calculating a set of financial ratios that give an indication of carrier financial status. Taken as a whole, the use of both financial and nonfinancial indicators enables the Department to better allocate its safety inspection resources.

Airline Industry Status Evaluations

One of the functions of this program is to keep senior Departmental officials fully informed as to the status of the airline industry. One phase of this includes analyzing the financial health of the industry. These evaluations require certain accounts reported on the Form 41 financial schedules for use in individual and comparative financial analyses. It should be noted that this program, as well as the overwhelming majority of the Department's aviation programs, requires accounting and statistical data about carrier operations that are reliable and uniform, and comparable from period to period and from carrier to carrier. This is extremely important in the current deregulated environment due to the rapid changes taking place within the industry. The USOA contributes significantly to the level of reliability, uniformity and consistency of the financial data underlying the decision-making process.

Alternatives To Uniform Accounting System

Before concluding that the continuation of the USOA is necessary for administering its aviation programs, the Department did explore possible alternatives to maintaining the current accounting system. Among these alternatives was the elimination of the USOA. This alternative was rejected due to the nature of the aviation programs being administered. As explained above, the Department's aviation programs require a uniform data base that facilitates data comparisons between air carriers on both a current and historical basis.

If the USOA was eliminated, the Department would be forced to develop highly detailed reporting instructions for each and every financial data element reported on the thirteen RSPA Form 41 balance sheet (B) and profit and loss (P) schedules. This would be especially true for describing the reporting of air carrier operating expenses on Form 41 Schedules P-5.2, "Aircraft Operating Expenses," P-6, "Operating Expenses by Objective Groupings," and P-7, "Operating Expenses by Functional Groupings—Group III Air Carriers." These schedules require the extensive use of cost allocations in computing the reportable data elements. The Department believes that establishing, updating and maintaining such a detailed reporting system would be very burdensome for both the Department and the carriers. Every change in accounting standards would normally require a change in reportable data element definitions. These changes could be very voluminous and require a considerable commitment of both Federal and air transportation industry resources to implement.

Changes in the data element definitions would also require the use of time consuming rulemaking procedures to maintain an up-to-date financial reporting system. This alternative would result in a significant increase in the Department's rulemaking workload. Consequently, this alternative would also increase the burden on the air transportation industry by expanding the amount of time the industry must spend to review proposed rules and implement final rules.

USOA and GAAP-Based Accounting

As mentioned above, the CAB, prior to airline deregulation, had established a policy whereby the pronouncements of professional accounting standards setting bodies, such as the Financial Accounting Standards Board, were reviewed and, as appropriate, transformed into a rulemaking proposal to modify the uniform air carrier accounting provisions. With the enactment of the Airline Deregulation Act and the revision of the CAB's regulatory agenda, this policy was effectively suspended. The last rulemaking proceeding that updated the accounting provisions for a change in GAAP was Economic Regulation ER-1076 (43 FR 46295, October 6, 1978), which became effective November 6, 1978. This regulation updated the USOA to be in accordance with generally accepted accounting principles on troubled debt restructurings, prior period adjustments and forward exchange contracts.

Based on the Department's continued need for uniform air carrier accounting, the USOA has been evaluated to determine if any air carrier burden reductions are possible without adversely affecting the level of uniform, comparative financial information required for decision-making purposes. The Department has concluded that the current level of air carrier burden could be reduced by adopting the concept that the Part 241 accounting provisions will be based on GAAP. It is anticipated that such a system would be beneficial to both the carriers and the Federal government. The carriers would benefit because they would be able to operate accounting systems which yield information acceptable for both financial and governmental reporting purposes. The government would benefit from the degree of comparability of accounting practice among large certificated air carriers.

Given the fact one of the founding principles of deregulation is competition based on free market entry and exit, the Department's experience has shown that the introduction and assimilation of new entrants in the marketplace has been made easier through the beneficial use of the USOA, which has proven to be a useful accounting tool in helping new entrants establish a reliable financial reporting system. This benefit should be further enhanced by a GAAP-based USOA.

Another benefit of GAAP is to reduce the Department's need for on-site accounting classification audits. These audits evaluate the accuracy and reliability of data that are used for regulatory decision-making. A GAAP-based system should save audit time that would otherwise be spent reviewing the application of regulatory accounting provisions that may depart from GAAP.

Alternatives for Updating the USOA for Changes in GAAP

After deciding to propose the adoption of a GAAP-based accounting system, the Department has analyzed several alternative methodologies for updating the accounting provisions for changes in GAAP. To date, all revisions of the accounting provisions have been accomplished through formal rulemaking proceedings. The Department has tentatively determined that the continued use of this approach to GAAP-based accounting may be too burdensome on the affected air carriers and the Federal government. It is estimated, based on prior regulatory proceedings, that the time required to develop and issue a proposed rule, solicit and analyze public comments, and develop and issue a final rule is about eight to twelve months.

The promulgation of a new financial accounting standard normally requires the development of a proposed rule to incorporate the change in Part 241 of the Department's Economic Regulations. Depending on the specific GAAP pronouncement, changes to Part 241 usually include one, several, or all of the following types of changes: (1) Expansion of the definitions or glossary section to include new or revised terminologies, (2) revision and/or expansion of the section containing the accounting provisions, (3) revision of the reporting instructions for each affected Form 41 schedule, and (4) revision of the format of each affected Form 41 schedule. This last element includes changing the graphic composition of each revised schedule as well as printing a supply of the schedule for distribution and inventory.

Economic Regulation ER–1013, adopted by the CAB in July 1977, provides an example of the extent of the modification required to update the USOA for a change in GAAP. This regulation amended the USOA to include certain accounting and disclosure standards for lease transactions that were issued by the Financial Accounting Standards Board (FASB) as Statement of Financial Accounting Standards No. 13 "Accounting for Leases." ER–1013 included nine new definitions, fifteen new accounts, revisions of several existing accounts, a new accounting provisions section, six Form 41 schedules that required revisions to their reporting instructions, and twelve Form 41 schedules that required revisions for changes in graphics.

A review of the current body of generally accepted accounting principles reveals that the FASB has issued, since its 1973 inception, over ninety statements of financial accounting standards. This represents an average promulgation of over six revisions to GAAP each year. The Department is concerned that continuation of this level of activity would severely overburden its staff and cause a substantial reordering of workload priorities as expressed in the Department's Semiannual Regulatory Agenda (52 FR 14548; April 27, 1987).

After considering: (1) The amount of time required to complete a rulemaking proceeding, (2) the volume of FASB statements being issued annually, and (3) the limited staff resources available to process a large volume of rules, the Department decided to consider various alternative methodologies to updating the accounting provisions for changes in GAAP.

One method considered is the initiation of periodic rulemaking proposals. For example, updates could be performed on annual basis so as to include all GAAP revisions that occurred within a given calendar year. This alternative would significantly reduce the total number of rules required to maintain conformity with GAAP. However, a significant drawback with this method is the delay between the effective date of a GAAP pronouncement and the effective date of the USOA revision to reflect the change. Thus, if the FASB issues a Statement of Financial Accounting Standards that is effective early in the 1987 calendar year, the relevant changes may not be included in a notice of proposed rulemaking until some time in 1988, resulting in a delay of about 24 months before the change in GAAP would be incorporated in the Department's uniform accounting provisions. The Department feels this alternative may be significantly burdensome to the carriers who would be required to maintain two accounting systems until the Department made its change. This approach is counter to the purpose of this proposal which is to eliminate the carriers' need for maintaining two accounting systems.

In an attempt to minimize the degree of burden, the Department is proposing to adopt a policy of relying on GAAP, as promulgated by the FASB, as the recognized body of accounting principles for recording air carrier financial information. The Department believes this would be, for the affected air carriers, the most cost effective method of adopting and maintaining a GAAP-based accounting system.

While the Department proposes to base its air carrier accounting requirements on GAAP to the maximum extent possible, it also recognizes the possibility that a situation may arise where a change in GAAP could adversely impact the Department's ability to administer its aviation responsibilities. In this circumstance, the proposed rule provides that the Department's Office of Aviation Information Management would issue an Accounting Directive fully explaining why the application of the accounting principle in question would negatively impact administration of the Department's aviation programs. The directive would also provide the necessary accounting guidance required to maintain the accounting integrity of the USAR.

This methodology would enable the Department to communicate its position on a given accounting principle in a very timely fashion. The Department believes this approach would be the least burdensome to the air carriers since all affected carriers would be informed of the Department's position at the earliest possible moment and thereby spared the burden of implementing any unnecessary accounting system revisions.

While the function of the directive would be to inform the carriers of the Department's accounting provision requirements, the Department recognizes the fact there may be some objection to its decision not to implement a particular accounting principle. If significant objections are raised by any concerned party or parties, the Department plans to address such objections in the public forum by issuing a notice of proposed rulemaking. Air carriers and any other concerned parties would be encouraged to submit their views and comments on the issues raised. After due deliberation of all comments received, the Department would issue a final rule, stating its conclusions.

Proposed Changes to Part 241

In order to more closely align the current air carrier accounting system with GAAP and to place a greater reliance on GAAP for the recording of financial information, the Department proposes to revise Part 241 as follows:

Definitions

Section 03 of Part 241 contains a list of definitions that define terms that are used in the remaining sections of the part. Certain of these definitions have been tentatively identified as being either already defined by GAAP or no longer required in the current air transportation environment. These definitions, which are being proposed for elimination, include: Air Carrier, Route; Air Transportation, Supplemental; Exposed Net Asset Position; Exposed Net Liability Position; Express; Foreign Currency Transactions; Foreign Currency Translation; Forward Exchange Contract (Forward Contract); Interest Rate Implicit in the Lease; Lease, Capital; Lease, Direct Financing; Lease, Leveraged; Lease, Operating; Lease, Sales-Type; Lessee's Incremental Borrowing Rate; Marketable (as Applied to an Equity Security); Market Price; Market Value (Equity Security); Minimum Lease Payments; Net Unrealized Gain or Loss, Marketable Equity Securities Portfolio; Realized Gain or Loss, Marketable Equity Security; Schedule, Published; Service, Irregular (Excluding Charter and Special); Service, Special; Service, Tourist; Stop, Fuel; and Valuation Allowance, Marketable Equity Securities Portfolio.

The following definitions would be editorially revised to enhance clarity and eliminate incorrect references: Agent, Cargo; Air Carrier, Charter; Airport-to-Airport Distance; Certificate of Public Convenience and Necessity; Flight, Developmental; Freight; Mail, Nonpriority; Mail, Priority; Person Controlling an Air Carrier; Route, Certificated; Section 418 Cargo Operations; Service, Charter; Service, Mixed; Service, Nonscheduled; Stop, Flag; Tariff, Published; Traffic, Enplaned; Traffic, Deplaned; and Weight, Passenger.

The following definitions are proposed for inclusion in Section 03: "Department" and "DOT."

General Accounting Provisions

The Department has tentatively identified the following sections as not relevant or no longer being required since the accounting policies related to each of the subject headings are already covered by GAAP pronouncements.

1. 1–9, Conversion to This System of Accounts and Reports
2. 2–3, Foreign Currency Transactions
3. 2–5, Liability Accruals
4. 2–6, Income Tax Accruals
5. 2–7, Extraordinary Items, Discontinued Operations, Prior Period Adjustments and Accounting Changes
6. 2–8, Unaudited Items
7. 2–9, Improvements, Additions and Betterments
8. 2–10, Capitalization of Interest
9. 2–11, Accounting for Transactions in Gross Amounts
10. 2–12, Acquisition and Valuation of Assets
11. 2–13, Establishment of Allowances
12. 2–14, Depreciation and Amortization
13. 2–15, Contingent Assets and Contingent Liabilities
14. 2–16, Notes to Financial Statements
15. 2–18, Transactions Between Members of an Affiliated Group
16. 2–20, Accounting for Leases
17. 2–21, Accounting for Troubled Debt Restructurings
18. 5–1, Current Assets
19. 5–2, Investments and Special Funds
20. 5–3, Property and Equipment
21. 5–4, Property and Equipment Depreciation
22. 5–5, Other Assets
23. 5–6, Current Liabilities
24. 5–7, Noncurrent Liabilities
25. 5–8, Deferred Credits and Commitments and Contingent Liabilities
26. 5–9, Stockholders' Equity

Balance Sheet Accounts

The Department has tentatively decided to eliminate the following balance sheet accounts because each of the following accounts has either already been eliminated from the applicable Form 41 schedule or represents an account that is no longer required.

1. 2860, Subscribed and Unissued Stock
2. 2950, Net Unrealized Loss on Noncurrent Marketable Equity Securities

Profit and Loss Accounts

The following accounts are proposed for elimination. These accounts were tentatively identified as being no longer required.

1. 15, Mutual Aid
2. 15.1, Mutual Aid Receipts
3. 15.2, Mutual Aid Payments

Department Regulatory Policies and Procedures

Executive Order 12291, Regulatory Flexibility Act, and Paperwork Reduction Act of 1980

This proposed action has been reviewed under Executive Order 12291a, and it has been determined that this is not a major rule. It will not result in an annual effect on the economy of $100 million or more. There will be no increase in production costs or prices for consumers, individual industries, Federal, State or local governments, agencies or geographic regions. Furthermore, this proposed rule would not adversely affect competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. These proposed regulations would result in a reduction in reporting burden for large certificated air carriers. Accordingly, a regulatory impact analysis is not required.

This proposed regulation is significant under the Department's Regulatory Policies and Procedures, dated February 26, 1979, because it involves important Departmental policies. Its economic impact should be minimal and a full regulatory evaluation is not required.

I certify that this rule will not have a significant economic impact on a substantial number of small entities. For purposes of its aviation economic regulations, Departmental policy categorizes certificated air carriers operating small aircraft (60 seats or less or 18,000 pounds maximum payload or less) in strictly domestic service as small entities for purposes of the Regulatory Flexibility Act. The proposed amendments would affect only large certificated air carriers.

The accounting requirements in this proposal are subject to the Paperwork Reduction Act, Pub. L. 96–511, 44 U.S.C. Chapter 35. These requirements will be submitted to the Office of Management and Budget (OMB) for review and comment. Persons may submit comments on the accounting requirements to OMB. Comments should be directed to Sam Fairchild, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503. It would be appreciated if a copy of any comments sent to OMB is also sent to the DOT rules docket. It is anticipated that this rule would result in a 400-hour reduction in the Department's fiscal year 1988 Information Collection Budget for OMB No. 2138–0013, Report of Financial and Operating Statistics for Large Certificated Air Carriers.

List of Subjects in 14 CFR Part 241

Air carriers and Uniform System of Accounts and Reports.

Proposed Rule

Accordingly, the Department of Transportation proposes to amend 14 CFR Part 241, *Uniform System of Accounts and Reports for Large Certificated Air Carriers*, as follows:

PART 241—[AMENDED]

1. The authority for Part 241 would continue to read as follows:

Authority: Sections 204, 401, 407, 416, 417, 901, 902, 1002 of the Federal Aviation Act of 1958, as amended: 49 U.S.C. 106, 1324, 1371, 1377, 1386, 1387, 1471, 1472 and 1482.

2. The Table of Contents of the Uniform System of Accounts and Reports for Large Certificated Air Carriers would be amended by:

A. Removing sections 1–9, 2–5, 2–6, 2–7, 2–8, 2–9, 2–10, 2–11, 2–12, 2–13, 2–14, 2–15, 2–16, 2–17, 2–18, 2–19, 2–20, 2–21, 5–1, 5–2, 5–3, 5–4, 5–5, 5–6, 5–7, 5–8 and 5–9.

B. Revising the title of Section 2–3 to read:

Sec. 2–3 Revenue and accounting practices.

C. Removing and reserving the title of Section 5, *Balance Sheet Account Groupings.*

3. Section 03, *Definitions for Purposes of This System of Accounts and Reports*, would be amended by:

A. Removing the definitions of Air Carrier, Route; Air Transportation, Supplemental; Exposed Net Asset Position; Exposed Net Liability Position; Express; Foreign Currency Transactions; Foreign Currency Translation; Forward Exchange Contract (Forward Contract); Interest Rate Implicit in the Lease; Lease, Capital; Lease, Direct Financing; Lease, Leveraged; Lease, Operating; Lease, Sales-Type; Lessee's Incremental Borrowing Rate; Marketable (as Applied to an Equity Security); Market Price; Market Value (Equity Security); Minimum Lease Payments; Net Unrealized Gain or Loss, Marketable Equity Securities Portfolio; Realized Gain or Loss, Marketable Equity Security; Schedule, Published; Service, Irregular (Excluding Charter and Special); Service, Special; Service, Tourist; Stop, Fuel; and Valuation Allowance, Marketable Equity Securities Portfolio.

B. Revising the definitions of Agent, Cargo; Air Carrier, Charter; Airport-to-Airport Distance; Certificate of Public Convenience and Necessity; Flight, Developmental; Freight; Mail, Nonpriority; Mail, Priority; Person Controlling an Air Carrier; Route, Certificated; Section 418 Cargo Operations; Service, Charter; Service, Mixed; Service, Nonscheduled; Stop, Flag; Tariff, Published; Traffic, Enplaned; Traffic, Deplaned; and Weight, Passenger; and adding new definitions Department and DOT to read:

* * * * *

Agent, cargo. Any person (other than the air carrier performing the direct air transportation or one of its bona fide regular employees or an indirect air carrier lawfully engaged in air transportation under authority conferred by any applicable part of the Economic Regulations of the Department) who for compensation or profit: (1) Solicits, obtains, receives or furnishes directly or indirectly property or consolidated shipments of property for transportation upon the aircraft of an air carrier subject to this part, or (2) procures or arranges for air transportation of property upon aircraft of an air carrier subject to this part by charter, lease, or any other arrangement.

* * * * *

Air carrier, charter. An air carrier holding a certificate issued under section 401(d)(3) of the Federal Aviation Act of 1958, as amended.

* * * * *

Airport-to-airport distance. The great circle distance, measured in statute miles, between airports as compiled by the Department's Office of Aviation Information Management, RSPA.

* * * * *

Certificate of Public Convenience and Necessity. A certificate issued to an air carrier under section 401, of the Act, by the Department of Transportation authorizing the carrier to engage in air transportation.

* * * * *

Department. Department of Transportation.

* * * * *

DOT. Department of Transportation.

* * * * *

Flight, developmental. A flight for (1) the development of a new route either prior or subsequent to certification by the Department of Transportation; (2) the extension of an existing route; and (3) the integration of a new type of aircraft or service.

* * * * *

Freight. Property transported by air.

* * * * *

Mail, nonpriority. All mail for which transportation by air is provided on a space available basis.

Mail, priority. All mail for which transportation by air is provided on a priority basis.

* * * * *

Person controlling an air carrier. Any person, as defined in section 101 (32) of the Act, whom the Department has found, in any proceeding, to control an air carrier, or who holds, directly or indirectly, the legal or beneficial ownership of more than 50 percent of the outstanding voting capital stock or capital of an air carrier, and who does not make a proper showing to the Department that he or she does not control the carrier despite such stock ownership, shall be deemed to be a person controlling the carrier for the purpose of this part. A brokerage firm which holds record ownership of securities merely for the convenience of the customer beneficially owning the stock shall not be deemed a person controlling.

* * * * *

Route, certificated. The route(s) over which an air carrier is authorized to provide air transportation by a Certificate of Public Convenience and Necessity issued by the Department of Transportation pursuant to section 401(d)(1) or (2) of the Act.

* * * * *

Section 418 cargo operations. The carriage, pursuant to section 418 of the Act, by aircraft of property and/or mail as a common carrier for compensation or hire in commerce between a place in any State of the United States, or the District of Columbia; or Puerto Rico, or the U.S. Virgin Islands, and a place in any other of those entities, or between places in the same State or other entity through the air-space over any place outside thereof, or between places within the District of Columbia, Puerto Rico, or the U.S. Virgin Islands: This includes commerce moving partly by aircraft and partly by other forms of transportation, as well as commerce moving wholly by aircraft.

* * * * *

Service, charter. Nonscheduled air transport service in which the party receiving transportation obtains exclusive use of an agreed upon portion of the total capacity of an aircraft with the remuneration paid by the party receiving transportation accruing directly to, and the responsibility for providing transportation is that of, the accounting air carrier.

* * * * *

Service, mixed. Transport service for the carriage of both first-class and coach passengers on the same aircraft.

* * * * *

Service, nonscheduled. Includes transport service between points not covered by Certificates of Public Convenience and Necessity issued by the Department of Transportation to the air carrier; services pursuant to the charter or hiring of aircraft; other revenue services not constituting an integral part of the services performed pursuant to published schedules; and related nonrevenue flights.

* * * * *

Stop, flag. A point on an air carrier's operating system that is scheduled to be served only when traffic is to be picked up or discharged.

* * * * *

Tariff, published. A publication containing fares and rates applicable to the transportation of persons or cargo and rules relating to or affecting such fares or rates of transportation, filed with the Department of Transportation.

* * * * *

Traffic, deplaned. A count of the number of passengers getting off and tons of cargo unloaded from an aircraft. For this purpose, passengers and cargo on aircraft leaving a carrier's system on interchange flights are considered as deplaning at the interchange point; and passengers and cargo moving from one operation to another operation of the same carrier, for which separate reports are renuired by the Department of Transportation, are considered as deplaning at the junction point.

Traffic, enplaned. A count of the number of passengers boarding and tons of cargo loaded on an aircraft. For this purpose, passengers and cargo on aircraft entering a carrier's system on interchange flights are considered as enplaning at the interchange point; and passengers and cargo moving from one operation to another operation of the same carrier, for which separate reports are required by the Department of Transportation, are considered as enplaning at the junction point.

* * * * *

Weight, passenger. For the purposes of this part, a standard weight of 200 pounds per passenger (including all baggage) is used for all civil operations and classes of service. Other weights may be prescribed in specific instances upon the initiative of the Department of Transportation or upon a factually supported request by an air carrier.

4. Section 1, *Introduction to System of Accounts and Reports*, would be amended by eliminating Section 1–9, *Conversion to This System of Accounts and Reports;* and revising Section 1–7 and 1–8 to read:

Sec. 1–7 Interpretation of accounts.

To the end that uniform accounting may be maintained, questions involving matters of accounting significance which are not clearly provided for should be submitted to the Director, Office of Aviation Information Management, Research and Special Programs Administration, for explanation, interpretation, or resolution.

Sec. 1–8 Address for reports and correspondence.

All reports required under this part and related correspondence shall be addressed to: Office of Aviation Information Management, DAI–1, Room 4125, Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590.

5. Section 2, *General Accounting Policies*, would be amended by:

A. Removing Sections 2–3, *Foreign Currency Transactions;* 2–5, *Liability Accruals;* 2–6, *Income Tax Accruals;* 2–7, *Extraordinary Items, Discontinued Operations, Prior Period Adjustments and Accounting changes;* 2–8, *Unaudited Items;* 2–9, *Improvements, Additions and Betterments;* 2–10, *Capitalization of Interest;* 2–11, *Accounting for Transactions in Gross Amounts;* 2–12, *Acquisition and Valuation of Assets;* 2–13, *Establishment of Allowances;* 2–14, *Depreciation and Amortization;* 2–15, *Contingent Assets and Contingent Liabilities;* 2–16, *Notes to Financial Statements;* 2–18, *Transactions Between Members of an Affiliated Group;* 2–19, *[Reserved];* 2–20, *Accounting for Leases;* and 2–21, *Accounting for Troubled Debt Restructurings.*

Section 2–17 [Redesignated as Section 2–3]

B. Redesignating section 2–17 as section 2–3.

6. Section 4, *General*, would be amended by revising paragraph (b) to read:

(a) * * *

(b) The balance sheet accounts prescribed in this system of accounts for each air carrier group are set forth in Section 3, Chart of Balance Sheet Accounts. The balance sheet elements to be included in each account are presented in section 6.

7. Section 5, *Balance Sheet Account Groupings*, in its entirety, would be removed and reserved.

8. Section 6, *Objective Classification of Balance Sheet Elements*, would be amended by:

A. Revising the description of accounts 1510.1, 1510.2 and 1530 to read:

1510.1 Investments in Investor Controlled Companies.

Record here the cost of investments in investor controlled companies except that permanent impairment in the value of securities may be reflected through charges to profit and loss classification 8100, Nonoperating Income or Expense—Net. This account shall also include the equity in undistributed earnings or losses since acquisition. In the event dividends are declared by such companies, the air carrier shall credit this account for its share in dividends declared and debit balance sheet account 1270 Accounts Receivable. This account shall separately state: (a) The cost of such investments at date of acquisition and (b) the equity in undistributed earnings or losses since acquisition.

1510.2 Investments in Other Associated Companies.

Record here the cost of investments in associated companies other than investor controlled companies. Cost shall represent the amount paid at the date of acquisition without regard to subsequent changes in the net assets through earnings or losses of such associated companies. However, permanent impairment in the value of securities may be reflected through charges to profit and loss classification 8100, Nonoperating Income or Expense—Net.

1510.3

* * * * *

1530 Other Investments and Receivables.

Record here notes and accounts receivable not due within one year, investments in securities issued by others, investments in leveraged leases, the noncurrent net investment in direct financing and sales-type leases, and the allowance for unrealized gain or loss on noncurrent marketable equity securities. Securities held as temporary cash investments shall not be included in this account but in balance sheet account 1100 Short-Term Investments. Investments in and receivables from associated companies which are not settled currently shall be included in balance sheet account 1510 Investments in Associated Companies.

B. Inserting a paragraph immediately following the center heading, *Operating Property and Equipment* to read:

Operating Property and Equipment

"Operating Property and Equipment" shall encompass items used in air transportation services and services related thereto.

C. Revising paragraph (a) of account 1601 to read:

1601 Airframes.

(a) Record here the total cost to the air carrier of airframes of all types and classes together with the full complement of instruments, appurtenances and fixtures comprising complete airframes including accessories necessary to the installation of engines and flight control and transmission systems, except as specifically provided otherwise in accounts 1602 and 1607. Also record here in separate subaccounts the costs of airframe overhauls accounted for on a deferral and amortization basis.

* * * * *

D. Revising paragraph (a) of account 1602 to read:

1602 Aircraft Engines.

(a) Record here the total cost to the air carrier of complete units of aircraft engines of all types and classes together with a full complement of accessories, appurtenances, parts and fixtures comprising fully assembled engines as delivered by the engine manufacturer ready for operation in test but without the accessories necessary to its installation in airframes. Also record here in separate subaccounts the costs of aircraft engine overhauls accounted for on a deferral and amortization basis.

* * * * *

E. Revising the description of account 1607 to read:

1607 Improvements to Leased Flight Equipment.

Record here the total cost to the air carrier incurred in connection with modification, conversion or other improvements to leased flight equipment. Also record here, in separate subaccounts, the costs of airframe and aircraft engine overhauls of leased aircraft accounted for on a deferral and amortization basis.

F. Revising paragraph (a) of account 1608 to read:

1608 Flight Equipment Rotable Parts and Assemblies.

(a) Record here the total cost to the air carrier of all spare instruments, parts, appurtenances and subassemblies related to the primary components of flight equipment units provided for in balance sheet accounts 1601 through 1607, inclusive. This account shall include all parts and assemblies of material value which are rotable in nature, are generally reserviced or repaired, are used repeatedly and possess a service life approximating that of the property type to which they relate. Items of an expendable nature which generally may not be repaired and reused, shall not be recorded in this account but in account 1300 Spare Parts and Supplies. Except for recurrent service sales, flight equipment parts recorded in this account shall not be charged to operating expense as retired. Profit or loss on sales of parts as a routine service to others shall be included in profit and loss account 14 General Service Sales, and parts sold shall be removed from this account at full cost irrespective of any allowance for depreciation which has been provided.

* * * * *

G. Revising paragraph (a) and the note following paragraph (b) of account 1629 to read:

1629 Flight Equipment Airworthiness Allowances.

(a) Record here accumulated provisions for overhauls of flight equipment.

(b) * * *

Note: At the option of the air carrier, the number "2629" may be assigned to this account for accounting purposes. However, for purposes of reporting on RSPA Form 41, the balance in this account shall be reported under account "1629."

H. Revising paragraphs (a) through (h) of account 1630 to read:

1630 Equipment.

* * * * *

(a) Equipment assigned to aircraft or active line operations as opposed to items held in stock for servicing passengers such as broilers, bottleware, dishes, food boxes, thermos jugs, blankets, first aid kits, etc. Spare items shall be carried in balance sheet account 1300 Spare Parts and Supplies and shall be charged directly to expense upon withdrawal from stock for replacing original complements.

(b) Equipment used in restaurants and kitchens.

(c) Equipment of all types and classes used in enplaning and handling traffic and in handling aircraft while on ramps, including motorized vehicles used in ramp service. Classes of equipment used interchangeably between handling aircraft on ramps and in maintaining aircraft may be classified in accordance with normal predominant use.

(d) Nonairborne equipment of all types and classes used in meteorological and communication services which is not a part of buildings.

(e) Equipment of all types and classes including motorized vehicles used in engineering and drafting services and in maintaining, overhauling, repairing and testing other classes of property and equipment.

(f) Property and equipment of all types and classes used in ground and marine transportation services.

(g) Property and equipment of all types and classes used in storing and distributing fuel, oil and water, such as fueling trucks, tanks, pipelines, etc.

(h) All other ground equipment of all types and classes such as medical, photographic, employees' training equipment, and airport and airway lighting equipment.

I. Revising the description of account 1636, 1640 and 1679 to read:

1636 Furniture, Fixtures, and Office Equipment.

Record here the total cost to the air carrier of furniture, fixtures and office equipment of all types and classes wherever used or located.

* * * * *

1640 Buildings.

Record here the total cost to the air carrier of owned buildings, structures and equipment and related improvements. Each air carrier shall maintain the following subaccounts in which the values fairly assignable to maintenance and other operations shall be separately recorded:

1640.1 Maintenance Buildings and Improvements.

1640.9 Other Buildings and Improvements.

* * * * *

1679 Land.

Record here the initial cost and the cost of improving land.

J. Revising paragraph (a) of account 1689 to read:

1689 Construction Work in Progress.

(a) Record here all direct and indirect costs of the air carrier that are expended for constructing and readying property and equipment of all types and classes for installation in operations. The amount reported shall reflect all such expenses that are accumulated to the balance sheet date. Where properly includable in the property and equipment classification, record here also the accumulated costs for uncompleted overhauls of airframes, aircraft engines, or other material units of property.

* * * * *

K. Revising paragraph (a) of account 1695 to read:

1695 Leased Property Under Capital Leases.

(a) Record here the total cost to the air carrier for all property obtained under capital leases.

* * * * *

L. Revising paragraph (a) of account 1696 to read:

1696 Leased Property Under Capital Leases—Accumulated Amortization.

(a) Record here accruals for amortization of leased property obtained under capital leases.

* * * * *

M. Adding a paragraph after the center heading *Nonoperating Property and Equipment* to read:

Nonoperating Property and Equipment

"Nonoperating Property and Equipment" shall encompass investments in property and equipment not separately accounted for within a nontransport division but assigned to other than air transportation and transport-related services, and property and equipment held for future use.

N. Revising the description of accounts 1797, 1798 and 2080 to read:

1797 Property on Operating-type Lease to Others and Property Held for Lease.

Record here the total cost to the air carrier of property on operating-type lease to others and property held for lease.

1798 Property on Operating-type Lease to Others and Property Held for Lease—Accumulated Depreciation.

Record here accruals for depreciation of property on operating-type leases to others and property held for lease.

2080 Current Obligations Under Capital Leases.

Record here the total current liability applicable to property obtained under capital leases.

O. Revising paragraph (b) of account 2120 to read:

2120 Accrued Vacation Liability.

* * * * *

(b) This account shall be credited and the applicable personnel compensation expense account concurrently charged with the cost of any lag between vacations accrued and vacations taken. Accruals may be based upon standard rates of lag, if such standard rates are verified by physical inventory and adjusted accordingly at least once each calendar year. Adjustments of balances in this account shall be cleared to applicable compensation expense accounts.

P. Revising the description of accounts 2130, 2210, 2280, 2340 and 2345 to read:

2130 Accrued Taxes.

(a) Record here accruals for currently payable income and other forms of taxes which constitute a charge borne by the air carrier as opposed to those collected as an agent for others.

(b) Each air carrier shall disclose in the footnotes of its RSPA Form 41 for each calendar quarter whether utilized credits are accounted for by the flow-through method or the deferred method. The method selected shall be consistently followed by the carrier.

2210 Long-Term Debt.

(a) Record here the face value of principal amount of debt securities issued or assumed by the air carrier and held by other than associated companies, which has not been retired or cancelled and is not payable within 12 months of the balance sheet date.

(b) In cases where debt coming due within 12 months is to be refunded, or where payment is to be made from assets of a type not properly classifiable as current, the amount payable shall not be removed from this account. In addition, this account shall include short-term debt obligations when both the intent to refinance the short-term obligations on a long-term basis is established and the ability to consummate this refinancing can be demonstrated.

2280 Noncurrent Obligations Under Capital Leases.

Record here the total noncurrent liability applicable to property obtained under capital leases.

2340 Deferred Income Taxes.

Record here credits and debits representing the net tax effect of material timing differences originating and reversing in the current accounting period, giving appropriate recognition to the portion of investment tax credits which would have been allowed if taxes were based on pretax accounting income by a reduction of the deferred tax provision.

2345 Deferred Investment Tax Credits.

Record here investment tax credits utilized as reduction of tax liabilities, when the carrier exercises the option to defer such credits for amortization over the service life of the related equipment.

2860 and 2950 [Removed].

Q. Removing accounts 2860, *Subscribed and Unissued Stock*, and 2950, *Net Unrealized Loss on Non-current Marketing Equity Securities.*

R. Revising paragraph (a) of account 2990 to read:

2990 Treasury Stock.

(a) Record here the cost of capital stock issued by the air carrier reacquired by it and not retired or canceled.

* * * * *

9. Section 7, *Chart of Profit and Loss Accounts*, would be amended by removing accounts 15, *Mutual Aid;* 15.1, *Receipts;* and 15.2, *Payments.*

10. Section 8, *General*, would be amended by revising paragraphs (d)(1)(i), (d)(2)(i), (d)(5), (d)(6), and (d)(7) to read:

* * * * *

(d) * * *

(1) *Operating revenues.* (i) This primary classification shall include revenues of a character usually and ordinarily derived from the performance of air transportation and air transportation-related services, which relate to services performed during the current accounting year, and adjustments of a recurrent nature applicable to services performed in prior accounting years.

(ii) * * *

(2) *Operating expenses.* (i) This primary classification shall include expenses of a character usually and ordinarily incurred in the performance

of air transportation and air transportation-related services, which relate to services performed during the current accounting year, and adjustments of a recurring nature attributable to services performed in prior accounting years.

* * * * *

(5) *Discontinued operations.* This primary classification (9600) shall include earnings and losses of discontinued nontransport operations and gains or losses from the disposal of nontransport operations the result of which are customarily accounted for through profit and loss objective accounts 86, 87 and 88.2.

(6) *Extraordinary items.* This primary classification (9700) shall include material items characterized by their unusual nature and infrequent occurrence.

(7) *Cumulative effect of changes in accounting principles.* This primary classification (9800) shall include the cumulative effect of material changes in accounting principles.

11. Section 10, *Functional Classification—Operating Expenses of Group I Air Carriers,* would be amended by:

A. Revising Paragraph (c) of account 5300 to read:

5300 Maintenance Burden.

* * * * *

c. This subfunction shall include only those expenses attributable to the current air transport operations of the air carrier. Maintenance burden associated with capital projects of the air carrier, other than overhauls of airframes and aircraft engines shall be allocated to such projects. Maintenance burden incurred in common with services to other companies and operating entities shall be allocated to such services on a pro rata basis unless the services are so infrequent in performance or small in volume as to result in no appreciable demands upon the air carrier's maintenance facilities. When overhauls of airframes or aircraft engines are as a consistent practice accounted for on an accrual basis instead of being expensed directly, maintenance burden shall be allocated to such overhauls on a pro rata basis. Standard burden rates may be employed for quarterly allocations of maintenance burden provided the rates are reviewed at the close of each calendar year. When the actual burden rate for the year differs materially from the standard burden rate applied, adjustment shall be made to reflect the actual cost incurred for the full accounting year. Allocations of maintenance burden to capital projects, and service sales to others shall be effected through the individual maintenance burden objective accounts, except that the air carrier may effect such allocations by credits to profit and loss account 77 Uncleared Expense Credits under circumstances in which the use of that account will not undermine the significance of the individual maintenance burden objective accounts in terms of the expense levels associated with the air carrier's air transport services. Maintenance burden allocated to overhauls shall be credited to profit and loss subaccounts 5372.1 or 5372.6 Airworthiness Allowance Provisions.

B. By revising the description of account 7000 to read:

7000 Depreciation and Amortization.

This function shall include all charges to expense to record losses suffered through current exhaustion of the serviceability of property and equipment due to wear and tear from use and the action of time and the elements, which are not replaced by current repairs as well as losses in serviceability occasioned by obsolescence, supersession, discoveries, change in popular demand or action by public authority. It shall also include charges for the amortization of capitalized developmental and preoperating costs, leased property under capital leases and other intangible assets applicable to the performance of air transportation. (See sections 6–1696, 1830 and 1890.)

12. Section 11, *Functional Classification—Operating Expenses of Group II and Group III Air Carriers,* would be amended by:

A. Revising paragraph (c) of account 5300 to read:

5300 Maintenance Burden.

* * * * *

c. This subfunction shall include only those expenses attributable to the current air transport operations of the air carrier. Maintenace burden associated with capital projects of the air carrier, other than overhauls of airframes and aircraft engines shall be allocated to such projects. Maintenance burden incurred in common with services to other companies and operating entities shall be allocated to such services on a pro rata basis unless the services are so infrequent in performance or small in volume as to result in no appreciable demands upon the air carrier's maintenance facilities. When overhauls of airframes or aircraft engines are as a consistent practice accounted for on an accrual basis instead of being expensed directly, maintenance burden shall be allocated to such overhauls on a pro rata basis. Standard burden rates may be employed for quarterly allocations of maintenance burden provided the rates are reviewed at the close of each calendar year. When the actual burden rate for the year differs materially from the standard burden rate applied, adjustment shall be made to reflect the actual costs incurred for the full accounting year. Allocations of maintenance burden to capital projects, and service sales to others shall be effected through the individual maintenance burden objective accounts, except that the air carrier may effect such allocations by credits to profit and loss account 77 Uncleared Expense Credits under such circumstances in which the use of that account will not undermine the significance of the individual maintenance burden objective accounts in terms of the expense levels associated with the air carrier's air transport services. Maintenance burden allocated to overhauls shall be credited to profit and loss subaccounts 5372.1 or 5372.6 Airworthiness Allowance Provisions.

B. By revising the description of account 7000 to read:

7000 Depreciation and Amortization.

This function shall include all charges to expense to record losses suffered through current exhaustion of the serviceability of property and equipment due to wear and tear from use and the action of time and the elements, which are not replaced by current repairs, as well as losses in serviceability occasioned by obsolescence, supersession, discoveries, change in popular demand or action by public authority. It shall also include charges for the amortization of capitalized developmental and preoperating costs, leased property under capital leases, and other intangible assets applicable to the performance of air transportation. (See section 6–1696, 1830 and 1890.)

13. Section 12, *Objective Classification—Operating Revenues and Expenses,* would be amended by:

A. Revising paragraphs (a) and (c) of account 05 to read:

05 Mail.

(a) Record here revenue from the transportation by air of both United States and foreign mail.

* * * * *

(c) This account shall be subdivided as follows by all air carrier groups:

05.1 Priority.

Record here revenue from United States mail for which transportation by air is provided on a priority basis.

05.2 Nonpriority.

Record here revenue from United States mail for which transportation by air is provided on a space available basis.

05.3 Foreign.

Record here revenue from the transportation by air of mail other than United States mail.

B. Revising the description of account 08 to read:

08 Public Service Revenues (Subsidy).

Record here amounts of compensation received pursuant to the provisions of section 419 of the Federal Aviation Act under rates established by the Department of Transportation for the provision of essential air service to small communities.

C. Removing the account title and description of account 15, *Mutual Aid.*

D. Revising paragraph (a) of account 39 to read:

39 Traffic Commissions.

(a) Record here charges by others, including associated companies, for commissions arising from sales of transportation. Commissions, fees or other charges incurred for general agency services, as opposed to commissions arising from sales of transportation, shall not be included in this account but in profit and loss account 43 General Services Purchased.

* * * * *

E. Revising the description of account 58 to read:

58 Injuries, Loss and Damage.

Record here the remainder of gains, losses or costs resulting from accidents, casualties or mishandlings, after offsetting insurance recoveries, as accumulated until finally determined in balance sheet account 1890 Other Assets and Deferred Charges. This account shall not include gains or losses from retirement of property and equipment resulting from casualties. Such gains or losses shall be recorded in appropriate capital gains or losses accounts.

F. Revising the description of account 61 to read:

61 Foreign Exchange Gains and Losses.

Record here gains or losses from transactions involving currency translations resulting from normal, routine, current fluctuations in rates of foreign exchange. Gains or losses of a nonroutine abnormal character and gains or losses which arise from long-term debt principal and interest transactions shall not be entered in this account but in profit and loss account 85, Foreign Exchange Gains and Losses.

G. Revising paragraph (b) of account 74 to read:

74 Amortization.

* * * * *

(b) This account shall be subdivided as follows by all air carrier groups:

74.1 Developmental and Preoperating Expenses.

Record here amortization of the cost of projects carried in balance sheet account 1830 Unamortized Developmental and Preoperating Costs.

74.2 Other Intangibles.

Record here amortization of the cost of intangibles not provided for otherwise.

14. Section 14, *Objective Classification—Nonoperating Income and Expense,* would be amended by revising the description of accounts 83.1, 83.2, 83.3, 83.4, 85, 88.1, 88.3, 88.4 and 89.1 to read:

* * * * *

83.1 Imputed Interest Capitalized—Credit

Record here credits related to imputed interest capitalized and recorded in asset accounts.

83.2 Imputed Interest Deferred—Debit.

Record here debits related to imputed interest deferred in balance sheet account 2390, Other deferred credits.

83.3 Imputed Interest Deferred—Credit.

Record here periodic credits for imputed interest, cleared to this account as the amount of such interest in the asset accounts is amortized.

83.4 Interest Capitalized—Credit.

Record here interest which is capitalized and recorded in asset accounts.

* * * * *

85 Foreign Exchange Gains and Losses.

Record here gains and losses from transactions involving currency translations resulting from nonroutine abnormal changes in rates of foreign exchange and gains or losses which arise from translations of long-term debt principal and interest transactions.

* * * * *

88.1 Intercompany Transaction Adjustment—Credit.

Record here all intercompany credits for any differences between amounts at which transactions between the air carrier and its nontransport divisions or associated companies are initially recorded and are to be settled.

* * * * *

88.3 Net Unrealized Gain or Loss on Marketable Equity Securities.

Record here the net unrealized gain or loss on the valuation of marketable equity securities.

88.4 Net Realized Gain or Loss on Marketable Equity Securities.

Record here the net realized gain or loss on the valuation of marketable equity securities.

* * * * *

89.1 Intercompany Transaction Adjustment—Debit.

Record here all intercompany debits for any differences between amounts at which transactions between the air carrier and its nontransport divisions or associated companies are initially recorded and are to be settled.

* * * * *

15. Section 15, *Objective Classification—Income Taxes for Current Period,* would be amended by revising the description of account 91 to read:

91 Provision for Income Taxes.

(a) Record here quarterly provisions for accruals of Federal, State, local, and foreign taxes based upon net income, computed at the normal tax and surtax rates in effect during the current accounting year. In general, this account shall reflect provisions within each period for currently accruing tax liabilities as actually or constructively computed on tax returns, and any subsequent adjustments. This account shall include credits for refund claims arising from the carryback of losses in the year in which the loss occurs, credits for the carry-forward of losses in the year to which the loss is carried, and investment tax credits in the year in which each credit is utilized to reduce the liability for income taxes.

(b) Income taxes shall be allocated among the transport entities of the air carrier, its nontransport divisions, and members of an affiliated group. Under circumstances in which income taxes are determined on a consolidated basis by an air carrier and other members of an affiliated group, the income tax expense to be recorded by the air carrier shall be the same as would result if determined for the air carrier separately for all time periods, except that the tax effect of carryback and carryforward operating losses, investment tax credits, or other tax credits generated by operations of the air carrier shall be recorded by the air carrier during the period in which applied in settlement of the taxes otherwise attributable to any member, or combination of members, of the affiliated group. Any difference between the income tax so recorded and

OL
53
SS
57
MR
24
988
MI

the amount at which settlement is to be made shall be recorded in subaccount 88.1 Intercompany Transaction Adjustment—Credit or in subaccount 89.1 Intercompany Transaction Adjustment—Debit, as is appropriate.

(c) This account shall be subdivided as follows by all carrier groups:

91.1 Income Taxes Before Investment Tax Credits.

Record here accruals of income taxes based upon taxable income of the period.

91.2 Investment Tax Credits Utilized.

Record here investment tax credits utilized to reduce the accrued liability for income taxes.

16. Section 17, *Objective Classification—Extraordinary Items,* would be amended by revising the description of account 98 to read:

98 Extraordinary Items.

Record here material items characterized by their unusual nature and infrequent occurrence. Events or transactions which are material and either unusual or nonrecurring, but not both, shall not be recorded in this account but should be disclosed on RSPA Form 41 Schedule P–2 and identified both as to their nature and financial effects.

SECTION 24—[AMENDED]

17. Section 24, *Profit and Loss Elements,* would be amended by:

A. Revising the title and paragraph (e), and removing paragraphs (f) through (p) to Schedule P–2 to read:

Schedule P–2—Notes to RSPA Form 41 Report

* * * * *

(e) Each scheduled air carrier shall include on this schedule a description of each interruption in air transport operations, the aggregate effect of which is ten (10) percent or more of the scheduled revenue plane-miles which, except for the interruption, would have been operated during the month or either of 2 consecutive months affected. The information to be reported for each such interruption in operations shall consist of:

(1) For the report period in which partial or complete interruption first occurs, the nature of the interruption and dates of partial and/or complete cessation of operations, as applicable; (2) for each report period until full resumption of operations, an estimate of the revenue plane-miles canceled in each month of the quarter because of the interruption; and (3) for the report period in which scheduled operations are resumed, dates of partial and/or complete resumption, as applicable.

B. Revising paragraph (f) of Schedule P–5.2 to read:

Schedule P–5.2—Aircraft Operating Expenses

* * * * *

(f) Item 79.6 "Applied Maintenance Burden" shall reflect a memorandum allocation by each air carrier of the total expenses included in subfunction 5300 "Maintenance Burden" between maintenance of flight equipment, by aircraft type, and maintenance of ground property and equipment. The allocation of subfunction 5300 (maintenance burden) shall include the net effect of charges and credits to profit and loss account 5272 Flight Equipment Airworthiness Provisions.

* * * * *

18. RSPA Form 41 Report (which will not appear in the Code of Federal Regulations) would be revised by removing Account No. 2800 under Stockholders' Equity as shown in Exhibit A to this document.

Issued in Washington, DC, on March 10, 1988.

M. Cynthia Douglass,

Administration, Research and Special Programs Administration, DOT.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. 9175]

General Nutrition, Inc.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would prohibit, among other things, a Pittsburgh, Pa. corporation, that manufactures and sells food supplements, from making false claims for products, unless it possesses reliable and competent scientific evidence that substantiates such claims. The consent order would also require respondent to pay a total of $600,000 to certain organizations for scientific research in the fields of nutrition, obesity, or physical fitness.

DATE: Comments must be received on or before May 23, 1988.

ADDRESS: Comments should be directed to: FTC/Office of the Secretary, Room 136, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: C. Lee Peeler, FTC/S–4002, Washington, DC 20580, (202) 326–3090.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 3.25(f) of the Commission's Rules of Practice (16 CFR 3.25(f)), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

List of Subjects in 16 CFR Part 13

Food supplements, Trade practices.

Agreement Containing Consent Order To Cease and Desist

The agreement herein, by and between General Nutrition, Inc., a corporation, hereafter sometimes referred to as respondent, and its attorney, and counsel for the Federal Trade Commission, is entered into in accordance with the Commission's Rule governing consent order procedures. In accordance therewith the parties hereby agree that:

1. General Nutrition, Inc. is a corporation organized, existing and doing business under and by virtue of the laws of the Commonwealth of Pennsylvania, with its office and principal place of business located at 921 Penn Avenue, in the City of Pittsburgh, Commonwealth of Pennsylvania.

2. Respondent has been served with a copy of the complaint issued by the Federal Trade Commission on March 20, 1984, charging respondent with violations of Sections 5 and 12 of the Federal Trade Commission Act, and has filed an answer to said complaint denying said charges. After a trial, an Administrative Law Judge issued an initial decision on February 24, 1986, ruling that counsel for the Federal Trade Commission proved all of the allegations contained in the complaint. Respondent subsequently filed an appeal to the Commission. The Federal Trade Commission staff, on January 4, 1984, initiated a separate investigation of certain other acts and practices of respondent. The consent order contained herein is intended to resolve both matters.

3. Respondent admits all the jurisdictional facts set forth in the Commission's proposed amended complaint in this proceeding.

4. Respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

5. This agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the respondent, in which event it will take such action as it may consider appropriate, or issue and serve its decision, in disposition of the proceeding.

6. This agreement is for settlement purposes only and does not constitute an admission by respondent that the law has been violated as alleged in the said copy of the proposed amended complaint.

7. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 3.25(f) of the Commission's Rules, the Commission may without further notice to respondent, (1) issue its amended complaint corresponding in form and substance with the draft of the amended complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the amended complaint and decision containing the agreed-to order to respondent's address as stated in this agreement shall constitute service. Respondent waives any right it might have to any other manner of service. The amended complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or in the agreement may be used to vary or to contradict the terms of the order.

8. Respondent has read the proposed amended complaint and the order contemplated hereby. It understands that once the order has been issued. It will be required to file one or more compliance reports showing that it has fully complied with the order. Respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is ordered that respondent General Nutrition Incorporated, a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the manufacture, advertising, labeling, packaging, offering for sale, sale, or distribution of "Healthy Greens," or any substantially comparable product, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from

representing, directly or by implication, contrary to fact, that any finding of the National Research Council, National Cancer Institute, American Cancer Society, or U.S. Government, or any finding contained in the Report entitled *Diet, Nutrition, and Cancer*, supports the claim that use of such product is associated with a reduction in incidence of any type of cancer.

II

It is further ordered that respondent, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the manufacture, advertising, labeling, packaging, offering for sale, sale, or distribution of any product in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from misrepresenting in any manner, directly or by implication, the purpose, content, sample, reliability, results or conclusions of any scientific test, research article, or any other scientific opinion or data, with respect to such product's ability to cure, treat, prevent or reduce the risk of developing any disease in humans.

III

It is further ordered that respondent, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the manufacture, advertising, labeling, packaging, offering for sale, sale, or distribution of "Challenge Growth and Training Vita-Pak," "Challenge Free Form Amino Acids," "Life Expander Growth Hormone Releaser," or "24 Hour Diet Plan," or any other free form amino acid nutrient supplement containing arginine, ornithine, tryptophane or a combination thereof, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing, directly or by implication, that:

A. Any such nutrient supplement will stimulate greater production or release of human growth hormone in users than in non-users;

B. Any such nutrient supplement will aid a user in achieving greater or faster muscular development than a non-user or will aid a user in achieving muscular development similar to or superior to the kind generally believed by bodybuilders to be achievable through the use of anabolic steroids, e.g., rapid or substantial muscular development;

C. Any such nutrient supplement will burn away fat or otherwise alter human metabolism to use up or "burn" stored fat, rather than stored carbohydrates, or will aid a user in attaining greater weight loss during sleep than a non-user; or

D. Any such nutrient supplement will expand, extend, or prolong life, or retard aging.

IV

It is further ordered that respondent, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, do forthwith cease and desist from using the expression "Growth Hormone Releaser," or other expressions of similar meaning as a brand name or description for any product, unless such product stimulates the body to produce, or the pituitary gland to release, significantly greater amounts of human growth hormone in users than in non-users and, at the time of using such expression, respondent possesses and relies upon reliable and competent scientific evidence that substantiates the representation. "Reliable and competent scientific evidence" shall mean for purposes of paragraphs IV and V of this order those tests, analyses, research, studies, or other evidence conducted and evaluated in an objective manner by persons qualified to do so, using procedures generally accepted by others in the profession or science to yield accurate and reliable results.

V

It is further ordered that respondent, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the manufacture, advertising, labeling, packaging, offering for sale, sale, or distribution of any product in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from making any representation, directly or by implication:

A. Concerning such product's ability to cure, treat, prevent or reduce the risk of developing any disease in humans;

B. That such product assists or enables a user to lose or control weight or fat, or suppress appetite;

C. That such product expands, extends, or prolongs life or retards aging; or

D. That such product aids a user in achieving greater or faster muscular development than a non-user or aids a user in achieving greater endurance, strength, power or stamina or shorter exercise recovery or recuperation time than a non-user

unless, at the time of making such representation (V A–D above), respondent possesses and relies upon reliable and competent scientific evidence that substantiates the representation.

Provided however, that respondent shall not be liable under this paragraph for any representation contained on a package label or package insert for a product that meets all of the following conditions:

1. The product is manufactured and distributed by a third party and is not manufactured or distributed exclusively for respondent;

2. The product is generally available at competing retail outlets;

3. The product is not identified with respondent and does not contain respondent's name or logo;

4. The product was not developed or manufactured at the instigation or with the assistance of respondent; and

5. The product representation is not otherwise advertised or promoted by respondent.

VI

It is further ordered that respondent shall pay, in lieu of redress, the aggregate sum of six hundred thousand dollars ($600,000.00) divided in three equal parts to the American Diabetes Association, Inc., the American Cancer Society, Inc., and the American Heart Association. These funds shall be designated for the support of research or fellowships in the fields of nutrition, obesity or physical fitness. Respondent shall make payment in three installments, each installment to be divided equally among the recipients: the first installment in the amount of $300,000.00 within 30 days of the date of service of this order; the second in the amount of $200,000.00 within one year and 30 days of the date of service of this order; and, the third in the amount of $100,000.00 within two years and 30 days of the date of service of this order. In the event any default in payment occurs and continues for 10 days beyond the due date of payment and the giving of notice of such default, the entire remaining amount shall then become due and payable.

VII

It is further ordered that for three (3) years after the last date of dissemination of the representation, respondent, or its successors and assigns, shall maintain and upon request

BEST COPY AVAILABLE

make available to the Federal Trade Commission for inspection and copying copies of:

1. All materials that were relied upon by respondent in disseminating any representation covered by this order; and

2. All tests, reports, studies, surveys, demonstrations or other evidence in its possession or control that contradict, qualify, or call into question any representation made by respondent that is covered by this order.

VIII

It is further ordered that respondent shall notify the Commission at least thirty (30) days prior to any proposed change in the respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of this order.

IX

It is further ordered that respondent shall, within sixty (60) days after service of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order.

X

It is further ordered that respondent shall forthwith distribute a copy of this order to each of its operating divisions and to all distributors of products manufactured or marketed by respondent.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted, subject to final approval, an Agreement containing a Consent Order from General Nutrition, Inc., a Pennsylvania corporation (the "respondent"). Under this Agreement, the respondent is prohibited from making certain false claims and will cease and desist from making certain other claims for products, unless it possesses reliable and competent scientific evidence that substantiates such claims. The consent Order also requires the respondent to pay a total of $600,000 to certain organizations for scientific research.

The proposed Consent Order has been placed on the public record for sixty (60) days for receipt of comments by interested persons. Comments received during the period will become part of the public record. After sixty (60) days, the Commission will again review the Agreement and the comments received and will decide whether it should withdraw its acceptance of the Agreement and take other appropriate action, or make final the proposed Order contained in the Agreement.

The proposed Consent Order is intended to settle two separate matters involving the respondent. The Commission issued an administrative Complaint (D. 9175) against the respondent on March 20, 1984, alleging that the respondent made false and unsubstantiated claims that its "Healthy Greens" food supplement and the ingredients in "Healthy Greens" were effective in reducing the risk of cancer. After a trial on the merits before an Administrative Law Judge ("ALJ"), the ALJ ruled that complaint counsel (attorneys from the FTC's Division of Advertising Practices) had proved all the allegations of the Complaint. Respondent appealed this ruling to the Commission. After post-trial appeal briefs were filed by the respondent and complaint counsel, but before oral argument, a proposed Amended Complaint and Consent Agreement were proferred to the Secretary of the Federal Trade Commission together with a Joint Motion to Withdraw from Litigation. The Commission withdrew the matter from litigation on February 4, 1987.

In addition to this litigated matter, the FTC's Chicago Regional Office has conducted an investigation of the respondent concerning advertisements for six food supplements: "Challenge Growth and Training Vita-Pak," "Challenge Free Form Amino Acids," "Life Expander Growth Hormone Releaser," the "24 Hour Diet Plan," "L-Ornithine" and "L-Arginine."

The Amended Complaint accompanying the proposed Consent Order alleges that in connection with promoting "Healthy Greens" and the six products that were the subject of the Chicago Regional Office investigation, the respondent engaged in deceptive acts and practices in violation of Section 5 of the Federal Trade Commission Act and that the respondent disseminated false advertisements in violation of Section 12 of the Federal Trade Commission Act. According to the Amended Complaint, the respondent falsely represented that: (1) A 1982 Report of the National Academy of Sciences/National Research Council, entitled, *Diet, Nutrition and Cancer*, supported the claim that use of food supplements such as "Healthy Greens" was associated with a reduction in the incidence of certain cancers in humans; (2) research indicated that Vitamin E plays an important role in reducing the risk of cancer; (3) use of Healthy Greens is associated with a reduction in the incidence of certain cancers in humans; and (4) Vitamin E plays an important role in reducing the risk of cancer. The Complaint alleges that these first two claims were false and that the last two claims were unsubstantiated.

The Amended Complaint also alleges that respondent's advertisements were deceptive because respondent's claims that one or more of the other six products—"Challenge Growth and Training Vita-Pak," "Challenge Free Form Amino Acids," "Life Expander Growth Hormone Releaser," the "24 Hour Diet Plan," "L-Ornithine" and "L-Arginine"—could increase muscularity and strength, "burn" fat or "expand" life were false and unsubstantiated.

The Consent Order contains provisions designed to prevent the respondent from engaging in similar allegedly illegal acts and practices in the future.

Part I of the Order prohibits the respondent from representing, contrary to fact, that any finding of the National Research Council, National Cancer Institute, American Cancer Society or the United States Government or any finding contained in the report entitled, *Diet, Nutrition and Cancer*, supports the claim that use of "Healthy Greens" or a substantially comparable product is associated with a reduction in incidence of any type of cancer.

Part II of the Order prohibits the respondent from misrepresenting the purpose, content, sample reliability, results or conclusions of any scientific test, research article or any data with respect to any product's ability to cure, treat, prevent or reduce the risk of developing any disease in humans.

Part III of the Order prohibits the respondent from misrepresenting that "Challange Growth and Training Vita-Pak," "Challange Free Form Amino Acids," "Life Expander Growth Hormone Releaser" and the "24 Hour Diet Plan," or any free form amino acid nutrient supplement containing one of three specified amino acids, will: (1) Stimulate greater production or release of human growth hormone in users than in non-users; (2) aid a user in achieving greater or faster muscular development than a non-user; (3) "burn" away fat or otherwise alter human metabolism to use up or "burn" stored fat rather than carbohydrates, or aid a user in attaining greater weight loss during sleep than a non-user; or (4) expand, extend or prolong life, or retard aging.

Part IV of the Order prohibits the respondent from using the brand name or description "Growth Hormone Releaser" unless the respondent can substantiate the claim inherent in use of that name or description.

Part V of the Order prohibits the respondent from representing, without adequate substantiation, that any product will: (1) Cure, treat, prevent or reduce ~~the risk of developing~~ any disease in humans; (2) assist or enable a user to lose or control weight or fat, or suppress appetite; (3) expand, extend or prolong life or retard aging; or (4) aid a user in achieving greater or faster muscular development than a non-user or aid a user in achieving greater endurance, strength, power or stamina or shorter exercise recovery or recuperation time than a non-user. Part V of the Order, however, does not apply to label or package representations contained on the products sold by respondent that are manufactured or distributed by other companies.

Part VI of the Order requires the respondent to pay a total of $600,000 over approximately a two-year period equally to the American Diabetes Association, Inc., the American Cancer Society, Inc., and the American Heart Association. These funds are to be used for research or fellowships in the fields of nutrition, obesity, or physical fitness.

Part VII of the Order requires the respondent to: (1) Retain records that respondent contends support any future advertising representation covered by the Consent Order; and (2) retain records that contradict any such representation.

Part VIII of the Order requires the respondent to give the Federal Trade Commission prior notification of any changes in the respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change which may affect its compliance obligations under the Order.

The purpose of this analysis is to facilitate public comment on the proposed Order, and it is not intended to constitute an official interpretation of the Agreement and proposed Order, or to modify in any way their terms.

Emily H. Rock,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 916

Public Comment Period and Opportunity for Public Hearing on and Amendment to the Kansas Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement, (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSMRE is announcing procedures for a public comment period and for a public hearing on the adequacy of amendments submitted by the State of Kansas to amend its permanent regulatory program (hereinafter referred to as the Kansas program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

The proposed amendments to Kansas' regulations are intended to render Kansas' regulations consistent with the revised Federal regulations contained in 30 CFR Chapter VII. The proposed regulation changes are in the areas of definitions, hydrology, coal exploration, approximate original contour, coal waste disposal, revegetation success, land use, protection of cultural resources and lands unsuitable for surface mining.

This notice sets forth the times and locations that the Kansas program and proposed amendments to that program are available for public inspection, the comment during which interested persons may submit written comments on the proposed amendments and procedures that will be followed regarding the public hearing, if one is requested.

DATES: Written comments relating to Kansas' proposed modification of its program not received on or before 4:00 p.m. c.s.t. on April 25, 1988, will not necessarily be considered in the decision process. A public hearing on the adequacy of the amendments will be held upon request on April 18, 1988. Any person interested in making an oral or written presentation at the public hearing should contact Mr. William J. Kovacic at the Kansas City Field Office by the close of the business on or before April 8, 1988. If no one has contacted Mr. Kovacic to express an interest in participating in the hearing by that date, the hearing will not be held. If only one person has so contacted Mr. Kovacic, a public meeting may be held in place of the hearing. If possible, a notice of the meeting will be posted in advance at the locations listed under "ADRESSES."

ADDRESSES: Written comments should be mailed or hand delivered to Mr. William J. Kovacic, Director, Kansas City Field Office, Office of Surface Mining Reclamation and Enforcement, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64106. Copies of the Kansas program, the proposed modifications to the program, and all written comments received in response to this notice will be available for public review at the Kansas City Field Office, OSMRE Headquarters Office, and the office of the State regulatory authority listed below, Monday through Friday, 9:00 a.m. to 4:00 p.m. c.s.t., excluding holidays. Each requester may receive, free of charge, one copy of the proposed amendments by contacting OSMRE's Kansas City Field Office.

Kansas City Field Office, Office of Surface Mining Reclamtion and Enforcement, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64106; Telephone: (816) 374-5527.

Office of Surface Mining Reclamation and Enforcement, 1100 L Street, NW., Room 5131, Washington, DC 20240; Telephone: (202) 343-5492.

Mined Land Conservation and Reclamation Board, 107 West 11th Street, P.O. Box 1418, Pittsburg, Kansas 66762; Telephone: (316) 231-8615.

FOR FURTHER INFORMATION CONTACT: Dr. William J. Kovacic, Director, Kansas City Field Office, Office of Surface Mining Reclamation and Enforcement, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64106; Telephone: (816) 374-5527.

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of the Interior approved the Kansas program on January 21, 1981 (46 FR 5892). Information pertinent to the general background and revisions to the permanent program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Kansas program can be found in the January 21, 1981 **Federal Register** (46 FR 5892). Subsequent actions concerning proposed amendments and the conditions of approval are codified at 30 CFR 916.10, 916.12, 916.15, 916.16, and 916.20.

II. Submission of Amendments

On January 28, 1988 (Administrative Record No. KS-407) the State of Kansas submitted to OSMRE amendments to its approved regulatory program. The proposed regulations would amend the Kansas Administrative Regulations

(K.A.R.) of the Kansas Mined Land Conservation and Reclamation Board (MLCRB).

The Kansas MLCRB has incorporated by reference certain Federal regulations set out in 30 CFR Parts 701 through 817 as they existed on July 1, 1987. The list of amendments proposed to OSMRE contains the following regulations: K.A.R. 47–2–75 Definitions, K.A.R. 47–3–42 Application for mining permit, K.A.R. 47–7–2 Coal exploration, K.A.R. 47–9–1 Performance standards, K.A.R. 47–10–1 Underground mining, and K.A.R. 47–12–4 Land unsuitable for surface mining.

These revisions are proposed by the State of Kansas in response to 14 required program amendments placed on the Kansas program at 30 CFR 916.16 in the **Federal Register** (52 FR 19502) dated May 26, 1987. The revisions are also in response to a letter (Administrative Record No. KS–395) under 30 CFR Part 732 from OSMRE dated June 9, 1987 concerning the protection of historic properties during coal exploration as required in the final rule published by OSMRE in the **Federal Register** dated February 10, 1987 (52 FR 4244).

III. Public Comment Procedures

In accordance with the provisions of 30 CFR 732.17, OSMRE is now seeking comment on whether the amendments proposed by Kansas satisfy the requirements of 30 CFR 732.15 for the approval of State program amendments. If the amendments are deemed adequate, they will become part of the Kansas program.

Written Comments

Written comments should be specific, pertain only to the issue proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "Dates" or at locations other than Kansas City, Missouri, will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under "FOR FURTHER INFORMATION CONTACT" by 4:00 p.m. c.s.t. April 8, 1988. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare appropriate questions.

The public hearing will continue on the specified date with all persons scheduled to comment being heard first, and those persons present in the audience who wish to comment being heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

If only one person requests an opportunity to comment, a public meeting, rather than a public hearing, may be held. Persons wishing to meet with OSMRE representatives to discuss the proposed amendments may request a meeting at the OSMRE office listed under "**ADDRESSES**" by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT.**" All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under "**ADDRESSES.**" A written summary of each meeting will be made a part of the Administrative Record.

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD7–88–02]

Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, Florida

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the Port of Miami, the Coast Guard is considering a change to the regulations governing the Dodge Island drawbridges at Miami, Florida by permitting an extension of the existing regulation and allowing the draw to remain closed during certain periods. This proposal is being made because periods of peak vehicular traffic have been identified. The proposed regulations would be in effect only until the newly permitted high-level fixed bridge between the mainland and Dodge Island is constructed and opened to vehicular traffic. Construction of this new bridge is scheduled to begin in approximately two to three months and completion is expected to be accomplished by March 25, 1991. This action should accommodate the needs of vehicular traffic and still provide for the reasonable needs of navigation.

DATE: Comments must be received on or before May 9, 1988.

ADDRESSES: Comments should be mailed to Commander (oan), Seventh Coast Guard District, Brickell Plaza Federal Building, 909 SE. 1st Avenue, Miami, Florida 33131–3050. The comments and other materials referenced in this notice will be available for inspection and copying on the 4th Floor, of the Brickell Plaza Federal Building, 909 SE. 1st Ave., Miami, Florida. Normal office hours are between 7:30 a.m. and 4 p.m., Monday through Friday, except holidays. Comments also may be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Mr. Brodie Rich (305) 536–4103.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgement that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Seventh Coast Guard District, will evaluate all communications received and determine a course of final action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are Mr. Brodie Rich, Bridge Administration Specialist, project officer, and Lieutenant Commander S.T. Fuger, Jr., project attorney.

Discussion of Proposed Regulations

The Dodge Island drawbridges presently open on signal, except that, from 7:15 a.m. to 5:45 p.m. Monday through Saturday, except federal holidays, the drawbridges need open only on the quarter-hour and three quarter hour. Highway traffic data shows that two peak periods of vehicular traffic occur during the arrival and departure of passenger cruise vessels. The Port of Miami wants closed periods on Saturdays and Sundays to accommodate these peak vehicular traffic movements. The vehicular traffic counts support closed periods during morning and afternoon peak periods on Saturdays. Therefore, the Coast Guard is proposing specific closed periods on Saturdays. During these closed periods, vessels would have the option of diverting around Dodge Island via Government Cut, a distance of 5.85 statute miles. Drawbridge openings and highway traffic data do not justify similar closed periods on Sundays. Vehicular traffic is approximately one-half of that experienced on Saturdays and the number of vessels transiting the ICW requiring draw openings is much greater.

However, to eliminate back-to-back draw openings, the Coast Guard is proposing to extend the existing weekday regulations to include the peak traffic periods on sundays. Public vessels of the United States, tugs with tows, and vessels in a situation where a delay would endanger life or property would continue to be passed at any time.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. We conclude this because the regulations exempt tugs with tows. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations, as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.261(pp) is revised to read as follows:

§ 117.261 Atlantic Intracoastal Waterway from St Marys River to Key Largo.

* * * * *

(pp) *Dodge Island bridges, mile 1089.4 at Miami.* The draws shall open on signal; except that from 7:15 a.m. to 5:45 p.m. Monday through Saturday except federal holidays and from 9:15 a.m. to 2:15 p.m. on sundays, the draws need open only on the quarter-hour and three quarter-hour. From 9:20 a.m. to 11:10 a.m. and from 12:20 p.m. to 2:10 p.m. on Saturdays, the draws need not open.

* * * * *

Dated: March 9, 1988.

M. J. O'Brien,

Captain, U.S. Coast Guard, Acting Commander, Seventh Coast Guard District.

[FR Doc. 88–6469 Filed 3–23–88; 8:45 am]

BILLING CODE 4910-14-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

33 CFR Part 334

Danger Zone; Pacific Ocean Between Point Sal and Point Conception, CA

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Corps of Engineers proposes to amend the regulations which established a danger zone in the waters of the Pacific Ocean near Vandenberg Air Force Base, California, by deleting the requirement for periodic review of the regulations. These proposed amendments will, if approved, establish the danger zones for an infinite period of time without scheduled reviews.

DATE: Written comments must be submitted on or before April 25, 1988.

ADDRESS: HQDA, CECW-OR, Washington, DC 20314–1000.

FOR FURTHER INFORMATION CONTACT: Mr. Cliff Rader at (213) 894–5606 or Mr. Sam Collinson at (202) 272–1782.

SUPPLEMENTARY INFORMATION: The public is invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each person submitting a comment should include his or her address, identify this notice and give the reasons for the comment. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests are received and the Corps of Engineers determines that the opportunity to make oral presentations will aid the rulemaking process.

In accordance with regulations presently promulgated in 33 CFR 334.1130(b)(11), the danger zone regulations shall be in effect until further notice, but a 5-year review was required during September 1987. The Corps of Engineers and the Air Force have completed the required 5-year review of the regulations. The danger zones continue to be essential for Air Force operations and the regulations are presently adequate. We do not however, see a continuing need for specific dates to review the regulations. The Corps of Engineers periodically reviews these regulations as part of its normal maintenance program. The Air Force is also required to notify the Corps if conditions change sufficiently to warrant amending the regulations or deleting the regulations when appropriate.

Economic Assessment and Certification

This proposed rule is issued with respect to a military function of the Defense Department and provisions of Executive Order 12291 do not apply. The Corps of Engineers certifies that if adopted, this proposal will have no significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 334

Navigation (water), Transportation, Danger zones.

Accordingly, the Corps of Engineers proposes to amend § 334.1130(b)(11) by deleting the 2nd sentence which reads "They shall be reviewed again during September 1987" as set forth below.

PART 334—DANGER ZONES AND RESTRICTED AREA REGULATIONS

1. The authority citation for Part 334 continues to read as follows:

Authority: 40 STAT. 266; (33 U.S.C. 1) and 40 STAT. 892; (33 U.S.C. 3)

2. Section 334.1130 (b)(11) is revised to read as follows:

§ 334.1130 Pacific Ocean, Western Space and Missile Center (WSMC), Vandenberg AFB, California; danger zones.

* * * * *

(b) * * *

(11) The regulations in this section shall be in effect until further notice.

Date: March 2, 1988.

Approved:

C. Hilton Dunn, Jr.,

Colonel, Corps of Engineers, Executive Director of Civil Works.

BILLING CODE 7035-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Public Hearing on the Proposed Endangered Status for the Independent Valley Speckled Dace and the Clover Valley Speckled Dace

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; Notice of Public Hearing.

SUMMARY: The U.S. Fish and Wildlife Service (Service) gives notice that a public hearing will be held for the proposed determination of endangered status for the Clover Valley speckled dace (*Rhinichthys osculus oligoporus*) and the Independence Valley speckled dace (*Rhinichthys osculus lethoporus*). The former is known from only two small springs in northwestern Nevada and the latter from only one spring in the same area. Both are in jeopardy because of their extremely limited distribution, the vulnerability of their habitats to perturbation by human irrigation practices, and the introduction of non-native aquatic species. The public hearing will allow comments on this proposal to be submitted from all interested parties.

DATE: The public hearing will be held from 7:00 to 9:00 p.m. on Thursday, April 7, 1988.

ADDRESSES: The public hearing will be held at the Wells High School, 115 Lake Avenue, Wells, Nevada 89835. Written comments and materials will still be accepted until April 25, 1988, and should be sent to the Regional Director, U.S. Fish and Wildlife Service, 500 N.E. Multnomah Street, Suite 1692, Portland, Oregon 97232.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne S. White, Chief, Division of Endangered Species, at the above address (503-231-6150 or FTS 429-6150).

SUPPLEMENTARY INFORMATION:

Background

The Independence Valley speckled dace and Clover Valley speckled dace are very limited in distribution in northwestern Nevada. Both are in jeopardy because of their extremely limited distribution, the vulnerability of their habitats to perturbation by human irrigation practices, and the introduction of non-native aquatic species. A proposal of endangered status for both fish was published in the **Federal Register** (52 FR 35282) on September 18, 1987. Extensions of the comment period were published in the **Federal Register** (52 FR 45976) on December 3, 1987, and (53 FR 5434) on February 24, 1988. The comment period now closes April 25, 1988.

On December 15, 1987, and January 15, 1988, a public hearing on this proposal was requested by Mr. Norman Sholes and Mr. Robert Wright, both residents in the area that the dace occur.

The U.S. Fish and Wildlife Service will hold a public hearing on proposed endangered status for the Independence Valley speckled dace and Clover Valley speckled dace from 7:00 to 9:00 p.m., on Thursday, April 7, 1988, at the Wells High School, Wells, Nevada.

Author

The primary author of this notice is Mr. Wayne S. White, U.S. Fish and Wildlife Service, 500 N.E. Multnomah Street, Suite 1692, Portland, Oregon 97232 (503-231-6150 or FTS 429-6150).

Authority: The authority for this action is the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq;* Pub. L. 93-205, 87 Stat. 884; Pub. L. 94-359, 90 Stat. 911; Pub. L. 95-632, 92 Stat. 3751; Pub. L. 96-159, 93 Stat. 1225; Pub. L. 97-304, 96 Stat. 1411).

BILLING CODE 4310-55-M

Notices

Federal Register
Vol. 53, No. 57
Thursday, March 24, 1988

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Regulation; Public Meeting

SUMMARY: Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Regulation of the Administrative Conference of the United States. The committee will meet to discuss consultants Clayton P. Gillette and Thomas D. Hopkins' project on "Federal Agency Valuations of Human Life."

DATE: Friday, April 15, 1988 at 10:00 a.m.

Location: Steptoe and Johnson, 4th Floor Large Conference Room, 1330 Connecticut Avenue, NW., Washington, DC.

Public Participation: Attendance at the committee meeting is open to the public, but limited to the space available. Persons wishing to attend should notify the contact person at least two days in advance of the meeting. The committee chairman may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with a committee before, during, or after a meeting. Minutes of the meeting will be available upon request.

FOR FURTHER INFORMATION CONTACT: Sara Gordon, Staff Attorney, Office of the Chairman, Administrative Conference of the United States, 2120 L Street, NW., Suite 500, Washington, DC 20037. Telephone: (202) 254-7020.

Jeffrey S. Lubbers,

Research Director.

March 21, 1988.

BILLING CODE 6110-01-M

DEPARTMENT OF AGRICULTURE

Types and Quantities of Agriculture Commodities To Be Made Available for Donation Overseas

AGENCY: Office of the Secretary, USDA.

ACTION: Notice.

SUMMARY: This notice increases the quantities of agricultural commodities owned by the Commodity Credit Corporation to be made available for donation overseas under section 416(b) of the Agricultural Act of 1949, as amended, during fiscal year 1988.

FOR FURTHER INFORMATION CONTACT: Mary Chambliss, Director, Program Analysis Division, Office of the General Sales Manager, FAS, USDA, (202) 447-3573.

SUPPLEMENTARY INFORMATION: Section 416(b) of the Agricultural Act of 1949, as amended (7 U.S.C. 1431(b)) ("Section 416(b)"), requires the Secretary of Agriculture to make available for donation overseas for each of the fiscal years 1986-1990, not less than certain minimum quantities of Commodity Credit Corporation ("CCC") uncommitted stocks. The minimum quantity of grains (wheat, rice, and feed grains) and oilseeds required to be made available shall be the lesser of 500,000 metric tons of CCC's uncommitted stocks or 10 percent of the estimated year-end levels of CCC's uncommitted stocks. The minimum quantity of dairy products shall be 10 percent of CCC's uncommitted stocks, but not less than 150,000 metric tons to the extent that uncommitted stocks are available. The minimum quantity requirements may be waived by the Secretary if the Secretary determines and reports to Congress that there are insufficient valid requests for eligible commodities under section 416(b) for any fiscal year, or the Secretary determines that the restrictions in furnishing commodities under section 416(b)(3) prevent making available commodities in such quantities.

I have previously determined that a total of 1,600,000 metric tons of grains and oilseeds shall be made available for donation under section 416(b) during fiscal year 1988. This determination was published in the **Federal Register** on November 12, 1987 (52 FR 43375). The purpose of this notice is to inform the public that such previous determination is revised by increasing the quantity of corn and sorghum to be made available to 1 million metric tons and 500,000 metric tons, respectively. This increase is intended to enable CCC to meet additional commodity donation requests.

Determination

Accordingly, I have determined that 2,550,000 metric tons of grains and oilseeds shall be made available for donation overseas pursuant to section 416(b) during fiscal year 1988. The kinds and quantities of commodities that shall be made available for donation are as follows:

Commodity	Quantity (metric tons)
Grains and oilseeds:	
Wheat	1,000,000
Corn	1,000,000
Sorghum	500,000
Soybeans	50,000
Total	2,550,000

Done at Washington, DC, this 18th day of March 1988.

Richard E. Lyng,

Secretary of Agriculture.

[FR Doc. 88-6418 Filed 3-23-88; 8:45 am]

BILLING CODE 3410-10-M

Agricultural Marketing Service

Tobacco Inspection; Grower's Referendum

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of referendum.

SUMMARY: This notice announces that a referendum will be conducted by mail during the period March 28-April 1, 1988, for producers of flue-cured tobacco who sell their tobacco at auction in Carthage and Aberdeen, North Carolina, to determine producer approval of the designation of the Carthage and Aberdeen tobacco markets as one consolidated auction market.

DATE: The referendum will be held March 28-April 1, 1988.

FOR FURTHER INFORMATION CONTACT: Lioniel S. Edwards, Director, Tobacco Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, DC 20250; Telephone Number (202) 447–2567.

SUPPLEMENTARY INFORMATION: Notice is hereby given of a mail referendum on the designation of a consolidated Carthage and Aberdeen, North Carolina, auction market. Carthage and Aberdeen, North Carolina, were separately designated on June 26, 1942 (7 CFR 29.8001) as flue-cured tobacco auction markets under the Tobacco Inspection Act (7 U.S.C. 511 *et seq.*). Under this Act the two markets have been receiving mandatory grading services from USDA.

On September 8, 1987, an application was made to the Secretary of Agriculture to consolidate the designated markets of Carthage and Aberdeen. This application, filed by the warehousemen in those markets, was made pursuant to the regulations promulgated under the Tobacco Inspection Act (7 U.S.C. 511 *et seq.*, 7 CFR Part 29). On October 28, 1987, a public hearing was held in Aberdeen, North Carolina, pursuant to applicable provisions of the regulations under the Tobacco Inspection Act. A Review Committee, established pursuant to § 29.3(h) of the regulations (7 CFR 29.3(h), has reviewed and considered the application, the testimony presented at the hearing, the exhibits received in evidence, together with other available information which was officially noticed at the hearing relating to the application filed. The Committee recommended to the Secretary that the application be granted and the Secretary approved the application on March 18, 1988.

Before a new market can be officially designated, a referendum must be held to determine that a two-thirds majority of producers favor the designation. It is hereby determined that the referendum will be held by mail during the period of March 28–April 1, 1988. The purpose of the referendum is to determine whether farmers who sold their tobacco on the designated markets at Carthage and Aberdeen are in favor of or opposed to the designation of the consolidation market for the 1988 and succeeding crop years. Accordingly, if a two-thirds majority of those tobacco producers voting in the referendum favor this consolidation, a new market will be designated as and be called Carthage-Aberdeen.

To be eligible to vote in the referendum a tobacco producer must have sold flue-cured tobacco on either the Carthage or Aberdeen auction markets during the 1987 marketing season. Any farmer who believes he or she is eligible to vote in the referendum but has not received a mail ballot by March 28, 1988, should immediately contact Lioniel S. Edwards at (202) 447–2567.

The referendum will be held in accordance with the provisions for referenda of the Tobacco Inspection Act, as amended (7 U.S.C. 511d) and the regulations for such referendum set forth in 7 CFR 29.74.

Dated: March 22, 1988.

Karen K. Darling,

Deputy Assistant Secretary, Marketing and Inspection Services.

[FR Doc. 88–6575 Filed 3–23–88; 8:45 am]

BILLING CODE 3410-02-M

Forest Service

Environmental Impact Statement; Oil and Gas Leasing in Teton-Bridger East Study Area

AGENCY: Forest Service, USDA.

ACTION: The Department of Agriculture, Forest Service, will prepare an Environmental Impact Statement for oil and gas leasing in the Teton-Bridger East Study Area of the Bridger-Teton National Forest located in Fremont, Park, Teton, Sublette, and Lincoln Counties, Wyoming.

SUMMARY: The National Environmental Policy Act requires an early and open process for determining the scope of issues to be addressed and for identifying the significant issues related to a proposed action. Federal, State, and local agencies, and other individuals or organizations who may be interested in or affected by the proposed action will be invited to participate in the process (scoping). Input gathered during scoping will be used in preparation of the draft environmental impact statement (DEIS). The scoping process will include:

1. Identifying the potential issues.
2. Identifying issues to be analyzed in depth.
3. Eliminating insignificant issues or those which have been covered by a relevant previous environmental analysis.

J.S. Tixier, Regional Forester, Intermountain Region, U.S. Forest Service, Ogden, Utah 84401 is the responsible official. The Bureau of Land Management (BLM), Department of the Interior, will be invited to participate as a cooperating agency to evaluate potential impacts for issuance of the oil and gas leases.

The Draft EIS will be available for review by March 1, 1989. Public meetings on the draft document will be held following distribution, and an announced review period. Notice of the date, time, and place for the public meetings will be announced in the local media. The Final EIS is scheduled to be completed by December 22, 1989.

Written comments and suggestions concerning the analysis questions about the proposed action and environmental impact statement, or information about public meeting dates and places should be directed to Al Koschmann, Forest Engineer, Bridger-Teton National Forest, Box 1888, Jackson, Wyoming 83001, Phone (307) 733–2752.

Date: March 9, 1988.

T.A. Roederer,

Deputy Regional Forester, Resources.

[FR Doc. 88–6480 Filed 3–23–88; 8:45 am]

BILLING CODE 3410-11-M

Soil Conservation Service

Dixon High School Flood Prevention Measure, Illinois

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of No Significant Impact.

SUMMARY: Pursuant to section 102 (2) (c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Dixon High School Measure, Lee County, Illinois.

FOR FURTHER INFORMATION CONTACT: John J. Eckes, State Conservationist, Soil Conservation Service, 301 North Randolph Street, Champaign, Illinois, 61820, Telephone (217) 398–5267.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicated that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, John J. Eckes, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns flooding of the Dixon High School, a National Guard Armory, and adjacent recreation facilities at Page Park. The planned works of improvement include 2100 linear feet of dike and pumping facilities.

The Notice of a Finding of No Significant Impact (FONSI) has been forward to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by by contacting John J. Eckes.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.901—Resource Conservation and Development—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)

Harry D. Slawter,

Assistant State Conservationist.

March 16, 1988.

BILLING CODE 3410-16-M

COMMISSION ON CIVIL RIGHTS

Oregon Advisory Committee; Agenda and Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Oregon Advisory Committee to the Commission will convene at 1:30 p.m. and adjourn at 6:00 p.m., on April 21, 1988, at the Hilton Hotel, 921 Southwest Sixth Avenue, Portland, Oregon 97204. The purpose of the meeting is to plan activities and programming for the coming year.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, James Huffman or Philip Montez, Director of the Western Regional Division (213) 894–3497, (TDD 213/894–0508). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, March 17, 1988.

Susan J. Prado,

Acting Staff Director.

BILLING CODE 3510-BP-M

International Trade Administration

[A–307–701 and C–307–702]

Postponement of Final Antidumping and Countervailing Duty Determinations and Postponement of Antidumping Duty Public Hearing; Certain Electrical Conductor Aluminum Redraw Rod From Venezuela

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: This notice informs the public that we have received a request from Suramericana de Aleaciones Laminadas, C.A. (SURAL) in the antidumping investigation to postpone the final determination, as permitted in section 735(a)(2)(A) of the Tariff Act of 1930, as amended (the Act), (19 U.S.C. 1673d(a)(2)(A)).

Based on the request, we are postponing our final antidumping and countervailing duty determinations on certain electrical conductor aluminum redraw rod (redraw rod) from Venezuela until not later than June 22, 1988. We are also postponing our public hearing in the antidumping duty investigation until May 20, 1988.

EFFECTIVE DATE: March 24, 1988.

FOR FURTHER INFORMATION CONTACT: Mary Martin (202–377–2830) or Roy Malmrose (202–377–2815), Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION: On February 8, 1988, we published a preliminary determination of sales at less than fair value with respect to this merchandise (53 FR 3614, February 8, 1988). This notice stated that if the investigation proceeded normally, we would make our final determination by April 18, 1988.

On February 9, 1988, SURAL requested a postponement of the final determination for 60 days pursuant to section 735(a)(2)(A) of the Act. In a letter dated March 1, 1988, SURAL stated that it was its intention to request the maximum extension for the final determination until June 22, 1988. This respondent accounts for a significant proportion of exports of the merchandise to the United States. If exporters who account for a significant proportion of exports of the merchandise under investigation request an extension after an affirmative preliminary determination, we are required, absent compelling reasons to the contrary, to grant the request. Accordingly, we are postponing the date of the final antidumping duty determination until not later than June 22, 1988.

On November 2, 1987, (52 FR 42703, November 6, 1987) we granted the request of petitioner, Southwire Company, to extend the deadline date for the final countervailing duty determination to correspond to the date of the final antidumping duty determination of the same product pursuant to section 705(a)(1) of the Act, as amended, [19 U.S.C. 1671d(a)(1)]. Accordingly, we are also postponing the date of the final countervailing duty determination until not later than June 22, 1988.

Public Comment

In accordance with 19 CFR 353.47, we will hold a public hearing in the antidumping duty investigation to afford interested parties an opportunity to comment on the preliminary determination at 10:00 a.m. on May 20, 1988, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit prehearing briefs in at least 10 copies to the Assistant Secretary for Import Administration, Room B-099, at the above address by May 13, 1988. Oral presentations will be limited to issues raised in the briefs.

All written views should be filed in accordance with 19 CFR 353.46 and 19 CFR 355.34 not less than 30 days before the final determinations or, if a hearing is held, within seven days after the hearing transcript is available, at the above address in at least 10 copies.

The U.S. International Trade Commission is being advised of these postponements, in accordance with section 735(d) of the Act. This notice is published pursuant to section 735(d) of the Act.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

March 21, 1988.

Rescheduling of Public Hearing; Carbon Steel Wire Rod From Malaysia

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce is rescheduling the public hearing in the countervailing duty investigation of carbon steel wire rod from Malaysia. The hearing will now be held at 10:00 a.m. on March 28, 1988, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who have requested the opportunity to participate in the hearing must submit 10 copies of the proprietary version and five copies of the nonproprietary version of the prehearing briefs to the Acting Assistant Secretary for Import Administration, Room B-099, at the above address by 12:00 noon on March 24, 1988. Oral presentations will be limited to issues raised in the briefs. In accordance with 19 CFR 353.46, additional written views will be considered for the final determination only if received within seven days after the hearing transcript becomes available.

FOR FURTHER INFORMATION CONTACT: Steve Morrison or Gary Taverman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: 202/377-0189 or 202/377-0161.

BILLING CODE 3510-DS-M

Electronic Instrumentation Technical Advisory Committee; Partially Closed Meeting

A meeting of the Electronic Instrumentation Technical Advisory Committee will be held April 19 and 20, 1988, in the Herbert C. Hoover Building, 14th & Constitution Avenue, NW., Washington, DC. The April 19 meeting will convene in Room 1092 at 9:30 a.m. on April 20, the meeting will reconvene at 9:30 a.m. and continue to its conclusion in Room 1092 in the Herbert C. Hoover Building. The Committee advises the Office of Technology and Policy Analysis with respect to technical questions which affect the level of export controls applicable to electronics and related equipment and technology.

General Session

1. Opening remarks by the Chairman.
2. Presentation of papers or comments by the public.
3. Comments are especially invited on Commodity Control List entries 1584A —Oscilloscopes and 1533A —Spectrum Analyzers.
4. Public discussion on any other matters related to activities of the Electronic Instrumentation Technical Advisory Committee.

Comments should consider the need for revision (strengthening relaxation or decontrol) of the current regulations based on technological trends, foreign availability and national security.

Executive Session

5. Discussion on matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1988, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings of the Committee and of any Subcommittees thereof, dealing with the classified materials listed in 5 U.S.C. 552b(c)(1) shall be exempt from the provisions relating to public meetings found in section 10(a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public.

A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Washington, DC. For further information or copies of the minutes, contact Carole P. Willis, 202-377-2583.

Date: March 21, 1988.

Joint Meeting of the Electronic Instrumentation Technical Advisory Committee and the Semiconductor Technical Advisory Committee; Partially Closed Meeting

A joint meeting of the Electronic Instrumentation Technical Advisory Committee and Semiconductor Technical Advisory Committee will be held on April 21, 1988, Herbert C. Hoover Building, 14th and Constitution Avenue NW., Washington, DC. The meeting will convene in Room 4830 at 9:30 a.m.

General Session

1. Opening remarks by the Chairmen.
2. Public comments are invited on the following entries on the Commodity Control List (CCL):

CCL 1529A—Microprocessor and Microcomputer Development Instruments or Systems;
CCL 1355A—Automated Test Equipment.

3. Any other matters of mutual interest to the Semiconductor Technical Advisory Committee and the Electronic Instrumentation Technical Advisory Committee.

Executive Session

4. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committees. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1988, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings of the Committee and of any Subcommittees thereof, dealing with the classified materials listed in 5 U.S.C., 552b(c)(1) shall be exempt from the provisions relating to public meetings found in section 10(a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public.

A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Washington, DC. DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title Applicable Form and Applicable OMB Control Number: Application for the U.S. Army Health Professions Scholarship Program; DA Form 4628; and OMB Control number 0702-0028.

Type of Request: Extension.

Annual Burden Hours: 2,000.

Annual Responses: 2,000.

Needs and Uses: Applicants for the U.S. Health Professions Scholarship Program must submit information requested so that in the selection process all pertinent information can be reviewed and selection for scholarship support made on a competitive basis.

Affected Public: Individuals or households.

Frequency: On Occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Mr. Edward Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Edward Springer at Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Ms. Pearl Rascoe-Harrison.

A copy of the information collection proposal may be obtained from, Ms. Rascoe-Harrison WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202-4302, telephone (202) 746-0933.

Department of the Army

Army Science Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: 19 and 20 April 1988.

Times of Meeting: 0830-1630 Hours, each day.

Place: The Pentagon, Washington, DC.

Agenda: The Army Science Board's Ad Hoc Subgroup on U.S. Army Aeromedical Research Laboratory; Fort Rucker, Alabama, will meet to examine the efficiency and effectiveness of the U.S. Army Aeromedical Research Laboratory. This meeting is open to the public. Any person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695-3039 or 695-7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

[FR Doc. 88-6476 Filed 3-23-88; 8:45 am]

BILLING CODE 3710-08-M

Army Science Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Date of Meeting: 21 April 1988.

Time of Meeting: 0800-1700 hours.

Place: The Pentagon, Washington, DC.

Agenda: The Army Science Board's Ad Hoc Subgroup on Competition in Contracting will meet to draft its report and make recommendations on its findings. This meeting will be open to the public. Any person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695-3039 or 695-7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710-08-M

Military Traffic Management Command; Directorate of Personal Property; Domestic Program

AGENCY: Military Traffic Management Command (MTMC), Department of the Army, Department of Defense (DOD).

ACTION: The Department of Defense is proposing to strengthen the current qualification program for motor carriers seeking participation in the Department of Defense Domestic Household Goods Program.

SUMMARY: MTMC will require any new motor carrier seeking approval and entry into the Department of Defense Domestic Household Goods Program to certify and provide evidence to MTMC that they are capable of providing managed transportation services which will meet established standards. Motor Carriers seeking approval must submit proof of registration and insurance of their vehicles and material handling equipment, addresses of their terminal facilities, and other resources required in the movement of household goods. A change to Appendix A, the Tender of Service, of DOD 4500.34R is pending.

DATE: Comments submitted on or before April 25, 1988.

ADDRESS: Comments should be addressed to Headquarters, Military Traffic Management Command, ATTEN: MT-PPQ-Q, 5611 Columbia Pike, Falls Church, Virginia 22041-5050.

FOR FURTHER INFORMATION CONTACT: LT Marcial B. Dumlao, SC, USN, HQMTMC, ATTN: MT-PPQ-Q, 5611 Columbia Pike, Falls Church, Virginia 22041-5050, (703) 756-1784.

Robert F. Waldman,

Deputy Director of Personal Property.

BILLING CODE 3710-08-M

Military Traffic Management Command; Directorate of Personal Property; International Program

AGENCY: Military Traffic Management Command (MTMC), DOD.

ACTION: Volume 57 ITGBL Rate Solicitation.

SUMMARY: For Volume 57, effective 1 October 1988, MTMC will test a new method of filing rates for household goods and unaccompanied baggage. Instead of filing a rate for the traffic channel US66 (Texas North) to GE37 (Germany North), carriers will file a rate from each personal property shipping office in US66 to GE37. The rate solicitation will contain special rate filing instructions for this traffic channel.

FOR FURTHER INFORMATION CONTACT: Commander, Military Traffic Management Command, ATTN: MT-PPC (Ms. Barbara Scott or Naomi King), Room 408, 5611 Columbia Pike, Falls Church, VA 22041-5050, (703) 756-2385.

Joseph R. Marotta,

Colonel, U.S. Army, Director of Personal Property.

BILLING CODE 3710-08-M

Military Traffic Management Command Directorate of Personal Property; International Program

AGENCY: Military Traffic Management Command MTMC), DOE.

ACTION: Volume 57 ITGBL Rate Soliciation.

SUMMARY: During Volume 57, which will be effective 1 October 1988, we will test a new procedure for filing Letters of Intent (LOI). Only those carriers who intend to set the rates or file other than administrative high rates would be required to have LOIs at all installations within a rate area by the initial filing (IF) deadline date. In addition those carriers who me-too the rate setter would be required to have full LOI rate area coverage by the me-too filing deadline. The participating carriers would not need to have full LOI rate area coverage.

Testing will be done in two rate areas, US38 (Illinois) and US64 (Louisana). The following installations would be utilized:

Barksdale AFB, LA; England AFB, LA; Naval Support Activity, New Orleans, LA; Ft Polk, LA; Chanute AFB, IL; Scott AFB, IL: Naval Training Station, Great Lakes, IL: St Louis Area Support Center, Granite City, IL; Rock Island, IL; and Ft Sheridan, IL.

FOR FURTHER INFORMATION CONTACT: Commander, Military Traffic Management Command, ATTN: MT-PPC (Mrs. Mary Sullivan or Mrs. Naomi King), Room 408, 5611 Columbia Pike, Falls Church, VA 22041-5050 (703) 756-2383.

Joseph R. Marotta,

Colonel, U.S. Army, Director of Personal Property.

BILLING CODE 3710-08-M

DEPARTMENT OF ENERGY

Research Announcement; Solicitation for Laser Fusion Research Proposals

The Nevada Operations Office, Department of Energy (DOE), invites any university or other institutions of higher education, not-for-profit or for-profit organizations, or other entity to submit competitive proposals for a contract for the conduct of basic research experiments in high-energy density studies at the National Laser User's Facility (NLUF) located at the University of Rochester Laboratory for Laser Energetics. The project period for which DOE expects to provide funding for an approved project is one year.

The unique resources of the NLUF are available to scientists for state-of-the-art experiments in areas such as plasma physics, spectroscopy of high ionized atoms, laboratory astrophysics, inertial fusion, fundamental physics, materials science, and biology and chemistry.

The Laboratory for Laser Energetics was established in 1970 to investigate the interaction of high power lasers with matter. It is the home of: OMEGA, a 2.5 trillion watt, 24-beam laser system (at 0.35 um) and the Glass Development Laser (GDL) a 250 billion watt, single-beam prototype for OMEGA (at 0.35 um).

DOE has designated these elements of the Laboratory as the National Laser User's Facility, with the aim of making this unique research tool available to qualified researchers nationwide. The NLUF is funded by DOE and maintains and operates the facility which is available for scientific collaboration and for assistance with user experiments. Outside researchers are encouraged to collaborate with staff members.

The NLUF offers to the scientific community its capabilities for laser matter interaction experiments or for using the short, 100 picosecond, pulses of laser light, x-rays, or neutrons for probing the structure of matter.

For more technical information about the facilities and potential collaboration at the NLUF please contact: James Knauer, Manager, National Laser User's Facility, Laboratory for Laser Energetics, University of Rochester, 250 East River Road, Rochester, NY 14623, Telephone No. 716-275-2074.

I. Definitions

Basic Research: Basic research means research directed toward increasing knowledge in science. The primary aim of basic research is a fuller knowledge or understanding of the subject under study, rather than any immediate application of that knowledge.

II. Proposals

An original and 12 copies of an initial proposal for new work must be submitted to Robert Clemensen, Contracting Officer Representative, Nevada Operations Office, P.O. Box 98518, Las Vegas, Nevada, 89193-8518 (Phone: 702-295-1070).

III. Information To Be Provided in Proposals

Each proposal should include the following information:

A. Basic Information

- Name and address of the offeror.
- If an organization, indicate type, e.g., profit, not-for-profit, educational institution, small business, minority owned, etc.
- Name(s) and telephone number(s) of the offeror's technical and business personnel whom the Department may contact for negotiation purposes;
- Names of any other Federal agencies or other parties who have received (or will be receiving) a proposal for the same effort or activity and/or who are (or will be) providing or receiving funds for the effort or activity;
- Date of submission; and
- Signature of a responsible official or authorized representative of the organization or a person authorized to contractually obligate the organization.

B. Detailed Information

- A detailed description of the proposed project, including the objectives of the project, its relationship to and significance within its field of research and proposer's plan for carrying it out. Such information should provide a basis upon which DOE can evaluate the proposal in view of the criteria provided in Section V.C. below.
- Detailed information about the background and experience of the principal investigator(s) (including references to publications), the facilities and experience of the proposer, and the cost-sharing arrangements, if any. (While cost sharing is encouraged, it is not required nor is it to be considered as a criterion in the evaluation and selection process.)
- A budget with supporting justification sufficient to evaluate the costs of the proposed project. (Standard Form 1411 may be used.) This item should be submitted with the proposal, but as a detached part.
- The proposal must be signed by the individual who is applying or by an individual who is authorized to act for the proposing organization and to commit the proposer to comply with the terms and conditions of the contract, if awarded.

C. Other Information for Proposers

Proposals may be submitted to DOE at the address specified in Section III of this Announcement at any time. Prior to the closing date of 2:00 p.m. local prevailing time, December 15, 1988. Proposals received after the closing date shall not be considered for funding during fiscal year 1989.

DOE is under no obligation to pay for any costs associated with the preparation or submission of proposals.

Approximately $600,000 will be allocated to this program and multiple awards are anticipated. However, DOE reserves the right to fund, in whole, or in part, any, all, or none of the proposals submitted.

DOE is not required to return to the proposer a proposal which is not selected or funded.

D. Continuation/Renewal Proposals

Proposals for a continuation or a renewal award must be submitted in an original and seven copies to the DOE office cited in Section III above. Renewal proposals for existing awards will be considered in the same manner as proposals for new endeavors. The renewal proposal should describe the plans for the next period, contain a cost estimate, and otherwise adhere to these instructions.

IV. Proposal Evaluation and Selection

A. DOE shall evaluate the proposals using scientific peer review against the criteria set forth in C. below. DOE will use this external peer review as the basis of the Federal evaluation, with the objective of having the technical/scientific evaluation conducted by the most qualified individuals available. Selections for award will be made by a designated DOE official (with due regard for conflict of interest and protection of proposal information).

B. Evaluators shall be selected on the basis of their professional qualifications and expertise in the field of research.

C. DOE shall evaluate new and renewal proposals based on the following criteria which are approximately of equal weight:

- The overall scientific and technical merit of the project;
- The relevance of the stated objectives to the field of research;
- The appropriateness of the proposed method or approach;
- The competence and experience and known past performance of the proposer, principal investigator and/or key personnel;
- The adequacy of any necessary equipment which is to be provided by the proposer;
- The appropriateness and adequacy of the proposed budget; and
- Other appropriate factors, which may be established and set forth by DOE by a modification to this Research Announcement or in a superseding Research Announcement.

D. In addition to the evaluation criteria set forth in paragraph C., if a proposer is currently under an NLUF contract, DOE shall consider the proposer's performance under the existing contract during the evaluation of a renewal or continuation proposal.

E. After the selection of a proposal for funding, DOE may, if necessary, enter into negotiations with a proposer. Such negotiations are not a commitment that DOE will make an award. DOE may accept proposals without discussion; hence, proposals should initially be as complete as possible and be submitted on the proposers' most favorable terms.

Dated: March 10, 1988.

Nick C. Aquilina,

Manager, Nevada Operations Office.

BILLING CODE 6450-01-M

Office of Fossil Energy

Coordinating Subcommittee on Petroleum Storage & Transportation, Committee on Petroleum Storage & Transportation, National Petroleum Council; Open Meeting

Notice is hereby given of the following meeting:

Name: Coordinating Subcommittee on Petroleum Storage and Transportation of the Committee on Petroleum Storage & Transportation of the National Petroleum Council.

Date and Time: Thursday, April 28, 1988, 9 am.

Place: Windsor Court Hotel, Board Room, 300 Gravier Street, New Orleans, Louisiana.

Contact: Margie D. Biggerstaff, U.S. Department of Energy, Office of Fossil Energy (FE-1), Washington, DC 20585, Telephone: 202/586-4695.

Purpose of the Parent Council: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries.

Purpose of the Meeting: Discuss study assignment and review task group assignments.

Tentative Agenda:

—Opening remarks by the Chairman and Government Cochairman.
—Discuss study assignment.
—Review task group assignments.
—Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

Public Participation: The meeting is open to the public. The Chairman of the Subcommittee on Petroleum Storage & Transportation is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Ms. Margie D. Biggerstaff at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Donald L. Bauer,

Principal Deputy Assistant Secretary, Fossil Energy.

[FR Doc. 88-6454 Filed 3-23-88; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

Final Consent Order; Salomon Inc

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Final Action on Proposed Consent Order.

SUMMARY: The Department of Energy (DOE) hereby gives the notice required by 10 CFR 205.199J that it has adopted as final the Consent Order with Salomon Inc (Salomon) executed on January 22, 1988, and published for comment in 53 FR 3237 on February 4, 1988.

As required by 10 CFR 205.199J DOE provided a period of thirty days following publication of the Notice of Proposed Consent Order for the submission of comments. The ERA received no comments in response to this notice. Accordingly, ERA has determined that the Consent Order should be made final without modification. The Consent Order becomes effective as a Final Order of the DOE on the date of publication of this Notice.

FOR FURTHER INFORMATION CONTACT: Laurence J. Hyman, Economic Regulatory Administration, Department of Energy, 1000 Independence Avenue SW., Washington, DC. 20585, (202) 586-8900.

The full text of the Consent Order was published in the **Federal Register** in Vol. 53 commencing at 3238. Copies may also be obtained in person at DOE's Freedom of Information Reading Room, Room IE-190, Forrestal Building 1000 Independence Avenue SW., Washington, DC 20585.

SUPPLEMENTARY INFORMATION: On February 4, 1988, DOE published notice in the **Federal Register**, Vol. 53 at page 3237, announcing the execution of a Proposed Consent Order between Salomon and DOE. The text of the Proposed Consent Order accompanied that Notice, which also summarized the relevant facts, and a Press Release issued at the same time summarized the Proposed Consent Order and the relevant facts.

As a result of an audit of Salomon's compliance with the Federal petroleum price and allocation regulations, the Economic Regulatory Administration (ERA) tentatively concluded that Salomon had overcharged in certain crude oil resale transactions during the period August 19, 1973 through December 31, 1977. Salomon disputed ERA's audit findings and denied any overcharge liability. No formal allegations of violations were issued against Salomon and the Consent Order resolves these matters.

As consideration, Salomon has agreed to pay $16.25 million within 30 days of the effective date of the Consent Order. ERA will petition DOE's Office of Hearings and Appeals to implement special refund procedures pursuant to 10 CFR Part 205, Subpart V, to distribute the amounts so paid.

As noted, no comments were received in response to the Notice of the Proposed Consent Order. Accordingly, ERA has determined to adopt the

Proposed Consent Order without modification as a final order of the DOE, pursuant to 10 CFR 205.199J. The Consent Order becomes effective upon publication of this Notice.

Issued in Washington, DC, on March 18, 1988.

Chandler L. van Orman,

Deputy Administrator, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER88-288-000 et al.]

Southern California Edison Co. et al., Electric Rate and Corporate Regulation Filings

March 18, 1988.

Take notice that the following filings have been made with the Commission:

1. Southern California Edison Company

[Docket No. ER88-288-000]

Take notice that on March 14, 1988, Southern California Edison Company (Edison) tendered for filing, as an initial rate schedule, the following contract, which has been executed by Edison and the Valley Electric Association, Inc. (VEA):

Contract for Exchange of Electric Service

Under the terms and conditions of the Contract, Edison will deliver to VEA and VEA will deliver to Edison capacity and energy to serve certain portions of each utilities' isolated service areas along the state boundary between California and Nevada which are relatively close to the lines of the other utility.

The Contract was to become effective September 30, 1978, and inasmuch as service has been provided under the conditions of this contract for the mutual benefit of both utilities' ratepayers, Edison requests waiver of notice requirements and an effective date of September 30, 1978.

Copies of this filing were served upon the Public Utilities Commission of the State of California and the Valley Electric Association, Inc.

Comment date: April 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

2. Florida Power and Light Company

[Docket No. ER88-287-000]

Take notice that on March 14, 1988, Florida Power & Light Company (FPL) tendered for filing a document entitled Amendment Number Twenty-One to Revised Agreement to Provide Specified Transmission Service Between Florida Power & Light and Fort Pierce Utilities Authority (Fort Pierce) (Rate Schedule FERC No. 68).

FPL states that under Amendment Number Twenty-One, FPL will transmit power and energy for Fort Pierce as is required in the implementation of its interchange agreement with the Utility Board of the City of Key West, Florida.

FPL requests that waiver of § 35.3 of the Commission's Regulations be granted and that the proposed Amendment be made effective immediately. FPL states that copies of the filing were served upon Fort Pierce.

Comment date: April 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

3. Central Hudson Gas & Electric Company

[Docket No. ER88-291-000]

Take notice that on March 14, 1988, Central Hudson Gas & Electric Company (Central Hudson) tendered for filing as a supplement to its Rate Schedule FERC No. 22 a letter of agreement and notification dated February 17, 1988 between Central Hudson and New York State Electric and Gas Corporation. Central Hudson states that this letter provides for a decrease in the monthly facilities charge from $6,060.58 to $5,354.75 in accordance with Article IV.1 of its Rate Schedule FERC No. 22, a decrease in the monthly Transmission Charge from $6,036.82 to $3,976.77 in accordance with Articles V and VI of its Rate Schedule FERC No. 22 and an increase in the annual Operation and Maintenance Charge from $3,572.66 to $3,706.63 in accordance with Article IV.2 of its Rate Schedule FERC No. 22. Central Hudson requests waiver of the notice of requirement of Subsection 35.3 of the Commission's Regulations to permit this proposed increase to become effective January 1, 1988.

Copies of filing by Central Hudson were served upon: New York State Electric and Gas Corporation, 4500 Vestal Parkway, East Binghamton, NY 13902.

Comment date: April 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

4. Alabama Power Company

[Docket No. ER88-290-000]

Take notice that on March 14, 1988, Alabama Power Company tendered for filing five Transmission Service Delivery Point Agreements specifying fifty-one additional delivery points to be covered by the Agreement between Alabama Power Company and Alabama Electric Cooperative, Inc., for Transmission Service to Distribution Cooperative Members of AEC which was dated August 28, 1980 (Agreement). This Agreement has been designated Rate Schedule FERC No. 147 by the FERC. The purpose of these agreements is to provide for the commencing of transmission service at these delivery points under the Agreement. Transmission Service will commence under the Agreement on June 1, 1988 for Central Alabama Electric Cooperative Inc.'s Bradford, East Chilton, Enterprise, Evergreen, Friendship, Kingston, Maplesville, Rockford, Speigner, Statesville, Stewartville, Thorsby, Titus, Union Grove, Wallsboro, and Wetumpka delivery points; for Coosa Valley Electric Cooperative, Inc.'s Childersburg, Eureka, Lincoln, New London, Ohatchee, Stewarts Crossroads, Stockdale, and Talladega delivery points; for Dixie Electric Cooperative, Inc.'s Arrowhead, Cecil, Halstead, LeGrand, Notasulga, Pintlalla, Union Springs, Woodley and "Y" Community delivery points; and for Tallapoosa River Electric Cooperative, Inc.'s Blackwater, Browns-Uchee, Cheaha Mountain, Cottonton, Elias, Ft. Mitchell, Hurtsboro, LaFayette, Mellow Valley, New Site, Opelika, Penton, Providence, Pyriton, Randolph, Sturkie and Tallapoosa River delivery points. Also, transmission service will commence under the Agreement on July 1, 1988 for Clarke-Washington Electric Membership Corporation's Camden delivery point. Effective June 1, 1988, Alabama Power Company filed Twenty-Fifth Revised Sheet No. 37 and Twenty-First Revised Sheet No. 38 to its FERC Electric Tariff, Original Volume No. 2 and withdrew, effective July 1, 1988, Twenty-First Revised Sheet No. 38 to reflect the termination of wholesale service at the above listed delivery points concurrent with the commencement of transmission service as outlined above.

Copies of the filing were served upon Alabama Electric Cooperative, Inc.

Comment date: April 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

5. Detroit Edison Company

[Docket No. ER88-289-000]

Take notice that on March 14, 1988, Detroit Edison Company (Detroit Edison) tendered for filing a letter agreement dated January 13, 1988, between Detroit Edison and General Public Utilities which constitutes a redetermination of the fixed charge rate applicable to transactions under Amendment No. 6 among Consumers

Power Company, the Detroit Edison Company, and the Toledo Edison Company, dated June 1, 1982, for the sale of Specific Capacity Power to General Public Utilities. This Amendment has been denoted as the Detroit Edison Company Rate Schedule FERC No. 11. Detroit Edison states that the redetermination of the fixed charge rate was made pursuant to the terms of Amendment No. 6.

Detroit Edison states that the letter agreement establishes the fixed charge rate at 14.035% for service rendered on and after January 1, 1988, and is subject to redetermination during the term of Amendment No. 6 in accordance with section 7.12. Detroit Edison stated the redetermination reflects the reduction of the effective corporate income tax rate from 40% to 34% for 1988; the effect being a reduction of 1.835% in the fixed charge rate from that used in the initial agreement. This determination will decrease the monthly demand charge to $427,023 in accordance with sections 7.11 and 7.12 of Service Schedule G.

Detroit Edison states that copies of the filing were served upon Consumers Power Company, the Cleveland Electric Illuminating Company (Centerior Energy), General Public Utilities Corporation, the Toledo Edison Company, and the Michigan Public Service Commission.

Detroit Edison requests waiver of the notice requirements to permit a retroactive effective date of January 1, 1988 for the 14.035% fixed charge rate.

Comment date: April 4, 1988, in accordance with Standard Paragraph E at the end of this document.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6466 Filed 3-23-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. RM88-4-000 and RM88-5-000]

Intent To Prepare Environmental Impact Statement and to Hold Scoping Session

Issued March 18, 1988.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of intent to prepare environmental impact statement and to hold scoping session.

SUMMARY: This notice informs the public that the Federal Energy Regulatory Commission (Commission) intends to hold a scoping session on Monday, April 18, 1988, in order to prepare an environment impact statements (EIS) for two notices of proposed rulemakings (NOPRs) issued by the Commission on March 16, 1988. This scoping session is being held to discuss the environmental impact of the issues associated with two NOPRs. One NOPR proposes regulations to govern a class of non-traditional utility suppliers, called independent power producers (IPPs) and the second NOPR proposes regulations to govern bidding programs under the Public Utility Regulatory Policies Act of 1978 (PURPA). Interested persons and agencies are encouraged to attend these meetings and provide comments that will assist Commission's staff with the determination of issues to be addressed in the EIS.

EFFECTIVE DATE: March 18, 1988.

DATE AND LOCATION: The scoping session will be held on Monday, April 18, 1988, and will be comprised of two meetings to be held in two separate locations—Baltimore, Maryland, and Albuquerque, New Mexico. The Commission will issue a second notice in the near future detailing the exact time and location for each meeting in both cities.

FOR FURTHER INFORMATION CONTACT:

Michael Schopf, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357-8002

Bernard W. Tenebaum, Office of Economic Policy, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, (202) 357-8100.

SUPPLEMENTARY INFORMATION:

In the matter of Regulations Governing Independent Power Producers; Docket No. RM88-4-000 and Regulations Governing Bidding Programs; Docket No. RM88-5-000.

Notice of Intent To Prepare Environmental Impact Statement and to Hold Scoping Sessions

March 18, 1988.

On March 16, 1988, the Federal Energy Regulatory Commission (Commission) issued two notice of proposed rulemaking (NOPRs). One NOPR proposes regulations to govern a class of non-traditional utility suppliers, called independent power producers (IPPs). A second NOPR proposes regulations to govern bidding programs under the Public Utility Regulatory Policies Act of 1978 (PURPA). The bidding NOPR would authorize state regulatory authorities and nonregulated electric utilities to implement bidding procedures as a means of establishing rates for power purchases from qualifying facilities (QFs) under section 210 of PURPA.

The Commission has determined that these proposals may constitute a major Federal action significantly affecting the quality of the human environment. The Commission therefore intends to prepare a single environmental impact statement (EIS) in accordance with the National Environmental Policy Act of 1969.

Scoping Session

Interested persons and agencies are invited to participate in a scoping session to discuss the environmental impact of the issues associated with both NOPRs. The scoping session will be comprised of two meetings to be held in two separate locations on Monday, April 18, 1988. One scoping meeting will be held in Baltimore, Maryland. Another scoping meeting will be held in Albuquerque, New Mexico. The Commission will issue a second notice containing the exact time and location for each meeting in both cities in the near future.

Scoping sessions are utilized by Commission staff to: (1) Determine the scope and the significant issues to be analyzed in depth in the environmental impact statement; (2) present those environmental issues that have been identified for coverage in the EIS to the public and to experts familiar with the project; (3) receive input from the public and experts on the issues presented; and (4) identify issues that do not merit EIS treatment. Agencies and individuals with environmental expertise and concerns are encouraged to attend the meeting and to assist the Commission's staff with the determination of issues to be addressed in the EIS.

Participants in the scoping sessions may give their comments orally or in writing. Written comments regarding the environmental effects of the NOPRs will be accepted during the scoping sessions or may be filed with the Commission on or before Tuesday, May 3, 1988. Comments filed with the Commission must be addressed to the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. The scoping sessions will be recorded by a stenographer and all statements (oral or written) will become part of the public record.

A participant that wishes to reserve time to speak at the meetings or obtain information about the scoping process should contact Michael Schopf, Office of the General Counsel (202) 357-8002 or Bernard W. Tenenbaum, Office of Economic Policy (202) 357-8100.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. QF87-344-001]

Central Phosphates, Inc.; Application for Commission Recertification of Qualifying Status as a Cogeneration Facility

March 18, 1988.

On February 1, 1988, Central Phosphates, Inc. (Applicant), of P.O. Drawer L, Plant City, Florida 33566 submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located at the phosphate fertilizer facility in Plant City, Florida. The facility will consist of four sulfuric acid plant heat recovery units and an extraction/condensing steam turbine generator. Thermal energy recovered from the facility will be used to produce concentrated phosphoric acid and in the fertilizer manufacturing processes such as reactor heating, steam line tracing and storage tank heating. The net electric power production capacity of the facility will be 34,945 kW. The primary energy source is waste heat produced from the exothermic process in the production of sulfuric acid. The installation of the facility was expected to commence on or about April 1, 1987.

By order issued July 16, 1987, the Commission granted certification of the facility as a cogeneration facility (40 FERC ¶ 62,038).

The recertification is requested due to the change of ownership from CF Industries, Inc. to Central Phosphates, Inc. All other facility characteristics remain the same.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6482 Filed 3-23-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP88-286-000]

Cascade Natural Gas Corp. (Complainant) v. Northwest Pipeline Corp., Chevron Chemical Co., and Intermountain Gas Co. (Respondents); Complaint

March 21, 1988.

Take notice that on March 9, 1988, Cascade Natural Gas Corporation (Cascade), P.O. Box 24464, Seattle, Washington 98124, filed in Docket No. CP88-286-000 pursuant to Rules 206 and 212 of the Commission's Rules of Practice and Procedure and sections 7, 14 and 16 of the Natural Gas Act, a complaint and motion for restraining order.

Cascade complains that Northwest Pipeline Corporation (Northwest), Chevron Chemical Company (Chevron), and Intermountain Gas Company (Intermountain) are engaging in the unlawful transportation of natural gas in interstate commerce and that Chevron is bypassing natural gas service historically rendered to Chevron by Cascade. Cascade requests that the Commission order Northwest and Cascade to cease and desist from the transportation of natural gas in interstate commerce for which they do not have requisite authority. Cascade also requests an order restraining the unlawful conduct pending a formal hearing on the issues raised by Cascade.

Cascade states that Northwest has informed Cascade that Northwest is performing transportation service pursuant to section 311 of the Natural Gas Policy Act of 1978 (NGPA) for Chevron, which is an end-user connected directly to Northwest's system at an ammonia plant located near Finley, Washington (Finley plant). Cascade states that Northwest is authorized to sell and deliver gas to Chevron at the Finley plant, but has no certificate authorization under the Natural Gas Act to transport and deliver third-party gas to Chevron at the Finley plant.

Cascade further states that Chevron also owns another industrial facility near Kennewick, Washington (Kennewick Plant) which Cascade has served since 1959. The gas supply for the Kennewick Plant has historically been purchased by Cascade from Northwest and been resold to Chevron; more recently, Cascade has purchased alternate, lower-cost supplies for Chevron and has transported to the Kennewick plant gas supplies obtained by Chevron on its own, it is explained.

Cascade asserts that Chevron has recently constructed a high-pressure gas transmission pipeline to transport gas from the Finley plant to the Kennewick plant. The pipeline is constructed on right-of-way along the Columbia River that is not owned by Chevron; the two industrial plants are not contiguous, nor are they operated as part of the same manufacturing operation, it is explained.

Cascade also states that on February 5, 1988, Northwest announced that it would begin performing transportation of natural gas on its system under NGPA Section 311 commencing February 10, 1988. Further, Cascade states that Northwest sent Cascade two letters dated February 19, 1988, stating that Northwest would provide self-implementing transportation of gas to Chevron under Part 284, Subpart B of the Commission's Regulations, with the gas being delivered to the Finley plant. Both letters indicated that transportation would be provided by Northwest on behalf of Intermountain, it is explained. Cascade states, further, that its field personnel have verified that gas is now flowing from the Finley plant through Chevron's newly constructed high-pressure pipeline to the Kennewick plant. Moreover, Cascade states, Chevron has terminated purchasing gas at the Kennewick plant. Cascade states that the loss of this sale results in the loss of approximately $24,400 per month in net revenues to Cascade.

Cascade alleges that the transportation by Northwest does not qualify as self-implementing transportation service under NGPA

Section 311, since Intermountain, a local distribution company in the State of Idaho, has to Cascade's information and belief no physical or legal connection to the transportation being provided to Chevron purportedly "on behalf of" Intermountain, nor is Intermountain receiving any benefit from the transportation. Since the "on behalf of" test of section 311 of the NGPA has not been met, Cascade argues that the transportation is not exempt from the jurisdictional requirement of the NGPA. Cascade argues that both Northwest and Chevron are transporting gas in interstate commerce within the meaning of the Natural Gas Act, without having certificates of public convenience and necessity that authorize such transportation. Cascade, therefore, requests the Commission to order Northwest and Chevron to cease such transportation and requests a restraining order of directing them to cease transportation pending a hearing on Cascade's Complaint.

Any person desiring to be heard or to make any protest with reference to said complaint should on or before April 8, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 384.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. Answers to the Complaint are also due on or before April 8, 1988.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. ID-2333-000]

George Cameron Creel; Notice of Filing

March 17, 1988.

Take notice that on March 10, 1988, George Cameron Creel filed an application pursuant to section 305(b) of the Federal Power Act and Part 45 of the Regulations of the Federal Energy Regulatory Commission for Commission authorization to hold concurrently the following positions:

Position	Name of corporation
Vice President	Baltimore Gas and Electric Company.
Director	Safe Harbor Water Power Corporation.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 31, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP85-125-008]

Distrigas of Massachusetts Corp.; Amended Compliance Filing

March 18, 1988.

Take notice that on March 15, 1988, Distrigas of Massachusetts Corporation ("DOMAC") tendered for filing the below listed tariff sheets to amend its compliance filing in this docket and to include in its FERC Gas Tariff, First Revised Volume No. 1 the following:

Third Revised Sheet No. 17A
Substitute First Revised Sheet No. 23

DOMAC states that the tariff sheets are submitted as an amendment to the TS-1 compliance filing made on February 18, 1988 to comply with Commission Opinion No. 291-A. DOMAC also states that the submission of the tariff sheets is without prejudice to DOMAC's positions on judicial review of Opinion Nos. 291 and 291-A.

A copy of the filing was mailed to DOMAC's jurisdictional customers and all parties set out on the office service list in Docket No. RP85-125-000.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211. All such motions or protests must be filed on or before March 25, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. TA88-2-47-000]

MIGC, Inc.; Proposed Purchased Gas Adjustment Rate Change

March 18, 1988.

Take notice that on March 15, 1988, MIGC, Inc. tendered for filing copies of Forty-Sixth Revised Sheet No. 32 to its FERC Gas Tariff, Original Volume No. 1, in accordance with the Commission's Rules and Regulations under the Natural Gas Act.

MIGC states that Forty-Sixth Revised Sheet No. 32 provides for a Purchased Gas Adjustment rate increase of 77.16 cents per MMBtu effective May 1, 1988 in order (1) to provide a current gas cost adjustment reflecting a 5.59 cents per MMBtu increase which is designed to permit MIGC to reflect the higher cost of gas purchases which it is currently incurring; (2) to provide an adjustment to MIGC's Unrecovered Purchased Gas Cost Account which produces a 74.23 cents per MMBtu increase over MIGC's present surcharge adjustment; and (3) to recover carrying charges on the Unrecovered Purchased Gas Cost Account. MIGC states that the single largest contributing factor to the proposed rate increase is the elimination of a large supplier refund from its unrecovered purchased gas cost account balance, which refund will have been returned to MIGC's sales customers prior to the May 1, 1988 proposed effective date of the instant PGA filing.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such motions or protests should be filed on or before March 25, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for the public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6430 Filed 3-23-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP88-77-000]

Natural Gas Pipeline Company of America; Changes in FERC Gas Tariff

March 18, 1988.

Take notice that on March 11, 1988, Natural Gas Pipeline Company of America (Natural) submitted for filing First Revised Sheet Nos. 21, 23, 24, 26, 27, 32, 33 and 35 to be a part of its FERC Gas Tariff, First Revised Volume No. 1A, to be effective June 1, 1988.

Natural states that the proposed sheets revise the provisions of Rate Schedule FTS to provide shippers with additional flexibility to reserve mainline capacity by allowing each shipper the option of selecting up to five secondary receipt points and five secondary delivery points. The proposed provision provides that the secondary points must be along and within the requested transportation paths established by the primary points. The Secondary receipt and delivery points shall be allowed only to the extent that they do not require additional capacity on any portion of Natural's system. Natural also states that volumes may be nominated in any mix of primary and secondary receipt and delivery points along and within the transportation paths established by the primary points. Shipper cannot use secondary points to increase the Maximum Daily Quantity levels along and within the transportation paths established by the primary points. Natural further states that the reservation charge, commodity charge and the fuel percentage will be based on the primary receipt and delivery points specified in the transportation agreement.

Natural also submitted for informational purposes only a study which indicates the amount of spare capacity and the segments on Natural's system where such spare capacity will become available if Natural's existing sales customers converted their sales contract quantities by a total of 200 MMcf per day and 500 MMcf per day to firm transportation.

Natural requests that the Commission grant any waivers it deems necessary to allow the tariff sheets to become effective June 1, 1988, a date coincident with the proposed effective date of its Gas Supply Charge.

A copy of this filing was mailed to Natural's jurisdictional customers and to interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211. All such motions or protests must be filed on or before March 25, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. RP85-13-018]

Northwest Pipeline Corp.; Proposed Change in FERC Gas Tariff

March 21, 1988.

Take notice that on March 14, 1988, Northwest Pipeline Corporation ("Northwest") tendered for filing and acceptance as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff Sheets:

Sixth Revised Sheet No. 1
Sixth Revised Sheet No. 14
Sixth Revised Sheet No. 84

Northwest states that these tariff sheets provide for the cancellation of Rate Schedule IS-1 as allowed by Commission order of May 31, 1985 at Docket No. RP85-13-000 *et al.* Rate Schedule IS-1 made gas available at an incentive rate to Northwest's ODL-1, PL-1 and DS-1 customers for gas purchase volumes on a monthly basis that were between a test period quantity and their contract demand on a customer by customer basis. Rate Schedule IS-1 expired by its terms on April 30, 1986. Northwest requests an effective date of April 13, 1988 with respect to the tendered tariff sheets.

A copy of the filing has been mailed to all affected customers under Rate Schedule IS-1 and interested state commissions.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 28, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6484 Filed 3-23-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP88-17-005]

Southern Natural Gas Co.; Proposed Changes in FERC Gas Tariff

March 21, 1988.

Take notice that on March 16, 1988, Southern Natural Gas Company (Southern) tendered for filing the followong tariff sheets to its FERC Gas Tariff, Sixth Revised Volume No. 1, to be effective December 1, 1987:

Second Revised Sheet No. 30S
Second Revised Sheet Nos. 30U-30V
Second Revised Sheet Nos. 30X-30Z
Original Sheet No. 30Z.1
Second Revised Sheet No. 30KK
Second Revised Sheet Nos. 30MM-30NN
Second Revised Sheet Nos. 30PP-30RR
Original Sheet No. 30RR.1
Second Revised Sheet No. 30SS
Second Revised Sheet Nos. 45.23-45R.24
Second Revised Sheet No. 45R.27
First Revised Sheet No. 531.34
First Revised Sheet No. 531.41
First Revised Sheet No. 531.50
First Revised Sheet No. 531.57

Southern states that on October 30, 1987, it filed in this proceeding revisions to its FERC Gas Tariff to establish as part of its Tariff Rate Schedules FT and IT, the General Terms and Conditions for Rate Schedules FT and IT, and Forms of Service Agreement under Rate Schedule FT and IT. The Commission issued its Order Accepting Filing and Suspending Tariff Sheets, Subject to Refund and Conditions, Convening Technical Conference and Granting Late Interventions on November 27, 1987, pursuant to which Southern filed revised tariff sheets on December 14, 1987. On March 1, 1988, the Commission issued its Order Accepting Partially Granting Rehearing, Accepting Compliance Filing Subject to Conditions, and Establishing Hearing (Order). Ordering Paragraph (C) required Southern to file within 15 days of the date of the issuance of the Order to make revisions prescribed by the Order. Accordingly, Southern has submitted the revised tariff sheets listed above and has requested a waiver of the Commission's Regulations to make the revised sheets effective December 1, 1987.

Southern states that copies of the filing were mailed to all of Southern's jurisdictional purchasers, shippers, and interested state commissions, as well as the parties listed on the Commission's official service list compiled in this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions or protests should be filed on or before March 28, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6483 Filed 3-23-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP88-75-000]

Transwestern Pipeline Co.; Tariff Changes

March 21, 1988.

Take notice that on March 15, 1988, Transwestern Pipeline Company (Transwestern) filed revised tariff sheets listed on the attached sheet. Such changes are designed to clarify and ease the administration of Transwestern's tariff provisions relative to non-discriminatory transportation services under its FTS-1 and ITS-1 Rate Schedules. Transwestern states that its filing also includes a revised form of service agreements for such services. Transwestern seeks a May 1, 1988 effective date for its proposed changes. Copies of Transwestern's filing were sent to all parties, jurisdictional customers and appropriate state regulatory agencies.

Any person desiring to become a party to this proceeding should on or before March 28, 1988, file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP82-55-037 and RP87-7-031]

Transcontinental Gas Pipe Line Corp.; Compliance Filing

March 18, 1988.

Take notice that on March 11, 1988, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing as part of its FERC Gas Tariff, Second Revise Volume No. 1, copies of certain tariff sheets to revise the rates for Transco's G and OG Rate Schedules for the period commencing April 1, 1987. Transco states that the tariff sheets are intended to comply with the terms of the Commission's January 29, 1988 order in this proceeding.

Transco states that Transco made a similar filing on February 16, 1988 but included only the tariff sheets pertaining to Transco existing rates, *i.e.*, tariff sheets to be effective as of January 1, 1988. Transco states that by Letter Order dated March 2, 1988, the Commission rejected Transco's February 16 filing, based on the concern that Transco had not calculated for each appropriate period the changes to Transco's G and OG rates for the period commencing April 1, 1987.

Transco states that in the instant filing, Transco has corrected the foregoing omission in its February 16 filing by including herein tariff sheets for each appropriate date commencing April 1, 1987 when rate filings required a change to Transco's rates.

Transco states further that Transco made refunds to its G and OG customers and filed a report of such refunds with the Commission on March 2, 1988. Transco states that Transco calculated the refunds to G and OG customers based on the difference between the rates actually billed to such customers and the rates at an imputed 80 percent load factor.

Transco states that copies of this filing are available at Transco's offices in Houston, Texas, and have been mailed to Transco's jurisdictional sales customers and interested State commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.211). All such motions or protests should be filed on or before March 25, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-6429 Filed 3-23-88; 8:45 am]

BILLING CODE 6717-01-M

Office of Conservation and Renewable Energy

[Case No. WH-006]

Energy Conservation Program for Consumer Products, Decision and Order Granting Waiver From Water Heater Test Procedures to Aero Environmental Limited

AGENCY: Department of Energy.

ACTION: Decision and Order.

SUMMARY: Notice is given of the Decision and Order [Case No. WH-006] granting Aero Environmental Limited a Waiver for its models CF-32T, CF-40S, and CF-50T oil-fired water heaters from the existing DOE water heater test procedures.

FOR FURTHER INFORMATION CONTACT:

Esher R. Kweller, U.S. Department of Energy, Office of Conservation and Renewable Energy, Mail Station CE-132, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9127.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC-12, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9513.

SUPPLEMENTAL INFORMATION: In accordance with 10 CFR 430.27(g), notice is hereby given of the issuance of the Decision and Order set out below. In the Decision and Order, Aero Environmental Limited has been granted a waiver for its Models CF-32T, CF-40S and CF-50T oil-fired water heaters, permitting the company to use a "simulated use" test method in lieu of the "cold-start recovery" test method in the existing test procedure.

Issued in Washington, DC, March 10, 1988.

Donna R. Fitzpatrick,

Assistant Secretary, Conservation and Renewable Energy.

Decision and Order

The Energy Conservation Program for Consumer Products was established pursuant to the Energy Policy and Conservation Act (EPCA), Pub. L. 94-163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Pub. L. 95-619, 92 Stat. 3266, and the National Appliance Energy Conservation Act of 1987, Pub. L. 100-12, which requires the Department of Energy (DOE) to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including water heaters. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchase decisions. These test procedures appear at 10 CFR Part 430, Subpart B.

Section 430.27 allows the Department of Energy to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing of the basic model according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption characteristics as to provide materially inadequate comparative data. 45 FR 64108 (September 26, 1980).

Pursuant to § 430.27(g), the Department shall publish in the **Federal Register** notice of each waiver granted, and any limiting conditions of each waiver.

Aero Environmental Limited (AERO) filed a "Petition for Waiver" in accordance with § 430.27 of 10 CFR Part 430. DOE published in the **Federal Register** the Aero petition and solicited comments, data, and information respecting the petition. 52 FR 46528 (December 8, 1987). No comments were received. DOE consulted with the Federal Trade Commission on January 29, 1988, concerning the Aero petition.

Assertions and Determinations

Aero filed a petition for waiver from the DOE test procedure for oil-fired water heaters. The Aero petition essentially asks for the allowance to rate its heaters in the same manner allowed to previous petitioners, Bock Water Heaters, Inc. (Bock), Ford Products Corporation (Ford), and Lochinvar Water Heater Corporation (Lochinvar).

Aero offers that its models CF-32T, CF-40S, and CF-50T oil-fired water heaters have a high termal mass which leads to unrepresentative values of recovery efficiency, and consequently, Aero seeks relief from the DOE "cold-start" recovery efficiency test methodology.

In the Bock, Ford, and Lochnivar Decision and Orders, DOE allowed the petitioners to determine the recovery efficiency of their oil-fired water heaters by use of a "simulated use" test method (50 FR 47106, November 14, 1985, 50 FR 50678, December 11, 1985, and 52 FR 46526, December 8, 1987, respectively). Accordingly, in the interest of consistency, and since DOE determined that the existing test method is inappropriate with regard to high thermal mass water heaters, today's Decision and Order allows Aero the use of the "simulated use" test method for its models CF-32T, CF-40S, and CF- 50T oil-fired water heaters.

It is therefore ordered that:

(1) The "Petition for Waiver" filed by Aero Environmental Limited (Case No. WH-006) is hereby granted as set forth in paragraph (2) below, subject to the provisions of paragraphs (3) and (4).

(2) Notwithstanding any contrary provisions, Aero Environmental Limited shall comply in all respects with the test procedures in Appendix E of 10 CFR Part 430, Subpart B. Aero shall be permitted to test its models CF-32T, CF-40S, and CF-50T oil-fired water heaters for recovery efficiency on the basis of the test procedures set forth below:

(i) Recovery Efficiency for Oil Water Heaters by the Simulated Use Method

The simulated use test involves withdrawing water from the hot water outlet of the water heater in three separate consecutive water draws. For both the first and second water draws, 21.4 gallons ± 0.5 gallon of water shall be withdrawn from the water heater. The third water draw shall be of a sufficient volume to bring the total volume of water withdrawn from the water heater by means of these three water draws to 64.3 gallons ± 0.5 gallon. Water shall be withdrawn at a rate of 3.0 ± 0.25 gallons per minute for each of the three water draws. All water volume measurements shall be made using the water flow meter specified in section 2 of Appendix E of 10 CFR Part 430.

Begin the simulated use test at the time a thermal equilibrium is achieved at the maximum mean tank temperature by recording the mean tank temperature in degrees F, recording the time, recording the water meter reading, commencing measurement of electrical and fossil fuel energy consumption by the water heater and starting the first water draw. During this draw and during all subsequent draws measure the temperature of the inlet and outlet water every minute commencing one minute after the start of the draw until the draw is complete. Immediately upon the conclusion of the first water draw record the water meter reading. Determine the first draw average inlet and outlet water temperatures T_{ID1} and T_{TD1} respectively) by averaging the measured temperature during the first draw. At the time a thermal equilibrium is achieved at the maximum mean tank temperature after the cutout following the recovery of the first water draw, begin the second water draw. Immediately upon the conclusion of the second water draw, record the water meter reading. Determining the second draw average inlet and outlet water

BEST COPY AVAILABLE

temperatures (T_{ID2} and T_{TD2} respectively) by averaging the measured temperatures during the second draw. At the time a thermal equilibrium is achieved at the maximum mean tank temperature after the cutout following the recovery of the second of the second water draw, begin the third water draw. Immediately upon the conclusion of the third draw, record the water meter reading and determine the third draw average inlet and outlet water temperatures (T_{ID3} and T_{TD3} respectively) by averaging the measured temperatures during the third draw. At the time a thermal equilibrium is achieved at the maximum mean tank temperature after the cutout following the recovery of third draw, record the total amount of energy consumed by the water heater since the start of the test (Z_R), in Btu's (where 3,412 Btu equals 1 kilowatt-hour). Determine the mean of the three outlet water temperature averages (T_{TWD} and the mean of the three inlet water temperature averages (T_{IWD}), in degrees F. Determine the total amount of water withdrawn from the water heater over all three water draws (V_{WD}), in gallons, from the appropriate recorded water meter readings.

(ii) Calculation of Recovery Efficiency Using the Results of the Simulated Use Test Method

Calculate the recovery efficiency (E_R) expressed as a dimensionless quantity and defined as:

$$E_R = \frac{(k)\,(V_{WD})(T_{TWD} - T_{IWD})}{(Z_R)}$$

where:

k = 0.25 Btu per gallon °F, the nominal specific heat of water

V_{WD} = volume of water withdrawn from the water heater over all three water draws of the simulated use test, determined in accordance with subparagraph (i) above expressed in gallons

T_{TWD} = mean of the outlet water temperature recordings made over the period of the three water draws of the simulated use test, determined in accordance with subparagraph (i) above expressed in degrees F

T_{IWD} = mean of the inlet water temperature recordings made over the period of the three water draws of the simulated use test, determined in accordance with subparagraph (i) above expressed in degrees F

Z_R = total amount of energy consumed by the water heater over the period of the three water draws of the simulated use test, determined in accordance with subparagraph (i) above expressed in Btu's.

(3) The waiver shall remain in effect from the date of issuance of this order until the Department of Energy prescribes a final rule with regard to the testing of oil-fired water heaters with high thermal mass.

(4) This waiver is based upon the presumed validity of statements, allegations, and documentary materials submitted by applicant. This waiver may be revoked or modified at any time upon a determination that the factual basis underlying the application is incorrect.

Issued in Washington, DC, March 10, 1988.

Donna R. Fitzpatrick,

Assistant Secretary, Conservation and Renewable Energy.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Cases Filed; Week of November 13 Through November 20, 1987

During the Week of November 13 through November 20, 1987, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

March 17, 1988.

George B. Breznay,

Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of Nov. 13 through Nov. 20, 1987]

Date	Name and location of applicant	Case No.	Type of submission
Nov. 13, 1987	Hilt Truck Lines, Inc., Washington, DC	RR270-6	Request for Modification/Rescission in the Stripper Well Litigation Proceeding. If granted: The November 2, 1987 Decision and Order (Case No. RF 270-1464) issued to Hilt Truck Lines, Inc. would be modified regarding the firm's application for refund as a surface transporter in the stripper well litigation proceeding.
Nov. 16, 1987	Centran, Inc., Sterling Heights, MI	RR270-27	Request for Modification/Rescission in the Stripper Well Litigation Proceeding. If granted: The October 26, 1987, Decision and Order issued to Centra, Inc. (Case No. RF270-1196) would be modified regarding the firm's application for refund as a surface transporter in the stripper well litigation proceeding.
Do	Coline, Pennzoil & Perry Gas/New York, Albany, New York.	RM2-92, RM10-93 & RM183-94.	Request for Modification/Rescission in the Second Stage Refund Proceedings. If granted: The June 5, 1987, Decision and Order issued to New York (Case Nos. RO2-283, RO10-282, & RO183-290) would be modified regarding the State's application for refund in the Coline, Pennzoil and Perry Gas refund proceedings.
Do	Senco Marketing, Irving, Texas	KEE-0157	Exception to the Reporting Requirements. If granted: Senco Marketing would no longer be required to file certain EIA reporting forms.
Nov. 17, 1987	Environmental Task Force, Portland, Oregon	KFA-0142	Appeal of an Information Request Denial. If granted: The October 5, 1987 Freedom of Information Request Denial issued by the Chief of FOI and Privacy Act Branch would be rescinded and the Environmental Task Force would receive access to documents regarding the creation of a group to assess the current and future status of nuclear power in America.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS—Continued

[Week of Nov. 13 through Nov. 20, 1987]

Date	Name and location of applicant	Case No.	Type of submission
Do	Iowa, Des Moines, Iowa	KEG-0024	Petition for Special Redress. If granted: The Office of Hearings and Appeals would review the proposed expenditures for stripper-well funds which were disapproved by the Assistant Secretary for Conservation and Renewable Energy.

REFUND APPLICATIONS RECEIVED

[Week of Nov. 13 to Nov. 20, 1987]

Date received	Name of refund proceeding/name of refund applicant	Case No.
11/16/87	A.P. Green Refractories Corp	RF 299-40.
11/20/87	Emerson Electric Company	RF 225-10918.
11/20/87	Emerson Electric Company	RF 250-2742.
11/19/87	Luci Petroleum, Inc	RF 299-42.
11/19/87	Lucy Vitale	RF 276-295.
11/18/87	Southland Corporation	RF 293-9.
11/13/87	Toms River Chemical Corp	RF 299-37.
11/13/87	Leach Camper Sales, Inc	RF 299-38.
11/13/87	Sealright Co., Inc	RF 299-39.
11/16/87	Charles E. Smith Companies	RD 272-219.

BILLING CODE 6450-01-M

Issuance of Decisions and Orders; Week of February 1 Through February 5, 1988

During the week of February 1 through February 5, 1988, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeals

Storage Technology Corporation, 02/04/88; KFA-0157

The Storage Technology Coporation filed an Appeal from a partial denial by the Manager of the Schenectady Naval Reactors Office of a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). The DOE found that the Manager properly withheld the sought material under Exemption 4 of the FOIA. An important issue that was considered in the Decision and Order was whether Federal Acquisition Regulation § 15.1001(c)(1)(IV) mandates the disclosure of unit prices in a contract between a government contractor and a private firm.

USA Petroleum Corp., 02/02/88; KFA-0155

USA Petroleum Corp. (USAP) filed an Appeal challenging the extent to which the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) complied with an OHA order directing that ERA release certain documents to USAP pursuant to the Freedom of Information Act. In its appeal, USAP questioned the adequacy of the ERA's search. The DOE found that the ERA's search for responsive documents was not adequate and therefore remanded the matter to the ERA for further consideration.

Interlocutory Order

Economic Regulatory Administration, 02/04/88; KRZ-0075

The Economic Regulatory Administration (ERA) filed a submission entitled "Motion for an Order Which Accords No Weight to the Affidavits of B.B. Fox and Robert E. Way or, In the Alternative, Motion for Further Discovery." The ERA's motion related to a prior OHA decision approving discovery in connection with an enforcement proceeding involving Texaco, Inc. In its motion, ERA claimed that certain affidavits provided by Texaco pursuant to the discovery decision were without factual basis and should therefore be accorded no weight in the underlying enforcement proceeding. In the alternative, the ERA sought to depose the affiants, Fox and Way. After considering the motion, the OHA determined that the affidavits of Fox and Way would be most efficiently tested through cross-examination in the context of an evidentiary hearing. Accordingly, OHA directed that an evidentiary hearing be convened to receive the testimony of Fox and Way. In all other respects, the motion was denied.

Supplemental Order

Ernest E. Allerkamp, et al., 02/04/88; KFX-0033, et al.

The DOE issued a Decision and Order implementing procedures for the distribution of $130.5 million (plus accrued interest) in crude oil overcharge funds obtained from 111 separate settlements, consent orders or remedial orders. The DOE determined that the funds should be distributed in accordance with the Department's Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges. Accordingly, 80 percent of the money in these cases was divided equally between the state and federal governments. Twenty percent of the funds was reserved for direct restitution to injured parties submitting claims to the OHA under 10 CFR Part 205, Subpart V. The specific information to be included in applications for refund and the standards by which Subpart V crude oil refund claims will be evaluated are set forth in the Decision. All applications must be submitted by June 30, 1988.

Refund Applications

Beacon Oil Company/Frost Oil Company, 02/03/88; RF238-47

The DOE issued a Decision and Order concerning an Application for Refund filed on behalf of the Frost Oil Company (Frost) in the Beacon Oil Company (Beacon) special refund proceeding. The DOE concluded that Frost was injured with respect to the 119,829 gallons of diesel fuel, kerosene, and solvents that the firm purchased from Beacon during the period August 19, 1973 through October 31, 1973. Accordingly, Frost was granted a refund or $3,802, representing $1,831 in principal and $1,971 in accrued interest.

Carl Broweleit, et al., 02/04/88; RF272-1355, et al.

The DOE issued a Decision and Order approving the applicatons for crude oil overcharge refunds submitted by 22 claimants. The DOE found that the claimants, all end-users, met the eligibility requirements by supplying their actual or estimated refined petroleum product purchase volumes for their agricultural activities. The DOE granted the claimants a total refund of $775 based on purchases of 3,869,394 gallons of refined petroleum products from August 19, 1973 through January 27, 1981

Chattanooga Area Regional Transportation Authority, et al., 02/05/88; RF272-2, et al.

The DOE issued a Decision and Order granting refunds to 19 transit authorities and municipal governments that filed Applications for Refund under OHA's Subpart V crude oil overcharge refund proceedings. Each applicant provided evidence of the volume of refined petroleum products that it purchased during the period August 19, 1973 through January 27, 1981. As a transit authority or governmental entity end-user, each applicant was found to have been injured as a result of the crude oil overcharges on the basis of the end-user presumption of injury. The refund granted was $22,034.

Chet's Cedarville Quicki Stop, 2/5/88; RF272-2047

The DOE issued a Decision and Order denying an application for crude oil overcharge refunds filed by Chet's Cedarville Quicki Stop. Chet's was a gasoline retailer during the period August 19, 1973 through January 27, 1981. Because Chet's did not demonstrate that it was injured due to the crude oil overchanges, it was ineligible for a crude oil refund.

Clouse Brothers, et al., 02/05/88; RF272-4136, et al.

The DOE issued a Decision and Order granting refunds to 50 claimants that filed Applications for Refund in OHA's Subpart V crude oil overcharge refund proceedings. Each applicant provided evidence of the volume of refined petroleum products that it purchased during the period August 19, 1973 through January 27, 1981. All claimants were agricultural end-users of petroleum products. Each claimant was found to have been injured as a result of the crude oil overcharges on the basis of the end-user presumption of injury. The refunds totaled $1,549.

Cranston Oil Service Company, Inc./Pasco La Fazia, et al., 02/05/88; RF276-31, et al.

The DOE issued a Decision and Order concerning 13 Applications for Refund filed by purchasers of No. 2 heating oil covered by a consent order that the agency entered into with Cranston Oil Service Company, Inc. Each applicant's refund was based on estimated usage of 2,500 gallons of heating oil during the consent order period. Since each applicant was an end-user of that product, each was presumed injured as a result of its Cranston purchases. The sum of the refunds approved in this Decision is $754, representing $650 in principal and $104 in interest.

Earnest Lawson, et al., 02/04/88; RF272-2160, et al.

The DOE issued a Decision and Order approving thirty-two Applications for Refund from crude oil overcharge funds. The thirty-two claimants were farmers who used the USDA formula to derive the number of gallons of petroleum products they purchased during the period August 19, 1973 through January 27, 1981. Because the claimants were end-users, they were not required to demonstrate injury. A total refund of $346 was approved in this Decision and Order.

Hartsville Oil Mill, 02/02/88; RF272-1361

The Office of Hearings and Appeals of the Department of Energy issued a Decision and Order approving the Application for Refund submitted by Hartsville Oil Mill from crude oil overcharge funds. The OHA determined that each of four petroleum products purchased by Hartsville could properly form the basis for a refund. In particular, the DOE determined that Hartsville was eligible for a refund for purchases of hexane, a hydrocarbon used by Hartsville to extract vegetable oil from soybeans. The DOE fund the hexane purchases could form the basis for a refund because that product was covered by Agency regulations. The OHA granted the claimant a total refund of $2,809 based on purchases of 14,046,895 gallons of refined petroleum products.

Howard Oil Co., Inc./Chevron U.S.A., Inc., 02/01/88; RF286-7

The DOE isued a Decision and Order granting a refund to Chevron U.S.A., Inc. from the fund which Howard Oil Co., Inc. remitted to the DOE pursuant to a Settlement Agreement. The DOE found that Chevron, a reseller of Howard middle distillates, demonstrated that it was unable to pass through Howard overcharges and was, accordingly, injured as a result of its Howard purchases. The total refund approved in this Decision was $37,106 representing $31,170 in principal and $5,936 in interest.

Husky Oil Company/Dave's Husky Service, 02/02/88; RF161-106

The DOE issued a Decision and Order concerning an Application for Refund filed by Dave's Husky Service in the Husky Oil Company special refund proceeding. Dave's, a retailer of Husky motor gasoline and diesel fuel, demonstrated that it was eligible for a refund based on the $5,000 small claims presumption. Accordingly, the firm was granted a refund of $1,861, representing $1,274 in principal and $587 in accrued interest.

Mobil Oil Corporation/A-Z Service Station, Inc., et al., 02/05/88, RF225-6318, et al.

The DOE issued a Decision granting 56 Applications for Refund from the Mobil Oil Corporation escrow account filed by retailers and resellers of Mobil refined petroleum products. Each applicant elected to apply for a refund based upon the presumptions set forth in *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). The DOE granted refunds totalling $48,650 ($39,274 in principal plus $9,376 in interest).

Mobil Oil Corporation/Adeeb Bathish, et al., 01/04/88, RF225-1350, et al.

The DOE issued a Decision granting 42 Applications for Refund from the Mobil Oil Corporation escrow account filed by retailers and resellers of Mobil refined petroleum products. Each applicant elected to apply for a refund based upon the presumptions set forth in *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). The DOE granted refunds totalling $42,911 ($34,638 in principal plus $8,273 in interest).

Mobil Oil Corporation/Alfred A. Rose, et al., 02/05/88, RF225-5776, et al.

The DOE issued a Decision granting 22 Applications for Refund from the Mobil Oil Corporation escrow account filed by retailers, resellers, and end-users of Mobil refined petroleum products. Each applicant elected to apply for a refund based upon the presumptions set forth in *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). The DOE granted refunds totalling $31,176 ($25,167 in principal plus $6,009 in interest).

Mobil Oil Corporation/Manor Fuel Oil Company, Inc., 02/04/88 RF225-5012, RF225-5013

The DOE issued a Decision granting an Application for Refund from the Mobil Oil Corporation escrow account to Manor Fuel Oil Company, Inc. Since Manor was unable to provide data demonstrating injury, its refund was limited to the small claims threshold of $5,000. The refund amount approved in this Decision and Order totalled $6,194, representing $5,000 in principal plus $1,194 in interest.

Mobil Oil Corporation/Perry Oil Company, 02/03/88, RF225-9258, RF225-9259, RF225-9260

The DOE issued a Decision and Order granting Applications for Refund from the Mobil Oil Corporation escrow account filed by Perry Oil Company, a reseller of Mobil refined Petroleum products. In its refund application based on motor gasoline purchases, Perry elected to submit documentation that it was injured by Mobil's pricing practices. The DOE found that the firm's negative gasoline banks through December 1, 1974 indicated that the firm had passed through any motor gasoline overcharges incurred prior to that date. The DOE concluded that Perry was therefore eligible to receive the full volumetric refund amount only for its purchases of Mobil motor gasoline made after December 1, 1974. That refund amount was $4,284. Because this amount was less than the $5,000 small claims level and because the firm had not attempted to demonstrate injury concerning its Mobil middle distillate and motor oil purchases, the DOE also granted Perry a refund based on its purchases of those products sufficient to raise its refund principal to $5,000. The DOE further granted the firm interest of $1,194.

Saber Agency, Inc./NGL Supply, Inc., 02/05/88, RF192-22

NGL Supply, Inc. filed an Application for Refund in the Saber Energy, Inc. special refund proceeding. The DOE found that NGL Supply purchased Saber products in only four quarters of the eight-year consent order period and therefore the firm was a spot purchaser. Because NGL Supply neither demonstrated that its purchases were not spot purchases, nor rebutted the presumption that as a spot purchaser it suffered no injury, its Application for Refund was denied.

Dismissals

The following submissions were dismissed:

Name	Case No.
Bonus International, Inc	RF225-10252.
Crowley Maritime Corp	RF225-6168.
Depere Service Center	RF225-9543.
Oklahoma	KEG-0026.
Wither Oil Corp	RF225-6622, RF225-6623.
Wooleyhan Transport Co	RF225-3650.

Copies of the full text of these decisions and orders are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

BILLING CODE 6450-01-M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Notice of proposed implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding to adversely affected parties $860,896 obtained as a result of a Consent Order that the DOE entered into with E.D.G., Inc. (Case No. KEF-0003), a reseller-retailer of petroleum products located in Long Beach, California. The money is being held in escrow following the settlement of enforcement proceedings brought by the DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Comments must be filed on or before April 25, 1988, and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585. All comments should conspicuously display a reference to case number KEF-0003.

FOR FURTHER INFORMATION CONTACT: Thomas L. Wieker, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-2390.

SUPPLEMENTARY INFORMATION: In accordance with the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision relates to a December 17, 1979 consent order between the DOE and E.D.G., Inc. (EDG). That consent order settled certain disputes between the firm and the DOE concerning EDG's possible violations of DOE regulations in its sales of gasoline and No. 2 distillates. The consent order covers the period August 19, 1973 through September 24, 1976.

The Proposed Decision sets forth the procedures and standards that the DOE has tentatively formulated to distribute the contents of an escrow account in the amount of $860,896, funded by EDG pursuant to the consent order. The DOE has proposed that the consent order fund be disbursed to 28 purchasers identified in the Consent Order that were allegedly overcharged by EDG in its sales of gasoline and No. 2 distillates. These customers and their respective overcharge amounts are listed in the Appendix of the Proposed Decision. Under the proposed procedures, the OHA will consider refund applications only from these 28 identified EDG customers. The amount of the refund available to an applicant will be limited to the amount it was allegedly overcharged by EDG according to the Consent Order. In order to obtain a refund, each claimant will be required to submit a schedule of its monthly purchases of covered product from EDG. The specific requirements for proving injury are set forth in the Proposed Decision and Order.

Applications for Refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized. Any member of the public may submit written comments regarding the proposed refund procedures. Such parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice. All comments received in this proceeding will be available for public inspection between 1:00 and 5:00 p.m., Monday through Friday, except federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E–234, 1000 Independence Avenue SW., Washington, DC 20585.

Dated: March 16, 1988.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order

March 16, 1988.

Name of Firm: E.D.G., Inc.
Date of Filing: October 16, 1985.
Case Number: KEF–0003.

On October 16, 1985, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) filed a petition with the Office of Hearings and Appeals (OHA), requesting that the OHA formulate and implement procedures for distributing funds obtained through the settlement of enforcement proceedings involving E.D.G., Inc. (EDG). 10 CFR Part 205, Subpart V. This Proposed Decision sets forth the OHA's tentative plan for distributing these funds to qualified refund applicants. Since the procedures set forth in this Decision are in proposed form, no refund applications should be filed at this time. A final determination will be issued at a later date announcing that the filing of EDG refund applications is authorized.

I. Background

EDG was a "reseller-retailer" of gasoline and No. 2 distillates as that term was defined in 10 CFR 212.31 and was subject to the DOE Mandatory Petroleum Price Regulations. On the basis of an extensive audit of the firm's pricing practices during the period August 19, 1973 through September 24, 1976 (the consent order period), the ERA alleged that EDG overcharged its customers in sales of gasoline and No. 2 distillates.[1] In order to settle all claims and disputes between EDG and the DOE, the two parties entered into a consent order that became final on December 17, 1979. The Consent Order covers EDG's sales of motor gasoline and No. 2 distillates during the consent order period.

This Proposed Decision and Order concerns the distribution of $945,524, plus accrued interest, that EDG remitted to the DOE for direct restitution to 29 of its identified reseller-retailer customers. *See* EDG Consent Order, 44 FR 73140 (December 17, 1979).[2] Appendix D of the EDG Consent Order, which is attached as an Appendix to this Proposed Decision, sets forth the names of these EDG purchasers and the amount that each customer was allegedly overcharged by EDG.[3] Accordingly, the protential refund claimants in this proceeding are the reseller-retailer customers listed in the Appendix of this Proposed Decision.[4]

II. Proposed Refund Procedures

As indicated above, the EDG customers listed in the Appendix of this Proposed Decision constitute a finite set of potential refund claimants. We therefore propose to consider refund applications *only* from these customers. We further propose that each claimant's refund in this proceeding be limited to the amount it was allegedly overcharged by EDG. These amounts are listed next to each potential claimant's name in the Appendix. We recognize that any eligible firm could have been overcharged in amounts greater than the overcharges specified in the appendix of this Proposed Decision. Nonetheless, an eligible firm may not receive a refund in excess of the amount specified in the Appendix. It would simply be illogical to permit an applicant to receive a refund that exceeds the amount that the ERA collected with respect to the consent order firm's transactions with that applicant. Moreover, it would be inequitable to permit such a refund, because it would deplete the consent order fund at the expense of other parties entitled to direct and indirect restitution from the fund. Accordingly, on the grounds of both logic and equity, an eligible firm's maximum refund will be limited to the amount specified for that firm in the Appendix.

The allocation of potential refund amounts to claimants is only the first step in the distribution process. We propose that in order to receive a refund, an applicant must demonstrate that it did not pass on the alleged overcharges to its customers during the consent order period. *See, e.g., Office of Enforcement,* 8 DOE ¶ 82,597 at 85,396 (1981). As we have done in many prior refund cases, we propose to adopt specific injury presumptions that will simplify and streamline the refund process. These presumptions will excuse members of certain applicant categories from proving that they were injured by EDG's alleged overcharges. We will discuss these presumptions in Section II(A) below.

(A) Refund Claimants

(1) Reseller-Retailer Applicants Seeking Refunds of $5,000 or Less. We propose to adopt a presumption, as we have in many previous cases, that purchasers seeking small refunds were injured by EDG's pricing practices. *See, e.g., Uban Oil Co.,* 9 DOE ¶ 82,541 at 85,224–25 (1982). We recognize that the cost to the applicant of gathering evidence of injury to support a small refund claim could exceed the expected refund. Consequently, without simplified procedures, some injured parties would be denied an opportunity to obtain a refund. Under the small-claims presumption, a claimant seeking total refunds of $5,000 or less will not be required to submit any evidence of injury beyond establishing the volume of EDG products it purchased during the consent order period. *Texas Oil & Gas Corp.,* 12 DOE ¶ 85,069 at 88,210 (1984). We propose that applicants seeking refunds in excess of $5,000 must follow the procedures that are outlined below.

(2) Reseller-Retailer Applicants Seeking Larger Refunds. We propose that if a firm's claim exceeds $5,000, it will be required to provide a detailed demonstration of its injury. We propose that it will be required to demonstrate that it maintained a "bank" of unrecovered product costs in order to show that it did not pass along the alleged overcharges to its own customers. In addition, we propose that a claimant must show that market conditions would not permit it to pass through those increased costs. *See Panhandle Eastern Pipeline Co./I. V. Cole Petroleum Co.,* 10 DOE ¶ 85,051 at 88,265 (1983). For periods in which the DOE regulations did not require retailers to compute cost banks, we propose that a retailer will only be required to show that market conditions prevented it from recovering increased costs. Such a showing might be made through a demonstration of lowered profit margins, decreased market share, or depressed sales volume during the period of purchases from EDG. *American Pacific International,* 14 DOE ¶ 85,158 at 88,295 (1986). If a reseller-retailer that is eligible for a refund in excess of $5,000 elects not to submit the cost bank and purchase price information described above, it may still apply for a small claims refund of $5,000, plus accrued interest.

(3) Other Applicants. If any one of the firms listed in the Appendix of this Proposed Decision is not a reseller-retailer, it is still eligible to apply for a refund in this proceeding. We propose to adopt a finding that end-users or ultimate consumers whose businesses are unrelated to the petroleum industry where injured by EDG's alleged overcharges. Unlike regulated firms in the petroleum industry, end-users generally were not subject to price controls during the consent order period. Moreover, they were not required to keep records that justified selling price increases by reference to cost increases. For these reasons, an analysis of the impact of the alleged overcharges on the final prices of non-petroleum goods and services would be beyond the scope of a special refund proceeding. *See, e.g., Dorchester Gas Corp.,* 14 DOE ¶ 85,240 at 88,450 (1986). We propose, therefore, that if any EDG purchaser listed in the Appendix of this Proposed Decision is an end-user, it need only establish that it was an ultimate consumer of EDG gasoline and/or No. 2 distillates during the consent order period to receive its maximum refund amount.

(B) Distribution of the Remainder of the Consent Order Funds Attributable to EDG's Sales of Gasoline and No. 2 Distillates

In the event that money remains after all refund claims from the EDG fund have been analyzed, those funds in that account will be disbursed in accordance with the provisions of the Petroleum Overcharge Distribution and Restitution Act of 1986, H.R. 5400, Title III, 99th Cong. 2d Session., Cong. Rec. H11319–21, (Daily E. October 17, 1986).

III. Conclusion

Applications for Refund should not be filed at this time. Detailed procedures for filing Applications for Refund will be provided in a final Decision and Order. Before distributing any portion of the consent order fund, we intend to publicize the distribution process, to solicit comments on the proposed refund procedures, and to provide an opportunity for any potential claimants to file a claim. In addition to publishing copies of the proposed and final decision in the **Federal Register**, copies will be provided to the EDG customers listed in the Appendix of this Proposed Decision.[5] Comments regarding the tentative distribution process set forth in this Proposed Order should be filed with the Office of Hearings and Appeals within 30 days of the publication of this Proposed Order in the **Federal Register**.

It Is Therefore Ordered That:

The refund amount remitted to the Department of Energy by E.D.G., Inc., pursuant to the Consent Order executed on December 17, 1979, will be distributed in accordance with the foregoing decision.

---

[1] EDG ceased its petroleum operations on September 24, 1976 and was therefore subject to the regulations only until that date.

[2] On January 9, 1980, EDG remitted $945,524 in principal and $360,859 in interest to the DOE. According to our records, this total of $1,306,383 ($945,524 + $360,859 = $1,306,383), which includes principal and interest accrued theron, should be treated as principal. *See* March 21, 1988 Memo from the Office of Hearings and Appeals to the Office of the Controller at 1. Any successful claimants in this proceeding will be awarded a pro-rata share of the $1,306, 383, plus a pro-rata share of the interest that has accrued on this amount since the date of remittance.

[3] World Oil Company, Inc., one of the 29 EDG customers identified in Appendix D of the EDG Consent Order, waived its right to a refund in the EDG proceeding under a consent order it entered into with the DOE on January 19, 1984. *See* World Consent Order, 49 FR 2290, 2291 (January 19, 1984). Consequently, the DOE transferred the amount designated to World in the EDG proceeding, $445,487 in principal and $412,216 in interest, from the EDG Escrow Account to the World Account. World Oil Company is therefore not eligible to apply for a refund in this proceeding.

[4] The Consent Order states that EDG agreed to refund an additional $54,476 plus accrued interest to 34 of its end-user customers. *See* Appendix C of EDG Consent Order for a list of these end-user customers and the amounts that they were allegedly overcharged by EDG. These funds have already been distributed pursuant to the Consent Order and therefore are not subject to the present Subpart V proceeding.

APPENDIX

Identified purchasers	Potential refund [1]
Al-Sal Oil	$46,512
Anco Oil Company	12,268
Brokers Petroleum Inc	84,541
J.E. Dewitt	78,123
Dunbar Texaco	752
Dytron Development Company	36,258
Fletcher Oil Co	170
Fisher Motor Company	35,713
Golden Arrow Dairy	98,303
H.E. Graham	156,430
Greinke Petroleum Corp	1,511
Archie Jacobs	686
Jessups Drive-In Dairy	602
Keen, Inc	29,081
L&S Service	2,165
Lockmann Farms	422
Mag Oil Company	2,296
Marlex Petroleum Company	65,724
William L. Martin II	3,818
Nickey Petroleum Company	2,792
Payless Oil Company	3,897
Pesky	635
Petromar Distributors	111,645
Quick Save	5,673
Reliance Dairy	8,619
Rocky Home Dairy	61,701
Santa Fe Service	346
Bob Smith Oil Company	10,213
Total	860,896

[1] Each identified purchaser's potential refund was calculated by adding the amount it was allegedly overcharged by EDG to its prorated share of the interest that had accrued up until the date of remittance. This amount does *not* include a prorated share of the interest that has accured on the escrow account since the date of remittance.

---

[5] The addresses of the EDG customers listed in the Appendix were obtained from DOE audit files.

[FR Doc. 88–6456 Filed 3–23–88; 8:45 am]

BILLING CODE 6450-01-M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, DOE.

ACTION: Implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals (OHA) of the Department of Energy (DOE) announces the procedures for disbursement of $163.3 million, plus accrued interest, in alleged crude oil violation amounts obtained from Shell Oil Company. The OHA has determined that the funds will be distributed in accordance with the DOE's Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges, 51 FR 27899 (August 4, 1986).

DATE AND ADDRESS: Applications for refund must be filed by June 30, 1988, and should reference Case Number KFX–0048 and be addressed to: Subpart V Crude Oil Overcharge Refunds, Office of Hearings and Appeals, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Roger Klurfeld, Assistant Director, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–2094 (Mann); 586–2383 (Klurfeld).

SUPPLEMENTARY INFORMATION: In accordance with 20 CFR 205.282(c), notice is hereby given of the issuance of the Decision and Order set out below. The Decision sets forth the final procedures that the DOE has formulated to distribute the portion of the funds obtained from Shell Oil Company that are attributable to alleged crude oil overcharges. These funds were obtained from Shell as a result of a consent order entered into by the DOE and Shell on March 26, 1987. The funds are being held in an interest-bearing escrow account pending distribution by the DOE. Procedures for distribution of the refined product pool of the Shell consent order funds will be established at a future time.

The OHA has decided to distribute the crude oil overcharge funds in accordance with the DOE's Modified Statement of Restitutionary Policy Concerning Crude Oil Overcharges, 51 FR 27899 (August 4, 1986). Under the Modified Policy, crude oil overcharge monies are divided among the states, the federal government, and injured purchasers of refined products. Refunds to the states will be distributed in proportion to each state's consumption of petroleum products during the period of price controls. Refunds of eligible purchasers will be based on the number of gallons of petroleum products which they purchased and the extent to which they can demonstrate injury.

Applications for crude oil refunds must be filed by June 30, 1988, and should be sent to the address set forth at the beginning of this notice. The information which claimants should include in their applications is explained in the Decision, which immediately follows. Any claimant that has already filed a crude oil refund application need not file again. Applications for refund from the refined product pool should not be submitted at this time.

Date: March 15, 1988.

George B. Breznay,

Director, Office of Hearings and Appeals.

Decision and Order

March 15, 1988.

Name of Case: Shell Oil Company.
Date of Filing: April 29, 1987.
Case Number: KFX–0048.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special refund procedures. 10 CFR section 205.281. These procedures are used to refund monies to those injured by actual or alleged violations of the DOE price regulations.

On April 29, 1987, the ERA filed a Petition for the Implementation of Special Refund Procedures to distribute funds received from Shell Oil Company under the terms of a March 26, 1987 consent order with Shell. Pursuant to the terms of the consent order, Shell remitted a total of $183,667,955.78 to the DOE for distribution in accordance with 10 CFR Part 205, Subpart V.[1] An additional $9,461,960.10 in interest had accrued on that amount as of February 29, 1988. This Decision and Order establishes procedures for distributing the portion of those funds attributable to alleged crude oil violations.

The general guidelines which the OHA may use to formulate and implement a plan to distribute refunds are set forth in 10 CFR Part 205, Subpart V. The Subpart V process may be used in situations where the DOE cannot readily identify the persons who may have been injured as a result of actual or alleged violations of the regulations or ascertain the amount of the refund each person should receive. For a more detailed discussion of Subpart V and the authority of the OHA to fashion procedures to distribute refunds, see *Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981). We have considered the ERA's request to implement Subpart V procedures with respect to the monies received from Shell and have determined that such procedures are appropriate.

I. Background

On July 28, 1986, the DOE issued its Modified Statement of Restitutionary Policy concerning crude oil overcharges. 51 FR 27899 (August 4, 1986) ("the MSRP"). The MSRP, which was issued as a result of a court-approved Final Settlement Agreement in *In Re: The Department of Energy Stripper Well Exemption Litigation*, M.D.L. 378 (D. Kan.), provides that crude oil overcharge monies will be divided among the states, the federal government, and injured purchasers of refined petroleum products. Under the MSRP, up to 20 percent of these crude oil overcharge funds will be reserved initially to satisfy valid claims by injured purchasers of crude oil and refined petroleum products. Eighty percent of the funds, and any monies remaining after all valid claims are paid, are to be disbursed equally to the states and federal government for indirect restitution.

The OHA has been applying the MSRP in all Subpart V proceedings involving alleged crude oil violations. *See* Order Implementing the MSRP, 51 FR 29689 (August 20, 1986). That Order provided a period of 30 days for the filing of any objections to the application of the MSRP, and solicited comments concerning the appropriate procedures to follow in processing refund applications in crude oil refund proceedings.

On April 10, 1987, the OHA issued a Notice analyzing the numerous comments which it received in response to the August 1986 Order. 52 FR 11737. The Notice set forth generalized procedures and provided guidance to assist claimants that wish to file refund applications for crude oil monies under the Subpart V regulations. All applicants for refunds would be required to document their purchase volumes of petroleum products during the period of price controls and to prove that they were injured by the alleged overcharges. The Notice indicated that end-users of petroleum products whose businesses are unrelated to the petroleum industry will be presumed to have absorbed the crude oil overcharges, and need not submit any further proof of injury to receive a refund. Finally, we stated that refunds would be calculated on the basis of a per gallon refund amount derived by dividing crude oil violation amounts by the total consumption of petroleum products in the United States during the period of price controls. The numerator would include the crude oil overcharge monies that were in the DOE's escrow account at the time of the settlement and a portion of the funds in the MDL 378 escrow at the time of the settlement.

These procedures have been approved by the United States District Court for the District of Kansas. Various States had filed a Motion with that Court, claiming that the OHA violated the Settlement Agreement by employing presumptions of injury for end-users and by improperly calculating the refund amount to be used in those proceedings. On August 17, 1987, Judge Theis issued an Opinion and Order denying the States' Motion in its entirety. The court concluded that the Settlement Agreement "does not bar OHA from permitting claimants to employ reasonable presumptions in affirmatively demonstrating injury entitling them to a refund." *In Re: The Department of Energy Stripper Well Exemption Litigation*, M.D.L. No. 378, 3 Fed. Energy Guidelines ¶ 26,587 at 26,826 (D. Kan. 1987). The court also ruled that, as specified in the April 1987 Notice, the OHA could calculate refunds based on a portion of the M.D.L. 378 overcharges. *Id.* at 26,827. The States have appealed the latter ruling. *In Re: The Department of Energy Stripper Well Exemption Litigation*, No. 10–76 (Temp. Emer. Ct. App. filed Nov. 5, 1987).

II. The Proposed Decision and Order

On December 10, 1987, the OHA issued a Proposed Decision and Order tentatively establishing procedures for the distribution of the $183,667,955.78 received from Shell, plus accrued interest. *Shell Oil Company*, 52 FR 47967 (December 17, 1987). In that Decision, we proposed to divide the consent order funds into two pools: a refined product pool consisting of $20,407,550.64 plus interest, and a crude oil pool of $163,260,405.14 plus interest. The refined product pool would be made available for distribution to purchasers of Shell refined petroleum products who demonstrate that they were injured as a result of Shell's alleged regulatory violations. We further proposed that the crude oil pool would be distributed in accordance with the MSRP and the April 1987 Notice. In this Decision, we will establish procedures for distributing the Shell crude oil pool only. Procedures for distributing the refined product pool will be issued at a future time.

Pursuant to the MSRP, the OHA proposed in *Shell* to reserve initially 20 percent of the crude oil pool for direct restitution to applicants who claim that they were injured by the alleged crude oil violations. The remaining 80 percent of the funds, would be distributed to the state and federal governments for indirect restitution. After all valid claims are paid, any remaining funds in the claims reserve also would be divided equally between the states and federal government. The federal government's share ultimately would be deposited into the general fund of the Treasury of the United States.

In *Shell*, the OHA proposed to require applicants for refunds from the crude oil pool to document their purchase volumes of petroleum products during the period of price controls and to prove that they were injured by the alleged crude oil overcharges. The Proposed Decision stated that end-users of petroleum products whose businesses are unrelated to the petroleum industry could use a presumption that they absorbed the crude oil overcharges, and need not submit any further proof of injury to receive a refund. The OHA also proposed to calculate refunds on the basis of a per gallon refund amount derived by dividing the amount of funds in the crude oil pool by the total consumption of petroleum products in the United States during the period of price controls. Finally, the OHA proposed to combine the Shell crude oil volumetric refund amount with all of the volumetric refund amounts obtained in each crude oil refund proceeding implemented to date under the MSRP. Comments were solicited regarding the tentative distribution process set forth in the Proposed Decision.

III. Discussion of the Comments Received

In response to the *Shell* Proposed Decision, the OHA received comments from the following: a group of 29 States and Territories of the United States ("the States"); a group of 43 ocean carriers and foreign air carriers; Philip P. Kalodner as counsel for six electric utilities, 14 shipping companies and five pulp and paper manufacturers; and the Controller of California ("the Controller").[2] The comments received from the various parties are nearly identical to those received and discussed in *Ernest E Allerkamp*, 17 DOE ¶ 85,079 (1988); *Berry Holding Company*, 16 DOE ¶ 85,405 (1987); and *A. Tarricone, Inc.*, 15 DOE ¶ 85,495 (1987). Our discussion of the comments will therefore be brief.

The States and the Controller have submitted comments concerning the presumption of injury for end-users proposed in *Shell* and established in all crude oil proceedings implemented under the MSRP. These commenters correctly point out that the end-user presumption is rebuttable, and they request that the OHA emphasize in this Decision the rebuttable nature of the presumption. However, the States' argument that the presumption of injury can be rebutted merely by the presentation of any evidence which bears upon the presumption is erroneous. As we stated in *Allerkamp*, the claimants' burden of proof is eased by the presumption. If an interested party submits evidence to rebut the presumption of injury, we must first determine whether the evidence submitted is relevant to the issue. If the evidence is relevant and sufficient to rebut the presumption, the claimant has the burden of coming forward with further evidence of injury. However, if we find the evidence submitted to rebut the presumption to be insufficient, a refund to the end-user can be approved, based upon the weight of the presumption, without requiring the end-user to submit further evidence of injury. *Allerkamp*, 17 DOE at 88,173.

We are similarly unpersuaded by the States' contention that econometric evidence should be used to calculate the percentage of alleged crude oil overcharges that were absorbed by refiner, resellers and retailers, and that any refunds to end-users should be reduced by that amount. As we noted in *Allerkamp*, this plan would unnecessarily delay the Subpart V refund process for an extended period of time and needlessly complicate the calculation of refunds. *Id.* at 88,173. In contrast, the "full parity" approach set forth in the April 1987 Notice and in *Allerkamp* provides a simple, balanced and fair method for calculating refunds. Under the "full parity" method, the numerator of the volumetric formula includes only $985 million of the $1.4 billion in the MDL escrow at the time of the Settlement Agreement. The $415 millon refunded to refiners, resellers and retailers, which represents the total amount of upstream absorption for all crude oil overcharges, is not included. Thus, the numerator excludes the amount of injury attributed to those intermediaries in the distribution chain. No further reductions of refunds to qualified end-users will be necessary.

None of the comments received challenges the manner in which the volumetric for the Shell crude oil pool was calculated. However, a number of the commenters again discussed the volumetric calculations made in *Allerkamp*. In their comments on the *Shell* Proposed Decision, the States do not contest the OHA's addition of $985 million to the numerator of the volumetric formula made in *Allerkamp* except to note that they have appealed to the Temporary Emergency Court of Appeals that part of the district court's opinion denying the States' motion on this issue. The States also recommend that the OHA "refrain from distributing any refunds based on a formula which includes monies not in the custody of the DOE until the issue of the proper volumetric refund formula is finally decided." Comments of States at 9. However, as we have stated previously, the OHA is not required to delay granting refunds to qualified claimants while the States, who already have obtained sizeable payments of crude oil violation amounts under Subpart V, carry on a potentially lengthy appellate process. *Allerkamp*, 17 DOE at 88,173 n. 5

---

[1] This amount consists of the principal consent order amount of $180,000,000 plus $3,667,955.78 in interest which accrued prior to Shell's payment to the DOE. For accounting purposes, the interest remitted by Shell shall shall be considered as additional principal and shall be divided proportionately between the crude oil and refined product pools discussed below.

[2] Both the ocean and air carriers and Mr. Kalodner's clients are potential recipients of crude oil refunds. They will be referred to collectively as the "claimant commenters."

The claimant commenters endorse and approve of the use of the full parity approach to calculating crude oil refunds. However, Mr. Kalodner suggests that the numerator of the volumetric formula be increased to reflect certain additional amounts of crude oil monies. Theses amounts include the following: $100 million in crude oil overcharge funds distributed to the states and territories by the DOE in February 1983 pursuant to Section 155 of the Further Continuing Appropriations Act of 1982, Pub. L. No. 99–377 (the Warner Amendment); $100 million in crude oil overcharge funds distributed to the states and federal government pursuant to the stipulation and order of dismissal in *Diamond Shamrock Refining & Marketing Co. v. Standard Oil Co.*, No. C2–84–1482 (D. Ohio May 30, 1986); and certain other funds previously recovered by the United States, even if those funds had been distributed to the federal government prior to the Settlement Agreement. We previously discussed and rejected Mr. Kalodner's arguments in support of an upward adjustment to the numerator of the volumetric formula in *Allerkamp*. As we noted in that Decision, the remedy fashioned in *Diamond Shamrock* was distinct from that embodied in the Settlement Agreement. *Allerkamp*, 17 DOE at 88,175. In addition, both the MSRP and the Settlement Agreement apply prospectively only and therefore cannot govern funds distributed prior to the court's approval of the Settlement Agreement and the promulgation of the MSRP, as Mr. Kalodner suggests.

The commenting parties make a number of other recommendations concerning the size of the reserve for crude oil claimants and the process of analyzing and paying refund claims. These comments appear to reflect a concern on the part of the claimant commenters that there may not be sufficient funds to pay all valid claims. The ocean and air carriers recommend that the OHA retain the entire Shell crude oil pool "until such time as it is mathematically certain that full refunds to claimants can be made," and that the OHA use "whatever portion of the total Shell crude oil pool proves necessary to assure complete restitution." Comments of ocean and air carriers at 4. We will not reserve more than 20 percent of the Shell crude oil pool for payment of claims. This amount will be sufficient for that purpose, and the claimant commenters' concern that additional funds will be needed to pay all valid claims is unwarranted. Furthermore, the Settlement Agreement permits only downward adjustment of the reserve from the initial 20 percent figure. *Settlement Agreement* at IV.B.6.

We are similarly unpersuaded by Mr. Kalodner's recommendation that the analysis of individual claims filed by the states and federal government as end-users be deferred until "full parity" refunds are made to successful, non-governmental claimants. Kalodner comments at 4. The OHA will not unnecessarily delay a refund proceeding, 10 CFR 205.288, and we see no reason to give priority to one refund applicant over another. Even if Mr. Kalodner were to show that the delay is necessary, the present proceeding is not the proper forum for his argument. If Mr. Kalodner wishes to object to a specific applicant's claim, he may file comments in the case which considers that claim. 10 C.F.R. § 205.284(b).

IV. The Refund Procedures

A. Refund Claims

After considering the comments received, we have concluded that the $163.3 million in alleged crude oil violation amounts covered by this Decision, plus the $9.5 million in interest which had accrued on that amount as of February 29, 1988, should be distributed in accordance with the crude oil refund procedures previously discussed.[3] As noted in the *Shell* Proposed Decision, we have decided to reserve initially the full 20 percent of the alleged crude oil violation amounts, or $32.7 million plus interest, for direct refunds to claimants, in order to ensure that sufficient funds will be available for refunds to injured persons. The amount of the reserve may be adjusted downward later if circumstances warrant.

The process which the OHA will use to evaluate claims based on alleged crude oil violations will be modeled after the process the OHA has used to evaluate claims based on alleged refined product overcharges pursuant to Subpart V. *MAPCO Inc.*, 15 DOE ¶ 85,097 (1986); *Mountain Fuel Supply Co.*, 14 DOE ¶ 85,475 (1986). As in non-crude oil cases, applicants will be required to document their purchase volumes and demonstrate that they were injured. *See id.* Following Subpart V precedent, reasonable estimates of purchase volumes may be submitted. *Greater Richmond Transit Co.*, 15 DOE ¶ 85,028 (1986). Generally, it is not necessary for applicants to identify their suppliers of petroleum products in order to receive a refund. End-users or ultimate consumers of petroleum products whose businesses are unrelated to the petroleum industry and who were not subject to the DOE price regulations are presumed to have absorbed rather than passed on alleged crude oil overcharges. In order to receive a refund, end-users need not submit any further evidence of injury beyond volumes of product purchased in the distribution scheme in which the overcharges occurred. *Id.* The end-user presumption of injury is rebuttable, however. *Berry*, 16 DOE at 88,797. If an interested party submits evidence which is of sufficient weight to rebut the end-user presumption, the applicant will be required to produce further evidence of injury.

Resellers and retailers of petroleum products must submit detailed evidence of injury, and may not use presumptions of injury established by the OHA in refund cases involving refined petroleum products. They can, however, use econometric evidence of the type employed in the OHA Report to the District Court in the Stripper Well Litigation, Fed. Energy Guidelines ¶ 90,507 (June 19, 1985), and the OHA intends to utilize the final and April 1, 1985 draft reports in evaluating refund applications submitted under Subpart V. *See* Petroleum Overcharge Distribution and Restitution Act of 1986, Pub. L. No. 99–509, section 3003(b)(2). The presumption used in refined product cases that spot purchasers were not injured by their purchases will not be used in the crude oil overcharge area. *Tarricone*, 15 DOE at 88,897 (1987). Applicants who executed and submitted a valid waiver pursuant to one of the escrows established in the Settlement Agreement have waived their rights to apply for crude oil refunds under Subpart V. *Boise Cascade Corp.*, 16 DOE ¶ 85,214 at 88,411 (1987); *Sea-Land Service, Inc.*, 16 DOE ¶ 85,496 (1987). *See In Re: The Department of Energy Stripper Well Exemption Litigation*, M.D.L. No. 378 (D. Kan. opinion issued December 7, 1987).

Refunds to eligible claimants who purchased refined petroleum products will be calculated on the basis of a volumetric refund amount derived by dividing the crude oil violation amounts by the total consumption of petroleum products in the United States during the

---

[3] This Decision makes no determination regarding the distribution of the refined product pool. Applications for Refund from the refined product pool based on purchases of Shell products therefore should *not* be submitted at this time.

period of price controls.[4] In paying claims, we will combine all of the volumetric refund amounts obtained in each crude oil refund proceeding implemented to date under the MSRP. The volumetric refund amount calculated prior to addition of the *Shell* crude oil funds was $0.0007634495. *Allerkamp*, 17 DOE at 88,176 n. 10. The volumetric refund amount calculated from the Shell crude oil pool is $0.000080782. The total per-gallon refund amount is therefore $0.0008442315. Successful applicants will also receive an appropriate portion of the interest which accrues of the crude oil funds.

A crude oil refund applicant will be required to submit only one application for all crude oil overcharge amounts for which procedures have been implemented to date. Any party that has previously submitted a refund application in crude oil refund proceedings need not file another application; that application will be deemed to be filed in all crude oil proceedings finalized to date. To apply for a crude oil refund, applicants claiming a refund based on a purchase volume of less than 300,000 gallons should submit the information in the suggested format attached as an Appendix to this Decision. Applicants claiming a refund based on a volume of 300,000 gallons or more should submit all of the information in the suggested format of the Appendix and include all of the information outlined below:

(1) Identifying information including the applicant's name, address, and social security number or employer identification number, an indication whether the applicant is a corporation, the name and telephone number of a person to contact for any additional information, and the name and address of the person who should receive the refund check;

(2) A short description of the applicant's business and how it used petroleum products. If the applicant did business under more than one name, or a different name during the period of price controls, the applicant should list these names;

(3) If the applicant's firm is owned by another company, or owns other companies, a list of those other companies' names and their relationships to the applicant's firm;

(4) A statement identifying the petroleum products which the applicant purchased during the period August 19, 1973, through January 27, 1981, the number of gallons of each product purchased, and the total number of gallons for all products purchased on which the applicant bases its claim;

(5) An explanation of how the applicant obtained the volume figures above, and an explanation of its method of estimation if the applicant used estimates to determine its purchase volumes;

(6) A statement that neither the applicant, its parent firm, affiliates, subsidiaries, successors nor assigns has waived any right it may have to receive a refund in these cases (i.e. that it has not filed for a refund from any of the escrow accounts established pursuant to the Settlement Agreement);

(7) If the applicant is not an end-user whose business is unrelated to the petroleum industry, a showing that the applicant was injured by the alleged overcharges (i.e. that the applicant did not pass the overcharges through to its own customers); and

(8) If the applicant is a regulated utility, a certification that it will notify the state utility commission of any refund received and that it will pass on the entirety of its refund to its retail customers.

All applications should be typed or printed, clearly labelled "Application for Crude Oil Refund," submitted in duplicate and mailed to the following address: Subpart V Crude Oil Overcharge Refunds, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue S.W., Washington DC 20585.

The volumetric refund amount will be increased as additional crude oil violation amounts are received in the future. Applicants may be required to submit additional information to document their refund claims for present or future amounts. Notice of additional amounts available in the future will be published in the **Federal Register**.

B. Payments to the States and Federal Government

Under the terms of the MSRP, the remaining 80 percent of the $163.3 million plus interest in alleged crude oil violation amounts subject to this Decision, or $130.6 million plus interest, should be disbursed equally to the states and federal government for indirect restituion. The accrued interest on the 80 percent portion of the crude oil pool comes to approximately $6.8 million. The total amount to be disbursed to the states and federal government pursuant to this determination is therefore $137.4 million.

Accordingly, we will direct the DOE's Office of the Controller to segregate the $137.4 million available for disbursement to the states and federal government and transfer one-half of that amount, or $68.7 million into an interest-bearing subaccount for the states, and one-half into an interest-bearing subaccount for the federal government. In the near future, we will issue a Decision and Order directing the DOE's Office of the Controller to make the appropriate disbursements to the individual states from their respective subaccount. This future Order is necessary to improve our ability to track the various disbursements to the states. Each individual state's percentage share of the funds to be disbursed is set forth in Exhibit H to the Settlement Agreement and is based on each state's consumption of petroleum products during the period of price controls. When disbursed, these funds will be subject to the same use limitations and reporting requirements as all other crude oil monies received by the states under the Settlement Agreement.

It Is Therefore Ordered That:

(1) Applications for Refund from the alleged crude oil overcharge funds remitted to the Department of Energy by Shell Oil Company pursuant to the Consent Order executed on March 26, 1987 may now be filed.

(2) All applications submitted pursuant to paragraph (1) above must be filed no later than June 30, 1988.

(3) The Director of Special Accounts and Payroll, Office of Departmental Accounting and Financial Systems Development, Office of the Controller, Department of Energy, shall take all steps necessary to transfer $171,752,989.57 from the Shell Oil Company subaccount, Consent Order Number RSHA00001Z, pursuant to Paragraphs (4), (5), and (6) of this Decision.

(4) The Director of Special Accounts and Payroll shall transfer $68,701,195.83 of the funds obtained pursuant to paragraph (3) above, plus interest which accrues from February 29, 1988 to the date of transfer, into the subaccount denominated "Crude Tracking-States," Number 999DOE003W.

(5) The Director of Special Accounts and Payroll shall transfer $68,701,195.83 of the funds obtained pursuant to paragraph (3) above, plus interest which accrues from February 29, 1988 to the date of transfer, into the subaccount denominated "Crude Tracking-Federal,' Number 999DOE002W.

(6) The Director of Special Accounts and Payroll shall transfer $34,350,597.91 of the funds obtained pursuant to paragraph (3) above, plus interest which accrues from February 29, 1988 to the date of transfer, into the subaccount denominated "Crude Tracking-Claimants," Number 999DOE007Z.

Dated: March 15, 1988.

George B. Breznay,

Director, Office of Hearings and Appeals.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3353-7]

Approvals of PSD Permits; Region VI

Notice is hereby given that the Environmental Protection Agency (EPA), Region VI, has issued Prevention of Significant Deterioration (PSD) permits to the following:

1. PSD–TX–701—CSX Oil and Gas Corporation: This permit, issued on October 9, 1987, authorizes the modification of the existing natural gas processing plant located on Ranch Road 1962, approximately 20 miles southeast of Tilden, McMillen County, Texas.

2. PSD–TX–670—Hansa Manufacturing Company: This permit, issued on October 28, 1987, authorizes the construction of hydrocarbon processing facilities to be located on FM Road 1405, approximately 1500 feet north of Sulton Gully in Baytown, Chambers Country, Texas.

3. PSD–TX–657—Southwest Texas State University: This permit, issued on November 6, 1987, authorizes the construction of a new central heating and utility plant at the State University located at Live Oak and Guadalupe Streets in San Marcos, Hays County, Texas.

4. PSD–TX–724—Harmon Operating Company, Inc.: This permit, issued on December 22, 1987, authorizes the construction of a gas treating plant to be located on FM Road 429, approximately 6.5 miles northeast of Terrell, Kaufman County, Texas.

5. PSD–TX–688—Fina Oil and Chemical: This permit, issued on December 22, 1987, authorizes the construction of two gas-fired turbine cogenerations units at the existing refinery located at the intersection of Highway 366 and 32nd Street in Port Authur, Jefferson County, Texas.

6. PSD–TX–716—Encogen One Partners, Ltd.: This permit, issued on December 31, 1987, authorizes the construction of a 200 MW gas turbine cogeneration facility at the U.S. Gypsum plant located off Highway 20, approximately one mile northeast of Sweetwater, Nolan County, Texas.

These permits have been issued under EPA's Prevention of Significant Deterioration of Air Quality Regulations at 40 CFR 52.21, as amended August 7, 1980. The time period established by the Consolidated Permit Regulations at 40 CFR 124.19 for petitioning the Administrator to review condition of the permit decisions has expired. Such a petition to the Administrator is, under 5 U.S.C. 704, a prerequisite to the seeking of judicial review of the final agency action. A petition for review of Encogen One Partners (PSD–TX–716) was received by the Region VI Administrator on February 3, 1988. It was withdrawn on February 17, 1988. No other petition for review of these permits has been filed with the Administrator.

Documents relevant to the above actions are available for public inspection during normal business hours at the Air, Pesticides and Toxics Division, U.S. Environmental Protection Agency, Region VI, 1445 Ross Avenue Dallas, Texas 75202.

Under section 307(b)(1) of the Clean Air Act, judicial review of the approval of these actions is available, if at all, only by the filing of a petition for review in the United States Fifth Circuit Court of Appeals, within 60 days of March 24, 1988. Under section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or crimimal proceedings brought by EPA to enforce the requirements.

This notice will have no effect on the National Ambient Air Quality Standards.

The office of Management and Budget has exempted this information notice from the requirements of section 3 of Executive Order 12291.

Date: March 3, 1988.

Robert E. Layton Jr.,

Regional Administrator, Region VI.

BILLING CODE 6560-50-M

[FRL-3353-6]

Proposed Administrative Settlement at Pollution Abatement Services Site; Veterans Administration Medical Center, Canandaigua, NY, et al.

AGENCY: Environmental Protection Agency.

ACTION: Proposed administrative settlement at pollution abatement services site.

SUMMARY: The United States Environmental Protection Agency ("EPA") Region II Office and the State of New York have entered into a proposed Administrative Settlement with two parties at the Pollution Abatement Services ("PAS") site in Oswego, New York. The proposed settlement provides that the Veterans Administration Medical Center at Canandaigua, New York ("V.A.") and Griffiss Air Froce Base ("Griffiss"), reimburse EPA and the State of New York for certain response hazardous substances at the PAS site. The purpose of this notice is to announce the proposed settlement and to announce that EPA's Region II office will receive comments relating to the proposed settlement for a 30-day period following the date of this publication.

DATE: Comments relating to the proposed settlement should be submitted in writing to the EPA Region II Office at the address below on or before April 25, 1988.

FOR FURTHER INFORMATION CONTACT: Gregory C. Snyder, Assistant Regional Counsel, Office of Regional Counsel, U.S. Environmental Protection Agency Region II, 26 Federal Plaza, Room 437, New York, New York 10278, (212) 264–4928.

SUPPLEMENTAL INFORMATION: Section 122(h) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended ("CERCLA"), 42 U.S.C. 9622(g), provides EPA with the authority to enter into administrative settlements at hazardous waste sites. As of April 1, 1987, EPA and the State of New York have incurred a total of $12,319,551.04 in responding to conditions created by the presence of hazardous substances at the PAS site. Both V.A. and Griffiss are generators of hazardous substances to the PAS site. The proposed settlement provides for the reimbursement by V.A. and Griffiss for response costs incurred by the federal and state governments at the PAS site. The proposed settlement provides that V.A. shall reimburse the two governments $8,746.88 and that Griffiss shall reimburse the two governments $6,283.06.

The proposed settlement may be examined at the Office of Regional Counsel, EPA Region II, 26 Federal Plaza, Room 437, New York, New York, 10278. A copy of the proposed settlement can be obtained by mail from the same address.

Pursuant to Section 122(i) of CERCLA, 42 U.S.C. 9622(i), EPA Region II will receive written comments relating to the proposed settlement for 30 days following the date of this publication. Comments should be sent to Gregory C. Snyder, Assistant Regional Counsel, Office of Regional Counsel, U.S. Environmental Protection Agency Region II, 26 Federal Plaza, Room 437, New York, New York 10278.

Dated: March 9, 1988.

William J. Muszynski,

Acting Regional Administrator, United States Environmental Protection Agency.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

[General Docket No. 86–336; FCC 88–67]

Inquiry Into the Scrambling of Satellite Television Signals and Access to Those Signals by Owners of Home Satellite Dish Antennas

AGENCY: Federal Communications Commission (FCC).

ACTION: Second report.

SUMMARY: This item, part of a Congressionally-requested investigation of the home satellite dish (HSD) programming market, describes and analyzes developments in that market during the past year. The Second Report, which is being transmitted to the Congress, recommends that it consider increasing the penalties for satellite signal "piracy." No additional government regulatory intervention in the HSD market is recommended.

FOR FURTHER INFORMATION CONTACT: Jonathan D. Levy, tele: (202) 653–5940.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Second Report* in General Docket 86–336, FCC 88–67, Adopted February 25, 1988 and Released March 11, 1988.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington DC 20037.

Summary of Second Report

1. The Commission's *Second Report* on satellite TV signal scrambling, reviews the public interest benefits of scrambling, describes the progress of the home satellite dish (HSD) programming market during the past year, and notes the existence of a serious problem with signal "piracy"—the use of altered decoders to descramble satellite programming without payment or authorization. While criminal and civil sanctions against piracy are available (and being utilized), the penalties are relatively light. Because unchecked piracy threatens the viability of direct-to-home program distribution, the Commission recommends that the Congress consider increasing the penalties for piracy.

2. The *Second Report* points out that scrambling protects programmers from commercial theft of their services and allows them to recover compensation from all who view their copyrighted product. This is not only equitable, but also efficient, since HSD households are provided with the means to convey their preferences to programmers and to acquire the services that they desire. Scrambling thus serves the public interest by improving the operation of the market for programming and maintaining proper program production incentives.

3. Substantial progress has been made in the HSD market during the past year. Many additional programmers have scrambled their signals, all of them with the Videocipher II (VC II) system. The status of that system as the market-determined *de facto* industry standard has been confirmed. Hence, a government-mandated standard, which would also have the undesirable effect of limiting incentive to improve the technology, is unnecessary.

4. VC II decoders apparently are widely available now, in the wake of a substantial expansion of production capacity in 1987. That expansion was a market response by General Instrument Corporation (GIC), the primary VC II manufacturer, to a decoder shortage in the spring and summer of 1987.

5. As more services have scrambled their signals over the past year, a wide variety of discount program packages have been assembled. Many of them are sold on a nationwide basis, and may be ordered via toll free telephone numbers. Thus, it appeas that viewers wishing to subscribe to satellite program services can do so easily.

6. The *Second Report* analyses HSD program prices both by examining the structure of the market and by comparing those prices with cable subscriber rates. With respect to premium services, there is vigorous rivalry among satellite cable programmers such as HBO and Showtime, SelecTV (a non-cable service), and cassette rental outlets. Also, under the current regime, entry into superstation distribution is extremely easy, so existing distributors are constrained by potential entry as well as rivalry with each other.

7. The *Second Report* reviews allegations that cable multiple system operators have exercised market power to force programmers to keep their HSD prices artificially high. While the cable market power hypothesis cannot be conclusively rejected, the Commission's investigation revealed no specific evidence to support it. The Department of Justice has an ongoing investigation of the provision of satellite programming to cable-competitive distribution systems. Furthermore, it is not clear that HSD price regulation, be it direct or indirect (*e.g.*, a prohibition of "discrimination" by programmers among alternative distributors), will be effective in checking whatever underlying cable market power that may be present. Price regulation can only address a manifestation of market power. For that reason, measures to allow entry by new competitors are likely to be more efficacious than price regulation in dealing with market power. These considerations lead to a recommendation against regulation of HSD program prices.

8. HSD households have access to virtually every satellite-delivered program service (HBO's Ku band "Festival" service is currently an exception), but certain legal and policy questions remain unresolved with respect to the provision of television broadcast programming to those households. The applicability of the cable compulsory license to HSD sales is unclear. While most superstation carriers are behaving as if the license does apply (and superstations are widely marketed to HSD households), this issue is before the courts and the Congress. Voluntary arrangements to bring network programming to unserved areas appear to be developing.

9. When the Commission adopted the initial *Report* in this proceeding (published at 52 FR 10136, Mar. 30, 1987), it directed its staff to monitor the HSD industry for one year. Pursuant to that direction, the staff prepared progress reports on the industry for the Commission in May and September of 1987 and in January of this year. The *Second Report* draws on material in the three progress reports, which are available for inspection and copying in the FCC Dockets Branch and available for purchase from the Commission's copy contractor (see above). In fulfillment of a commitment made by the Commission in the initial *Report*, this *Second Report* will be transmitted to the Congress. Although it is terminating this satellite television signal scrambling proceeding, the Commission declares its willingness to re-examine HSD market conditions if future developments warrant it.

Ordering Clauses

10. Accordingly, it is ordered, that this proceeding on satellite television signal scrambling is terminated.

11. It is further ordered, that the Secretary shall forward copies of this *Second Report* to the appropriate Committees and Subcommittees of the House of Representatives and the Senate.

Federal Communications Commission.

H. Walker Feaster, III,

Acting Secretary.

BILLING CODE 6712-01-M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202-010689-030.

Title: Transpacific Westbound Rate Agreement.

Parties:

American President Lines, Ltd.
Hanjin Container Lines, Ltd.
Hyundai Merchant Marine Co., Ltd.
Japan Line, Ltd.
Kawasaki Kisen Kaisha, Ltd.
A.P. Moller-Maersk Line
Mitsui O.S.K. Lines, Ltd.
Neptune Orient Lines, Ltd.
Nippon Yusen Kaisha, Ltd.
Orient Overseas Container Line, Inc.
Sea-Land Service, Inc.
Showa Line, Ltd.
Yamashita-Shinnihon Steamship Co., Ltd.

Synopsis: The proposed amendment would permit the parties to maintain rates previously established by Independent Action, in lieu of having such rates increased as part of a conference-wide General Rate Increase ("GRI"), by giving the conference manager 10 days' notice of such action prior to the effective date of the GRI. It would also restate the agreement.

Agreement No.: 202-010776-026.

Title: Asia North America Eastbound Rate Agreement.

Parties:

American President Ltd.
Barber Blue Sea
Japan Line, Ltd.
Kawasaki Kisen Kaisha, Ltd.
A.P. Moller-Maersk Lines
Mitsui O.S.K. Lines, Ltd.
Neptune Orient Lines, Ltd.
Nippon Yusen Kaisha Line
Orient Overseas Container Line, Inc.
Sea-Land Service, Inc.
Showa Line, Ltd.
Yamashita-Shinnihon Steamship Co., Ltd.
Zim Israel Navigation Co., Ltd.

Synopsis: The proposed amendment would add a new agreement provision dealing with breaches of confidentiality by agreement members.

By Order of the Federal Maritime Commission.

Tony P. Kominoth,

Assistant Secretary.

Dated: March 21, 1988.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Change in Bank Control; Acquisitions of Shares of Banks or Bank Holding Companies; Bruce Bockelmann

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than April 8, 1988.

A. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Bruce Bockelmann;* to acquire 15 percent of the voting shares of Beecher Bancorp, Beecher, Illinois, and thereby indirectly acquire Farmers State Bank of Beecher, Beecher, Illinois.

B. **Federal Reserve Bank of Minneapolis** (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Diane M. Bricco,* to acquire 4.6 percent; Lawrence J. Gentine, to acquire 2.3 percent; Thomas J. Grasse, to acquire 11.3 percent; C. Reed Harvey, to acquire 5.7 percent; Michael J. Harvey, to acquire 11.3 percent; Anthony L. Jovanovich, to acquire 5.7 percent; Larry LeMahieu, to acquire 3.4 percent; Walter H. Miller, Jr., to acquire 2.3 percent; D. Tod Pauly, to acquire 11.3 percent; Charles E. Rohde, to acquire 4.6 percent; Schabo Materials, Inc., William D. Murphy, to acquire 22.7 percent; Larry Van Akkeren, to acquire 3.4 percent; Gordon Veldboom, Jr., to acquire 5.7 percent; and Neil H. VanDerJagt and Don G. VanDerJagt to acquire 5.7 percent of the voting shares of Cameron Investment Company, Inc., Cameron, Wisconsin, and thereby indirectly acquire Bank of Cameron, Cameron, Wisconsin.

C. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Ralph and Bill Ball,* to acquire 3 percent; James S. Brock, to acquire 3 percent; Marvin Moore, to acquire 3 percent; Gary Proffitt, to acquire 3 percent; Larry Sankey, to acquire 3 percent; and Russell Wilkey, to acquire 3 percent of the voting shares of Quivira Banc Shares, Inc., Sterling, Kansas, and thereby indirectly acquire First National Bank, Sterling, Kansas. All of the notificants reside in Sterling, Kansas.

Board of Governors of the Federal Reserve System, March 18, 1988.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

CoreStates Financial Corp.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23 (a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23 (a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 15, 1988.

A. **Federal Reserve Bank of Philadelphia** (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *CoreStates Financial Corp.,* Philadelphia, Pennsylvania; to engage through Signal Financial Corporation, Pittsburgh, Pennsylvania, in acting as agent for the sale of insurance, directly related to an extension credit by Signal and its finance subsidiaries, that is limited to ensuring the repayment of the outstanding balance due on extensions of credit in the event of loss or damage to any property used as collateral for the extension of credit pursuant to § 225.25(b)(8)(ii) of the Board's Regulation Y. In addition, Applicant proposes to expand the geographical service area to include Florida, New Jersey and Delaware.

Board of Governors of the Federal Reserve System, March 18, 1988.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Proposed Review Criteria and Program Announcement for Grants for Centers for Excellence

The Health Resources and Services Administration announces that applications for Fiscal Year 1988 Grants for Centers for Excellence are being accepted under the authority of section 788A of the Public Health Service Act, as established by Pub. L. 100-97, the Excellence in Minority Health Education and Care Act, and amended by the Department of Health and Human Services Appropriation Act, 1988, and invites comments on the proposed review criteria.

The Department of Health and Human Services Appropriations Act, 1988, as contained in Pub. L. 100–202, specifies that any university which awards a graduate degree in the health professions and which has a majority enrollment of minority students is eligible to apply and compete for a grant. It is estimated that there are 15 universities which meet these eligibility requirements and are eligible to apply for a grant. The legislative history clarifies that the intent of this program is not to duplicate support for schools which are directly funded by Federal appropriation, such as Howard University.

As used in this notice, "graduate degree in the health professions" means a degree of doctor of medicine, doctor of dentistry or an equivalent degree, doctor of osteopathy, bachelor of science in pharmacy or an equivalent degree, doctor of optometry, doctor of podiatry or an equivalent degree, doctor of veterinary medicine or an equivalent degree, a masters or doctoral degree in public health or an equivalent degree, a doctor of chiropractic or an equivalent degree, or a masters or doctoral degree in health administration or an equivalent degree, awarded, respectively, by an accredited public or nonprofit school of medicine, dentistry, osteopathy, pharmacy, optometry, podiatry, veterinary medicine, public health or chiropractic or an accredited graduate program in a public or nonprofit private institution.

"Minority" means an individual whose race/ethnicity is classified as American Indian or Alaska Native, Asian or Pacific Islander, Black, or Hispanic.

"Majority enrollment of minority students" means an enrollment of minority students exceeding 50 percent of the total number of students enrolled in the university.

Section 788A specifies that Grants for Centers for excellence may be used by a grantee school for the following purposes:

(1) To develop a plan to achieve institutional improvements, including financial independence, to enable the school to support programs of excellence in health professions education for minority individuals;

(2) To improve the capacity of the school to recruit and retain faculty;

(3) To provide improved access to the library and information resources of the school;

(4) To establish, strengthen, or expand programs to enhance the academic performance of students in the school;

(5) To establish, strengthen, or expand programs to increase the number and quality of applicants for admission to the school; and

(6) To develop curricula and carry out faculty training programs in order to enable the school to become, for the nation's health care providers, a resource with respect to the health problems of minority communities, such as higher infant mortality rates and higher incidences of acquired immunodeficiency syndrome (AIDS).

The Health Resources and Services Administration proposes to use the criteria listed below to evaluate the relative merit of applications.

(1) The degree to which the applicant can arrange to continue the proposed project beyond the Federally funded project period.

(2) The degree to which the proposed project meets three or more of the purposes stated in the legislative authorization (see above);

(3) The relationship of the objectives to the implementation plan to achieve institutional improvements;

(4) The administrative and managerial ability of the applicant to carry out the project in a cost effective manner;

(5) The adequacy of the staff and faculty to carry out the program;

(6) The soundness of the budget for assuring effective utilization of grant funds;

(7) The technical merit of the project as determined by the following elements;

a. Delineation of specific objectives which are consistent with the legislative purposes; where applicable, objectives should be measurable (e.g. improvement in student and faculty attrition rate);

b. Description of a methodology which corresponds to the objectives and provides specific details on the activities, projects, or services which will be implemented to achieve the objectives; time frame for implementing the activities, projects or services; target population; responsibile staff; and facilities which will be used to accomplish the objectives;

c. Description of a comprehensive evaluation plan inclusive of all objectives and activities;

(8) The number of individuals who can be expected to benefit from the project; and

(9) The overall impact the project will have on strengthening the school's capacity to train minority health professionals and increase the supply of minority health professionals available to serve minority populations in underserved areas.

Approximately $9.5 million is expected to be available for competing grants in Fiscal Year 1988. It is expected that 4–6 grants averaging $1.0 to $2.0 million will be supported with these funds.

Requests for application materials and questions regarding grants policy should be directed to: Grants Management Officer, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, Room 8C–22, Rockville, Maryland 20857, Telephone: (301) 443–6880.

Questions regarding programmatic information should be directed to: Division of Disadvantaged Assistance, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, Room 8A–09, Rockville, Maryland 20857, Telephone: (301) 443–2100.

A technical assistance conference will be held on April 11 and 12 at the following location: Health Resources and Services Administration, Parklawn Building, Conference Room C, 5600 Fishers Lane, Rockville, Maryland 20857.

To receive consideration, applications must meet the deadline of May 4, 1988, which means they must either be:

(1) *Received* on or before the deadline date, or

(2) *Postmarked* on or before the deadline and received in time for submission to the independent review group. A legibly dated receipt from a commercial carrier or the U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

The standard application form, PHS 6025–1, HRSA Competing Training Grant Application and General Instructions have been approved by the Office of Management and Budget. The supplemental instructions have been submitted for OMB approval.

This program is not yet listed in the *Catalog of Federal Domestic Assistance.* Applications submitted in response to this announcement are not subject to the provisions of Executive Order 12372, Intergrovernmental Review of Federal Programs, (as implemented through 45 CFR Part 100).

Interested persons are invited to comment on the proposed review criteria. Normally, the comment period would be 60 days, however, due to the need to implement this new program in Fiscal Year 1988, this comment period has been reduced to 30 days. All comments received on or before April 25, 1988, will be considered before the final review criteria are established. No funds will be allocated or final selections made until a final notice including the final criteria is published.

Written comments should be addressed to: Director, Division of Disadvantaged Assistance, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8A–09, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and coying at the Division of Disadvantaged Assistance, Bureau of Health Professions, at the address above weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5:00 p.m.

Dated: February 23, 1988.

David N. Sundwall,

Administrator, Assistant Surgeon General.

[U-61271]

Utah; Proposed Reinstatement of Terminated Oil and Gas Lease

In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (Pub. L. 97-451), a petition for reinstatement of oil and gas lease U-61271 for lands in Uintah County, Utah, was timely filed and required rentals and royalties accruing from October 1, 1987, the date of termination, have been paid.

The lessee has agreed to new lease terms for rentals and royalties at rates of $7 per acre and 16⅔ percent, respectively. The $500 administrative fee has been paid and the lessee has reimbursed the Bureau of Land Management for the cost of publishing this notice.

Having met all the requirements for reinstatement of lease U-61271 as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective October 1, 1987, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Robert Lopez,

Chief, Minerals Adjudication Section.

Reconveyed Land Opened to Private Exchange Application; Maricopa County, AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action will open 160 acres of reconveyed land in Maricopa County to Private Exchange application.

FOR FURTHER INFORMATION CONTACT: Lisa Schaalman, Arizona State Office, P.O. Box 16563, Phoenix, Arizona 85011 (602) 241-5534.

SUPPLEMENTARY INFORMATION: On March 2, 1949, as authorized under section 8 of the Taylor Grazing Act of June 28, 1934 (48 Stat. 1269), as amended, the United States acquired the following land:

Gila and Salt River Meridian, Arizona

T. 1 S., R. 2 W.;
  Sec. 32, SE¼

The area described contains 160 acres in Maricopa County.

The land described above has been determined suitable for disposal by private exchange, as provided by section 206 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2756; 43 U.S.C. 1716). The land will continue to be segregated from appropriation under all other public land laws. The mineral estate was not reconveyed to the United States and therefore, will not be subject to entry under the mining or mineral leasing laws.

John T. Mezes,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-32-M

[CO-050-4212-11; C-42676]

Reality Action; Public Lands, Boulder County, CO

AGENCY: Bureau of Land Management, Interior.

ACTION: Recreation and public purposes classification and application for patent of public lands in Boulder County, Co.

SUMMARY: The following public land has been examined and found suitable for classification and sale under the Recreation and Public Purposes (R&PP) Act of June 14, 1926, as amended (43 U.S.C. 869):

Sixth Principal Meridian, Colorado

T. 1 N., R. 71 W.;
  Sec. 9: Lot 16.
  Containing 39.29 acres.

Boulder County has applied for patent to this land so that it can be included in their Fourmile Canyon Park. The land has been and will continue to be used for hiking and dispersed recreation. The land is physically suited to the proposed use and is not of national significance. Since the land is valuable for a local government program it is considered chiefly valuable for public purposes and therefore suitable for classification and sale under the R&PP Act. This action is consistent with local and Federal government plans, programs and policies. Any patent issued under this notice shall be subject to the provisions in 43 CFR 2741.8. In the event of non compliance with the terms of the patent, title to the land shall revert to the United States.

The classification of this land will segregate it from all appropriation except as to applications under the mineral leasing laws and the R&PP Act. If patent does not issue, segregation will terminate eighteen (18) months from the date of this notice, or upon publication of a notice of termination, whichever occurs first.

DATE: For a period of up to and including May 9, 1988, interested parties may submit comments to: District Manager, Canon City District Office, Bureau of Land Management, P.O. Box 311, 3170 East Main, Canon City, CO 81212. Any adverse comments will be evaluated by the District Manager who may modify or vacate this classification.

FOR FURTHER INFORMATION CONTACT: Detailed information concerning this action is available for review at the Canon City District Office listed above; or at the Northeast Resource Area Office, Bldg. 41, Denver Federal Center, Denver, CO 80225; or by calling the Northeast Area Realty Specialist, Priscilla McLain, at (303) 236-4399.

Donnie R. Sparks,

District Manager.

BILLING CODE 4310-JB-M

[CO-050-4212-11; C-45647]

Realty Action; Sunshine Cemetery, Boulder County, CO

AGENCY: Bureau of Land Management, Interior.

ACTION: Recreation and public purpose classification, C-45647 (Sunshine Cemetery, Boulder County, CO).

SUMMARY: The following public land has been examined and found to be suitable for public use. It is hereby classified for lease or sale under the Recreation and Public Purposes Act of June 14, 1926, as amended (43 U.S.C. 869), and the regulations thereunder (43 CFR 2740).

Sixth Principal Meridian, Colorado

T. 1 N., R. 71 W.;
  Sec. 8: Lot 184.
  Containing 1.28 acres.

Sunshine Cemetery Association, a non-profit organization, has applied for the land. They propose to manage it as a public cemetery for the local community of Sunshine. The land has been used as a cemetery for over 100 years without any authorization. Transferring it to the Association will legalize this use and provide for maintenance of the cemetery, thus preserving its local historical values. The land is physically suitable for this use and is not of national significance. This action is consistent with local and Federal plans, programs and policies. Any patent issued under this notice shall be subject to the provisions in 43 CFR 2741.8. In the event of non-compliance with the terms of the patent, title to the land shall revert to the United States.

The classification of this land segregates it from all appropriation except as to applications under the mineral leasing laws and the Recreation and Public Purposes Act. If lease or patent does not issue, segregation will terminate eighteen (18) months from the date of this notice, or upon publication of a notice of termination, whichever occurs first.

DATES: For a period of up to and including May 9, 1988, interested parties may submit comments to the District Manager, Bureau of Land Management, 3170 East Main Street, P.O. Box 311, Canon City, CO 81212. Any adverse comments will be evaluated by the District Manager, who may modify or vacate this classification.

FOR FURTHER INFORMATION CONTACT: Detailed information concerning this application is available for review at the Canon City District Office (address above) or the Northeast Resource Area Office, P.O. Box 25047, Bldg. 41, Denver, CO 80225 (303) 236-4399.

Realty Action; Issuance of Land Exchange Conveyance Documents; Idaho

AGENCY: Bureau of Land Mangement, Interior.

ACTION: Exchange of public and private lands.

SUMMARY: The United States has issued an exchange conveyance document to Fay H. Andrews of Salmon, Idaho 83467, for the following-described lands under section 206 of the Federal Land Policy and Management Act of 1976:

Boise Meridian, Idaho

T. 20 N., R. 24 E.
  Sec. 29, S½SW¼NW¼;
  Sec. 30, SE¼SE¼NE¼, SW¼SW¼SW¼NE¼, SW¼NE¼NW¼.

Comprising 42.50 acres of public land.

In exchange for these lands, the United States acqired the following-described lands:

Boise, Meridian, Idaho

T. 19 N., R. 23 E.
  Sec. 24, SE¼SW¼.

Comprising 40.00 acres of private land.

The purpose of the exchange was to acquire private land that contains valuable wildlife habitat, a one-quarter mile stretch of riparian habitat as well as excellent rangeland with potential for good water developments.

The values of the Federal public land and the non-federal land in the exchange was appraised at $4611.25 and $4140.00 respectively. An equalization payment of $471.25 was paid to the United States by Fay H. Andrews.

Date: March 17, 1988.

Charles J. Haszier,

Deputy State Director for Operations.

BILLING CODE 4310-GG-M

[NV-930-08-4212-13; N-48171]

Realty Action; Exchange; Lyon County, NV

AGENCY: Bureau of Land Management, Interior,

ACTION: Notice of realty action on proposed exchange.

SUMMARY: The following described federal land comprising 320 acres in Lyon County, Nevada, has been determined to be suitable for disposal by exchange pursuant to section 206 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716:

Mount Diablo Meridian, Nevada

T. 11 N., R. 23 E.,
  Sec. 1, S½, SE¼,
  Sec. 12, W½, NE¼, SE¼.

The federal government is offered the following described 408.49 acres of non-federal land in Carson City, Nevada, by the Trust for Public Land:

Mount Diablo Meridian, Nevada

T. 15 N., R. 19 E.,
  Sec. 3, Lots 1 and 2 of the NE¼, Lot 1 of the NW¼, SW¼.

The purpose of this exchange is to acquire non-federal land within and adjacent to the boundary of the Toiyabe National Forest. This proposed exchange will be based on equal value determined by fair market value appraisals and may ultimately involve less than the total acreage described for either federal or non-federal land.

This exchange is consistent with Bureau of Land Management land use planning. The federal land is not needed for any federal program. The land has previously been identified for transfer from federal ownership via public sale. Two unsuccessful sales were held.

There is no known value for minerals in the federal land. It is expected that the mineral estate will be conveyed with the surface estate.

Patent, if and when issued, will contain the following reservation to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

Patent will also be subject to the following depending upon which parcels of federal land are conveyed:

1. A right-of-way, approximately 150 feet in width along the north boundary of section 12 and the south boundary of section 1, granted to Nevada Highway Department for public access (Nev-054978).
2. A right-of-way for a material site granted to Nevada Highway Department (Nev-055377).
3. A right-of-way 50 feet in width for an access road granted to Ralph T. Casebolt, Inc. (N-31384).
4. A right-of-way 10 feet in width for a buried telephone cable granted to Continental Telephone Company (N-37513).
5. A right-of-way 10 feet in width for a buried telephone cable granted to Continental Telephone Company (N-39943).

Upon publication of this Notice of Realty Action in the **Federal Register**, the federal land will be segregated from all appropriations under the public land laws, including the mining laws, except exchanges. The segregative effect of the notice shall terminate upon issuance of patent or other document of conveyance to such land, upon publication in the **Federal Register** of a termination of the segregation or 2 years from the date of its publication, whichever occurs first. After acquisition, the non-federal land will become a part of the National Forest System.

Detailed information concerning the exchange is available for review at the Forest Supervisor's Office, Toiyabe National Forest, 1200 Franklin Way, Sparks, Nevada, and at the Carson City District Office, Bureau of Land Management, 1535 Hot Springs Road, Suite 300, Carson City, Nevada 89706.

For a period of 45 days from publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Carson City District Office, at the aforementioned address. Any adverse comments will be evaluated by the District Manager and forwarded to the Nevada State Director, Bureau of Land Management, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of the Interior.

Dated this 18th day of March, 1988.

James W. Elliott,

District Manager, Carson City District.

[CA-940-08-4220-10; CA 3613]

Proposed Withdrawal and Opportunity for Public Meeting; California

March 11, 1988.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Agriculture, Forest Service, has amended application CA 3613 to include an additional 5 acres of National Forest System lands to protect a fire lookout site and communication facilities. The original application was published at 41 FR 27404 and 27405 on July 2, 1976, and republished at 42 FR 37256 on July 20, 1977. This notice closes the lands for up to 2 years from location and entry under the United States mining laws, but will remain open to mineral leasing.

DATE: Comments and requests for meeting should be received on or before June 22, 1988.

ADDRESS: Comments and meeting requests should be sent to the California State Director, BLM, E-2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

FOR FURTHER INFORMATION CONTACT: Viola Andrade, BLM California State Office, (916) 978-4815.

SUPPLEMENTARY INFORMATION: On December 23, 1986, the U.S. Department of Agriculture amended its application to withdraw the following described National Forest System lands from location and entry under the United States mining laws, subject to valid existing rights:

Mount Diablo Meridian

Eldorado National Forest

T. 12 N., R. 11 E.,
  Sec. 12, N½NE¼NW¼SW¼.

The area described contains 5 acres in El Dorado County.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the undersigned officer within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting.

The application will be processed in accordance with the regulations set forth in 43 CFR Part 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the lands will be segregated as specified above unless the application is denied or cancelled or the withdrawal is approved prior to that date. No temporary uses will be permitted during this segregative period except for those uses now under permit.

The temporary segregation of the lands in connection with this withdrawal application shall not affect the administrative jurisdiction over the lands, and the segregation shall not have the effect of authorizing any use of the lands by the Department of Agriculture.

Nancy J. Alex,

Chief, Lands Section, Branch of Adjudication and Records.

[FR Doc. 88-6392 Filed 3-23-88; 8:45 am]

BILLING CODE 4310-40-M

[CA-940-08-4220-10; CA 3613]

Partial Termination of Proposed Withdrawal and Opening of Land; California

March 11, 1988.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice terminates the segregative effect of a proposed withdrawal of 60 acres of land requested by the Forest Service, U.S. Department of Agriculture. This action will open 60 acres of land to surface entry and mining location. The land has been and will remain open to mineral leasing.

EFFECTIVE DATE: April 20, 1988.

FOR FURTHER INFORMATION CONTACT: Viola Andrade, BLM California State Office, 2800 Cottage Way, Sacramento, California, (916) 978-4815.

SUPPLEMENTARY INFORMATION: On July 2, 1976, a notice of proposed withdrawal and reservation of land for the Forest Service, U.S. Department of Agriculture, was published in the **Federal Register** at 41 FR 27404 and 27405, and republished on July 20, 1977, at 42 FR 37256. The purpose of the application was to protect a fire lookout site and communication facilities. The land is no longer needed for this purpose.

1. The segregative effect is hereby terminated as to the following described land:

Mount Diablo Meridian, El Dorado National Forest

T. 12 N., R. 11 E.,
  Sec. 12, NE¼SW¼NW¼,
    SW¼SW¼NW¼, S½SE¼NW¼,
    and N½NE¼SW¼.

The area described contains 60 acres in El Dorado County.

2. At 10 a.m. on April 20, 1988, the lands shall be opened to such forms of disposition as may bylaw be made of National Forest System lands, including location and entry under the United States mining laws. Appropriation of lands described in this order under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. section 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes betweeen rival locators over possessory rights since Congress has provided for such determinations in local courts.

Nancy J. Alex,

Chief, Lands Section, Branch of Adjudication and Records.

[ID-943-08-4220-11; I-04381, I-016372]

Proposed Continuation of Withdrawal; Idaho

AGENCY: Bureau of Land Management. Interior

ACTION: Notice.

SUMMARY: The Corps of Engineers proposes that two withdrawals for the Lucky Peak Dam and Reservoir Project continue for an additional 68 years, which is the estimated remaining life of the project. The lands involved, which consist of a total of 2,652.81 acres, would remain closed to surface entry and mining, but would be opened to the mineral leasing laws.

EFFECTIVE DATE: Comments on the proposal must be received by June 22, 1988.

ADDRESS: Comments should be sent to the Idaho State Director, Bureau of Land Management, 3380 Americana Terrace, Boise, Idaho 83706.

FOR FURTHER INFORMATION CONTACT: William E. Ireland, BLM, Idaho State Office, 3380 Americana Terrace, Boise, Idaho 83706, 208-334-1597.

The Corps of Engineers proposes that the existing land withdrawals made by Public Land Order Nos. 1021 and 3892, be continued for a period of 68 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The land is located in the following-described townships and sections:

Boise Meridian

T. 2 N., R. 3 E.
  Secs. 12, 13 and 14.
T. 2 N., R. 4 E.
  Secs. 4, 5, 6, and 7.
T. 3 N., R. 4 E.
  Secs. 8, 9, 11, 12, 14, 15, 17, 21, 22, 28, 29, 31 and 32.

The areas involved aggregate 2,652.81 acres in Ada, Boise, and Elmore Counties.

The purpose of the withdrawals is to protect the Lucky Peak Dam and

Reservoir Project. The withdrawals presently segregate the lands from operation of the public land laws, including the mining and mineral leasing laws, except for 51.04 acres withdrawn under public land order 3892, which remain open to the mineral leasing laws. Under the continuation proposal, all of the lands would be opened to the mineral leasing laws, but would remain segregated from surface entry and the mining laws.

For a period of 90 days from date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Idaho State Director at the above address.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the Preisident, and Congress, who will determine whether the withdrawals will be continued and if so, for how long. The final determination on the continuation of the withdrawals will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

William E. Ireland,

Chief, Realty Operations Section.

Date: March 14, 1988.

Minerals Management Service

Development Operations Coordination Document; Mobil Exploration and Producing U.S. Inc.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development operations coordination document (DOCD).

SUMMARY: Notice is hereby given that Mobil Exploration & Producing U.S. Inc. has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 4428, Block 326, Vermilion Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Cameron, Louisiana.

DATE: The subject DOCD was deemed submitted on March 16, 1988. Comments must be received within 15 days of the date of this Notice or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Ms. Angie D. Gobert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736-2876.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Date: March 17, 1988.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

INTERNATIONAL TRADE COMMISSION

[Investigations Nos. 701-TA-289 (Final) and 731-TA-381 and 382 (Final)]

Certain Granite From Italy and Spain

AGENCY: United States International Trade Commission.

ACTION: Institution of final antidumping investigations and scheduling of a hearing to be held in connection with the investigations and with countervailing duty investigation No. 701-TA-289 (Final).

SUMMARY: The Commission hereby gives notice of the institution of final antidumping investigations No. 731-TA-381 and 382 (Final) under section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Italy and Spain of certain granite,[1] provided for in item 513.74 of the Tariff Schedules of the United States, that have been found by the Department of Commerce, in preliminary determinations, to be sold in the United States at less than fair value (LIFV). The Commission also gives notice of the scheduling of a hearing in connection with these investigations and with countervailing duty investigation No. 701-TA-289 (Final), Certain Granite from Spain, which the Commission instituted on December 24, 1987. The schedules for the countervailing duty and antidumping investigations regarding imports from Spain will be identical, pursuant to Commerce's extension of the countervailing duty investigation (53 FR 2521). Commerce will make its final LTFV determinations regarding imports from Italy on or before June 20, 1988. Commerce's final countervailing duty and LTFV determinations regarding imports from Spain will be on or before June 21, 1988. The Commission will make its final injury determinations within forty-five days after receipt of Commerce's final determinations (see sections 705(a), 705(b), 735(a), and 735(b) of the act (19 U.S.C. 1671d(a), 1671d(b)), 1673d(a), and 1673d(b))).

For further information concerning the conduct of these investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, Part 207, subparts A and C (19 CFR Part 207), and Part 201, Subparts A through E (19 CFR Part 201).

EFFECTIVE DATE: February 29, 1988.

FOR FURTHER INFORMATION CONTACT: Rebecca Woodings (202-252-1152), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-252-1000.

SUPPLEMENTARY INFORMATION:

Background—These investigations are being instituted as a result of affirmative preliminary determinations by the Department of Commerce that imports of certain granite from Italy and Spain are being sold in the United States at less than fair value within the meaning of section 731 of the act (19 U.S.C. 1673). The investigations were requested in a petition filed on July 28, 1987, by the Ad Hoc Granite Committee. In response to that petition the Commission conducted preliminary antidumping investigations and, on the basis of information developed during the course of those investigations, determined that there was a reasonable indication that an industry in the United States was materially injured by reason of imports of the subject merchandise (52 FR 35771, September 23, 1987).

Participation in the investigations—Persons wishing to participate in these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules (19 CFR 201.11), not later than twenty-one (21) days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who will determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Service list—Pursuant to section 201.11(d) of the Commission's rules (19 CFR 201.11(d)), the Secretary will prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance. In accordance with § 201.16(c) and 207.3 of the rules (19 CFR 201.16(c) and 207.3), each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service.

Staff report—A public version of the perhearing staff report in this investigation will be placed in the public record on June 13, 1988, pursuant to § 207.21 of the Commission's rules (19 CFR 207.21).

Hearing—The Commission will hold a hearing in connection with these investigations beginning at 9:30 a.m. on June 30, 1988, at the U.S. International Trade Commission Building, 500 E Street SW., Washington, DC. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on June 17, 1988. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 9:30 a.m. on June 22, 1988, in room 101 of the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is June 23, 1988.

Testimony at the public hearing is governed by § 207.23 of the Commission's rules (19 CFR 207.23). This rule requires that testimony be limited to a nonconfidential summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. Any written materials submitted at the hearing must be filed in accordance with the procedures described below and any confidential materials must be submitted at least three (3) working days prior to the hearing (see § 201.6(b)(2) of the Commission's rules (19 CFR 201.6(b)(2))).

Written submissions—All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing briefs in accordance with § 207.22 of the Commission's rules (19 CFR 207.22). Posthearing briefs must conform with the provisions of § 207.24 (19 FR 207.24) and must be submitted not later than the close of business on July 7, 1988. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before July 7, 1988.

A signed original and fourteen (14) copies of each submisson must be filed with the Secretary to the Commission in accordance with § 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired must be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6).

Authority: These investigations are being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.20 of the Commission's rules (19 CFR 207.20).

By the order of the Commission.

Issued: March 18, 1988.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

---

[1] For purposes of these investigations, "certain granite" is ⅜ inch (1 cm) to 2½ inches (6.34 cm) in thickness and includes the following: rough sawed granite slabs; face-finished granite slabs; and finished dimensional granite including, but not limited to, building facing, flooring, wall and floor tiles, paving, and crypt fronts. "Certain granite" does not include monumental stones, crushed granite, or curbing. The articles covered by these investigations are provided for in subheading 2516.11.00, 2516.12.00, 6801.00.00, 6802.23.00, and 6802.93.00 in the proposed Harmonized Tariff Schedule of the United States (USITC) Pub. 2030).

[Investigation No. 731-TA-376 (Final)]

Certain Stainless Steel Butt-Weld Pipe Fittings From Japan

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines,[2] pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)), that an industry in the United States is materially injured by reason of imports from Japan of stainless steel butt-weld pipe and tube fittings, under 14 inches in inside diameter, provided for in item 610.89 of the Tariff Schedules of the United States, that have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV).[3]

Background

The Commission instituted this investigation effective September 16, 1987, following a preliminary determination by the Department of Commerce that imports of certain stainless steel butt-weld pipe and tube fittings from Japan were being sold at LTFV within the meaning of section 731 of the Act (19 U.S.C. 1673). Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of October 19, 1987 (52 FR 38819). Subsequently, Commerce extended the date for its final determination from November 24, 1987, to January 29, 1988 (52 FR 37615, October 9, 1987). The Commission, therefore, revised its schedule and published the revised schedule in the **Federal Register** (52 FR 39292, October 21, 1987). The hearing was held in Washington, DC, on February 9, 1988, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on March 14, 1988. The views of the Commission are contained in USITC Publication 2067 (March 1988), entitled "Certain Stainless Steel Butt-Weld Pipe Fittings from Japan: Determination of the Commission in Investigation No. 731-TA-376 (Final) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: March 14, 1988.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 467]

Exemption of Water Carrier Operations; Availability of Environmental Assessment

AGENCY: Interstate Commerce Commission.

ACTION: Notice of availability of environmental assessment and request for comments.

SUMMARY: An environmental assessment has been prepared for this proceeding in which the Commission revises 49 CFR Part 1071 and removes 49 CFR Part 1072, to exempt from regulation: Water carrier transportation by small craft; water carrier transportation of passengers between places in the United States through foreign ports; water contract carrier leasing of vessels to private water carriers; and water carrier transportation of property owned by a person owning substantially all of the voting stock of the carrier. The environmental assessment concludes that the adoption of this exemption rulemaking will not significantly affect the quality to the human environment or energy conservation. The effect of the addition of these categories to categorias already exempt from Commission jurisdiction, would be minimal. The environmental assessment will be served on all parties of record. Other interested parties may receive copies of the environmental assessment from the contact person listed below.

---

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

[2] Chairman Liebeler did not participate in the final determination.

[3] Commerce determined that dumping margins on exports by Fuji Acetylene Industries Co., Ltd., were de minimis.

DATE: Comments are requested and should be filed by April 22, 1988.

ADDRESS: Send an original and one copy of pleadings addressed to: (1) Ex Parte No. 467—Environmental Assessment, Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Dana G. White, Telephone: (202) 275–6569.

Assistance for the hearing-impaired is available through TDD services (202) 275–1721.

Authority: 42 U.S.C. 4321, et seq.

Dated: March 18, 1988.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to Clean Air Act; Central Illinois Public Service Co.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States* v. *Central Illinois Public Service Co.*, Civil Action No. 88–3359, was lodged on March 11, 1988, with the United States District Court for the Central District of Illinois. The Complaint filed by the United States alleged violation of section 113 of the Clean Air Act for failure by defendant to comply with applicable provisions of the Illinois State Implementation Plan ("SIP"), relating to sulfur dioxide emissions, at defendant's Coffeen Generating Station.

The proposed Decree requires defendant to comply with the Clean Air Act by not exceeding the sulfur dioxide emission limitations of the SIP. In addition, defendant must install and operate a system to continuously monitor the sulfur dioxide emission levels of the plant, and also pay a civil penalty of $75,000.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Central Illinois Public Service Co.*, D.J. Reference No. 90–5–1–1044.

The proposed consent decree may be examined at the office of the United States Attorney, Central District of Illinois, U.S. Courthouse, 600 E. Monroe Street, Springfield, Illinois 62705, and at the Office of Regional Counsel, United States Environmental Protection Agency, Region V, 111 West Jackson Street, Chicago, Illinois 60604. Copies of the proposed consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue NW., Washington, DC. A copy of the proposed consent decree may be obtained in person from the above address or by mail from the Environmental Enforcement Section, Land and Resources Division, Department of Justice, P.O. Box 7611, Washington, DC 20044. When requesting a copy, please enclose a check in the amount of $1.50 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to Clean Air Act, Indiana Department of Mental Health et al.

In accordance with Department policy, 28 CFR § 50.7, notice is hereby given that a proposed Consent Decree in *United States* v. *Indiana Department of Mental Health, et al.*, Civil Action No. IP87–213–C, was lodged with the United States District Court for the Southern District of Indiana, on March 15, 1988. The complaint filed by the United States alleged that the defendants violated section 113 of the Clean Air Act, 42 U.S.C. 7413, by failing to comply with applicable provisions of the Indiana State Implementation Plan ("SIP") pertaining to the control of opacity and particulate emissions.

The proposed Decree establishes deadlines for achieving compliance with Indiana Administrative Code Regulations APC–3 and 325 IAC 6–1–12 (parts of the Indiana SIP relating to opacity and particulate emissions) by replacing defendants' offending coal-fired boilers with clean-burning oil and gas-fired boilers.

In addition, the proposed Consent Decree requires defendants to pay a civil penalty of $28,000.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to the *United States* v. *Indiana Department of Mental Health*, et al., D.J. Reference No. 90–5–2–1–1039.

The proposed Consent Decree may be examined at the office of the United States Attorney, 274 U.S. Courthouse, 46 East Ohio Street, Indianapolis, Indiana 46204 and at the Office of Regional Counsel, United States Environmental Protection Agency, Region V, 230 South Street, Chicago, Illinois 60604. Copies of the Consent Decree may be examined at the Environmental Enforcement Section, Lands and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy please enclose a check in the amount of $1.40 (ten cents per page reproduction cost) payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 88–6387 Filed 3–23–88; 8:45 am]

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to the Clean Air Act; Harry J. Smith, Jr., et al.

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a consent decree in *United States* v. *Harry J. Smith, Jr., et al.*, Civil No. 86–0088–B, was lodged with the United States District Court for the District of Maine on March 18, 1988.

The proposed consent decree concerns violations of the National Emission Standard for Hazardous Air Pollutants ("NESHAP") for asbestos, codified at 40 CFR 61.20, *et seq.*, and the Clean Air Act, 42 U.S.C. 7401 *et seq.*, for the defendants' alleged failure to respond to requests for information requested by the United States Environmental Protection Agency.

The proposed decree requires the defendants to comply with the Clean Air Act and the asbestos NESHAP requirements. The proposed decree also requires payment of a $2,000 civil penalty.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments relating to the consent decree. Comments should be addressed to the Acting Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530 and should refer to *United States* v. *Harry J. Smith, Jr. et al.*, D.J. Ref. No. 90–5–2–1–893.

The consent decree may be examined at the office of the United States Attorney, District of Maine, Rm. 321, 202 Harlow Street, Bangor, Maine 04401; at the Region I office of the Environmental Protection Agency, John F. Kennedy Federal Building, Boston, Mass. 02203; and at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

Roger J. Marzulla,

Acting Assistant Attorney General, Land & Natural Resources Division.

BILLING CODE 4410-01-M

Declaration of Intention Filing Requirement

AGENCY: Office of Special Counsel for Immigration Related Unfair Employment Practices, Justice.

ACTION: Notice.

SUMMARY: Notice is hereby given that the declaration of intention filing requirement contained in section 102 of the Immigration Reform and Control Act of 1986 (8 U.S.C. 1324b(a)(3)(B)) is satisfied as long as the declaration is completed and filed with the Immigration and Naturalization Service before a charge of citizenship status discrimination is filed with the Office of Special Counsel for Immigration Related Unfair Employment Practices.

DATES: This notice is effective immediately and will be given retroactive effect.

FOR FURTHER INFORMATION CONTACT: Lawrence J. Siskind, Special Counsel, Office of Special Counsel for Immigration Related Unfair Employment Practices, U.S. Department of Justice, P.O. Box 65490, Washington, DC 20035–5490; (800) 255–7688 (toll free) or (202) 653–8121 (Voice) or (202) 653–5710 (TDD number for the hearing impaired); or Andrew M. Strojny, Senior Attorney, Office of Special Counsel, (800) 255–7688 (toll free) or (202) 653–8248 (Voice) or (202) 653–5710 (TDD).

SUPPLEMENTARY INFORMATION: The filing of the Immigration and Naturalization Service (INS) Form I–772 Declaration of Intending Citizen has caused some concern among those who deal with the Office of Special Counsel for Immigration Related Unfair Employment Practices. Questions have been raised about the timing of the filing of the I–772 and its availability. This notice is to address those concerns and to dispel any confusion that may have arisen.

Under section 102 of the Immigration Reform and Control Act of 1986 (IRCA), protection from citizenship status discrimination is afforded to citizens, nationals, and intending citizens. Among other definitional requirements, an intending citizen is an alien who "evidences an intention to become a citizen of the United States through completing a declaration of intention to become a citizen." (8 U.S.C. 1324b(a)(3)(B)). When IRCA was passed, the only form in existence suited to that requirement was INS Form N–315. That Form, however, had fallen into disuse and could be executed only by permanent residents. IRCA permits temporary residents under the new legalization program, refugees, and asylees, as well as permanent residents, to qualify for intending citizen status. A new form was needed. The Immigration and Naturalization Service created the I–772 to meet that need.

Confusion has arisen over the timing of the filing of the I–772. Neither the statute nor the regulations specifically address the question of when the Declaration of Intention must be filed. The preamble to the regulations published on October 6, 1987 (52 FR 37402) states that the declaration must be completed prior to the occurrence of the alleged discrimination. *Id.* at 37407. The instructions to the I–772 itself, however, state that filing the I–772 is a prerequisite only "to assert a claim," not to qualify for protection.

To dispel any confusion on this question, this notice announces that the Justice Department views the declaration of intention filing requirement as satisfied as long as the declaration is completed and filed before the charge of discrimination is filed with the Office of Special Counsel for Immigration Related Unfair Employment Practices. It is not necessary to complete and file the declaration before the occurrence of the alleged discrimination.

This notice will also serve as a reminder that the original I–772 must be filed with the Immigration and Naturalization Service. A copy of the fully completed I–772, showing that the form has been received and filed by an INS officer, should accompany any citizenship status discrimination charges filed with this Office by or on behalf of intending citizens. For permanent residents, filing a Form N–315 with any court exercising naturalization jurisdiction remains an alternative. The same timing requirements for filing apply.

Lawrence J. Siskind,

Special Counsel, Office of Special Counsel for Immigration Related Unfair Employment Practices.

[FR Doc. 88–6375 Filed 3–23–88; 8:45 am]

BILLING CODE 4410-01-M

Drug Enforcement Administration

Richard A. Conley, M.D.; Revocation of Registration

On January 14, 1988, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA) issued an Order to Show Cause to Richard A. Conley, M.D. (Respondent) of Dalton Family Practice, P.C., 1114 Professional Boulevard, Dalton, Georgia 30720, proposing to revoke his DEA Certificate of Registration, AC2133142 and to deny any pending applications for registration as a practitioner under 21 U.S.C. 823(f). The Order to Show Cause alleged that Respondent's continued registration is inconsistent with the public interest as that term is used in 21 U.S.C. 823(f) and 824(a)(4). In addition, the Order to Show Cause alleged that Respondent materially falsified his applications for renewal of his Certificate of Registration thereby providing a second statutory basis for the revocation of his registration pursuant to 21 U.S.C. 824(a)(1).

In a letter dated January 31, 1988, Respondent failed to request a hearing and instead submitted a written statement regarding his position on the matters of fact and law involved pursuant to 21 CFR 1301.54(c). The Administrator hereby enters his final order in this matter based upon the investigative file and Respondent's written statement. 21 CFR 1301.57.

The Administrator finds that effective June 30, 1983, the Oklahoma State Board of Medical Examiners suspended Respondent's license to practice medicine in the State of Oklahoma for one year. As a result of this suspension, Respondent voluntarily surrendered his DEA Certificate of Registration

AC2133142, on June 29, 1983. Even though Respondent surrendered this registration, he continued to submit applications for its renewal. On these renewal applications, Respondent answered no to a question asking whether the applicant has ever surrendered a Controlled Substances Act registration. Therefore, Respondent materially falsified his applications for renewal of his DEA Certificate of Registration and consequently lawful grounds exist for the revocation of his registration. 21 U.S.C. 824(a)(1).

Respondent subsequently moved from Oklahoma to Georgia. Pursuant to a Consent Order dated December 3, 1986, the Composite State Board of Medical Examiners for the State of Georgia issued Respondent a license to practice medicine in the State of Georgia subject to various conditions. One condition of Respondent's licensure is that for a period of five years from the effective date of the Consent Order, December 3, 1986, Respondent shall not prescribe, administer or dispense any controlled substance in the course of his office practice. During the course of another investigation, DEA investigators discovered that on at least 81 occasions, Respondent continued either to write prescriptions for, or authorize the dispensing of, controlled substances even after the Composite State Board of Medical Examiners for the State of Georgia specifically ordered him not to do so. In his written statement dated January 31, 1988, Respondent stated, "[i]f I have written any prescriptions for controlled substances, it was an honest mistake and was not done in a knowingly, repeated, habitual manner." The Administrator finds however, that Respondent repeatedly violated the Consent Order under which he is licensed to practice medicine in the State of Georgia. A prescription survey conducted at 13 of the 18 pharmacies in Dalton, Georgia revealed a total of 81 prescriptions either written or authorized by Respondent between December 7, 1986 and April 1, 1987. This does not indicate an oversight by Respondent but rather it demonstrates an habitual pattern of disregard for the responsibilities which accompany the handling of controlled substances. Accordingly, the Administrator concludes that Respondent's continued registration is inconsistent with the public interest.

Additionally in his January 31, 1988 written statement, Respondent stated that it was not his intent to falsify his application for registration. Respondent, in referring to the surrender of his registration, further stated that, "[i]t was my understanding that this was not a punitive action and that once my Medical License was reinstated my DEA license would be restored." The Administrator does not find Respondent's argument persuasive. Whether or not DEA ever reinstated Respondent's registration, the fact remains that on June 29, 1983, Respondent did surrender his DEA registration. The question on the application specifically asks whether an applicant has ever surrendered a Controlled Substances Act registration. Respondent answered no to this question on more than one renewal application when in fact he had surrendered such a registration. The Administrator further doubts the accuracy of Respondent's position as stated in his written statement based on Respondent's additional material falsification of his renewal application dated December 22, 1986. A question on the application asks the applicant, "[a]re you currently authorized to prescribe, distribute, dispense, conduct research or otherwise handle controlled substances in the schedules for which you are applying, under the laws of the State or jurisdiction in which you are operating or proposing to operate." In response to this question, Respondent answered yes. However, this is not the case. Pursuant to the Consent Order of the Composite State Board of Medical Examiners for the State of Georgia, as of December 3, 1986, Respondent was not authorized to prescribe, dispense or administer controlled substances in the course of his office practice, yet he was permitted to write orders for medication for institutionalized patients. This restriction is in effect for five years from the date of the Order. Therefore, Respondent was less than truthful when executing his application. Respondent was clearly not authorized to handle controlled substances in an unrestricted manner in the State of Georgia at the time he signed his application for registration.

The Administrator concludes that Respondent's DEA registration must be revoked. Respondent materially falsified his renewal applications and has committed various acts which render his continued registration inconsistent with the public interest. Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration AC2133142, previously issued to Richard A. Conley, M.D., be, and it hereby is, revoked, and any pending applications for registration, be, and they hereby are, denied. This order is effective April 25, 1988.

John C. Lawn,

Administrator.

Date: March 17, 1988.

[FR Doc. 88–6376 Filed 3–23–88; 8:45 am]

BILLING CODE 4410-09-M

Immigration and Naturalization Service

[INS No. 1110–88]

Certification of State Governments as Qualified Designated Entities

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Notice.

SUMMARY: The Immigration and Naturalization Service is exercising its option, relating to the INS cooperative agreement with qualified designated entities (QDEs) participating in the Service's legalization program, to request additional QDE applications from State governments and other certain similar entities. This action is being taken by the INS in an effort to reach more potential aliens seeking temporary residence under the Immigration Reform and Control Act of 1986 (IRCA), before the May 4, 1988 deadline.

DATE: March 24, 1988.

FOR FURTHER INFORMATION CONTACT: E.B. Duarte, Director, Office of Outreach at 425 "I" Street NW., Room 6230, Washington, DC 20536; telephone number (202) 633–4123.

SUPPLEMENTARY INFORMATION: Section 245A(c)(2) of the Immigration and Nationality Act (Act), as amended by the Immigration Reform and Control Act of 1986 (IRCA), Pub.L. 99–603, provides for the designation by the Attorney General of qualified entities to assist aliens in the preparation and submittal of applications for legalization status. In an effort to provide all potentially eligible aliens every opportunity to apply for legalization by May 4, 1988, the INS is exercising its option to request additional QDE applications from state governments and other certain similar entities. The option procedures are detailed in the cooperative agreement application instructions, revised and distributed March 25, 1987. The Service will limit the application process to State governments because it is felt that these agencies and their subdivisions possess extensive networks and resources that can readily assist eligible aliens. Due to the approaching deadline, the Service has determined to expedite the process by preliminary certifying as QDEs all 50 State governments of the United States and the governments of Puerto Rico, Guam, the United States Virgin Islands and the District of Columbia. To enable these entities to immediately process legalization applications, they are being issued QDE identification numbers which can be affixed to legalization applications filed with INS legalization offices.

The INS will send information packets concerning the cooperative agreement and regulations and procedures pertaining to the QDEs to the State governments and other certain similar entities. The information will explain how the entities can formalize the cooperative agreement relationship with the Service.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel; Meeting

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meeting.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that the following meeting of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506, telephone 202/786–0322.

SUPPLEMENTARY INFORMATION: The panel will convene to consult and advise the NEH on reading and discussion programs in the nation's libraries. The meeting will be held on April 15–16, 1988 from 9:00 a.m. to 5:30 p.m. on April 15th and 9:00 a.m. to 1:00 p.m. on April 16th in Room M–07. This meeting will be open to the public.

Stephen J. McCleary,

Advisory Committee Management Officer.

[FR Doc. 88–6438 Filed 3–23–88; 8:45 am]

BILLING CODE 7536-01-M

Visual Arts Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L 92–463), as amended, notice is hereby given that a meeting of the Visual Arts Advisory Panel (Photography Fellowships) to the National Council on the Arts, will be held on April 11–14, 1988 from 9:00 a.m.–8:00 p.m. and on April 15, 1988 from 9:00 a.m.–5:00 p.m. in room 716 of the Nancy Hanks Center, 1100 Pennsylvania Avenue NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Yvonne M. Sabine,

Acting Director, Council and Panel Operations, National Endowment for the Arts.

March 18, 1988.

[FR Doc. 88–6396 Filed 3–23–88; 8:45 am]

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Meeting Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on April 7–9, 1988, in Room 1046, 1717 H Street, NW., Washington, DC. Notice of this meeting was published in the **Federal Register** on February 24, 1988.

Thursday, April 7, 1988

8:30 a.m.–8:45 a.m.: Comments by ACRS Chairman (Open)—The ACRS Chairman will report briefly regarding items of current interest.

8:45 a.m.–9:45 a.m.: Fitness for Duty (Open)—Review and discuss proposed NRC rule regarding fitness for duty of nuclear power plant operators.

9:45 a.m.–11:00 a.m.: Advanced Reactors (Open)—Discuss regulatory requirements for advanced DOE reactors.

11:15 a.m.–12:15 p.m.: Human Factors (Open)—Review proposed NRC research program regarding human factors.

1:15 p.m.–2:15 p.m.: Meeting with Director, NRR (Open)—Discuss items of mutual interest.

2:15 p.m.–5:15 p.m.: Rancho Seco Nuclear Power Plant (Open)—Briefing and discussion regarding proposed restart of the Rancho Seco Nuclear Power Station.

5:30 p.m.–5:45 p.m.: Anticipated ACRS Activities (Open)—Discuss anticipated ACRS Subcommittee Activities and topics proposed for consideration by the full Committee.

5:45 p.m.–6:15 p.m.: ACRS Activities (Open)—Discuss proposed change in ACRS Bylaws regarding activities of ACRS members.

Friday, April 8, 1988

8:30 a.m.–9:45 a.m.: Operator Training and Qualification (Open)—Review proposed NRC policy statement regarding training and qualification of nuclear power plant operators.

10:00 a.m.–11:00 a.m.: Training of NRC Technical Personnel (Open)—Briefing regarding proposed changes in NRC program for training and qualification as required of NRC technical personnel.

11:00 a.m.–12:30 p.m.: Generic Issues (Open)—Discuss proposed ACRS comments regarding effectiveness of NRC Staff activities to deal with generic issues and unresolved safety issues.

1:30 p.m.–3:00 p.m.: IAEA Safety Principles (Open)—Briefing regarding proposed IAEA safety principles for nuclear power plants.

3:15 p.m.–4:00 p.m.: Generic Issues (Open)—Discuss proposed comments regarding effectiveness of NRC staff activities to deal with generic issues and unresolved safety issues.

4:00 p.m.–6:00 p.m.: Important Safety Related Issues (Open)—Discuss proposed hierarchical structure for important safety-related issues.

Saturday, April 9, 1988

8:30 a.m.–12:00 Noon: Preparation of ACRS Reports (Open)—Discuss proposed ACRS reports regarding items considered during this meeting, proposed comments on a program to study the bottom head of the TMI-2 reactor pressure vessel, proposed comments on program to implement the safety goal policy, and ACRS comments regarding regulatory requirements for key features of DOE advanced reactor designs.

1:00 p.m.–1:45 p.m.: Appointment of New Members (Closed)—Discuss qualifications of candidates proposed for appointment to the Committee and internal agency allocation of resources to provide technical advice regarding nuclear power plant safety and the handling of nuclear radwaste.

This session will be closed to discuss information, the release of which would represent a clearly unwarranted invasion of personal privacy, and information that involves the internal personnel rules and practices of the agency.

1:45 p.m.–3:00 p.m.: Miscellaneous (Open)—Complete discussion of items considered during this meeting.

Procedures for the conduct of and participation in ACRS meetings were published in the Federal Register on October 2, 1987 (51 FR 37241). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with subsection 10(d) Pub. L. 92–463 that it is necessary to close portions of this meeting as noted above to discuss information that involves the internal personnel rules and practices of the agency [5 U.S.C. 552b(c)(2)] and information the release of which would represent a clearly unwarranted invasion of personal privacy [5 U.S.C. 552b(c)(6)].

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202/634–3265), between 8:15 a.m. and 5:00 p.m.

Date: March 21, 1988.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 88–[illegible] Filed 3–23–88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-160, License No. R-97, EA 88-32]

Georgia Institute of Technology, Atlanta, Georgia; Confirmatory Order Modifying License, Effective Immediately

I

The Georgia Institute of Technology (Georgia Tech) is the holder of Operating License No. R–97 issued by the Nuclear Regulatory Commission (NRC or Commission) on December 29, 1964, and subsequently amended. The license, as amended, authorizes Georgia Tech to operate its modified research reactor located on its campus in Atlanta, Georgia, at power levels up to 5 megawatts (thermal) for research and development activities in accordance with the conditions specified therein.

II

As a result of safety concerns identified during NRC inspections conducted on December 18, 1987, and January 4–5, 1988, and raised as a result of an August 1987 contamination event, an order modifying license, effective immediately was issued to Georgia Tech by the NRC on January 20, 1988. That order required that (a) the licensee cease utilization of the reactor facility for irradiation experiments until certain listed conditions were met and the NRC approves, in writing, the resumption of irradiation experiments, and (b) the results of the licensee's survey of the house of the individual involved in the August 1987 contamination event be provided in writing to the NRC within 10 days of the Order.

Subsequent to issuing the Order of January 20, 1988, the NRC initiated an investigation of alleged improper safety-related activities associated with the operation of the Georgia Tech Research Reactor (GTRR). That investigation is continuing.

On February 15, 1988, the President of the Georgia Institute of Technology directed the immediate suspension of all reactor operations at the Neely Nuclear Research Center which includes operation of the GTRR. He also announced that an independent evaluation of Georgia Tech's program and procedures would be performed by an outside expert.

During an Enforcement Conference on February 23, 1988, the NRC discussed a number of preliminary safety concerns that have come out of its investigation to date. These concerns, together with previously known events over the past year, give the NRC substantial concerns about the operation of the reactor. The President stated that, as evidenced by his suspension of all reactor operations, he was also concerned. He then stated that Georgia Tech would not resume any reactor operations until the independent evaluation was completed, appropriate actions were taken on recommendations from that evaluation and from an internal investigation which he has initiated, the President was assured that all safety questions were adequately resolved, and the NRC concurred in the resumption of operations.

III

Due to NRC's concerns regarding the adequacy of management of the operation of the GTRR and the ongoing investigation of safety-related matters, I have determined that these commitments are required in the interest of the public health and safety and, therefore, should be confirmed by an immediately effective order.

Accordingly, pursuant to sections 104, 161c, 161i, 161o, 182, and 186 of the Atomic Energy Act of 1954, as amended, and the Commission regulations in 10 CFR 2.204 and 10 CFR Part 50, it is hereby ordered, effectively immediately, that:

License No. R–97 is modified to prohibit resumption of operation of the GTRR until:

A. The licensee has identified, based on its reviews as well as the review of its independent evaluator, the root causes of the problems that may impact on the safe operations of the reactor and provided a listing of these issues to the Regional Administrator, Region II;

B. The President of the licensee has provided in writing to the Regional Administrator, Region II, a description of the actions taken to resolve the issues that may impact on the safe operation of the reactor and the reasons why he has determined that the suspension of reactor operations should be lifted; and

C. The Regional Administrator, Region II, has approved in writing the resumption of reactor operations.

The Regional Administrator, Region II, may in writing relax or rescind any of the above conditions upon written request and demonstration of good cause by the licensee.

The licensee or any other person adversely affected by this Order may request a hearing on this Order within twenty days of its issuance. Any request for hearing shall be sent to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Copies shall also be sent to the Assistant General Counsel for Enforcement at the same address and to the Regional Administrator, NRC Region II, 101 Marietta St., NW., Suite 2900, Atlanta, GA 30323. If a person other than the licensee requests a hearing, that person shall set forth with particularity the manner in which the petitioner's interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.714(d). A request for hearing shall not stay the immediate effectiveness of this order.

If a hearing is requested by the licensee or any person who has an interest adversely affected by the Order, the Commission will issue an Order designating the time and place of any such hearing. If the Licensee fails to request a hearing within 20 days of the date of this Order, the provisions of this Order shall be final without further proceedings. If a hearing is held, the issue to be considered at such hearing shall be whether this Order should be sustained.

For the Nuclear Regulatory Commission.

Dated at Bethesda, Maryland, this 17th day of March 1988.

James M. Taylor,

Deputy Executive Director for Regional Operations.

[FR Doc. 88–6435 Filed 3–23–88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-461]

The Illinois Power Company et al.; (Clinton Power Station, Unit 1); Exemption

I

The Illinois Power Company[1] (IP), Soyland Power Cooperative, Inc. and Western Illinois Power Cooperative, Inc. (the licensees) are the holders of Facility Operating License No. NPF–62 which authorizes operation of the Clinton Power Station, Unit 1 (the facility) at steady-state reactor power levels not in excess of 2894 megawatts thermal. The license provides, among other things, that it is subject to all rules, regulations, and Orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The facility is a boiling water reactor (BWR) located at the licensees' site in DeWitt County, Illinois.

II

10 CFR Part 50, Appendix J, Section III.D.3, states:

> Type C tests. Type C tests should be performed during each reactor shutdown for refueling but in no case at intervals greater than 2 years.

These tests would become due at the Clinton Power Station, Unit 1, for certain containment isolation valves which are the subject of this Exemption, by October 21, 1988. The tests necessary to meet this section of Appendix J to 10 CFR Part 50 are required by Technical Specification 4.6.1.2 of the Clinton Power Station, Unit 1, Technical Specifications.

On January 13, 1988, the licensees submitted a request for exemption from Section III.D.3 of Appendix J to 10 CFR Part 50 for the Clinton Power Station, Unit 1, for eight containment isolation valves. The licensees proposed to perform Type C local leak rate tests (LLRTs) of these valves prior to startup from the first refueling outage for Unit No. 1 (scheduled to be initiated in January of 1989) in lieu of the 2-year interval required by Section III.D.3. The licensees also submitted by separate correspondence dated December 10, 1987, a related Technical Specification change request to the Clinton Power Station, Unit 1 license which would revise Technical Specification 4.6.1.2 to be consistent with the requested exemption. The licensees also responded to the Commission's staff request for additional information related to the exemption and amendment request by letter dated January 29, 1988.

In accourdance with 10 CFR 50.12(a)(2), the licensees have stated that special circumstances are present which support the requested exemption. Particularly, with respect to 10 CFR 50.12(a)(2)(ii) and (v), the licensees state that the following special circumstances exist:

> *Section 50.12(a)(2)(ii)*—The purpose of 10 CFR Part 50 Appendix J testing is to assure that (a) leakage through the primary reactor containment and systems and components penetrating primary containment shall not exceed allowable leakage rate values as specified in the Technical Specifications or associated bases and (b) periodic surveillance of reactor containment penetrations and isolation valves is performed so that proper maintenance and repairs are made during the service life of the containment, and systems and components penetrating primary containment.
>
> The containment leakage rate is primarily affected by equipment wear and maintenance. Isolation valves typically see little usage (especially test connections, vents and drain valves) except for periodic operability testing. This leads to little degradation of equipment or increase in the leakage rate. From October 21, 1988 to the first refueling outage, which must be initiated by no later than Febreury 28, 1989, these valves will be subject to minimal wear. These

---

[1] Illinois Power Company is authorized to act as agent for Soyland Power Cooperative, Inc. and Western Illinois Power Cooperative, Inc. and has exclusive responsibility and control over the physical construction, operation and maintenance of the facility

MI

valves were last tested on October 21, 1986, shortly after the fuel was initially loaded into the core.

Redundancy regarding primary containment isolation is provided by two isolation valves in series or one isolation valve bounded by a closed loop outside containment. Consequently, a reduction in the effectiveness of one valve to provide a seal would not itself compromise containment integrity. Deterioration of the overall integrity of the containment penetrations is normally a gradual process. Considering the redundancy of the isolation barriers, the short duration of the requested extension of the testing interval and the limited number of valves affected, any reduction in the containment integrity during the extension period would be negligible.

These valves have not required maintenance since last tested on October 21, 1986. These valves are tested during cold shutdown, and to date, data from past testing shows leakage to be well within acceptable limits. Similar valves will be tested during the spring 1988 maintenance outage, and any excessive leakage or other degraded valve conditions indicative of a generic condition will be evaluated at that time.

Section 50.12(a)(2)(v)—IP is requesting a temporary exemption to the requirements of 10 CFR Part 50 Appendix J paragraph III.D.3 for a limited number (eight) of Containment Isolation Valves. All other Containment Isolation Valves at CPS are in compliance with these requirements. IP will be in complete compliance with 10 CFR Part 50 Appendix J paragraph III.D.3 after startup from the first refueling outage.

III

The Commission's staff has determined that the licensees' request for extension of the requested containment isolation valve Type C LLRTs until the first refueling outage is acceptable based on the following considerations:

1. The affordable results of previous leakage tests performed at the Clinton Power Station, Unit 1, on these valves, coupled with their small contribution to allowable leakage, confirmatory industry experience and expected gradual deterioration of valves of these types provide reasonable assurance and confidence that granting the requested schedular exemption will not result in a significant decrease in the integrity of the containment boundary.

2. Similar valves will be tested during the spring 1988 maintenance outage and any excessive leakage or other degraded valve conditions indicative of a generic condition will be evaluated by IP at that time.

3. Leak testing of the penetrations during plant shutdown is preferable because of the lower radiation exposures to plant personnel. Moreover, some valves, because of their intended functions, cannot be tested during power operations. For valves that cannot be tested during power operations or those that, if tested during power operation would cause a degradation in the plant's overall safety (e.g., the closing of a redundant line in a safety system), the increase in confidence of containment integrity and reactor coolant pressure boundary integrity following a successful test is not significant enough to justify either extending the 1988 maintenance outage by about one week or having a plant shutdown specifically to perform the LLRTs within the 2-year period, as long as the valves are in compliance with items 1 and 2 above. The drywell head has not been removed since it was initially bolted down in October 21, 1986; thus there has not been a ready opportunity to perform these tests to date.

For details with respect to the staff's evaluation see the Safety Evaluation Supporting Amendment to Facility Operating License No. NPF-62 dated March 18, 1988.

The Commission's staff has reviewed the licensee's description of the special circumstances relative to this exception request and has determined that there are special circumstances in this instance which satisfy 10 CFR 50.12(a)(2)(ii) in that application of the regulation for the circumstances requested is not necessary to achieve the underlying purpose of the rule. The 2-year interval testing requirement for Type B and C penetrations is intended to be often enough to prevent significant deterioration from occurring and long enough to permit LLRTs to be performed during plant outages. In this case the penetrations at issue were last tested in October 1986 shortly after initial fuel loading. A full power license was issued in April 1987 and the reactor reached 100% power during September 1987. As a result of delays in attaining full power, an occurrence common to initial startup activities, the first refueling outage for the Clinton facility is scheduled to be initiated by no later than February 28, 1989, approximately four months longer than two years since the last type B and C tests on these penetrations. However, the plant will not have accumulated two full years of power operations by the end of the first refueling outage, and the integrated temperature/pressure profiles experienced by the valves considered in this one-time limited extension of the test interval will not be significantly greater than that expected for subsequent refueling cycle test intervals. Moreover, initial tests on these valves showed very little leakage and since the facility has just commenced operation, little deterioration of the valves is expected during these early years of operating life. Accordingly, in these circumstances the staff concludes that conducting the type B and C tests of these valves before the end of the two year interval is not necessary to provide assurance of adequate leakage integrity of the affected penetrations. Moreover, delaying the tests until shutdown, a matter of up to four months, will help to limit occupational radiation exposure.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a), the requested exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Further, the Commission finds that special circumstances are present in that the requested exemption is temporary in nature, the application of the regulation during this limited period is not necessary to achieve the underlying purpose of the rule, and the licensees have made a good faith effort to comply with the regulation. Therefore, the Commission hereby grants the following Exemption from the requirements of Section III.D.3 of Appendix J to 10 CFR Part 50:

The 2-year limit on the Type C testing interval for the eight valves identified in the licensees' January 13, 1988, request for exemption is extended on a one-time basis until prior to startup from the first refueling outage for the Clinton Power Station, Unit 1, provided the licensees conduct these tests prior to when containment integrity must be assured following the refueling operation.

Pursuant to 10 CFR 51.32, the Commission has determined that the granting of this exemption will have no significant impact on the environment (53 FR 8825 dated March 17, 1988).

A copy of the Commission's Safety Evaluation referred to in this Exemption is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and at the local public document room located at the Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727.

A copy may be obtained upon written request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects—III, IV, V and Special Projects.

This Exemption is effective upon issuance.

For the Nuclear Regulatory Commission.

Dated at Rockville, Maryland this 18th day of March 1988.

Dennis M. Crutchfield,

Director, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Certain Industry Advisory Committees; Determination of Closing of Meetings

The Industry Advisory Committees for Trade Policy Matters (including the Industry Policy Advisory Committee, the Committee of Chairman of Industry Advisory Committees, the Industry Sector Advisory Committees, and the Industry Functional Advisory Committees) (the Advisory Committees) have been established to advise the United States Trade Representative and the Secretary of Commerce, in accordance with subsection 135(a) of the Trade Act of 1974, as amended (the Act), on trade matters referred to in section 102 of the Act; with respect to the operation of any trade agreement once entered into; and with respect to other matters arising in connection with the administration of the trade policy of the United States.

I, therefore, determine that meetings of the Advisory Committees will be concerned with matters the disclosure of which would seriously compromise the Government's negotiating objectives or bargaining positions and with matters listed in section 552b(c) of Title 5 of the United States Code. Therefore, meetings of the Advisory Committees will be closed to the public unless otherwise determined by the United States Trade Representative or his designee.

Clayton Yeutter,

United States Trade Representative.

[FR Doc. 88-6400 Filed 3-23-88; 8:45 am]

BILLING CODE 3190-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-25487; File No. SR-Amex-88-1]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Approving Proposed Rule Change

On January 13, 1988, the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder,[2] a proposed rule change to extend until June 30, 1988 the pilot plan for equity (stock) options during emergency or unusual market conditions.

The proposed rule change was noticed in Securities and Exchange Act Release No. 25380 (February 22, 1988), 53 FR 6044 (February 29, 1988). No comments were received on the proposed rule change.

In November, 1985, the Amex implemented a pilot program to be used during short periods of extremely high order flow for the execution of options orders automatically routed to the Exchange through the Amex's routing system, AUTOAMOS.[3] Under the pilot program, the implementation of emergency procedures could be authorized by the concurrence of two Floor Governors when, in their opinion, the Exchange received an extremely large influx of both system and non-system orders, such that the affected specialist(s) could not expose each AUTOAMOS order to the crowd. Under these circumstances, the specialist in the affected option was permitted to execute incoming AUTOAMOS orders either as agent against the book or as principal, without exposing them to the crowd.

In January, 1987, the pilot plan for equity options was extended and enhanced by the utilization of AUTO-EX.[4] AUTO-EX is an automatic system that permits member firms to route public customer market and marketable limit orders of up to 20 contracts[5] through AUTOAMOS for automatic execution at the best bid or offer displayed at the time the order is entered into the system. If the best bid or offer is on the specialist's book, the incoming order is routed to the specialist's post where it is executed against the book order. It the best bid or offer is not on the specialist's book, the contra side of the AUTO-EX trade is assigned to one of the Amex Registered Options Traders ("ROTs") who have signed on the system or to the specialist who participates in the rotation.

AUTO-EX is implemented when two floor officials have determined that an emergency situation involving high order flow is occurring. AUTO-EX has been activated on twenty-eight occasions in response to various different "emergency" or "breakout" situations since January 1987. The AUTO-EX pilot plan for equity options has been highly successful in enhancing execution and operational efficiencies during these emergency situations. The Amex believes that it is important to continue to have available the most efficient means of dealing with emergency, high volume situations. Accordingly, the Exchange proposed to extend the AUTO-EX pilot program pending Commission approval of Amex's proposal seeking permanent approval of AUTO-EX's use in all equity options,[6] so that it can continue to be activated in equity options when emergency situations occur.

The Commission believes that the proposed rule change will benefit public customers, member firms, and Amex floor brokers by ensuring that orders routed to the Exchange through AUTOAMOS will be handled efficiently during periods of peak volume. By utilizing the AUTO-EX system during these periods, AMEX ROTs who elect to participate in the pilot will be able to participate more fully in trading during fast markets. In addition, the proposed procedures should allow Amex specialists more time to handle non-system orders during these periods.

Accordingly, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6 [7] and the rules and regulations thereunder. The Commission believes that extending the AUTO-EX pilot plan will enhance the execution of orders during emergency situations and will facilitate transactions in securities and protect the investing pulblic.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[8] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[9]

Dated: March 18, 1988.

Jonathan G. Katz,

Secretary.

[Release No. 34-25485; File No. SR-PHLX 88-09]

Self-Regulatory Organizations; Partial Accelerated Approval of Rule Change By the Philadelphia Stock Exchange, Inc.; Value Line Arithmetic Average Computation

Pursuant to section 19(b) (1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] the Philadelphia Stock Exchange Inc. ("PHLX" or "Exchange") filed with the Securities and Exchange Commission ("Commission") on February 26, 1988, a proposed rule change to revise the method of computation of the Value Line Composite Stock Average Index ("XVL Index") underlying index option contracts to an arithmetic average from a geometric average.

The proposed rule change was published for comment in Securities Exchange Act release No. 25442 (March 10, 1988).

The Phlx has traded the XVL index utilizing a geometric average computation since January 11, 1985.[3] Currently, the XVL Index contracts traded at the PHLX are American style option contracts, although the Commission also has approved the trading of European style options on the Value Line Index.[4]

The proposed rule change would revise the method of computation of the XVL Index to an arithmetic average from a geometric average. The XVL Index is the only index that currently is calculated on a geometric average. Geometric averaging tends to underperform an arithmetic average and the geometric averaging of the XVL Index has resulted at times in substantial disparities between prices of the XVL futures and options contracts and the level of the underlying cash index.

The Exchange notes that geometric averaging of the XVL Index has created investor confusion and impedes efforts by market participants to develop precise hedges between the index contracts and their portfolios of underlying common stocks.

The PHLX has requested that, pending final approval of the rule change, the Exchange be allowed to add series of arithmetically averaged XVL Index Index contracts to complement such series of XVL Index contracts that are currently listed for trading calculated on a geometric average.[5] Accordingly, pending final approval of the rule change, there may be some arithmetic and geometric series open simultaneously.[6]

The Commission finds good cause for approving the proposed rule change as it relates solely to the addition of these new arithmetically averaged contracts prior to the thirtieth day after the date of publication of the proposal in the **Federal Register** for several reasons. First, the Commodities Futures Trading Commission recently has approved a Kansas City Board of Trade ("KCBT") proposal to revise the method of computation of the XVL future to an arithmetic average from a geometric average. The Commission believes that adopting a corresponding change for near term index options contracts trading on the Phlx will facilitate market participants' ability to hedge their respective options and futures positions with index products that are based on a uniformly calulated index. By permitting the PHLX to introduce option series that will be calculated in a similar manner and correspond to the index futures trading on the KCBT, market participant's hedging strategies will not be disrupted. At the same time, the Commission believes that investor confusion will be minimal since the PHLX will disseminate information concerning the different index calculations. Consequently, the Commission finds that the portion of the rule change receiving accelerated approval is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commision, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 14, 1980.

It is therefore Ordered, pursuant to section 19(b)(2) of the Act,[7] that the proposed rule change referenced above be, and hereby is, approved, as it related to the addition of near term arithmetically average Value Line Index contracts.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Jonathan G. Katz,
Secretary.

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Pacific Stock Exchange, Inc.; Order Granting Accelerated Approval to Proposed Rule Changes

On January 27, 1988, the Philadelphia Stock Exchange, Inc. ("PHLX") and the Pacific Stock Exchange, Inc. ("PSE"), submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] proposed rule changes to extend the market index option escrow receipt pilot program until June 30, 1988.

In August 1985, the Commission approvaed a one-year pilot program to permit the use of cash, cash equivalents, one or more qualified securities, or a combination of the foregoing, as collateral for escrow receipts issued to cover short call positions in broad-based stock index options.[3] The pilot was to

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b-4 (1986).

[3] *See* Securities Exchange Act Release No. 22323 (August 13, 1985), 50 FR 33439 for a description of the pilot.

end on August 19, 1986 but was initially extended until February 20, 1987 to provide sufficient time for the CBOE to review the data complied during the original pilot period.[4]

On February 6, 1987 the CBOE submitted a report to the Commission and requested that the pilot be extended until June 30, 1987 in order to give the Commission sufficient time to review and evaluate the report. The pilot was subsequently extended until December 31, 1987 to allow additional time for Commission review of the CBOE report.[5]

The Commission has determined to extend the pilot until June 30, 1988 in order that the options exchanges and the Options Clearing Corporation may review the format of the receipt. The proposed rule changes will extend the operation of the pilot program and thereby provide a workable mechanism through which index call options can be written in a cash account.

The Commission finds that the proposed rule changes to extend the operation of the index option escrow receipt program through June 30, 1988, are consistent with the requirements of the Act and the rules and regulations thereunder applicable to the Exchanges, and, in particular, the requirements of section 6, and the rules and regulations thereunder. The pilot program extension is consistent with the Act because it will enable continuation of a program designed to reduce operational difficulties of banks and trust companies while the Commission evaluates the program's effectiveness. In addition, the Commission will have the opportunity to assess the program's operation during the October 1987 market break before determining whether to make the program permanent.

The Commission finds good cause for approving the proposed rule changes prior to the thirtieth day after the date of publication in the **Federal Register** because the pilot was previously approved by the Commission, no adverse comments have been received regarding its operation, and the extension will allow for uninterrupted continuation of the program. Furthermore, the Commission recently approved identical proposals to extend the pilot submitted by the Chicago Board Options Exchange, Inc. and the American Stock Exchange, Inc.[6]

Interested persons are invitied to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule changes that are filed with the Commission, and all written communicaitons relating to the proposed rule changes between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of each exchange's filing also will be available for inspection and copying at the principal office of the respective exchange. All submissions should refer to the file numbers in the caption above and should be submitted by April 14, 1988.

It is therefore ordered, pursuant to section 19(b)(2) of the Act[7] that the proposal to extend the operation of the pilot through June 30, 1988, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Jonathan G. Katz,
Secretary.

DEPARTMENT OF TRANSPORTATION

Urban Mass Transportation Administration

UMTA Sections 3 and 9 Grant Obligations

AGENCY: Urban Mass Transportation Administration (UMTA), DOT.

ACTION: Notice.

SUMMARY: The Department of Transportation and Related Agencies Appropriations Act, 1988, included in the Omnibus Appropriations Act, Pub. L. 100-202 signed into law by President Reagan on December 22, 1987, contained a provision requiring the Urban Mass Transportation Administration to publish an announcement in the Federal Register each time a grant is obligated pursuant to Sections 3 and 9 of the Urban Mass Transportation Act of 1964, as amended. The statute requires that the announcement include the grant number, the grant amount, and the transit property receiving each grant. This notice provides the information as required by statute.

FOR FURTHER INFORMATION CONTACT: Edward R. Fleischman, Chief, Resource Management Division, Department of Transportation, Urban Mass Transportation Administration, Office of Grants Management, 400 Seventh Street, SW., Room 9305, Washington, DC 20590, (202) 366-2053.

SUPPLEMENTARY INFORMATION: The section 3 program was established by the Urban Mass Transportation Act of 1964 to provide capital assistance to eligible recipients in urban areas. Funding for this program is distributed on a discretionary basis. The section 9 formula program was established by the Surface Transportation Assistance Act of 1982. Funds appropriated to this program are allocated on a formula basis to provide capital and operating assistance in urbanized areas. Pursuant to the statute UMTA reports the following grant information:

Transit property	Grant number	Grant amount	Obligation date
Section 3 grants:			
Metropolitan Transit Authority, Houston, TX	TX-03-0119	$15,604,265	Feb. 12, 1988.
City of Dallas, Dallas, TX	TX-03-0121	1,201,449	Feb. 24, 1988.
Metropolitan Transit Commission, Minneapolis, MN	MN-03-0037	8,397,000	Mar. 2, 1988.
Section 9 grants:			
Utica Transit Authority, Utica, NY	NY-90-X105-01	140,000	Feb. 16, 1988.
New Jersey Transit Corporation, Northeastern, NJ	NJ-90-X024	9,300,000	Mar. 4, 1988.

Issued on March 18, 1988.

Sunshine Act Meetings

Federal Register
Vol. 53, No. 57
Thursday, March 24, 1988

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Tuesday, March 29, 1988, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 47,186
  Stockmen's Bank and Trust Company, Gillette, Wyoming

Reports of actions approved by the standing committees of the Corporation and by officers of the Corporation pursuant to authority delegated by the Board of Directors.

Discussion Agenda:

Discussion re: Application of the Corporation's Guidelines for Real Estate Appraisal Policies and Review Procedures.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898-3813.

Dated: March 22, 1988.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,
Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Tuesday, March 29, 1988, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Recommendation regarding the Corporation's assistance agreement with an insured bank.

Discussion Agenda:

Application for Federal deposit insurance:

Seoul Bank of California, a proposed new bank to be located at 3000 West Olympic Boulevard, Los Angeles, California.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2) and (c)(6)).

Matters relating to the possible closing of certain insured banks:

Names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898-3813.

Dated: March 22, 1988.

Federal Deposit Insurance Corporation.

31 CFR Part 25

Prepayment of Foreign Military Sales Loans Made by the Department of Defense and the Federal Financing Bank and Guaranteed by the Department of Defense; Interim Rule With Request for Comments

BEST COPY AVAILABLE

DEPARTMENT OF THE TREASURY

31 CFR Part 25

Interim Rule Governing Prepayment of Foreign Military Sales Loans Made by the Department of Defense and the Federal Financing Bank and Guaranteed by the Department of Defense

AGENCY: Department of the Treasury.

ACTION: Interim rule; request for comments.

SUMMARY: The regulations which follow implement the provisions relating to the prepayment of loans by foreign governments contained in paragraph (a), Refinancing, under the heading, Foreign Military Sales Debt Reform, of Title III, Military Assistance, of the Act entitled "Foreign Operations, Export Financing and Related Programs Appropriations Act, 1988" (Public Law No. 100–202), enacted December 22, 1987 (the "Act"). The Act specified that the President may, during fiscal years 1988 through 1991, transfer existing United States guarantees of outstanding Foreign Military Sales ("FMS") loans, or issue new guarantees, either of which may be attached to new loans made by United States financial institutions to finance the prepayment at par of the principal amounts maturing after September 30, 1989 of existing FMS loans. The proceeds of the new loans so obtained shall be used to prepay existing FMS loans with interest rates of ten percent or higher, interest accrued on the FMS loans prepaid, and arrearages on FMS loans. The guarantees that are authorized to be attached to such new loans shall cover no more and no less than 90 percent of the principal of the new loans, plus 90 percent of the interest thereon. Nothing in this regulation is intended to authorize any private United States financial institution to engage in any activity not otherwise authorized or permitted for such institution under any applicable laws of the United States, any territory or possession of the United States, any State or the District of Columbia.

DATE: This Interim Rule is effective on March 24, 1988. However, before issuing the Final Rule, the Department will consider comments submitted by the public. Comments must be received in writing on or before April 25, 1988. This Interim Rule is effective upon publication, thereby enabling Borrowers to proceed with the application procedure.

ADDRESS: Send comments to the Office of the Assistant Secretary for Domestic Finance, Room 3054, Main Treasury Building, Washington, DC 20220. Attention: Gene Holland.

FOR FURTHER INFORMATION CONTACT: Gene Holland, Office of the Assistant Secretary for Domestic Finance, Department of the Treasury. (202) 566–2468.

Interim Rule With Request for Public Comment

The Act requires that implementing regulations be issued within 90 days after the date of enactment, which was December 22, 1987. In order to meet the statutory deadline for issuing implementing regulations and at the same time provide the public an opportunity to comment on the regulations, the Treasury is issuing an Interim Rule with request for public comment. The Treasury finds that good cause exists to make the Interim Rule effective upon publication, thereby enabling those borrowers that wish to proceed with application to seek a guarantee for the refinancing loans to do so.

Procedural Requirements

Because the Interim Rule involves foreign and military affairs functions of the United States, it is not subject to Executive Order 12291 or the public notice and delayed effective date requirements of the Administrative Procedure Act (5 U.S.C. 553). Moreover, since the Act requires that these regulations be published and effective within ninety days of December 22, 1987, the Department finds that good cause exists to dispense with the public notice and delayed effective date requirements of 5 U.S.C. 553.

As no notice of proposed rulemaking is required, this Interim Rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Paperwork Reduction Act

The requirements to collect information contained in this Interim Rule have been reviewed and approved by the Office of Management and Budget pursuant to section 3507 of the Paperwork Reduction Act of 1980 (44 U.S.C. 3507). Comments on these requirements should be addressed to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Departmental Offices, Washington, DC 20503, and to the Department of the Treasury at the address previously specified.

List of Subjects in 31 CFR Part 25

Banks and banking, Loan programs—national defense, Reporting and recordkeeping requirements.

Subtitle A of Title 31, Code of Federal Regulations, is amended by adding Part 25 to read as follows:

PART 25—PREPAYMENT OF FOREIGN MILITARY SALES LOANS MADE BY THE DEPARTMENT OF DEFENSE AND FOREIGN MILITARY SALES LOANS MADE BY THE FEDERAL FINANCING BANK AND GUARANTEED BY THE DEPARTMENT OF DEFENSE

Sec.
25.100 Definitions.
25.101 OMB control number.

Subpart B—Qualifications for Prepayment

25.200 General rule.

Subpart C—Procedures

25.300 Application procedure.
25.301 Approval procedure.
25.302 Closing procedure.

Subpart D—Form of Private Loan

25.400 Loan provisions.
25.401 Fees.
25.402 Transferability.
25.403 Registration.
25.404 Non-separability.
25.405 Collateralization of unguaranteed portion.
25.406 Form of guarantee.
25.407 Savings clause.

Authority: Title III, Pub. L. 100–202; 31 U.S.C. 321.

Subpart A—General

§ 25.100 Definitions.

In this part, unless the context indicates otherwise:

(a) "Act" means paragraph (a), Refinancing, under the heading, Foreign Military Sales Debt Reform, of Title III, Military Assistance, of the Act entitled "Foreign Operations, Export Financing and Related Programs Appropriations Act, 1988" (Public Law No. 100–202), enacted December 22, 1987.

(b) "AECA" means the Arms Export Control Act, as amended (22 U.S.C. 2751 *et seq.*).

(c) "Borrower" means the obligor on an FMS Advance.

(d) "Closing Date" means (1) with respect to the prepayment of the amounts permitted by this part to be prepaid of FMS Loans held by DSAA, the date designated by the agreement of both the Borrower and DSAA on which the Guarantee will be attached to the Private Loan Note, the Private Loan will be funded, and the Total Permitted Prepayment Amount, or the portion thereof which the Borrower has selected to prepay, will be prepaid; and (2) with respect to the prepayment of the amounts permitted by this part to be prepaid of FMS Loans held by the FFB and guaranteed by DSAA, the date designated by the unanimous agreement of the Borrower, the FFB, and DSAA on which the Guarantee will be attached to the Private Loan Note, the Private Loan will be funded, and the Total Permitted Prepayment Amount, or portion thereof which the Borrower has selected to prepay, will be prepaid.

(e) "DSAA" means the Defense Security Assistance Agency, an agency within the Department of Defense.

(f) "Eligible FMS Advance" means any FMS Advance which (1) was outstanding on December 22, 1987; (2) has principal amounts becoming due and payable after September 30, 1989; and (3) bears interest at a rate equal to or greater than ten percentum per annum. "Eligible FMS Advance" may include FMS Advances meeting the criteria of Eligible FMS Advance which are made on account of FMS Loans even when such FMS Loans do not, in themselves, meet the criteria of Eligible FMS Loan.

(g) "Eligible FMS Loan" means any FMS Loan which (1) was outstanding on December 22, 1987; (2) has principal amounts becoming due and payable after September 30, 1989; and (3) bears interest pursuant to the terms of the loan agreement relating thereto at a consolidated rate equal to or greater than ten percentum per annum. "Eligible FMS Loan" may include FMS Advances which are made on account of FMS Loans meeting the criteria of Eligible FMS Loan even when such FMS Advances do not, in themselves, meet the criteria of Eligible FMS Advance.

(h) "FFB" means the Federal Financing Bank, an instrumentality and wholly-owned corporation of the United States.

(i) "FMS" means Foreign Military Sales.

(j) "FMS Advance" means (1) a disbursement of funds made pursuant to a loan agreement between the Borrower and DSAA, which loan agreement provides for the making of an FMS Loan, or (2) a disbursement of funds made pursuant to a loan agreement between the Borrower and the FFB, which loan agreement provides for the making of an FMS Loan.

(k) "FMS Loan" means either (1) a loan made directly by the Secretary of Defense pursuant to Section 23 of AECA, or (2) a loan made by the FFB and guaranteed by the Secretary of Defense pursuant to Section 24 of AECA; and "FMS Loans" mean the aggregate of such loans made to or for the account of a Borrower.

(l) "Guarantee" means either a new guarantee of the United States issued by DSAA or an existing guarantee of the United States transferred by DSAA, in the form of guarantee set forth in § 25.406 of this part, which guarantee will be attached to a Private Loan Note.

(m) "Non-Registered Obligation" means a bearer obligation which does not comply with all of the registration requirements of the Internal Revenue Code.

(n) "Permitted P&I Prepayment Amount" means, with respect to each Eligible FMS Loan or Eligible FMS Advance, as the case may be, the sum of (1) all principal amounts which become due and payable after September 30, 1989, on the respective Eligible FMS Loan or Eligible FMS Advance; and (2) all unpaid interest, if any, on the respective Eligible FMS Loan or Eligible FMS Advance accrued as of the Closing Date.

(o) "Permitted Arrears Prepayment Amount" means the sum of all arrears, if any, on all FMS Loans, which arrears are outstanding on the Closing Date.

(p) "Private Lender" means either (1) any of the following entities: (i) Any banking, savings, or lending institution chartered or otherwise lawfully organized under the laws of any State, the District of Columbia, the United States or any territory or possession of the United States, including, but not limited to, any bank, trust company, industrial bank, savings association, savings and loan association, building and loan association, savings bank, credit union, or finance company, which is doing business in the United States; (ii) any broker or dealer registered with the Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934; (iii) any company lawfully organized as an insurance company, and which is subject to supervision by the insurance commissioner or a similar official or agency of a State; or (iv) any United States pension fund; or (2) any trust or other special purpose financing entity which is wholly owned initially by an entity or entities of the type described in clause (1) of this definition.

(q) "Private Loan" means, collectively, the loan or loans that is or are obtained by the Borrower from a Private Lender to prepay the Total Permitted Prepayment Amount, or the portion thereof which the Borrower has selected to prepay.

(r) "Private Loan Note" means, collectively, the note or notes executed and delivered by the Borrower to evidence the Private Loan.

(s) "Total Permitted Prepayment Amount" means the sum of (1) the aggregate of the respective Permitted P&I Prepayment Amount for all Eligible FMS Loans and all Eligible FMS Advances on account of FMS Loans which FMS Loans do not, in themselves, meet the criteria of Eligible FMS Loans; and (2) the Permitted Arrears Prepayment Amount.

§ 25.101 OMB control number.

The reporting requirements in this part have been approved under OMB Control Number 1505–0109.

Subpart B—Qualifications for Prepayment

§ 25.200 General rule.

(a) To qualify for a loan prepayment at par pursuant to the Act, a Borrower must have Eligible FMS Loans or Eligible FMS Advances.

(b) A Borrower may prepay the Total Permitted Payment Amount in portions using more than one closing; however, all prepayments of the Total Permitted Prepayment Amount must have a Closing Date that is not later than September 30, 1991.

(c) A Borrower may prepay all or a portion of the Total Permitted Prepayment Amount; however, if a Borrower selects to prepay any Permitted P&I Prepayment Amount of an FMS Advance, the Borrower must prepay the entire Permitted P&I Prepayment Amount of such FMS Advance.

Subpart C—Procedures

§ 25.300 Application procedure.

(a) Each Borrower that wishes to prepay at par the Total Permitted Prepayment Amount, or any portion thereof, must submit a written application which shall contain the following information and materials:

(1) An identification of each Eligible FMS Loan or Eligible FMS Advance, as the case may be, with respect to which the Borrower has selected to prepay the amount thereof permitted by this part to be prepaid, setting forth with respect to each such Eligible FMS Loan or Eligible FMS Advance: (i) The date on which the Eligible FMS Loan or Eligible FMS Advance was made, (ii) the original amount of the Eligible FMS Loan or Eligible FMS Advance, (iii) the principal and interest payment schedule of the Eligible FMS Loan or Eligible FMS Advance, and (iv) the maturity of the Eligible FMS Loan or Eligible FMS Advance;

(2) A description of the Permitted Arrears Prepayment Amount calculated by the Borrower as of the date of the application;

(3) A description of each Private Loan, 90 percent of which the Borrower seeks to have guaranteed, setting forth with respect to each Private Loan: (i) The total amount of the Private Loan, (ii) the proposed principal and interest payment schedule of the Private Loan, (iii) the proposed maturity of the Private Loan, and (iv) the identity of each Eligible FMS Loan or Eligible FMS Advance with respect to which amount thereof permitted by this part to be prepaid is to be prepaid with the proceeds of the Private Loan;

(4) All material transaction documents, in substantially final form, relating to the prepayment of the Total Permitted Prepayment Amount, or the portion thereof which the Borrower has selected to prepay, with the proceeds of the Private Loan; and

(5) The name, address, and telephone number of a Borrower contact person with whom the FFB or DSAA will communicate to arrange for prepayment and closing.

(b) Each application shall be submitted to DSAA at the following address:

Defense Security Assistance Agency
Room 4B659
The Pentagon
Washington, DC 20301
Attention: Deputy Controller

§ 25.301 Approval procedure.

(a) *Review by the Defense Department.* (1) Each application will be reviewed by the Defense Department to ensure that the Private Loan complies with the requirements of this part, including without limitation the requirement that the payment schedule and maturity of each Private Loan are substantially the same as the payment schedules and maturities of the Eligible FMS Loans or Eligible FMS Advances, as the case may be, with respect to which the amounts thereof permitted by this part to be prepaid are to be prepaid with the proceeds of the Private Loan. Each application will also be reviewed by the Defense Department to ensure that the provisions of subsection (d) of the Act, Purposes and Reports, are considered.

(2) After each application has been reviewed, by the Defense Department, the Defense Department will either (i) return the application to the Borrower, or (ii) forward the application to the State Department.

(b) *Review by the State Department.* (1) Each application received by the State Department from the Defense Department will be reviewed by the State Department to ensure that the provisions of subsection (d) of the Act, Purposes and Reports, are considered.

(2) After each application has been reviewed by the State Department, the State Department will either (i) return the application to the Defense Department for return to the Borrower, or (ii) forward the application to the Treasury Department.

(c) *Processing by the Treasury Department.* (1) FMS Loans held by DSAA.

(i) Each prepayment application regarding an Eligible FMS Loan made by DSAA or an Eligible FMS Advance on account of an FMS Loan made by DSAA, as the case may be, will be processed by the Treasury Department within 10 days after receipt by the Treasury Department of the application from the State Department.

(ii) After the application has been processed by the Treasury Department, the Treasury Department will return the application to the Defense Department and the Defense Department will commence the Closing Procedures described in § 25.302(a) of this part.

(2) FMS Loans held by the FFB.

(i) Each prepayment application regarding an Eligible FMS Loan made by the FFB and guaranteed by DSAA or an Eligible FMS Advance on account of an FMS Loan made by the FFB and guaranteed by DSAA, as the case may be, will be processed by the Treasury Department within 30 days after receipt by the Treasury Department of the application from the State Department.

(ii) After the application has been processed by the Treasury Department, the Treasury Department will commence the Closing Procedures described in § 25.302(b) of this part.

§ 25.302 Closing procedure.

(a) *FMS Loans held by DSAA.* (1) After the Treasury has processed a prepayment application regarding an Eligible FMS Loan made by DSAA or an Eligible FMS Advance on account of an FMS Loan made by DSAA, as the case may be, DSAA will communicate with the Borrower's contact person identified in the prepayment application to establish a Closing Date. DSAA will inform the Borrower of the final amount of the Total Permitted Prepayment Amount, or the portion thereof which the Borrower has selected to prepay, as of the Closing Date established. The determination by DSAA of the final amount of the Total Permitted Prepayment Amount, or the portion thereof which the Borrower has selected to prepay, shall be conclusive.

(2) On the Closing Date, the Guarantee will be attached to the Private Loan Note, the Private Loan shall be funded, and the Total Permitted Prepayment Amount, or the portion thereof which the Borrower has selected to prepay, will be prepaid.

(3) The attachment of the Guarantee to the Private Loan Note will take place at such location as may be determined by the unanimous agreement of the Borrower, the Private Lender, and DSAA.

(4) Prior to 1:00 p.m. prevailing local time in New York, New York, on the Closing Date, immediately available funds in amounts sufficient to prepay the Total Permitted Prepayment Amount, or the portion thereof which the Borrower has selected to prepay, shall be transferred by electronic funds transfer to DSAA at the Treasury Department account at the Federal Reserve Bank of New York. The funds transfer message must include the following credit information:

United States Treasury
New York, New York
021030004
TREAS NYC/ (5037)
For credit to the Defense Security
Assistance Agency
Room 4B 659, The Pentagon
Washington, DC 20301–2800

This information must be *exactly* in this form (including spacing between words and numbers) to insure timely receipt by the DSAA. Checks, drafts, and other orders for payment will not be accepted.

(b) *FMS Loans held by the FFB.* (1) After the Treasury Department has processed a prepayment application regarding an Eligible FMS Loan made by the FFB and guaranteed by DSAA or an Eligible FMS Advance on account of an FMS Loan made by the FFB and guaranteed by DSAA, as the case may be, the FFB will communicate with the Borrower's contact person identified in the prepayment application to establish a Closing Date. The FFB will inform the Borrower of the final amount of the Total Permitted Prepayment Amount, or the portion thereof which the Borrower has selected to prepay, as of the Closing Date established. The determination by the FFB of the final amount of the Total Permitted Prepayment Amount, or the portion thereof which the Borrower has selected to prepay, shall be conclusive.

(2) On the Closing Date, the Guarantee will be attached to the Private Loan Note, the Private Loan will be funded, and the Total Permitted Prepayment Amount, or the portion

thereof which the Borrower has selected to prepay, will be prepaid.

(3) The attachment of the Guarantee to the Private Loan Note will take place at such location as may be designated by the unanimous agreement of the Borrower, the Private Lender, and DSAA.

(4) Prior to 1:00 p.m. prevailing local time in New York, New York, on the Closing Date, immediately available funds in amounts sufficient to prepay at par the Permitted Prepayment Amount, or the portion thereof which the Borrower has selected to prepay, shall be transferred by electronic funds transfer to the Treasury Department account at the Federal Reserve Bank of New York. The funds transfer message must include the following credit information:

United States Treasury
New York, New York
021030004
TREAS NYC/ (20180006)
For credit to the Federal Financing Bank
Room 143
Liberty Center Building
401 14th Street SW
Washington, D.C. 20227

This information must be *exactly* in this form (including spacing between words and numbers) to insure timely receipt by the FFB. Checks, drafts, and other orders for payment will not be accepted.

Subpart D—Form of Private Loan

§ 25.400 Loan provisions.

The principal and interest payment schedule and maturity of the Private Loan must be substantially the same as the payment schedules and maturities of the Eligible FMS Loans or Eligible FMS Advances, as the case may be, with respect to which the amounts thereof permitted by this part to be prepaid are to be prepaid with the proceeds of the Private Loan. A Private Lender which proposes to make a Private Loan, the proceeds of which will be used to prepay the amounts permitted by this part to be prepaid of Eligible FMS Loans or Eligible FMS Advances, as the case may be, having differing payment structures and maturities, may consolidate those differing payment structures and maturities into a single payment structure having substantially equal semi-annual payments, one set of semi-annual payment dates, and a final maturity date the same as the approximate weighted average of the maturities of the Eligible FMS Loans or Eligible FMS Advances with respect to which the Borrower has selected to prepay amounts thereof permitted by this part to be prepaid.

§ 25.401 Fees.

The interest rate on the Private Loan may include compensation for costs at prevailing market rates with the agreement of the Borrower and the Private Lender selected by the Borrower.

§ 25.402 Transferability.

Each Private Loan Note, with the Guarantee attached, shall be fully and freely transferable.

§ 25.403 Registration.

The Guarantee shall cease to be effective to the extent that the Private Loan, or any portion or derivative thereof, is to be used to provide significant support for a Non-Registered Obligation.

§ 25.404 Non-separability.

The Guarantee shall cease to be effective if the 90 percent guaranteed portion of the Private Loan (or any portion thereof) is at any time separated from the ten percent unguaranteed portion of the Private Loan (or any portion thereof) in any way, directly or through the issuance of participation shares or undivided ownership interests which have an exclusive or preferred claim to the guaranteed portion of the Private Loan (or any portion thereof) or through the issuance of notes, bonds or other obligations collateralized by an exclusive or prior security interest in the guaranteed portion of the Private Loan (or any portion thereof). The 90 percent guaranteed portion of the Private Loan (or any portion or derivative thereof) may not at any time be separated from the ten percent unguaranteed portion of the Private Loan (or any portion or derivative thereof) in any way, directly or indirectly, including without limitation through the issuance of participation shares or undivided ownership interests which have an exclusive or preferred claim to the guaranteed portion of the Private Loan (or any portion or derivative thereof) or through the issuance of notes, bonds or other obligations collateralized by an exclusive or prior security interest on the guaranteed portion of the Private Loan (or any portion or derivative thereof), such that any holder of the Private Loan Note, or any portion thereof, or any derivative thereof representing a direct or indirect claim to payment made from payments on the Private Loan Note, would receive more than 90 percent of any payment due to such holder from payments made under the Guarantee at any time during the term of the Private Loan.

§ 25.405 Collateralization of unguaranteed portion.

The Guarantee shall cease to be effective if the ten percent unguaranteed portion of the Private Loan becomes collateralized or secured in any manner whatsoever, in whole or in part, directly or indirectly, by an obligation or obligations of the United States Government or any of its agencies.

§ 25.406 Form of guarantee.

(a) The Guarantee that will be attached to the Private Loan Note on the Closing Date shall be in the following form:

FOR VALUE RECEIVED, the Defense Security Assistance Agency of the Department of Defense ("DSAA"), hereby guarantees to *(Name of Lender)* ("Lender"), incorporated under the laws of (*U.S. State or other jurisdiction*) or if not so incorporated or organized, then the principal place of doing business is (*U.S. location, address, and zip code*), under the authority of Section 24 of the Arms Export Control Act, as amended ("Act"), the due and punctual payment of ninety percent (90%) of amounts due: (1) On the promissory note ("Note") in the principal amount of up to $_____ dated _____ issued to the Lender by the Government of *(Name of Borrower)* ("Borrower") pursuant to the Loan Agreement between the Lender and the Borrower dated the __th day of _____ ("Agreement"); and (2) the Lender from the Borrower pursuant to the Agreement.

This Guaranty is a guaranty of payment covering all political and credit risks of nonpayment, including any nonpayments arising out of any claim which the Borrower may now or hereafter have against any person, corporation, or other entity (including without limitation, the United States, the Lender, and any supplier of defense items) in connection with any transaction, for any reason whatsoever. This Guaranty shall inure to the benefit of and shall be enforceable by the Lender, its successors or assigns. This Guaranty shall not be impaired by any law, regulation or decree of the Borrower now or hereafter in effect which might in any manner change any of the terms of the Note or Agreement. The obligation of DSAA hereunder shall be binding irrespective of the irregularity, invalidity or unenforceability under any laws, regulations or decrees of the Borrower of the Note, the Agreement or other instruments related thereto.

DSAA hereby waives diligence, demand, protest, presentment and any requirement that the Lender exhaust any right or power to take any action against the Borrower and any

VOL

MR
24
988
UMI

notice of any kind whatsoever other than the demand for payment required to be given to DSAA hereunder in the event of default on a payment due under the Note.

In the event of failure of the Borrower to make payment, when and as due, of any installment of principal or interest under the Note, the DSAA shall make payment immediately to the Lender upon demand to the DSAA after the Borrower's failure to pay has continued for 10 calendar days. The amount payable under this Guaranty shall be ninety percent (90%) of the amount of the overdue installment of principal and interest, plus ninety percent (90%) of any and all late charges and interest thereon as provided in the Agreement. Upon payment by DSAA to the Lender, the Lender will assign to DSAA, without recourse or warranty, ninety percent (90%) of all of its rights in the Note and the Agreement with respect to such payment.

In the event of a default under the Agreement or the Note by the Borrower and so long as this Guaranty is in effect and the DSAA is not in default hereunder:

(i) The Lender or other holder of the Note shall not accelerate or reschedule payment of the principal or interest on the Note or any other note of the Borrower guaranteed by DSAA except with the written approval of DSAA; and

(ii) The Lender shall, if so directed by DSAA, invoke the default provisions of the Agreement.

Subject to the limitations set forth below, the Lender's rights under this Guaranty may be assigned to any individual, corporation, partnership, or other association doing business in the United States of America. In the event of such assignment DSAA shall be promptly notified. The Lender will not agree to any material amendment of the Agreement or Note or consent to any material deviation from the provisions thereof without the prior written consent of DSAA.

The successors and assigns of the Lender under this Guaranty ("Beneficiaries") shall be severally bound by, and shall be severally entitled to, the rights and obligations of the Lender under the Note, the Agreement, and this Guaranty. The Lender shall maintain a current, accurate written record of the names, addresses, amount of financial interest in the Note and Agreement, and date of acquisition of such interest of each Beneficiary, and shall furnish DSAA a copy of such record on its demand without charge. No assignment by the Lender or by any Beneficiary shall be effective for purposes of this Guaranty unless and until so recorded by the Lender.

The total amount of this Guaranty shall not at any time exceed ninety percent (90%) of the outstanding principal, unpaid accrued interest and arrearages, if any, under the Note and Agreement, including any portion or derivative thereof.

This Guaranty shall cease to be effective if the ninety percent guaranteed portion of the total amount of the Note (or any portion thereof) is at any time separated from the ten percent unguaranteed portion of the total amount of the Note (or any portion thereof) in any way, directly or through the issuance of participation shares or undivided ownership interests which have an exclusive or preferred claim to the guaranteed portion of the total amount of the Note (or any portion thereof) or through the issuance of notes, bonds or other obligations collateralized by an exclusive or prior security interest in the guaranteed portion of the total amount of the Note (or any portion thereof). The ninety percent guaranteed portion of the total amount of the Note (or any portion or derivative thereof) may not at any time be separated from the ten percent unguaranteed portion of the total amount of the Note (or any portion or derivative thereof) in any way, directly or indirectly, including without limitation through the issuance of participation shares or undivided ownership interests which have an exclusive or preferred claim to the guaranteed portion of the total amount of the Note (or any portion or derivative thereof) or through the issuance of notes, bonds or other obligations collateralized by an exclusive or prior security interest in the guaranteed portion of the total amount of the Note (or any portion or derivative thereof), such that any holder of the Note, or any portion thereof, or any derivative thereof representing a direct or indirect claim to payment made from payments on the Note, would receive more than ninety percent of any payment due to such holder from payments made under this Guaranty at any time during the term of the Note or the Agreement.

This Guaranty is fully and freely transferable to the eligible assignees set forth above, except that it shall cease to be effective to the extent that the Note or the Agreement or any portion or derivative thereof is used to provide significant support for any non-registered obligation.

This Guaranty shall cease to be effective if the ten percent unguaranteed portion of the total amount of the Note becomes collateralized or secured in any manner whatsoever, in whole or in part, directly or indirectly, by an obligation or obligations of the United States Government or any of its agencies.

The full faith and credit of the United States is pledged to the performance of this Guaranty. No claim which the United States may now or hereafter have against the Lender or any Beneficiary for any reason whatsoever shall affect in any way the right of the Lender or any Beneficiary to receive full and prompt payment of any amount otherwise due under this Guaranty. The United States represents and warrants that (a) it has full power, authority and legal right to execute, deliver and perform this Guaranty, (b) this Guaranty has been executed in accordance with and pursuant to the terms and provisions of Section 24 of the Act and the provisions of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1988, under the heading "Foreign Military Sales Debt Reform," (c) this Guaranty has been duly executed and delivered by a duly authorized representative of DSAA, and (d) this Guaranty constitutes the valid and legally binding obligations of the United States, enforceable in accordance with the terms hereof.

Any notice, demand, or other communication hereunder shall be deemed to have been given if in writing and actually delivered to the Comptroller, DSAA, the Pentagon, Washington, DC 20301, or the successor, or such other place as may be designated in writing by the Comptroller, DSAA or the successor thereof.

By acceptance of the Note, the Lender agrees to the terms and conditions of this Guaranty.

Dated:____________________

By: ____________________

DIRECTOR, DSAA

(b) The obligations of DSAA under the Guarantee are expressly limited to those obligations contained in the form of Guarantee set forth in paragraph (a) of this section. Any provisions of any agreement relating to the Private Loan purporting to create obligations on the part of DSAA which are inconsistent with the terms of the Guarantee or any other provision of this part shall be unenforceable against DSAA.

§ 25.407 Savings clause.

Nothing in this regulation is intended to authorize any private United States financial institution to engage in any activity not otherwise authorized or permitted for such institution under any applicable laws of the United States, any territory or possession of the United States, any State, or the District of Columbia.

Date: March 18, 1988.

[FRL-3318-4]

Technical Assistance Grants to Groups at National Priorities List Sites

AGENCY: Environmental Protection Agency (EPA).

ACTION: Interim Final Rule with Request for Comments.

SUMMARY: Pursuant to section 117(e) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended, 42 U.S.C. 9617(e), the Environmental Protection Agency (EPA or the Agency) published in the **Federal Register** on June 10, 1987 (52 FR 22244) an Advance Notice of Rulemaking (ANRM). This notice discussed and solicited comments on several issues and various approaches that EPA was considering for accepting and evaluating applications, and for awarding and managing technical assistance grants. EPA stated that it would consider those comments in formulating an Interim Final Rule (IFR). Today EPA is publishing the IFR regarding the Technical Assistance Grant Program. Publication of this rule as an IFR with an immediate effective date allows EPA to begin accepting applications from citizens' groups for financial assistance without further delay, while simultaneously accepting comments on, and developing the Final Rule.

Elsewhere in today's **Federal Register**, EPA is also publishing an Advance Notice of Rulemaking (ANRM) to solicit comments from the public on a proposal to provide technical assistance grant applicants and/or recipients with the services of an Administrative Services Contractor (ASC). These services could include both assistance in preparing grant applications and the procurement of technical assistance, and contract management.

DATES: March 24, 1988.

Comments: Written comments must be submitted on or before June 22, 1988.

ADDRESSES: *Written comments must be submitted to:* Superfund Docket Clerk, Office of Emergency and Remedial Response (WH-548D), Room LG-100, U.S. Environmental Protection Agency, 401 M Street SW, Washington, DC 20460. Comments on today's Interim Final Rule must identify the regulatory docket as follows: "Docket CERCLA 117(e), Technical Assistance Grant Regulation."

Docket: Copies of materials relevant to this rulemaking are contained in the Superfund docket located in the Lower Garage (Room LG-100) at the U.S. Environmental Protection Agency, 401 M Street SW, Washington DC 20460. The docket is available for inspection by appointment only between the hours of 9:00 a.m. and 4:00 p.m. Monday through Friday, excluding Federal holidays. The docket phone number is (202) 382-3046. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

FOR FURTHER INFORMATION CONTACT: Daphne D. Gemmill, Office of Emergency and Remedial Response, WH-548E, U.S. Environmental Protection Agency, 401 M Street SW, Washington, DC 20460 at (202) 382-2460 or the RCRA/Superfund Hotline from 9:00 a.m. to 4:30 p.m., Monday-Friday, toll free at 1-(800)-424-9436 or in Washington, DC at 382-3000.

SUPPLEMENTARY INFORMATION: The contents of today's preamble are listed in the following outline:

I. Introduction

A. Authority

This rule is issued under the authority of section 117(e) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended, hereinafter cited as CERCLA, 42 U.S.C. 9617(e). Section 117(e) authorizes the President to make available technical assistance grants of up to $50,000 to groups of individuals to obtain assistance in interpreting information related to cleanups at Superfund sites. Section 117(e) requires the President to promulgate rules for issuing these grants before processing any grant applications. Executive Order No. 12580 delegated to EPA the authority to implement section 117(e) in consultation with the Attorney General.

B. Background of the Rulemaking

The process of cleaning up a Superfund site requires detailed technical study of site conditions and wastes, analysis of methods and techniques for remediation, and decisions based upon statutory and regulatory factors. In carrying out these cleanups, EPA and States seek informed comment from citizens living near these sites. Recognizing the importance of such comment and the need for citizens to be well-informed at the sites, Congress authorized technical assistance grants under section 117(e) of CERCLA.

This IFR details the specific requirements for obtaining technical assistance grants. To qualify for a grant, an applicant must demonstrate its ability to meet the requirements set forth in the Code of Federal Regulations (CFR) at 40 CFR Part 30 and 40 CFR Part 33, which are EPA's grant and procurement under assistance agreement regulations, respectively. EPA will review and evaluate all applications that demonstrate an ability to meet these requirements, applying the criteria set forth in the IFR for the Technical Assistance Grant Program published today.

The IFR enables EPA to issue grants while continuing to receive comments that will be considered in the

development of the Final Rule. On the effective date of this rule, EPA may begin accepting applications from citizens' groups for financial assistance in hiring technical experts to assess site information independently. To assist potential applicants and other interested citizens in understanding the Technical Assistance Grant Program, EPA will be providing guidance materials such as EPA's "Citizens' Guidance Manual for the Technical Assistance Grant Program," as well as training, workshops, and fact sheets on various aspects of the program.

EPA's policy is to involve the States in administering the Technical Assistance Grant Program. Throughout the regulation, the term "EPA" is used. Where the EPA Regional Administrator authorizes the State to administer the Technical Assistance Grant Program under a cooperative agreement, the term "EPA" may mean a State agency. Where States administer the Technical Assistance Grant Program, EPA will have an oversight role.

It should be noted that section 117(e) also applies to Federal facilities, which is defined in the IFR as "a facility that is owned or operated by a department, agency, or instrumentality of the United States," on the National Priorities List (NPL). A technical assistance grant to a group of individuals who may be affected by a release or threatened release at a Federal facility will be governed by this regulation. (See § 35.4125 of the regulation.)

Because this rule relates to public grants, benefits, or contracts, it is exempt from the requirements of section 553 of the Administrative Procedures Act (APA) (5 U.S.C. 553) including notice and opportunity for comment and delayed effective date. However, EPA is interested in receiving public comments. EPA sought public comments on the major issues addressed in this IFR by publishing an ANRM and is seeking comments on this IFR as well in order to develop the Final Rule.

II. Responses to Major Public Comments on Issues Raised in the ANRM and Description of the Rule

A total of 83 written comments were received in response to the ANRM published by EPA on June 10, 1987 (52 FR 22244). Approximately one-third of the comments were received from environmental and community groups; one-third from local and State government agencies; and the final one-third from other commenters such as lawyers, consultants, and academicians. The written comments and a document entitled "Summary Document: Response to Comments on the Advance Notice of Rulemaking on Technical Assistance Grants to Groups at National Priorities List Sites," which summarizes the comments and responses to all the public comments, are available in the public docket for the Technical Assistance Grant ANRM. The major issues addressed by the commenters and EPA's responses to them, as well as a description of the rule, are described below.

A. Groups Capable of Assuming Grant Responsibilities

Under EPA's grant regulations codified at 40 CFR 30.301, EPA can award grants only to groups who can meet minimum administrative and management requirements. Consequently, before EPA can evaluate whether a group is otherwise eligible for a grant under section 117(e) of CERCLA, it must first determine that the group is capable of meeting those administrative and management requirements.

Each applicant must demonstrate that it has established, or has plans for establishing, reliable procedures for recordkeeping and financial accountability related to the management of the grant (e.g., the group has established a separate bank account for the management of the grant funds, has described sound plans for fulfilling the reporting requirements, and has provided any other pertinent information showing its commitment to effective accounting procedures for managing the grant, etc.). Each applicant will be required to provide this information to the Agency in the "Applicant Qualifications" section of Part IV of the grant application, EPA Form 5700-33, "State and Local Nonconstruction Programs," or the appropriate State form. If EPA concludes that the applicant is not capable of meeting the minimum administrative and management capability requirements set forth at 40 CFR 30.301, the application will be rejected.

Additionally, EPA has determined that each grant recipient must be incorporated as a non-profit organization for the purpose of addressing the Superfund site for which the grant is provided in order to receive a grant. An applicant may meet this requirement by stating that the group, if it is not incorporated, has plans for incorporating if it is awarded a grant. Once declared a recipient, the group must affirm that it has filed the necessary papers for incorporation with the State. Furthermore, on or before the first request for reimbursement, the recipient must submit documentation (e.g., letter from the State) that the group has been incorporated officially by the State. Absent such documentation, the grant agreement may be annulled. This issue is discussed further in section II.B.3, "Ineligibility," of this Preamble.

B. Groups Eligible for Grants

Section 117(e) of CERCLA specifically provides that: "the President may make grants available to any group of individuals which may be affected by a release or a threatened release at any facility which is listed on the National Priorities List under the National Contingency Plan * * *" and that, "[n]ot more than one grant may be made under this subsection with respect to a single facility * * *."

This language raises four issues regarding grant eligibility: (1) Defining "affected" groups; (2) determining whether groups can apply individually or must consolidate their applications; (3) determining whether certain groups should be ineligible to receive grants; and (4) determining whether certain community representation should be required of the grantee organization to ensure that broad community interests are represented adquately.

1. Defining "Affected" Groups

The first issue in defining the scope of eligibility is interpreting the phrase "group of individuals which may be affected." The ANRM presented two options:

> Option a. * * * (EPA should) accept applications only from those groups of individuals who can demonstrate direct ties to the site (e.g., individuals who are directly threatened by the site from a health or economic standpoint); or
>
> Option b. * * * (EPA should) allow the involvement of groups with more distant connections to the site (e.g., the same watershed use), in addition to those groups next to the site.

The vast majority of public comments favored defining "affected" groups as those groups of individuals with direct ties to the site, particularly those facing actual or potential health and/or economic impacts. Several commenters suggested that groups with more distant geographic connections to the site should be eligible, provided that no groups in close proximity to the site applied for a technical assistance grant.

EPA, as set forth at § 35.4010 of the regulation, defines "affected" groups as those groups of individuals who can demonstrate that they are threatened by the site from a health, economic, or environmental standpoint. EPA will use evaluation criteria to measure whether, and to what extent, an applicant meets this standard.

VOL 53 ISS 57 MR 24 988 UMI

Evaluation Criteria. Applicants will describe in a short narrative in the "Applicant Qualifications" section of the grant application how they will meet each of the criteria described below. Applicants, however, will not be required initially to submit documentation. They may be required to supply it later if a pre-award review or an audit is initiated.

EPA will evaluate the strengths and weaknesses of each application. In the event of competing applications, EPA will rank each application relative to other applications since only one grant may be awarded for any eligible site. EPA will do this utilizing five criteria. Each criterion is assigned a weight showing the relative importance of that criterion. The primary purpose of CERCLA is the protection of human health; therefore, the health criteria has the most weight. Since the purpose of section 117(e) is the furthering of public participation, broad representation of affected groups, the ability to use technical assistance grants effectively, and information dissemination have the second highest weights. The last criterion includes two other concerns of the public, economic and environmental impacts.

The extent to which an applicant meets each criterion will be assigned a score ranging from zero (totally deficient) to four (excellent). After evaluating individual criterion, the scores will be multiplied by the assigned weight. Finally, the scores for each criterion will be added to determine the total score for the application. The maximum score that an application can receive is 400 points (5 criteria which total 100 points × a perfect score of 4 on each criterion = 400 total points). For example, the maximum score that an application can receive on the health criterion discussed below would be 120 points (4 × 30 points = 120).

In general, each criterion will be evaluated according to the scoring plan outlined below:

Value	Description
0	Not addressed or totally deficient.
1	Poor.
2	Fair.
3	Good.
4	Excellent.

EPA will review applications based on the following criteria (see § 35.4035 of the regulation):

(a) The presence of an actual or potential health threat posed to group members by the site. (30 points)

To help ensure that groups receiving grants are those most directly affected by a site, an applicant group must include a statement of no more than one page describing the actual or potential health threats posed to group members by the site, the number of group members facing such threats, and, where appropriate, any past actions taken by group members to resolve or to make known their health concerns through letters to local, State, or Federal officials, petitions for health assessments, etc.

A group may meet this criterion by establishing that its members are subject to a demonstrable health threat, whether actual or potential, or a threat that is reasonably believed to be substantial. Not all health concerns will be assigned equal value. Thus, for example, an applicant claiming the presence of a demonstrable health threat ordinarily will receive a higher score than one whose claims are based solely on a potential threat. An applicant's inability to provide documentation of health problems related to the site will not necessarily prevent that applicant from receiving a grant provided the other criteria are met.

(b) The applicant best represents groups and individuals affected by the site. (20 points)

To help ensure that an applicant is representative of groups and individuals affected by the site, this criterion considers the number and diversity of affected organizations and individuals represented within an applicant group (e.g., site neighborhood groups, community groups, local chapters of national or State public interest groups, local health awareness groups, nearby property owners, etc.) in relation to the number of affected groups in the community. An applicant must document in no more than one page the extent to which it represents affected groups and individuals in the community and explain how it plans to involve other affected community groups and individuals who express an interest in joining the coalition after the award of the grant.

Additionally, where appropriate, an applicant may discuss as part of the narrative past activities (e.g., letters, attendance at meetings, conferences, and hearings) conducted by the group or by individual group members that are directly related to the site for which the group is applying for a grant. Broad representation, the intent and the ability to involve other affected groups and individuals in the community, and a history of involvement at the site would be awarded a high score, while very narrow representation, the inability or unwillingness to involve others, and no history of involvement would receive a low score.

(c) The identification of how the group plans to use the services of a technical advisor throughout the Superfund response action, which includes all activities from preliminary planning and investigation through operation and maintenance. (20 points)

To help ensure that a technical assistance grant goes to the community group that is in greatest need of the services of a technical advisor and will use grant funds most effectively to assist citizens in understanding the Superfund cleanup process, an applicant must identify in no more than one page how the group intends to use grant funds. An applicant must also submit a schedule that the technical advisor will use to complete certain tasks.

If the applicant establishes that technical assistance is needed to interpret information throughout the Superfund cleanup process, and that the group has plans to use the funds effectively and efficiently to accomplish the intent of the technical assistance grant, the application would be awarded a high score. Conversely, if an applicant is unable to identify a significant or substantial need, or show that the group will use grant funds effectively and efficiently, the application would receive a low score.

(d) The demonstrated intention and ability of the applicant to inform others in the community of the information provided by the technical advisor. (20 points)

To help ensure that a technical assistance grant goes to the community group that will disseminate the information most effectively to the broader community, an applicant must describe or outline the activities the group plans to use to inform other interested community groups and individuals of the technical advisor's findings or interpretations of technical documents. EPA will evaluate an applicant according to its ability and willingness to disseminate information provided by the technical advisor to the broader community. A plan which indicates an inadequate method for disseminating information would be given a low score while one indicating a clear plan for disseminating information to the broader community would be awarded a high score.

(e) The presence of an actual or potential economic threat or threat of impaired use or enjoyment of the environment to group members that is caused by the site. (10 points)

To help ensure that a group receiving a grant is most directly affected by a site, an applicant must include a statement of no more than one page describing the presence of an actual or potential economic threat posed to group members by the site (e.g., decrease in property value or diminished economic use of property, such as farming, or recreational use). If appropriate, an applicant should also include a discussion of how conditions at the site have adversely affected members' use or enjoyment of the surrounding environment (e.g., aesthetic or recreational value). In addition, the applicant must include the number of group members affected, and a discussion of the actions taken by them to resolve or to make known their economic and/or environmental concerns through letters to local, State, or Federal officials, meetings with real estate agents, etc.

A group may meet this criterion by establishing that its members are subject to a demonstrable economic threat, or impairment of their use and enjoyment of the environment, whether actual or potential, or a threat that is reasonably believed to be substantial. Not all economic or environmental concerns will be assigned equal value. Thus, for example, an applicant claiming the presence of a demonstrable economic or environmental threat ordinarily will receive a higher score than one whose claims are based solely on a potential threat. An applicant's inability to provide documentation of economic or environmental problems related to the site will not necessarily prevent that applicant from receiving a grant provided other criteria are met.

2. Consolidation

Section 117(e)(2) states that, "[n]ot more than one grant may be made under this subsection with respect to a single facility * * *." Thus, only one group can receive a technical assistance grant at any particular site although a variety of divergent groups potentially could apply for the single available grant. Consequently, the ANRM sought public comments on various alternatives to encourage the consolidation of applications. The alternatives posed were:

> Option a. * * * (EPA should) accept only one grant application from each site. If more than one were received, then no grant would be awarded until the groups had combined their applications;
>
> Option b. * * * (EPA should place) a public notice of receipt of an application, e.g., in a local newspaper. The notice would inform others in the community that they have an opportunity to join the original applicant to prepare a single application; or
>
> Option c. * * * (EPA should) accept multiple applications and then fund one that best meets certain eligibility criteria.

Most of the commenters believed that EPA should encourage but not require consolidation, and several stated that EPA should publish a public notice after an application has been received so that other potential applicants could consolidate with the first applicant. Several commenters believed that if consolidation proved impossible, then EPA should accept multiple applications and choose one based solely on the merits of each application. Several commenters suggested that EPA should promote the consolidation of groups by providing facilitators.

(a) Forming coalitions. EPA agrees with the public comments on consolidation and therefore, through the use of the five criteria described above, will encourage but not require consolidation. Thus, an applicant's ability to make technical assistance available to a larger number of interested individuals in an affected community, broad representation of groups and individuals affected by the site, and plans for establishing procedures for disseminating a technical advisor's findings or interpretations of technical documents to the community are all important factors in the evaluation of applications. Ordinarily, consolidated applications will be evaluated more favorably than applications from unconsolidated groups. As for the use of facilitators, EPA, at its discretion, may provide facilitators under certain limited circumstances. Generally, it shall be the responsibility of the groups to form their own coalition.

(b) Notification process. EPA agrees with the commenters that a notification process is essential to provide equal access to technical assistance, and to encourage consolidation. By utilizing a formal notification process, EPA intends to ensure that all eligible groups have equal access to technical assistance and an equal opportunity to compete for the single available grant if consolidation proves to be impossible. EPA believes that a notification process will help identify interested groups enabling them to form coalitions, thereby avoiding delays in the award of a grant which could result from the review of competing applications.

Groups wishing to apply for a technical assistance grant must first submit a letter of intent to EPA. The purpose of the letter of intent is to advise EPA of the group's interest in applying for a technical assistance grant and to trigger a formal process for notifying other interested parties of the fact that an application will soon be filed. EPA will respond in writing to a letter of intent. A formal grant application from an affected group that has not submitted a letter of intent will be considered a letter of intent for the purposes of this regulation.

Upon receipt of the first letter of intent, EPA will undertake certain activities depending on the schedule for response activities at the site. If commencement of the remedial investigation or a removal action is not underway or scheduled to begin for several years, EPA will advise the group in writing that grant applications for the site are not yet being accepted. EPA may informally notify other interested groups that it has received a letter of intent.

If a response action is already underway or scheduled to begin, EPA will conduct one or more of the following activities—mailings, meetings, and public notices—to provide formal notice to other interested parties that a grant for the site soon may be awarded. While no scheduled or actual site work will be delayed or interrupted, EPA will make every effort to initiate these activities far enough in advance of the start of the response action to allow time for groups to consolidate, apply for and receive a grant award, and procure a technical advisor before work commences at the site.

Once EPA receives a letter of intent and begins the formal notification process, other potential applicants will have 30 days to contact the original applicant to form a coalition. If the community groups are unable to form a coalition, they must notify EPA within this time period. EPA will then accept separate applications from all interested groups for an additional 30-day period. EPA may consider written requests for an extension of this time. A technical assistance grant will be awarded to a qualified applicant from among the competing applications based on the criteria described above. The schedule for response activities at a site will not be affected by the technical assistance grant application process.

3. Ineligibility

The ANRM provided the following issues for consideration under the subcategory "Ineligibility."

> Issue a. EPA questions whether municipalities meet the definition of group of individuals, and therefore would be eligible to receive a grant under this section;
>
> Issue b. There are other groups which EPA believes may not be appropriate grant applicants. For example, should a party who

is potentially responsible for cleanup costs at the site be considered in the award of a grant? Similarly, national or State associations, with broad policy interests rather than local concerns, might be ineligible. Other possible exclusions might be academic institutions, profit-making organizations, local government advisory groups or citizen advisory groups; and

Issue c. * * * EPA is seeking comment on whether a group's organization status is a good indicator of which groups will be able to manage better the financial and other obligations associated with an EPA assistance agreement. If EPA requires its grantees to be incorporated, does the entire coalition have to incorporate or can one of the coalition member groups, which is incorporated, be the grant recipient?

Nearly all of those commenting agreed that potentially responsible parties (PRPs) should not be eligible for grants. The public commenters diverged, however, on the role of municipalities. Many of those commenting, primarily representatives from State and local governments, believed that municipalities should be eligible because they could provide financial management assistance. A greater number of those commenting, however, believed that municipalities should be ineligible. Many commenters stated that profit-making organizations, academic institutions, and the headquarters offices of national and State public interest groups, particularly those without local affiliates or chapters at the site, also should be ineligible.

EPA, as set forth at § 35.4030 of the regulation, agrees with the public comments regarding PRPs and has determined that PRPs should be ineligible to receive technical assistance grants. EPA also notes that section 117(e) of CERCLA authorizes a technical assistance grant only to a "group of individuals * * * affected by a release" at a Superfund site. It is EPA's view that this language authorizes the award of a technical assistance grant only to an organization formed for the specific purpose of representing these affected individuals. This interpretation is supported by the legislative history of CERCLA, as amended, and serves to exclude from eligibility, organizations formed for purposes other than representing the interests of affected individuals, such as academic institutions, political subdivisions, groups established and/or sustained by political subdivisions, or corporations that are not incorporated for the sole purpose of representing affected individuals at the site.

Moreover, individuals functioning as representatives of ineligible entities cannot be members of recipient groups. However, nothing in this regulation precludes an individual from participating as a member of a recipient group while acting solely in the capacity of an "affected" individual.

In the ANRM, EPA also sought comments on whether a technical assistance grant recipient should be required to incorporate. EPA stated that "[e]xisting regulations allow grant funds to be awarded to both incorporated and unincorporated entities." Several commenters stated that incorporation should be required, while a few disagreed.

EPA's analysis concluded that incorporation offers advantages to both recipients and EPA, and does so at relatively little cost to both. Incorporation protects individual group members from potentially serious personal liability problems that may result if the technical assistance grant is awarded to a group or organization that is not incorporated. It also reduces or eliminates problems that might otherwise arise from the departure of any individual from the recipient group, if it lacked the structure created by incorporation. EPA also benefits from awarding every grant to a group with the same legal status: a corporation with by-laws, officers, and official purposes.

EPA, as set forth at § 35.4020(b) in the regulation, has therefore determined that the group receiving a technical assistance grant must be a non-profit corporation that includes all the individuals and groups that joined in applying for the grant and is incorporated for the purpose of addressing the Superfund site for which the grant is to be awarded. At the time of the award, a recipient must either be incorporated or demonstrate that it has taken all necessary and appropriate actions to incorporate. Thus, applicants are not required to be incorporated at the time that the application is submitted; only recipients of technical assistance grant awards must be incorporated. However, the recipient must submit proof that the group has been incorporated by the State no later than the time of the group's first request for reimbursement for costs incurred.

Based upon a survey of several States, EPA has established that the process of incorporation is relatively quick, easy, and inexpensive. Nevertheless, to reduce even these minimal burdens, EPA has decided that when a recipient has incorporated for the sole purpose of receiving a technical assistance grant, necessary and reasonable costs of incorporation will be considered an eligible pre-award cost and may be charged to the grant as set forth in § 35.4075(b) of the regulation or counted towards the matching funds requirement which is discussed later in Section F, "Waivers of the Matching Funds Requirement," of this Preamble.

4. Representation

The ANRM also raised for discussion what action EPA should take to ensure that a broad-based representation of affected groups is achieved when groups consolidate to apply for a grant. The specific issues raised by the ANRM were:

Issue a. Should coalitions or groups include individuals, who are otherwise excluded from receiving grants? For example, should representatives of the municipal or county governments or potentially responsible parties (PRPs) be routinely included or should inclusion be by invitation only of the grant recipient?

Issue b. EPA specifically seeks comments on possible roles for local government in this program. For example, should a local government routinely, or at only the recipient's request, participate in management of the grant including monitoring fiscal aspects of the grant? Other potential roles for involving local governments may include helping citizen groups coalesce to prepare a single application, and providing expert advice; and

Issue c. * * * (W)hether to ensure that groups receiving grants should be representative of a broad range of community interests, and, if so, how this can be achieved.

The public comments emphasized that achieving broad representation should be encouraged, but not required. EPA concurs with those comments, and reiterates its desire to encourage broad representation of affected groups whenever possible. EPA believes further that given the finite nature of the financial assistance provided, technical assistance should be available to as broad a range of affected groups as possible. To encourage this process, EPA will favor coalitions of affected citizens' groups and community residents through the use of the criteria previously outlined.

EPA has determined that groups that are ineligible to receive technical assistance grants directly should also be ineligible to participate in coalitions that receive grants. Similarly, representatives of ineligible entities may not participate in coalitions. As noted above, individuals who are "affected" by a site may join a coalition, so long as they are acting only as individuals and not as representatives of ineligible entities.

C. When Grants May Be Available

Section 117(e) of CERCLA authorizes technical assistance grants for sites listed on the NPL under the National Contingency Plan (NCP). For many sites

on the NPL, the Agency has not yet begun remedial investigations, raising the question whether technical assistance grants should be awarded at such sites.

The purpose of a technical assistance grant as stated in section 117(e) is to provide recipients with "information with regard to the nature of the hazard, remedial investigation and feasibility study, record of decision, remedial design, selection and construction of remedial action, operation and maintenance, or removal action at such facility." Thus, the commencement of a remedial investigation or a removal action at a site could be viewed as a prerequisite for a technical assistance grant.

The ANRM provided two alternatives for public comment concerning when grants should be made available during the Superfund cleanup process:

Option a. * * * (EPA should) accept applications only for sites where a remedial investigation or feasibility study and/or design and remedial action are underway, or are planned to begin within one year on EPA's annual Superfund Comprehensive Accomplishments Plan (SCAP) (an annual plan of site work scheduled to be undertaken during the coming fiscal year); or

Option b. * * * (EPA should) accept applications at any time after a site has been listed on the final NPL.

The vast majority of those commenting recommended that groups should be allowed to submit a technical assistance grant application as soon as a site is listed on the NPL. Most of the commenters believed that such timing was needed to allow sufficient time for groups to attempt to consolidate with other groups, to prepare applications, and to obtain a technical advisor before work at the site commences. Many commenters suggested that technical assistance grant monies should be available only after the remedial investigation (RI) has begun or is scheduled to begin, or within a year prior to the commencement of the RI. Several commenters suggested that, while applications should be accepted as soon as the site is listed on the NPL, grant funds should not be made available until the RI has begun.

EPA, as reflected at § 35.4050 of the regulation, agrees with the commenters and has determined that groups may submit letters of intent at any time after a site is listed on the NPL or proposed for listing where a response action has begun. The earliest technical assistance grant monies would be available for these sites, however, is at the start of the response action. Therefore, the earliest a formal grant application will be accepted is just prior to the start of the response action. The phrase "start of the response action" means the guarantee or set aside of funding either by EPA, other Federal agencies, States, or PRPs in order to begin the remedial investigation, or other response activities at a site, such as a removal. EPA's annual Superfund Comprehensive Accomplishments Plan (SCAP) identifies the sites where project work is planned during the coming year.

EPA believes this approach ensures sufficient time for interested groups to consolidate and to apply formally because several months usually pass between the guarantee or set aside of the funds and the development of a work plan and commencement of work at the site. Such a schedule gives EPA an opportunity to process the grant application carefully and the grant recipient sufficient time to obtain the services of a technical advisor before work at the site actually begins. Technical work at a site will not be delayed pending the award of a technical assistance grant.

The Superfund cleanup process typically involves the remedial investigation and feasibility study, the selection and construction of remedial action, the operation and maintenance of the remedy, or removal action at a remedial site. The RI/FS is the most important point in the process for public participation. Therefore, EPA believes it should establish priorities for processing grant applications in light of key decision points in a cleanup process and the immediate need for technical assistance in some instances. Accordingly, applications from sites where RI/FS work is already underway or scheduled to begin in the near future will have priority over other applications. These applications will be considered first so that the citizens with the most immediate need for technical assistance at the most significant point in the process are given first consideration.

Technical assistance grants will be awarded depending upon the availability of funds within the Superfund program. The Technical Assistance Grant Program is discretionary and may be affected by requirements of higher priority activities. When funds are limited, EPA will set priorities among sites where grants will be awarded. Factors that EPA may use in ranking the sites include, but are not limited to: the risk to citizens' health or welfare presented by the site; the stage in the Superfund cleanup process; the history of public involvement at the site; and the environmental threat presented by the site. For example, EPA may give priority consideration to funding a grant at a site where the community has already been required to use bottled water or residents have been temporarily relocated, where the RI/FS is beginning, where there is a history of community concerns, and where site work is technically complex and is divided into numerous operable units.

There are other criteria that could be considered in setting priorities among sites for a technical assistance grant award when funds are limited, such as the use of a grant applicant's financial need. Elements that could be considered in calculating financial need include: below average per capita income, high unemployment rate in the area, and below average median household income. Comments are invited on the use of these and other priority-setting mechanisms in determining a technical assistance grant award when funds are limited.

Commenters did not distinguish between "proposed" and "final" listings on the NPL. Under CERCLA section 117(e), a technical assistance grant may be made available to a group affected by a release or threatened release "at any facility which is listed on the National Priorities List under the National Contingency Plan." A possible reading of this language is that it constitutes an absolute bar to a technical assistance grant at any site not formally included on the final NPL. This would preclude a technical assistance grant at a site that has met the rigorous eligibility criteria established in the NCP (40 CFR Part 300) and has been only formally proposed for inclusion on the NPL even if work were actually underway at the site under the authority of CERCLA section 104(b).

Such a result would frustrate the expressed intent of Congress that technical assistance grants be used to help recipients become "involved *from the beginning* in determining the actions which will be necessary to complete the cleanup" of the facility. (H. Rep. 99–253, 99th Cong., 1st Sess. (1985) (Part III) (Report from Committee on Judiciary) (adopting language of report of Energy and Commerce Committee) (emphasis added.)) A 1987 Senate Committee report confirms that section 117(e) was intended to authorize grants at both "proposed and final (NPL) sites" (Senate Report to accompany H.R. 2783, Department of Housing and Urban Development—Independent Agencies Appropriations Bill, 1988; October 6, 1987, p. 49.).

Rather than construing section 117(e) in a manner that would permit results inconsistent with this unequivocal expression of Congressional intent, EPA has concluded that technical assistance grants may be made available at sites formally proposed for inclusion on the NPL where a response action actually is underway.

D. Activities Eligible for Grants

EPA must determine the specific activities that are eligible for technical assistance grants. CERCLA section 117(e)(1) states that "[s]uch grants may be used to obtain technical assistance in interpreting information with regard to the nature of the hazard, remedial investigation and feasibility study, record of decision, remedial design, selection and construction of remedial action, operation and maintenance, or removal action at such facility." The ANRM provided the following three alternatives for public comment:

> Option a. * * * (EPA should) fund only the costs of technical advisors hired to interpret publicly available technical information at National Priorities List sites developed by Federal or State agencies (or their contractors) or potentially responsible parties:
>
> Option b. * * * (EPA should) fund activities, in addition to interpreting Agency documents, that would contribute to the public's understanding of overall site activities and decision-making; and
>
> Option c. * * * (EPA should consider) other options for activities that should be eligible for funding and which ones, if any, should be limited or excluded.

The majority of commenters agreed that EPA should use the Technical Assistance Grant Program to fund the broadest range of activities that would contribute to the public's ability to participate in the decisionmaking process by understanding site conditions and activities. Some commenters suggested that eligible expenses for the technical advisor include costs for meetings, travel, and overhead costs. Other commenters suggested that testing, sampling, and monitoring also be included as eligible activities. (See further discussion in Section E, "Activities Ineligible for Grants," of this Preamble.)

EPA, as set forth at § 35.4060 of the regulation, agrees with the position favored by the public that technical assistance grants should be used to interpret site-related documents and other activities that would contribute to the public's understanding of overall site conditions and activities. Examples of technical advisor activities eligible for funding include:

(a) Reviewing site-related documents, whether produced by EPA or others;

(b) Meeting with the recipient group to explain technical information;

(c) Providing assistance to the grant recipient in communicating the group's site-related concerns;

(d) Disseminating interpretations of technical information to the community;

(e) Participating in site visits, when possible, to gain a better understanding of site conditions and activities; and

(f) Traveling to meetings and hearings directly related to the situation at the site.

E. Activities Ineligible for Grants

EPA also must determine the specific activities that are ineligible for technical assistance grants. The ANRM provided this point of clarification regarding restricting the use of grant funds for public comment:

> * * * Technical assistance grants are not intended to be used to underwrite legal actions. EPA believes it would be inappropriate to allow costs incurred by a community group in preparing for or participating in any adjudicatory proceeding to be paid from a technical assistance grant.

All of those who commented on ineligible activities agreed that grant funds should not be used to "underwrite legal actions." Several commenters suggested that the collection of background information and site visits or travel by a technical advisor also should be considered ineligible.

The legislative history of section 117(e) provides that technical assistance grants "are not intended to be used to underwrite legal actions. However, any information developed through grant assistance may be used in any legal action affecting the facility, including any legal action in a court of law." (H. Rept. No. 99–962, 99th Cong., 2d Sess. (1986), p. 231.) Thus, technical assistance grant funds may not be used to pay for attorney's fees or for time the technical advisor may spend assisting an attorney in preparing a legal action (e.g., citizen suit) or preparing for and serving as an expert witness at any legal proceeding (public meetings scheduled by EPA or a State are not considered legal proceedings). Moreover, technical assistance grant funds may not be used in preparation for or participation in any legal proceeding. For example, an attorney's costs for locating, interviewing, or preparing a witness to testify, or the time that any witness spends preparing for any such legal proceeding may not be paid for with technical assistance grant funds. However, these prohibitions on the use of technical assistance grant funds do not preclude a technical advisor from participating in a legal proceeding so long as none of the costs of participation are charged to the technical assistance grant.

In addition, other activities, as set forth at § 35.4055 of this regulation, that are ineligible for technical assistance grant funding include: activities inconsistent with the cost principles stated in the Office of Management and Budget (OMB) Circular A–122 including lobbying and related activities; tuition of other expenses for recipient group members or technical advisors to attend training, seminars or courses; any activities or expenditures for recipient group members' travel; and generation of new primary data such as well drilling and testing (including split sampling). EPA also has determined that while technical assistance grant funds may be used for interpreting site-related technical documents and studies, they may not be used to challenge final Agency decisions (e.g., Records of Decision). Finally, technical assistance grant funds may not be used to underwrite disputes with EPA.

EPA calls particular attention to the prohibition on the use of technical assistance grant funds for lobbying and political activities (see 40 CFR 30.601). Briefly summarized, this prohibition means that technical assistance grant funds cannot be used to participate in or attempt to influence the outcome of any election or to influence the introduction, enactment, or modification of any legislation. Similarly, technical assistance grants funds may not be associated with any partisan or non-partisan political activity. The prohibition against political activities and lobbying is discussed more fully in OMB Circular A–122, the key sections of which appear in EPA's "Citizens' Guidance Manual for the Technical Assistance Grant Program" that has been developed for this program.

Costs associated with tuition or other expenses for recipient group members or technical advisors to attend training, seminars or courses, and any activities or expenditures for recipient group members' travel are not allowable. EPA believes that the primary purpose of the technical assistance grant is to assist citizens' groups in obtaining technical assistance and not to fund ancillary activities of the grant recipient such as travel and training, which, by reducing available funds, would detract from or limit the recipient's ability to obtain technical advice regarding remedial actions.

Costs associated with the generation of new primary data are not allowable because this would be inconsistent with Congressional intent of "interpreting information." In addition, developing new primary data, such as sampling data, would be so costly as to diminish

the recipient's ability to obtain technical assistance throughout the entire cleanup process.

Cost associated with disputes with the Agency or challenges to final Agency decisions (e.g., Records or Decision) are not allowable since this also would be inconsistent with Congressional intent or "interpreting information." In order to ensure the best use of limited technical assistance grant funds, costs of administering the grant are allowable to the extent that they do not exceed 15 percent of total project costs.

F. Waivers of the Matching Funds Requirement

Section 117(e)(2) of GERCLA states that "[e]ach grant recipient shall be required, as a condition of the grant, to contribute at least 20 percent of the total costs of the technical assistance for which such grant is made. The President may waive the 20 percent contribution requirement if the grant recipient demonstrates financial need and such waiver is necessary to facilitate public participation in the selection of remedial action at the facility."

This language clearly expresses the intent of Congress that the affected community's ability to pay should affect the size of the match for the technical assistance grant. In today's regulation, EPA is setting the matching funds requirement at a figure of 35 percent of total project costs. EPA invites comments on how to develop a workable system for determining the matching share based on financial need and other factors for inclusion in the Final Rule. As discussed later in the Preamble, this IFR provides for a total waiver of the matching funds requirement in exceptional circumstances.

Thus, each grant recipient must contribute 35 percent of the total project costs. For example, if total project costs will be $20,000, then the group would have to provide at least $7,000 (35 percent of $20,000) to "match" the Agency's grant of $13,000. Absent specific statutory authority, recipients may not use other Federal funds to meet the "match" requirement.

The ANRM requested comment on whether EPA should consider, and under what circumstances provide, waivers of the matching funds requirement. The Agency considered four options. First, if the Agency allows in-kind contributions to be used, waivers of the match might not be appropriate at all. If waivers are used, EPA will develop criteria to determine the basis on which waivers of the matching fund requirement may be provided. One option for doing so is for the Agency to establish a single waiver standard, such as per capita income, to identify recipients with financial need. A second option would be for the Agency to use a set of criteria, instead of a single measure, to determine financial need. Possible criteria might include a combination of such measures as per capita income, median household income, and demonstrated efforts to raise funds and in-kind contributions from State and local governments as well as private citizens. A third option might be simply to allow groups the opportunity to present whatever evidence of financial need they deem relevant in their waiver application. Finally, EPA could decide to grant partial waivers to groups able to raise part, but not all, of the match contribution.

A majority of commenters suggested that EPA grant waivers of the matching funds requirement, and allow in-kind contributions to meet the matching funds requirement. Many of these suggested that the financial need of the grant recipient was an appropriate criterion for determining whether a waiver of the "match" is justified. A small number of commenters felt that no waivers should be granted.

In-kind contributions are the recipient's non-cash contributions, such as the value of donated goods (e.g., office space) and services (e.g., an accountant's time or management of the technical advisor contract) that are properly allocable to and allowable under the given project. In-kind contributions can reduce the need for groups to raise money in order to receive assistance and therefore reduce and probably eliminate the need for waivers.

EPA, as set forth at § 35.4085(a)(2) of the regulation, agrees with the commenters and notes that in-kind contributions may be used as a "match" in accordance with 40 CFR 30.307(b). EPA will count toward the matching funds requirement any allowable in-kind contributions which are necessary to implement the technical assistance grant project, such as the recipient's project manager's time for managing the technical advisor contract; or the professional services of an accountant for maintaining the group's books and producing financial reports; or telephone calls; or copying.

Because in-kind contributions can be counted toward the "match," waivers of the 35 percent matching funds requirement will be granted only in exceptional cases. A waiver should be requested in writing only when it becomes apparent that the grant recipient cannot meet the matching funds requirement. The Agency may waive part or all of the recipient's 35 percent matching funds requirement only after a finding by the Agency that (1) there is a need for a waiver because providing the "match" would constitute an unusual financial hardship, (2) a good faith effort at raising the "match," including obtaining in-kind services, has failed; and (3) the waiver is necessary to facilitate public participation in the selection of a remedial action at the facility. Financial need may be demonstrated by such measures as below average per capita income, below average median household income, or a higher unemployment rate in the area.

Once a group has been awarded a technical assistance grant and signed a grant agreement promising to contribute a specific "match," if it subsequently receives a waiver it is reducing its contribution. Consequently, the total resources available for technical assistance will be less than the amount specified in the grant agreement. This constitutes a substantial change in the technical assistance grant project, and the grant agreement must be amended as required by 40 CFR Part 30, Subpart G.

Finally, CERCLA section 117(e) authorizes a waiver of the matching funds requirement only where it is needed to ensure the public's "participation in the selection of a remedial action at the facility." Meaningful participation in the selection of a remedial action is not possible, and therefore no waivers will be approved once the Record of Decision (ROD) has been issued for the last operable unit at the site. (An "operable unit" is a term that means an action taken as one part of an overall site response. A number of operable units may occur in the course of a site response.)

G. Waivers of the $50,000 Limit on Grants

Section 117(e) states that "[t]he amount of any grant under this subsection may not exceed $50,000 for a single grant recipient. The President may waive the $50,000 limitation in any case where such waiver is necessary to carry out the purposes of this subsection." The Agency must determine under what circumstances a waiver of the $50,000 limit on grants may be given, recognizing that the language and legislative history of CERCLA strongly suggests that waivers are to be granted as an exception rather than as a rule.

The ANRM discussed circumstances under which the Agency would give a waiver of the $50,000 limit on grants.

The ANRM presented these alternatives for public comment:

Option a. * * * (EPA should) issue waivers only for sites that are deemed significantly more technologically complex than a 'typical' remedial action. Indicators of complexity might include unusual waste type or hydrogeology;

Option b. * * * (EPA should) issue waivers only at sites where unanticipated changes in the remedial action justify a need for additional technical assistance;

Option c. * * * (EPA should) issue waivers to single grant applicants representing groups from several NPL sites in close proximity. The technical assistance grant award could not exceed the sum of the maximum allowable amount for the individual sites involved; and

Option d. * * * (EPA should consider) other criteria that would provide reasonable guidelines for determining when and on what basis to grant waivers of the $50,000 limit.

The majority of commenters suggested that the Agency issue waivers of the $50,000 limit on grants only for sites that are significantly more technologically complex than "typical" sites. Other commenters suggested that the Agency issue waivers of the $50,000 limit (a) when unanticipated changes occur, (b) when the length of the cleanup process is extended, or (c) where groups apply for a grant to provide technical assistance at multiple NPL sites in close proximity to each other.

EPA notes that CERCLA constitutes a broad mandate to clean up hazardous waste sites and provides finite resources for doing so. EPA believes that with careful planning and reasonable management, the maximum $76,923 ($50,000 grant plus the recipient's $26,923 "match") will be sufficient to provide meaningful technical assistance. Consequently, EPA has determined that a waiver of the $50,000 limit at the time that an award is made is appropriate only where a single grant is addressing multiple sites.

Thus, as set forth at § 35.4090(a) of the regulation, where there are several NPL sites in close geographic proximity to each other and an affected group desires to reduce its administrative burden by submitting one application and awarding one set of contracts, the Agency will consider awarding a single technical assistance grant for a sum not exceeding the maximum allowable amount for each of the individual sites involved (e.g., 3 sites × $50,000 = grant of $150,000). In this case, the Agency may waive the limitation that a single recipient cannot receive more than $50,000. The recipient, however, must provide the 35 percent matching funds and is still limited to spending no more than $50,000 of Federal grant funds at any site. Moreover, the application must be based on site specific information for each site involved.

EPA has determined that no other waivers to the technical assistance grant ceiling shall be granted during the period of the IFR. EPA believes that it needs to develop some experience with the Technical Assistance Grant Program in order to determine whether there are circumstances in which it is appropriate to grant waivers. Grant recipients are required to plan and manage the funds to last throughout the Superfund cleanup process so that waivers will not be needed. Waivers will be needed and granted only in the most exceptional circumstances.

H. Conflict of Interest and Disclosure Procedures.

In the ANRM, EPA also solicited comments regarding disclosure and avoidance of potential conflicts of interest. Given the pool of technically qualified individuals or firms available to interpret information concerning Superfund actions, some may have worked for PRPs or have been or can anticipate becoming involved in litigation against EPA. Title 40 CFR 30.613 and 33.270 presently contain regulations pertaining to conflicts of interest on the part of persons selecting a technical advisor. EPA was concerned about what requirements the Technical Assistance Grant Program should impose on technical advisors themselves to ensure that advisors do not have conflicting loyalties that might undermine public confidence in the integrity of their advice. EPA asked:

Option a. * * * Should EPA require prospective technical advisors to disclose in their proposals all financial and business relationships with any potentially responsible parties at Superfund sites so that the grantee can determine if it wants to select the technical advisor? and

Option b. * * * Should the technical advisors be required to inform the citizen group responsible for the grant, EPA, the State, and other interested parties, if they are invited to provide services related to any proposed or pending litigation concerning or arising from the site after award of the grant?

The comments regarding the issue of conflicts of interest in working for a PRP and a community group at the same site generally favored requiring the technical advisor to disclose any potential conflicts of interest by acknowledging activities or relationships, including business or financial, with PRPs.

EPA, as set forth at § 35.4130 of the regulation, agrees with the commenters who suggested that the citizens' groups must have the opportunity to assure themselves of the objectivity, as well as the expertise, of their technical advisors. The regulations, therefore, requires that technical advisors disclose to grant recipients all of their financial and business relationships with all PRPs that are involved at the site for which the grant has been awarded. This disclosure requirement encompasses past and anticipated financial and business relationships (including services related to any proposed or pending litigation) with the PRPs for the subject site, and with their parent companies, subsidiaries, affiliates, subcontractors, and current clients, attorneys, and agents. At any time an undisclosed past or anticipated business relationship is discovered, it must be reported immediately. Technical advisors must certify that, to the best of their knowledge and belief, they have disclosed such information or no such information exists. Technical advisors must also submit a statement that they shall disclose immediately any such information whether discovered after submission of its bid or proposal, or after award.

Disclosure of such a relationship does not automatically preclude the technical advisor from being hired by the recipient. Once full disclosure occurs, the recipient must determine if there is an actual conflict of interest. Where the recipient concludes that there is such a conflict that is significant and cannot be resolved or otherwise avoided, the recipient must reject the prospective contractor. (The issue of conflict of interest and disclosure requirements is discussed further in EPA's "Citizens' Guidance Manual for the Technical Assistance Grant Program.")

In an effort to reduce further any conflict of interest problems, EPA has determined that contractors and subcontractors may not apply for positions as technical advisors to recipient groups at the same NPL site for which they are doing work for the Federal or State government or any other entity, since they otherwise would be reviewing their own work.

I. State Involvement in Administering the Technical Assistance Grant Program

The ANRM provided three alternatives for State involvement:

Option a. * * * (EPA should) allow the States to administer the program. Under this option, a participating State would receive and evaluate grant applications from its citizens and administer all aspects of grant management. States also would monitor fiscal management of the grant. The States would consult with EPA prior to awarding a grant; or

Option b. * * * (EPA should allow the) States to administer the program by

cooperative agreement for all State-lead NPL sites, that is, sites at which the State is administering similar elements of the Superfund program such as remedial design and construction activities. EPA would then administer the technical assistance program for all Federal-lead sites. However, a State could volunteer to administer the program for Federal-lead sites. Again, the State would consult with EPA prior to awarding the grant; or

Option c. * * * (EPA should) administer the program entirely at the Federal level during the period that the IFR is effective, i.e., from the promulgation of the IFR to the publication of the Final Rule. After this initial period, the States could administer the program as outlined in the above options.

A majority of the commenters offered suggestions regarding State involvement with the Technical Assistance Grant Program. Most commenters favored EPA control of the program, but with State consultation.

Several commenters suggested that EPA and the States share administration of the program. A small number of commenters recommended that EPA retain full responsibility for the program through the issuance of the Final Rule and then EPA or the State, whichever is administering all elements of the Superfund program at a given NPL site, should administer the technical assistance grant for that site.

Section 121(f) of CERCLA, as amended, mandates that EPA provide for "substantial and meaningful" State involvement in the Superfund process. In keeping with this mandate, EPA has concluded that a State can administer all aspects of the Technical Assistance Grant Program, except for the waiver provisions. Based on the statutory language, the Agency must make all decisions whether to waive either the 35 percent matching funds requirement or the $50,000 limit to the technical assistance grant.

EPA will allow the States to determine for themselves their level of involvement in the Technical Assistance Grant Program. EPA is confident that State governments: are well able to manage the technical assistance grant program; understand the needs of their citizens; and can aid in identifying which groups most accurately reflect community desires, can disseminate most effectively the technical advisor's conclusions to the community, and can best represent the broadest set of local interests among affected citizens.

EPA, as set forth at § 35.4015(a) of the regulation, will initiate the Technical Assistance Grant Program immediately and begin accepting applications for, and awarding technical assistance grants in consultation with the States. Technical assistance grants will be available at an NPL site where (1) a State response action either funded by State dollar or by responsible parties under agreement with the State is scheduled to begin or is underway, and (2) a CERCLA-funded cooperative agreement or other written agreement which exists between the Agency and the State for the site for which the technical assistance grant will be awarded.

At a few NPL sites, States have elected to have work begin absent a written agreement with the Agency and Federal funding from the Trust Fund. Technical assistance grants may be available for these non-Fund financed State response actions at NPL sites where there is no response agreement between EPA and the State. The State, however, must enter into either a cooperative or other written agreement with the Agency for the overall technical activities at the site or for administration of the Technical Assistance Grant Program.

States wishing to be involved in administering the Technical Assistance Grant Program must inform the appropriate EPA Regional Administrator. If a State administers a technical assistance grant, it must do so in conformity with the regulation published today.

Following the guidance in EPA's "State Participation in the Superfund Program" (Vol. 1, OSWER Directive 9375.1–04A, February 1984 with Addendum, May 1987), a State may receive technical assistance grant funds plus administrative costs from EPA under a cooperative agreement. A State will receive $10,000 for administrative costs for the first technical assistance grant. Due to economies of scale, for each subsequent technical assistance grant, a State will receive an amount equal to 8 percent of the grant. Administrative costs include reviewing applications, awarding grants, and reviewing subagreements and financial and progress reports.

The State may provide technical assistance to a recipient group in either of two ways. A State will pass through technical assistance grant funds to a recipient group by way of a subgrant, and reimburse the recipient group for its expenditures as provided at § 35.4060 of this regulation. A State that elects this option is also responsible for monitoring the subgrant to ensure that recipients comply with its terms and with applicable regulations, e.g., 40 CFR Parts 30 and 33.

Alternatively, if a recipient group agrees, a State will use technical assistance grant funds to obtain the services of a technical advisor and provide those services to a grant recipient in lieu of cash. The recipient group may work closely with the State in advertising, reviewing bids and recommending a technical advisor, and managing the technical advisor. The State will make the final selection of the technical advisor. A State that elects this option becomes directly responsible for awarding the technical advisor contracts, submitting financial and progress reports, and for disbursing all technical assistance grant funds in compliance with applicable EPA regulations and requirements.

In addition to the three options in the ANRM, EPA considered two other options for State involvement, i.e., that (1) a State wishing to participate in the Technical Assistance Grant Program must elect to administer the Technical Assistance Grant Program for all sites within its borders or for none, and (2) the agency undertaking the technical activities at any given site, either EPA or the State, would administer the Technical Assistance Grant Program as part of its responsibility at that site. EPA invites comment on these options for State involvement described above in developing the Final Rule.

J. Other

EPA also solicited comments regarding other aspects of the Technical Assistance Grant Program not identified in the ANRM and appreciates the numerous comments offered.

1. Assistance to Communities

Twelve commenters requested that EPA provide guidance materials (such as a citizens' training manual) to communities and prospective applicants. EPA agrees with the commenters and will issue a comprehensive "Citizens' Guidance Manual for the Technical Assistance Grant Program" to assist citizens' groups in applying for and managing the technical assistance grants. It will be available to the public upon publication of this IFR.

EPA also intends to train Superfund/RCRA "hotline" staff on EPA technical assistance grant and procurement issues so that citizens will have a toll-free or local number (1–800–424–9436 or, in Washington, DC, 382–3000) to call for answers to their questions. In addition, EPA Headquarters will provide training and guidance to Regional and State personnel so that they will be fully prepared to implement this program.

2. Qualifications of Technical Advisors

EPA received several comments related to the qualifications of technical advisors. Among the comments received were: (a) technical advisors should be required to provide credentials and prove qualifications of their ability to perform the work, (b) EPA should impose minimum qualifications for technical advisors, and (c) EPA should impose a certification requirement for technical advisors and require previous Superfund experience as a qualification.

Consistent with EPA procurement regulations set forth at 40 CFR Part 33, EPA believes that grant recipients must determine the standards and criteria appropriate for choosing their technical advisors. The regulation at § 35.4065 identifies the following credentials a technical advisor must possess:

(a) Demonstrated knowledge of hazardous or toxic waste issues;

(b) Academic training in a relevant discipline (e.g., biochemistry, toxicology, environmental sciences, engineering); and

(c) Ability to translate technical information into terms understandable to lay persons.

The regulation also identifies the following credentials a technical advisor should possess:

(a) Experience working on hazardous or toxic waste problems;

(b) Experience in making technical presentations;

(c) Demonstrated writing skills; and

(d) Previous experience working with citizens' or community groups or other groups of individuals.

3. Grant and Procurement Procedures

Nine commenters requested that EPA streamline the grant and procurement process. Though the Agency is constrained by grant and procurement regulations, EPA is investigating several ways to streamline the process, such as increasing the small purchase order limitation from $10,000 to $25,000, which will reduce some of the administrative work associated with hiring a technical advisor by simplifying the procurement process.

4. Cost Recovery

Cost-recovery is an effort by EPA to recover all costs related to the cleanup at a Superfund site from any individual(s) or company(ies) (such as owners, operators, transporters, or generators) potentially responsible for, or contributing to, the contamination problems at the site.

One commenter stated that "The $50,000 award should not be cost-recoverable from PRPs; it should be considered part of the cost of EPA's Superfund community relations program." EPA does not agree. Superfund community relations costs are recoverable, and technical assistance grants as well as the administrative costs will likewise be subject to cost-recovery from the PRPs.

5. Prior Awards

One commenter stated that "Prior technical assistance provided by public agencies to community groups should be counted as part of the $50,000 award limit." EPA recognizes that technical assistance provided previously was not under the authority of section 117(e) and will not count such assistance as part of the $50,000 award limit under this authority.

6. Indemnification

One commenter stated that "EPA should indemnify a technical expert for non-negligent conduct based upon recommendations made by the expert to the community group. The indemnification would protect technical advisors against all liabilities, State or Federal, unless there is clear evidence of gross negligence or intentional misconduct." Section 119 of CERCLA, as amended, provides EPA's exclusive authority to indemnify persons engaged in CERCLA response activities. Consultants hired by recipients of technical assistance grants are not within the definition of those who can be indemnified by EPA. Moreover, liability claims against technical advisors seem remote in view of their role. Technical advisors will be reviewing and commenting only on site-specific documents. Their recommendations and citizen recommendations based on their work will be considered by EPA or the PRPs as any other public comment would be. Public comments are part of the administrative process. Final decisionmaking authority rests with EPA, however, which ultimately is responsible for actions taken at a Superfund site.

K. Sanctions

If the recipient fails to comply with any of the terms of the grant agreement, EPA may take any of the following measures, as set forth in 40 CFR Part 30, Subpart I, based on the severity of the recipient's misconduct:

(a) Issue a stop-work order;

(b) Withhold payment;

(c) Suspend or terminate the grant agreement for cause;

(d) Annul the grant agreement and secure the return of all grant funds;

(e) Request that the Director, Grants Administration Division, debar or suspend the recipient as an eligible grant recipient;

(f) Take other appropriate administrative action; or

(g) Institute judicial proceedings.

Where States administer the program. EPA will hold them accountable for proper administration of technical assistance grant funds.

See § 35.4070 of this regulation.

L. Disputes

The Agency shall review appeals of EPA or State decisions by the applicant or recipient. An appeal of an EPA decision will be resolved according to EPA regulations at 40 CFR Part 30, Subpart L. EPA can only review a State decision that is final. An appeal of a final State decision will be resolved as prescribed at § 35.4100 of this regulation. Before appealing a State decision, an applicant or recipient must first submit a petition for review to the State agency that made the initial decision.

M. Record Retention

In accordance with 40 CFR 30.501, all records must be maintained by the recipient and the technical advisor for three years or until any audits, litigation, cost-recovery, or disputes initiated before the end of the three-year retention period are settled, whichever is longer. After three years if the recipient intends to dispose of the records, the Agency must be notified in writing and the records must be held until the Agency notifies the recipient as to their disposition. See § 35.4105 of this regulation.

N. Budget Period

The budget period may not exceed three years. A technical assistance grant project period may be comprised of more than one three-year budget period. Certain procedures as described in 40 CFR 30.306 must be followed if the recipient wants to continue the project beyond the initial three-year budget period. The process also is discussed in the "Citizens' Guidance Manual for the Technical Assistance Grant Program."

O. Reimbursement

The Agency is authorized to make payments to grant recipients by (1) letter of credit, (2) by advance, or (3) by reimbursement pursuant to 40 CFR 30.400(b). EPA has determined that the appropriate method of distributing technical assistance grant funds is to reimburse recipients for grant-related costs which have been incurred and which the recipient legally is obligated to pay.

The letter of credit, according to the Treasury Department's criteria contained in Treasury Circular No. 1075, as revised, requires a longstanding relationship with the Agency in addition to the grant recipient receiving financial

assistance of at least $120,000 annually. Technical assistance grant recipients clearly cannot meet these requirements. Also, EPA had concluded that the advance method of payment is more administratively cumbersome than reimbursement. This method of payment was considered not be be suitable for the Technical Assistance Grant Program.

All costs related to the Technical Assistance Grant Program must be determined to be necessary, reasonable, allowable, and allocable to the project. The recipient, as set forth at § 35.4080 of this regulation, may submit quarterly requests for any reimbursements. Costs incurred over $500 may be submitted monthly. Normally, the Agency will reimburse the recipient within 10 to 20 days of receipt and approval of the eligible costs incurred. Recipients therefore will not need to pay any costs out-of-pocket. States administering the Technical Assistance Grant Program should adhere to this timetable. See § 35.4080 of this regulation.

P. Subagreement Review

Although the choice of a technical advisor is within the province of the recipient, the procedures used in procuring the services of a technical advisor must be consistent with 40 CFR Part 33. Since the majority of grant recipients will not be familiar with EPA procurement regulations, EPA believes that many problems of noncompliance can be avoided by EPA reviewing the content of the subagreements before they are awarded. Therefore, to ensure compliance with EPA's procurement regulations, the recipient must inform EPA of any proposed subagreement with the technical advisor and must provide EPA the opportunity to review the subagreement before it is awarded. See § 35.4095 of this regulation. However, the recipient is responsible for compliance with the procurement regulations even if EPA has reviewed the subagreement.

Q. Grant and Procurement Process

The process for the review and evaluation of technical assistance grant applications and the procurement of a technical advisor must follow certain steps as described in this regulation and EPA's grant and procurement regulations (40 CFR Parts 30 and 33, respectively). The key steps of the process may be summarized as follows:

Step 1. Group submits a letter of intent.

Step 2. If site work is not scheduled to begin nor is underway, EPA will advise the group in writing that grant applications for the site are not yet being accepted. EPA will formally notify the community if site work is scheduled to begin or is underway. The groups have 30 days to form a coalition and submit an application. If groups cannot form a single coalition, applicants have an additional 30 days if they want to file competing applications.

Step 3. Group or groups submits a grant application.

Step 4. EPA evaluates the applications and may make an award to a qualified applicant.

Step. 5. Recipient of the grant selects an approporiate procurement method, evaluates bids or proposals, and selects a technical advisor.

Step 6. Prior to selecting a technical advisor, EPA has the opportunity to review the group's subagreement.

Step 7. Group files quarterly request for reimbursement and progress reports and annual financial reports.

Step 8. Group prepares a draft and final report to EPA at the end of the technical assistance grant project.

The "Citizen's Guidance Manual for the Technical Assistance Grant Program" lays out in detail the grant and procurement process as well as the applicants and recipients' responsibilities. The Manual is designed to help citizens understand the process, complete the necessary forms correctly, and meet all their obligations to the Government.

III. Regulatory Analyses

A. Regulatory Impact Analysis

Executive Order No. 12291 requires that regulations be classified as "major" or "non-major" for purposes of review by the Office of Management and Budget (OMB). According to Executive Order No. 12291, "major" rules are regulations that are likely to result in:

(1) An annual adverse (cost) effect on the economy of $100 million or more; or

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government, or geographical regions; or

(3) Significant adverse effects on the competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Technical Assistance Grant Program described here, which involves grants of up to $50,000 at sites listed on the NPL or proposed for listing where site work has begun, is a "non-major" rule. It would have no significant annual adverse effect on the economy of $100 million or more; or a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.

There are approximately 951 sites currently on the NPL and if each site were awarded a maximum grant of $50,000, this would amount to less than $50 million. Also, EPA anticipates awarding approximately 50 technical assistance grants in 1988, the first year of the program and these would not amount to more than $2.5 million. Therefore, it would not have the requisite annual financial effect on the economy. This rule was submitted to the Office of Management and Budget for review as required by Executive Order No. 12291.

B. Regulatory Flexibility Analysis

The Regulatory Flexibility Act of 1980 requires that Agencies evaluate the effects of a proposed rule for three types of small entities:

(1) Small businesses (as defined in the Small Business Administration regulations);

(2) Small organizations (independently owned, nondominant in their field, non-profit); and

(3) Small government jurisdictions (serving communities of less than 5,000 people).

EPA has consistently considered the interests of small non-profit entities in designing the Technical Assistance Grant Program. EPA was careful not to impose additional reporting requirements on the public and to stay within the reporting requirement quota for grants and procurements. In addition, section 117(e) only applies to small non-profit organizations. There is even a limited number of small non-profit organizations involved in this program since this rule affects only those non-profit organizations located near the approximately 951 Superfund sites.

Moreover, EPA has undertaken several activities to help small organizations. EPA specifically developed the "Citizens' Guidance Manual for the Technical Assistance Grant Program" in order to assist small organizations through the grant and procurement process. The Agency has sought to increase the amount of small purchase orders to simplify the procurement process. EPA has deliberately written the regulations to encourage small entities to apply. And, for some applicants the Agency may waive the matching funds requirement.

Since today's rule is not expected to have a significant impact on small non-

profit entities. EPA certifies that no Regulatory Flexibility Analysis is necessary.

C. Paperwork Reduction Act

Pursuant to section 3504(h) of the Paperwork Reduction Act of 1980, the reporting and recordkeeping provisions of today's IFR have been submitted to the Office of Management and Budget (OMB), approved, and have been assigned OMB control numbers 2030–0020 and 2050–0083, for those information collection activities involving the general grant application process and for all other information collection activities associated with this rule.

Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs, OMB, 726 Jackson Place, NW., Washington, DC 20503, marked "Attention: Desk Officer for EPA." When EPA promulgates the Final Rule, EPA will respond to comments by OMB or the public regarding the information collection provisions and recordkeeping requirements of the rule.

IV. Supporting Information

List of Subjects in 40 CFR Part 35

Grant programs, Matching funds, Public involvement, Reporting and recordkeeping requirements, Hazardous wastes, Superfund.

Dated: March 10, 1988.

Lee M. Thomas,
Administrator.

Accordingly, the Administrator amends 40 CFR Part 35 by adding a new Subpart M to read as follows:

PART 35—STATE AND LOCAL ASSISTANCE

Subpart M—Grants for Technical Assistance

Sec.
35.4000 Authority.
35.4005 Purpose.
35.4010 Definitions.
35.4015 Administration of the Program.
35.4020 Responsibility requirements.
35.4025 Eligible applicants.
35.4030 Ineligible applicants.
35.4035 Evaluation criteria.
35.4040 Notification process.
35.4045 Submission of application.
35.4050 Timing of award.
35.4055 Ineligible activities.
35.4060 Eligible activities.
35.4065 Technical advisor's qualifications.
35.4070 Sanctions.
35.4075 Pre-award costs.
35.4080 Method of payment.
35.4085 Grant limitations.
35.4090 Waivers.
Sec.
35.4095 Subagreement review.
35.4100 Disputers.
35.4105 Audits.
35.4110 Reports.
35.4115 Availability of information.
35.4120 Budget period.
35.4125 Federal facilities.
35.4130 Conflict of interest and disclosure requirements.

Subpart M—Grants for Technical Assistance

Authority. 42 U.S.C. 9617(e); sec. 9(g), E.O. 12580.

§ 35.4000 Authority.

This regulation is issued under section 117(e) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended, 42 U.S.C. 9617(e).

§ 35.4005 Purpose.

This regulation codifies policies and procedures for technical assistance grants awarded by EPA to groups of individuals. This regulation establishes the procedures for accepting and evaluating applications, and for awarding and managing technical assistance grants. These provisions supplement the EPA general assistance regulations and procedures at 40 CFR Part 30 and are applicable to all applicants/recipients of technical assistance grants.

§ 35.4010 Definitions.

As used in this regulation, the following words and terms shall have the meaning set forth below:

"Affected" means subject to an actual or potential health, economic or environmental threat arising from a release or a threatened release at a facility listed on the National Priorities List (NPL) or proposed for listing under the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) where a response action under CERCLA has begun. Examples of "affected" parties include individuals who live in areas adjacent to NPL facilities, who depend on water sources endangered by releases of hazardous substances at the facility, or whose economic interests are directly threatened or harmed.

"Applicant" means any group of individuals that files an appplication for a technical assistance grant.

"Application" means a completed formal written request for a technical assistance grant that is submitted to the Agency on EPA Form 5700–33—State and Local Nonconstruction Program, or to a State on its appropriate form.

"Award" means the technical assistance grant agreement signed by both EPA and the recipient.

"Award Official" means the official delegated the authority to sign grant agreements.

"Budget" means the financial plan for the spending of all Federal and matching funds (including in-kind contributions) for a technical assistance grant project as proposed by the applicant, and negotiated with and approved by the Award Official.

"Budget Period" means the length of time specified in a grant agreement during which the recipient may spend or obligate Federal funds. The budget period may not exceed 3 years. A technical assistance grant project period may be comprised of several budget periods.

"Cash Contribution" means actual non-Federal dollars, or Federal dollars if expressly authorized by statute to do so, that a recipient spends for goods and services and real or personal property used to satisfy the matching funds requirement.

"Contractor" means any party (i.e., technical advisor) to whom a recipient awards a subagreement.

"EPA" means the Environmental Protection Agency. Where a State administers the Technical Assistance Grant Program, the term "EPA" may mean a State agency.

"Federal Facility" means a facility that is owned or operated by a department, agency, or instrumentality of the United States.

"Grant Agreement" means the legal document that transfers money, or anything of value, to a recipient to accomplish the purpose of the technical assistance grant project. It specifies budget and project periods, the Federal share of eligible project costs, a description of the work to be accomplished, and any special conditions.

"In-Kind Contribution" means the value of a non-cash contribution used to meet a recipient's matching funds requirement in accordance with 40 CFR 30.307(b). An in-kind contribution may consist of charges for equipment or the value of goods and services necessary to and directly benefiting the EPA-funded project.

"Matching Funds" means the portion of allowable project costs that a recipient contributes toward completing the technical assistance grant project using non-Federal funds or Federal funds if expressly authorized by statute. The match may include in-kind as well as cash contributions.

"Operable Unit" means a response action taken as one part of an overall site response. A number of operable units may occur in the course of a site response.

"Potentially Responsible Party" (PRP) means any individual(s) or company(ies) (such as owners, operators, transporters, or generators) potentially responsible under sections 106 or 107 of CERCLA for the contamination problems at a Superfund site.

"Recipient" means any group of individuals that has been awarded a technical assistance grant.

"Recipient's Project Manager" means the person legally authorized to obligate the organization to the terms and conditions of EPA's regulations and the grant agreement, and designated by the recipient to serve as its principal contact with EPA.

"Response Action" means all activities undertaken to address the problems created by hazardous substances at a National Priorities List site.

"Start of Response Action" means the point in time when there is a guarantee or set-aside of funding either by EPA, other Federal agencies, States, or PRPs in order to begin response activities at a site. The document which reflects the set-aside of, or formally guarantees, funding during the coming fiscal year, is EPA's annual Superfund Comprehensive Accomplishments Plan (SCAP).

"Subagreement" means a written agreement between the technical assistance grant recipient and another party (a contractor other than a public agency) for services or supplies necessary to complete the technical assistance grant project. Subagreements include contracts and subcontracts for personal and professional services or supplies necessary to complete the technical assistance grant project, and agreements with consultants, and purchase orders.

§ 35.4015 Administration of the Program.

(a) Upon publication of this regulation, the Agency will begin accepting applications for and awarding technical assistance grants in consultation with the States.

(b) The Technical Assistance Grant Program will be available at an NPL site where a State response action is scheduled to begin or is underway and a CERCLA-funded cooperative or other written agreement exists between the Agency and the State.

(c) States wishing to administer the Technical Assistance Grant Program must inform the appropriate EPA Regional administrator. If a State elects to administer the program, it must do so in conformity with this regulation. Where States administer the program, EPA will have an oversight role.

(d) A State that chooses to administer the Technical Assistance Grant Program will receive technical assistance funds plus administrative costs from the Agency under a cooperative agreement. A State will receive $10,000 for administrative costs for the first technical assistance grant. For each subsequent technical assistance grant, the State will receive an amount equal to 8 percent of the technical assistance grant. Using the criteria established under this regulation, the State may select a qualified recipient and provide assistance in either of two ways:

(1) A State will pass through technical assistance funds to a recipient group by way of a subgrant, and reimburse the recipient group for its expenditures as provided at § 30.4080 of this regulation. A State that elects this option is also responsible for monitoring the subgrant to ensure that recipients comply with its terms and with 40 CFR Parts 30 and 33; or

(2) If a recipient group agrees, a State will use technical assistance grant funds to obtain the services of a technical advisor and provide those services to a grant recipient in lieu of cash. The recipient group may work closely with the State in advertising, reviewing bids and recommending a technical advisor, and managing the technical advisor. The State will make the final selection of the technical advisor. A State that elects this option becomes directly responsible for awarding the technical assistance contracts, submitting financial and progress reports, and for disbursing all technical assistance grant funds in compliance with applicable EPA regulations and requirements.

§ 35.4020 Responsibility requirements.

(a) An applicant must meet the minimum administrative and management capability requirements set forth at 40 CFR 30.301. Thus, each applicant must demonstrate that it has established reliable procedures or has plans for establishing reliable procedures for recordkeeping and financial accountability related to the management of the technical assistance grant. These procedures must be in effect before the recipient incurs any costs. If EPA concludes that the applicant is not capable of meeting the responsibility requirements, the application will be rejected.

(b) Each recipient of a technical assistance grant must be incorporated as a non-profit organization for the purpose of addressing the Superfund site for which the grant is provided in order to receive a grant. At the time of award, a recipient must either be incorporated or must demonstrate to EPA that the group has filed the necessary documents for incorporation with the appropriate State agency. No later than the time of the first request for reimbursement for costs incurred, a recipient must submit proof that the group has been incorporated by the State.

§ 35.4025 Eligible applicants.

Eligible applicants, except as provided in § 35.4030, are any group of individuals that may be affected by a release or a threatened release at any facility that (a) is listed on the National Priorities List (NPL) under the National Contingency Plan (NCP) is proposed for listing and a response action has begun.

§ 35.4030 Ineligible applicants.

(a) Groups and organizations which are ineligible to receive or to be represented in groups receiving technical assistance grants are:

(1) Potentially responsible parties (PRPs);

(2) Corporations that are not incorporated for the specific purpose of representing affected individuals at the site;

(3) Academic institutions;

(4) Political subdivisions (e.g., townships and municipalities); and

(5) Groups established and/or sustained by governmental entities (including emergency planning committees and some citizen advisory groups).

(b) This section shall not preclude any individual affected by a Superfund site from participating in a recipient group in his or her capacity as an individual.

§ 35.4035 Evaluation criteria.

EPA will award a technical assistance grant only after it has determined that all eligibility and responsibility requirements listed in §§ 35.4020, 35.4025, and 35.4030 are met, and after review of the applicant's qualifications in the narrative section of the grant application. Each applicant will be required to provide information on how it meets the eligibility criteria in the grant application. If the Agency is administering the technical assistance grant program, the "Applicant Qualifications" section is Part IV of EPA Form 5700.33, "State and Local Nonconstruction Programs." The following factors will be evaluated and weighted as indicated:

(a) The presence of an actual or potential health threat posed to group members by the site. This criterion can be met by establishing a demonstrable threat to members' health or a reasonable belief that the site poses a substantial threat to their health. (30 points);

(b) The applicant best represents groups and individuals affected by the site (20 points);

(c) The identification of how the group plans to use the services of a technical advisor throughout the Superfund response action (20 points);

(d) The demonstrated intention and ability of the applicant to inform others in the community of the information provided by the technical advisor (20 points); and

(e) The presence of an actual or potential economic threat or threat of an impaired use or enjoyment of the environment to group members that is caused by the site. This criterion can be met by establishing a demonstrable economic or environmental threat to group members or a reasonable belief that the site poses a substantial economic or environmental threat. (10 points).

§ 35.4040 Notification process.

(a) Groups wishing to apply for a technical assistance grant shall first submit a letter of intent to EPA. EPA will respond in writing to a letter of intent.

(b) Upon receipt of the first letter of intent, EPA will undertake certain activities depending on the schedule for work at the site:

(1) If commencement of the remedial investigation or a removal action is not underway or scheduled to begin, EPA will advise the group in writing that grant applications for the site are not yet being accepted. EPA may informally notify other interested groups that it has received a letter of intent; or

(2) If a response action is already underway or scheduled to begin, EPA will conduct one or more of the following activities—mailings, meetings, and public notices—to provide formal notice to other interested parties that a grant for the site soon may be awarded. These formal notification activities will generally be conducted far enough in advance of the start of the response action to allow time for groups to consolidate, apply for and receive a grant award, and procure a technical advisor before work commences at the site.

(c) Other potential applicants will have 30 days to contact the original applicant to form a coalition. If the community groups are unable to form a coalition, they must notify EPA within the 30 days. EPA will then accept separate applications from all interested groups for an additional 30-day period. EPA may consider written requests for extensions of this time. If there is a qualified applicant, a grant will be awarded from among the competing applications based on the evaluation criteria described in § 35.4035 of this regulation. The schedule for response activities at a site will not be affected by the technical assistance grant application process.

(d) A formal grant application from a group which has not first submitted a letter of intent to EPA will be considered a letter of intent for the purposes of this subsection.

§ 35.4045 Submission of application.

(a) After an applicant submits a letter of intent, it must submit to the Agency its request for a technical assistance grant on EPA Form 5700–33, "State and Local Nonconstruction Programs." Each applicant must submit the original and two copies of the application to the Agency. At least one application must have the original signature (i.e.; not a photocopy of the signature) of the Recipient's Project Manager. If the State is administering the program, an applicant must submit a request for a technical assistance grant to a State on the appropriate State form;

(b) An applicant must submit a proposed budget clearly showing the proposed expenditure of funds, how it will provide the cash and/or in-kind contributions to meet the "match" requirement, and how the funds and other resources, including the "match," will be used to complete the technical assistance grant project;

(c) An applicant must submit to the Agency or the State on the appropriate form a short narrative justification to show compliance with the evaluation criteria in § 35.4035. Instructions for filing an application with the Agency are contained in the application kit and explained in EPA's "Citizens' Guidance Manual for the Technical Assistance Grant Program." Application kits are available from EPA Regional Offices upon request.

Instructions for filing an application with a State will be provided by the State.

§ 35.4050 Timing of award.

An award of a technical assistance grant will be made no earlier than the start of the response action. Grants to qualified applicants could be delayed depending upon the availability of funds for the Superfund program.

§ 35.4055 Ineligible activities.

(a) The following activities are ineligible for assistance under this program:

(1) Litigation or underwriting legal actions such as paying for attorney fees or paying for the time of the technical advisor to assist an attorney in preparing a legal action or preparing for and serving as an expert witness at any legal proceeding;

(2) Political activity and lobbying in accordance with 40 CFR 30.601 which incorporates OMB Circular A–122;

(3) Other activities inconsistent with the cost principles stated in OMB Circular A–122, "Cost Principles for Non-Profit Organizations";

(4) Tuition or other expenses for recipient group members or technical advisors to attend training, seminars or courses;

(5) Any activities or expenditures for recipient group members' travel;

(6) Generation of new primary data such as well drilling and testing, including split sampling; and

(7) Reopening final Agency decisions or conducting disputes with the Agency.

§ 35.4060 Eligible activities.

Technical assistance grants may be used to obtain technical assistance in interpreting information with regard to the nature of the hazard, remedial investigation and feasibility study, record of decision, remedial design, selection and construction of remedial action, operation and maintenance, or a significant removal action at a facility that is (a) listed on the NPL or (b) proposed for listing and at which a response action has begun. Technical assistance grants shall be used to fund activities that will contribute to the public's ability to participate in the decisionmaking process by improving the public's understanding of overall conditions and activities.

§ 30.4065 Technical advisor's qualifications.

(a) A technical advisor must possess the following credentials:

(1) Demonstrated knowledge of hazardous or toxic waste issues;

(2) Academic training in a relevant discipline (e.g., biochemistry, toxicology, environmental sciences, engineering); and

(3) Ability to translate technical information into terms understandable to lay persons.

(b) A technical advisor should possess the following credentials:

(1) Experience working on hazardous or toxic waste problems;

(2) Experience in making technical presentations;

(3) Demonstrated writing skills; and

(4) Previous experience working with citizens' or community groups or other groups of individuals.

§ 35.4070 Sanctions.

If EPA determines that the recipient has failed to comply with any terms of the grant agreement, EPA will initiate an appropriate measure as set forth at 40 CFR Part 30, Subpart L

§ 35.4075 Pre-award costs.

(a) Grant funds may not be used to pay costs incurred prior to award of the technical assistance grant, except as provided in paragraph (b) of this section.

(b) Necessary and reasonable costs of incorporation, if incurred for the sole purpose of complying with this regulation, will be eligible pre-award costs and may be charged to the technical assistance grant or count toward the matching funds requirement described in § 35.4085(a)(2).

§ 35.4080 Method of payment.

All grant recipients shall be reimbursed for grant-related eligible, allocable, allowable, necessary, and reasonable costs up to the amount of the technical assistance grant which have been incurred and which the recipients are currently and legally obligated to pay. Recipients may submit quarterly requests for reimbursement to the Agency on SF 270—Request for Advance or Reimbursement, or the appropriate State form if the State is administering the technical assistance grant program. Costs incurred greater than $500 may be submitted monthly.

§ 35.4085 Grant limitations.

Technical assistance grants will be awarded subject to the following limitations:

(a) The recipient must contribute 35 percent of the total costs of the technical assistance grant project, except as provided in § 35.4090(b) of this regulation.

(1) Absent specific statutory authority, no Federal funds may be included in the matching share.

(2) To meet the matching funds requirement, the recipient may use cash and/or in-kind contributions.

(b) The technical assistance grant award will not exceed $50,000 for a single grant recipient, except as provided in § 35.4090(a) of this regulation.

(c) Not more than one technical assistance grant may be awarded for any eligible site.

(d) Unless a waiver is granted, the technical assistance grant award of $50,000 will cover the entire Superfund cleanup process.

(e) Costs of administering the technical assistance grant are allowable to the extent that they do not exceed 15 percent of the total project costs.

§ 35.4090 Waivers.

(a) Waivers of the $50,000 limit may be granted only in the case of a single application covering multiple sites. In order to reduce the administrative burden to a recipient, the limitation that a single recipient cannot receive more than $50,000 may be waived by the Agency where there are several eligible sites in close geographic proximity to each other (e.g., 3 sites × $50,000=grant of $150,000).

(b) Waivers of the matching funds requirement will be granted only in exceptional cases. At any point in the process, the Agency may approve a waiver when it is established that the grant recipient cannot meet the matching funds requirement. The Agency may waive all or part of the recipient's matching funds requirement only after a finding by the Agency that:

(1) There is a need for a waiver because providing the "match" would constitute an unusual financial hardship,

(2) A good faith effort at raising the "match," including obtaining in-kind services, has failed, and

(3) The waiver is necessary to facilitate public participation in the selection of remedial action at the facility.

(c) Where a recipient who has obtained a grant subsequently obtains a waiver of the matching funds requirement, the grant agreement must be amended. (See 40 CFR Part 30, Subpart G.)

(d) No waivers will be granted by the Agency once the Record of Decision (ROD) has been issued at the last operable unit at the site.

§ 35.4095 Subagreement review.

Each applicant must inform EPA of any proposed subagreement between the recipient and the technical advisor and must provide EPA the opportunity to review the subagreement before it is awarded.

§ 35.4100 Disputes.

(a) If the Agency administers the Technical Assistance Grant Program, the Agency shall review disputes between Agency officials and the applicant or recipient in accordance with its dispute resolution procedures set forth at 40 CFR Part 30, Subpart L.

(b) If the State administers the Technical Assistance Grant Program, any applicant or recipient who has been adversely affected by a State's action or omission may request Agency review of such action or omission, but must first submit a petition for review to the State agency that made the initial decision. The State must provide, in writing, normally within 45 days of the date it receives the petition, the basis for its decision regarding the disputed action or omission. The final State decision must be labeled as such and, if adverse to the applicant or recipient, must include notice of the right to request Agency review of the State decision under this section. A State's failure to address the disputed action or omission in a timely fashion, or in writing, will not preclude Agency review.

(1) Requests for Agency review must include:

(i) A copy of any written State decision.

(ii) A statement of the amount in dispute.

(iii) A description of the issues involved, and

(iv) A concise statement of the objections to the State decision.

(2) The request must be filed by registered mail, return receipt requested, within 30 days of the date of the State decision or within a reasonable time if the State fails to respond in writing to the request for review.

(c) The Agency shall determine whether the State's review is comparable to a dispute decision official's (DDO) review pursuant to 40 CFR Part 30, Subpart L. If the State's review is comparable, the Regional Administrator will conduct the Agency's review of the State's decision. If the State's review is not comparable, an Agency DDO will review the State's decision and issue a written decision. If the Agency DDO issues a decision, the applicant or recipient may request a Regional Administrator's review of the decision. The applicant or recipient may request an EPA Assistant Administrator review of a Regional Administrator's decision pursuant to Subpart L.

§ 35.4105 Audits.

(a) *Records and audit—recipient.* (1) Each recipient shall keep and preserve full written financial records accurately disclosing the amount and the disposition of any funds, whether in cash or in-kind, applied to the technical assistance grant project, and shall comply with the terms and conditions of the grant agreement.

(2) Such records shall be retained for three years from the date of the final Financial Status Report, or until any audit, litigation, cost-recovery, and/or any disputes initiated before the end of the three-year retention period are settled, whichever is longer. A recipient

must obtain EPA's prior written approval to destroy records after the record retention period.

(b) *Records and audit—contractor(s).* (1) The recipient shall require its contractor(s) to keep and preserve detailed records in connection with the subagreement, reflecting acquisitions, work progress, reports, expenditures, and commitments and indicating their relationship to established costs and schedules.

(2) The recipient shall require its contractor(s) to keep such full written financial records to adequately establish compliance with the terms and conditions of the subagreement. Such records shall be retained for three years from closeout of the subagreement, unless audit, litigation, cost-recovery, and/or any disputes are initiated before the end of the three-year retention period. The recipient shall require its contractor(s) to obtain its prior written approval before the contractor(s) destroys any records after the record retention period. The recipient shall not give such approval without first obtaining EPA's approval.

(Approved by the Office of Management and Budget under control numbers 2030–0020 and 2050 0083).

§ 35.4110 Reports.

(a) *Progress reports.* Each recipient shall submit quarterly progress reports to EPA for the technical assistance grant project 45 days after the end of each calendar quarter. Progress reports shall fully describe in chart or narrative format the progress achieved in relationship to the approved schedule, budget, and the technical assistance grant project milestones. Special problems encountered must be explained.

(b) *Financial status report.* Each recipient shall submit to EPA a financial status report annually, within 90 days after the anniversary date of the start of the technical assistance grant project, and within 90 days after the end of the grant budget period and project. A recipient shall submit to the Agency a financial status report on SF–269 or on the appropriate State form if the State is administering the Technical Assistance Grant Program.

(c) *Final report.* Each recipient shall submit to EPA a draft of the final report for review no later than 90 days prior to the end of the technical assistance grant project and a final report within 90 days of the end of the project. The report shall document technical assistance grant project activities over the entire period of grant support and shall describe the recipient's achievements with respect to stated technical assistance grant project purposes and objectives.

(Approved by the Office of Management and Budget under control numbers 2030–0020 and 2050–0083)

§ 35.4115 Availability of information.)

Each recipient shall ensure that all final written products developed by a contractor for the recipient under its grant are disseminated by providing copies of such documents to EPA for the local Superfund information repository.

§ 35.4120 Budget period.

The budget period may not exceed three years. A technical assistance grant project period may be comprised of more than one three-year budget period.

§ 35.4125 Federal facilities.

EPA will determine the eligibility of any group of individuals who may be affected by a release or a threatened release at a Federal facility for a technical assistance grant under this regulation.

§ 35.4130 Conflict of interest and disclosure requirements.

(a) The recipient shall require each prospective contractor on any subagreement to provide, with its bid or proposal:

(1) Information on its financial and business relationship with all PRPs at the site, and with their parent companies, subsidiaries, affiliates, subcontractors, and current clients or attorneys and agents (this disclosure requirement encompasses past and anticipated financial and business relationships, including services related to any proposed or pending litigation, with such parties);

(2) Certification that, to the best of its knowledge and belief, it has disclosed such information or no such information exists; and

(3) A statement that it shall disclose immediately any such information discovered after submission of its bid or proposal or after award. The recipient shall evaluate such information and shall exclude any prospective contractor if the recipient determines the prospective contractor's conflict of interest is significant and cannot be avoided or otherwise resolved.

(b) Contractors and subcontractors may not be technical advisors to recipient groups at the same NPL site for which they are doing work for the Federal or State government or any other entity.

BILLING CODE 6560-50-M

ENVIRONMENTAL PROTECTION AGENCY

Office of Solid Waste and Emergency Response

40 CFR Ch. I

[FRL 3307–1]

Technical Assistance Grant Program Administrative Services Contractor

AGENCY: Environmental Protection Agency (EPA).

ACTION: Advance notice of rulemaking; request for comments.

SUMMARY: Elsewhere in today's Federal Register, the Environmental Protection Agency (EPA) is publishing the Interim Final Rule (IFR) for the Superfund Technical Assistance Grant Program. This Advance Notice of Rulemaking (ANRM) solicits comments regarding a proposal to provide technical assistance grant applicants and recipients with the services of an Administrative Services Contractor (ASC). These services could include both assistance in preparing grant applications and the procurement of technical assistance, and contract management. To implement the ASC, EPA would acquire contractors on a State, Regional, or National basis to provide services to grant recipients in lieu of cash. The ASC concept is based on EPA's desire to make the Technical Assistance Grant Program easier for groups to use and for EPA to administer.

DATE: Written comments must be received on or before April 25, 1988.

ADDRESSES: Comments: Written comments must be submitted to: Superfund Docket Clerk, Office of Emergency and Remedial Response (WH–548D), Room LG–100; U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20450. Comments on today's ANRM must identify the document as follows: "Docket CERCLA 117(e), Technical Assistance Grant Program Administrative Services Contractor." Copies of materials relevant to this ANRM are contained in the Superfund docket located in the Lower Garage (Room LG–100) at the U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. The docket is available for inspection between the hours of 9:00 a.m. and 4:00 p.m. Monday through Friday, excluding Federal holidays, by appointment only. The docket phone number in Washington, DC is (202) 382–3046. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

FOR FURTHER INFORMATION CONTACT: Daphne D. Gemmill, Office of Emergency and Remedial Response, WH–548E, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460 at (202) 382–2460 or the RCRA/Superfund Hotline from 9:00 a.m. to 4:30 p.m., Monday–Friday, toll free at 1–(800)–424–9436 or in Washington, DC at 382–3000.

SUPPLEMENTARY INFORMATION: Today's ANRM hs the following sections:

I. Introduction
II. Discussion of the ASC Concept
III. Benefits of the ASC
IV. Request for Comments

I. Introduction

Section 117(e) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended, 42 U.S.C. 9617(e), authorizes the President to make available technical assistance grants of up to $50,000 to groups of individuals to obtain assistance in interpreting technical material related to cleanups at Superfund sites. Section 117(e) requires the President to promulgate rules for issuing these technical assistance grants before processing any grant applications. Executive Order No. 12580 delegated to EPA the authority to develop the Interim Final Rule (IFR) published elsewhere in today's Federal Register and award these technical assistance grants.

This ANRM is being published today to solicit comments on EPA providing technical assistance grant applicants and recipients with the services of an ASC. These comments will be considered in developing the Final Rule for the Technical Assistance Grant Program and in determining whether to include the ASC approach in that Final Rule.

II. Discussion of the ASC Concept

EPA recognizes that technical assistance grant applicants and recipients may have little experience in applying for Federal grants or meeting the various recordkeeping, accounting, and contracting, and other requirements established in the EPA grant and procurement under assistance agreement regulations codified at 40 CFR Parts 30 and 33. The IFR published elsewhere in today's Federal Register ensures, as it must, that technical assistance grants will go only to citizens' groups that can and will comply with those regulations. However, EPA recognizes that technical assistance grant recipients may have to devote some of their limited resources to managing the grants in compliance with EPA regulations, rather than focusing on using the technical assistance grant for interpreting site-related documents. It also recognizes that there may be other citizens' groups with the potential ability to use technical assistance grants very productively, but who are precluded from receiving technical assistance grants by their inability to meet EPA's responsibility requirements for administrative and financial management of the grant.

An ASC could benefit such citizens' groups by offering assistance to grant applicants in completing all of the forms, by procuring technical assistance for grant recipients, and by assuming responsibility for managing and disbursing all Federal funds in compliance with EPA regulations. This would leave technical assistance grant recipients free to devote their time to making the most effective use of the technical assistance itself.

EPA also recognizes that administering the Technical Assistance Grant Program may place heavy demands on the resources of the lead agency (i.e., EPA or the State agency administering the technical assistance grant program). For every technical assistance grant, the lead agency must screen applicants, select a grant recipient, negotiate a grant agreement, and monitor the grant recipient's management of the technical assistance grant for compliance with the grant agreement itself and with EPA's grant and procurement under assistance agreement regulations. An ASC that contractually assumed responsibility for ensuring that all Federal funds were used in compliance with the technical assistance grant agreement and with applicable EPA regulations could reduce the lead agency's workload in fulfilling its oversight responsibilities.

In addition, some technical assistance grant applicants may be unfamiliar with the EPA grant process. If such citizens' groups have questions and difficulties while preparing their applications, they may ultimately look to the lead agency for information, advice, or assistance. An ASC whose services were available to grant applicants could reduce the lead agency's workload, both directly, by helping applicants who would otherwise seek help from the lead agency, and indirectly, by facilitating the submission of more accurate and informative applications.

EPA, therefore, is considering establishing one or more ASC(s) either on a State, Regional, or National basis, to provide services to grant applicants and recipients. The contractor(s) would procure such technical services and disburse funds as needed to pay for them. The ASC would also assume full responsibility for ensuring (1) that the services provided in the technical assistance grant award are delivered in a timely and effective manner, and (2) that all funds are managed and disbursed in full compliance with appropriate EPA regulations. The ASC would be subject to audit and liable for any costs disallowed as a result of an audit. The ASC would also be responsible for ensuring that use of the funds was consistent with each site budget and scope of work.

The ASC would not, however, play any role in deciding which citizens' group receives the technical assistance. Nor would it participate in determining the amount of technical assistance a grant recipient would receive. In addition, the grant recipient, and not the ASC, must provide the "match" of 35 percent.

After a technical assistance grant is awarded to a group of individuals, the grant recipient could consult with the ASC and help it to develop a request for proposal (RFP) for use in procuring a technical advisor. The grant recipient could also assist the ASC in reviewing bids received from prospective technical advisors. The grant recipient could then recommend a choice of technical advisor, but could not make the formal selection of the advisor. As the contractor for the project, the ASC would have the ultimate responsibility for selecting and contracting with all subcontractors, including the technical advisor, in accordance with EPA procurement regulations.

Thus, the community group would receive the full benefits of the technical assistance, while the ASC would be responsible for manageing and disbursing EPA funds in compliance with appropriate regulations and recordkeeping requirements. To ensure this, EPA's contract with the ASC would specify that the ASC was to provide the recipient group with the full amount of technical assistance specified in the grant agreement. Thus, if a technical assistance grant were awarded for $20,000, the grant recipient could receive $20,000 worth of technical assistance services, while EPA itself would fund, through the contract with the ASC, the costs of the ASC's services.

The following depicts one model for how this process could flow:

1. ASC is selected.
2. ASC provides information and assistance to citizens' groups applying for technical assistance grants.
3. Citizens' groups submit applications to lead agency.
4. Lead agency awards technical assistance grant to citizen's group.
5. Grant recipient assists ASC in developing the scope of work for the technical advisor.
6. ASC solicits subcontractors.
7. Grant recipient recommends to the ASC the selection of the subcontractor.
8. ASC selects subcontractor, negotiates and manages subcontract which specifies that the technical advisor will provide information and meet with the recipient as appropriate, and receives information concerning site from technical advisor.
9. Grant recipient receives reports directly from the technical advisor, consults with ASC, and recommends contract changes as appropriate.
10. ASC makes contract changes, as needed, and monitors contract to ensure technical advisor compliance;
11. ASC keeps records and reports to the lead agency.

III. Benefits of the ASC

The most obvious benefit of the ASC concept is that it permits citizens' groups to receive technical assistance without the administrative burden of managing and disbursing grant funds in compliance with EPA regulations. The ASC can benefit citizens' groups by providing a wide range of services and assistance which would not otherwise be available. An ASC can offer information and assistance to citizens' groups interested in applying for technical assistance grants. After the technical assistance grant has been awarded, the ASC, with assistance from the grant recipient, can identify precisely what services are needed at a site, and what contractors are capable of providing those services. In addition, the ASC can develop requests for proposal to provide those services. The technical assistance grant recipient can then review the proposals and recommend a technical advisor. The ASC will select and contract with the advisor, oversee the technical advisor's performance to ensure compliance with the terms of the contrct, manage and disburse funds to pay for the goods and services received, and prepare and ratain financial reports and records. Finally, it would be the ASC, rather than the citizens' groups, who would be accountable for compliance with applicable Federal procurement, and financial management requirements.

Conversely, if there is no ASC, technical assistance grant applicants who need assistance will have to rely on the lead agency for help. After the technical assistance grant is awarded, grant recipients will be responsible for identifying what technical services are needed, obtaining information regarding which contractors are available to provide those services, and developing requests for proposals. The grant recipient will be responsible for soliciting and evaluating responses to its request for proposal, selecting and negotiating a contract with the technical advisor, and monitoring the technical advisor's performance to ensure compliance with the contract. In addition, the grant recipient will be responsible for sound financial management involving the disbursement of funds and preparing financial reports. Finally, the grant recipient will be responsible for complying with all applicable Federal regulations and requirements in performing these tasks.

IV. Requests for Comments

Today, EPA solicits comments on the ASC concept. It frankly notes that this plan involves a number of trade-offs. On the one hand, grant recipients are freed from responsibility for securing the technical advisor and managing and disbursing grant funds in compliance with EPA grant and procurement under assistance agreement regulations and the recordkeeping and management responsibilities those regulations entail. On the other hand, although grant recipients can recommend the selection of a technical advisor, contract law requires that, as the contractor, the ASC must select subcontractors, including the technical advisor. EPA is interested in determining whether citizens' groups would be willing to exchange ultimate control over the selection of a technical advisor for the range of services and expertise an ASC can provide.

In addition, the ASC would oversee delivery of all technical assistance services and grant recipients would have an advisory role in managing the technical assistance grant. This might limit some opportunities grant recipients would otherwise have to contribute in-kind services to meet the 35 percent matching funds requirement. EPA invites comments on whether this would significantly affect a citizens' group's ability to meet the "match" and, if so, how EPA could treat the "match" requirement if it adopts some form of the ASC proposal.

EPA notes that the ASC concept is feasible only if it provides a cost-effective method of both assisting grant recipients and reducing the administrative burdens of the lead agency. Thus, a sufficient number of grant recipients would have to use the ASC to reduce EPA's administrative burden as well as to justify the expense in establishing such a system. EPA,

therefore, requests comments on whether citizens' groups would utilize the services of an ASC if they were available. In addition, EPA solicits comments on whether grant recipients should be required to utilize the services of the ASC as a condition of receiving their technical assistance grants.

EPA also solicits comments on whether the ASC should provide assistance only to those selected as grant recipients or should instead be available to assist all applicants. If it should assist applicants, EPA requests comments on how far the ASC should go beyond simply providing information and assistance as requested. EPA notes that any role that puts the ASC in the position of appearing to provide more assistance to one applicant than it provides to a competing applicant may be inappropriate. Such an arrangement could raise questions of favoritism and could make it difficult for the ASC to work productively with a grant recipient that believed the ASC had provided undue help to a competing applicant.

EPA also desires public comments on whether an ASC should be chosen on a State, Regional, or National basis. A single National contract may be easier and quicker to award than a series of Regional ones: typically, a Regional contract is easier and quicker to award than passing money to the States who, in turn, contract for such services. Citizens' groups may, however, perceive a State contractor to be more readily available and responsive than a National contractor. A way to incorporate the advantages of the two approaches may be to have a more distant contractor establish a toll-free number and to be available for at least one site meeting with each grant recipient; should it prove necessary, the ASC also could be available to meet once with an applicant group.

Finally, EPA desires public comment on whether EPA or the State, if they are administering the Technical Assistance Grant Program for a site, should be responsible for providing the ASC for that site. This would lead to the establishment of separate State and EPA ASC's in some States. EPA requests comments as to whether such an arrangement would be cost-effective or whether it would be confusing to the public.

Dated: March 18, 1988.

Lee M. Thomas,

Administrator.

ENVIRONMENTAL PROTECTION AGENCY

Office of Solid Waste and Emergency Response

[FRL-3354-7]

Financial Assistance Program Eligible for Review Under 40 CFR Part 29; Superfund Site Cleanups

AGENCY: Environmental Protection Agency.

ACTION: Notice of Availability and Review.

SUMMARY: Pursuant to section 117(e) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended, 42 U.S.C. 9617(e), the Environmental Protection Agency (EPA or the Agency) is announcing the availability of a new financial assistance program, the "Technical Assistance Grant Program" (Catalog of Federal Domestic Assistance Number 66.807). This program will make technical assistance grants (TAGs) of up to $50,000 available to groups of individuals to obtain assistance in interpreting information related to cleanups at Superfund sites. Funds are available starting in fiscal year (FY) 1988 for technical assistance grants to citizens' groups.

DATE: States choosing to include this program in their intergovernmental review process must notify EPA on or before April 25, 1988.

FOR FURTHER INFORMATION CONTACT: Daphne D. Gemmill, Office of Emergency and Remedial Response, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382-2460.

SUPPLEMENTARY INFORMATION: Section 117(e) of CERCLA authorizes the President to make available technical assistance grants of up to $50,000 to groups of individuals to obtain assistance in interpreting information related to cleanups at Superfund sites. Section 117(e) requires the President to promulgate rules for issuing these grants before processing any grant applications. Executive Order (E.O.) No. 12580 delegated to EPA the authority to implement section 117(e) in consultation with the Attorney General.

Under the authority of section 117(e) of CERCLA, EPA will award grants to any group of individuals that may be affected by a release or a threatened release at any facility that (a) is listed on the National Priorities List (NPL) under the National Contingency Plan (NCP) or (b) is proposed for listing and a response action has begun.

The Technical Assistance Grant Program is eligible for intergovernmental review under E.O. No. 12372, "Intergovernmental Review of Federal Programs," issued July 14, 1982, as amended; section 401 of the Intergovernmental Cooperation Act of 1968, as amended; and section 204 of the Demonstration Cities and Metropolitan Development Act of 1966, as amended. States must notify the following office in writing within 30 days of this publication whether their State's official E.O. No. 12372 process will review applications in this program: Grants Policy and Procedures Branch, Grants Administration Division (PM-216F), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Applicants for technical assistance grants must contact their State's Single Point of Contact (SPOC) for intergovernmental review as early as possible to determine if the Technical Assistance Grant Program is subject to the State's official E.O. 12372 review process and what material must be submitted to the SPOC for review. In addition, applications that include activities to be implemented within a metropolitan area must be sent for review to the areawide/Regional/local planning agency designated to perform metropolitan or Regional planning for the area.

SPOCs and other reviewers should send their comments on an application to the appropriate EPA Regional Office no later than sixty days after receiving the technical assistance grant application or other material required for review.

Applications for technical assistance grants will undergo administrative review for adequacy, content, completeness, and other criteria set by EPA. The EPA Regional Offices will have both award and approval authority.

Dated: March 21, 1988.

J.W. McGraw,

Acting Assistant Administrator for Solid Waste and Emergency Response.

Part IV

Department of Transportation

Federal Aviation Administration

14 CFR Parts 71 and 91

Transponder with Automatic Altitude Reporting Capability Requirement and Controlled Airspace Common Floor; Notice of Proposed Rulemaking; Extension of Comment Period

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 71 and 91

[Docket No. 25531; Notice No. 88-2]

Transponder with Automatic Altitude Reporting Capability Requirement and Controlled Airspace Common Floor

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM); extension of comment period.

SUMMARY: On February 12, 1988, the FAA published Notice No. 88-2 which proposes to require that all aircraft be equipped with a transponder and automatic altitude reporting equipment (Mode C transponder) when operating in terminal airspace where air traffic control (ATC) radar service is provided, and when operating at and above 6,000 feet above the surface in controlled airspace, and proposes to establish a common floor for controlled airspace over the U.S. This notice announces an extension of the comment period of the NPRM (Notice No. 88-2) for an additional 45 days.

DATE: Comments must be received on or before May 12, 1988.

ADDRESSES: Mail comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGD-204) (Docket No. 25531), 800 Independence Avenue SW., Washington, DC 20591.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Reginald C. Matthews, Air Traffic Rules Branch, ATO-230, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591, telephone (202) 267-9245.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in these proposed rulemaking procedures by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address above. All communications received on or before the closing date for comments will be considered by the Administrator before taking further rulemaking action. Persons wishing the FAA to acknowledge receipt of these comments submitted in response to this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 25531." The postcard will be date/time stamped and returned to the commenter. The proposals contained in this notice may be changed in light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Office of Public Affairs, Attention: Public Inquiry Center, APA-200, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267-3484. Communications must identify the notice number of this NPRM.

Persons interested in being placed on a mailing list for future notices should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

Background

Docket No. 25531 published on February 12, 1988 (53 FR 4306) proposed to require a Mode C transponder on all aircraft operating within 40 miles of an airport for which terminal radar approach control service was established, and on all aircraft operating in controlled airspace at or above 6,000 feet above the surface or 12,500 feet mean sea level (MSL) whichever is lower. Additionally, Docket No. 25531 contained a proposal to replace the Continental Control Area with the U.S. Control Area and described this new area as the airspace beginning at or below the level established for the use of Mode C transponders over the U.S. which includes the 50 States, the District of Columbia, Puerto Rico, and the possessions, including the territorial waters.

The Experimental Aircraft Association (EAA) and the Aircraft Owners and Pilots Association have requested that the comment period be extended from 45 days to as long as 120 days to enable those persons impacted by the proposal to obtain knowledge of the proposal and formulate meaningful comments. The FAA has received similar requests from a number of other commentors, including members of Congress. The FAA is aware that many general aviation pilots and others associated with the aviation industry receive notification of proposed rulemaking actions only through user organizations. In addition, it is apparent from many of the comments already received that this rulemaking involves complex issues with a broad impact on the flying public. For the above reasons, I believe that an extension of the comment period is necessary in order to guarantee that all interested parties, including pilots and aircraft owners who receive notification of proposals primarily through user organizations, will have an opportunity to respond to the NPRM. Accordingly, I have decided to extend the comment period for this rulemaking. The Department of Transportation concurs with this decision.

EAA and various other commentors who have already responded to the notice have requested extension periods of up to 75 additional days. Due to the statutory requirement to issue a final rule by June 30, 1988, however, an extension of the original comment period beyond an additional 45 days is not feasible. A comment period of 90 days will be sufficient for the agency to receive informed and representative comments from the public and to reach a timely final rule action.

For the reasons stated, I am extending the comment period on Docket No. 25531 to May 12, 1988, to allow for a 90-day comment period instead of the original 45-day comment period.

Issued in Washington, DC, on March 21, 1988.

T. Allan McArtor,

Administrator.

Briefings on How To Use the Federal Register—
For information on briefings in Washington, DC and Boston, MA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the Federal Register.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 15; at 9:00 a.m.
WHERE: Office of the Federal Register,
First Floor Conference Room,
1100 L Street NW., Washington, DC
RESERVATIONS: Carolyn Payne, 202-523-3187

BOSTON, MA

WHEN: April 19; at 9 a.m.
WHERE: Thomas P. O'Neill, Jr. Federal Building,
Auditorium,
10 Causeway Street,
Boston, MA.
RESERVATIONS: Call the Boston Federal Information Center, 617-565-8123

Rules and Regulations

Federal Register
Vol. 53, No. 58
Friday, March 25, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 910

[Lemon Regulation 606]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 606 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 315,000 cartons during the period March 27 through April 2, 1988. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulation 606 (§ 910.906) is effective for the period March 27 through April 2, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

This regulation is issued under Marketing Order No. 910, as amended (7 CFR Part 910) regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601–674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1987–88. The committee met publicly on March 22, 1988, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended, by a 12-1 vote, a quantity of lemons deemed advisable to be handled during the specified week. The committee reports that the market for lemons is good.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

For the reasons set forth in the preamble, 7 CFR Part 910 is amended as follows:

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR Part 910 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 910.906 is revised to read as follows:

Note.—This section will not appear in the Code of Federal Regulations.

§ 910.906 Lemon Regulation 606

The quantity of lemons grown in California and Arizona which may be handled during the period March 27, 1988, through April 2, 1988, is established at 315,000 cartons.

Dated: March 23, 1988.

Charles R. Brader,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 88–6096 Filed 3–24–88; 8:45 am]

BILLING CODE 3410-02-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1216

Environmental Quality

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: NASA is amending 14 CFR Part 1216, "Environmental Quality," by revising NASA organizational titles and making certain technical corrections throughout this regulation. Subpart 1216.1 establishes NASA policy on environmental quality and control and the responsibilities of NASA officials in carrying out these policies; Subpart 1216.2 prescribes procedures for floodplain and wetlands management; and Subpart 1216.3 sets forth NASA procedures for implementing provisions of the National Environmental Policy Act (NEPA).

EFFECTIVE DATE: March 25, 1988.

ADDRESS: Facilities Management Office, Code NX, National Aeronautics and Space Administration, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: G. Ted Ankrum, (202) 453–1865.

SUPPLEMENTARY INFORMATION: NASA organizational titles and changes in technical designations are being corrected in the following sections: 1216.103, 1216.202, 1216.204, 1216.205, 1216.301, 1216.302, 1216.303, 1216.304, 1216.305, 1216.306, 1216.308, 1216.309, 1216.310, 1216.311, 1216.313, 1216.315, 1216.316, 1216.318, 1216.319, 1216.320, and 1216.321. Since these changes are internal and administrative in nature and do not affect the existing regulations, notice and public comment are not required.

The National Aeronautics and Space Administration has determined that:

1. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601–612, since it will not exert a significant economic impact on a substantial number of entities.

2. This rule is not a major rule as defined in Executive Order 12291.

List of Subjects in 14 CFR Part 1216

Environmental impact statements, Floodplains, Wetlands.

For reasons set out in the Preamble, 14 CFR Part 1216 is amended as follows:

PART 1216—ENVIRONMENTAL QUALITY

1. The authority citation for 14 CFR Part 1216 following the table of contents is removed.

Subparts 1216.1 and 1216.3—[Amended]

2. The authority citation for 14 CFR Part 1216 Subparts 1216.1 and 1216.3 is added to read as follows:

Authority: The National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2451 *et seq.*); the National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*); the Environmental Quality Improvement Act of 1970, as amended (42 U.S.C. 4371 *et seq.*); sec. 309 the Clean Air Act, as amended (42 U.S.C. 7609); E.O. 11514 (Mar. 5, 1970, as amended by E.O. 11991, May 24, 1977); the Council on Environmental Quality NEPA Regulations (40 CFR Part 1500–1508); and E.O. 12114, Jan. 4, 1979 (44 FR 1957).

Subparts 1216.2—[Amended]

2. The authority citation for 14 CFR Part 1216 Subpart 1216.2 is added to read as follows:

Authority: E.O. 11988 and E.O. 11990, as amended; 42 U.S.C. 2473(c)(1).

3. Section 1216.103 is amended by revising the introductory text of paragraph (a), and paragraph (b)(2) and (3), and (c)(2) to read as follows:

§ 1216.103 Responsibilities of NASA officials.

(a) The Associate Administrator for Management or designee shall: * * *

(b) * * *

(2) Coordinating environmental quality-related activities under their cognizance with the Associate Administrator for Management; and

(3) Supporting and assisting the Associate Administrator for Management on request.

(c) * * *

(2) In coordination with the Associate Administrator for Management, making available to other parties, both governmental and nongovernmental, advice and information useful in protecting and enhancing the quality of the environment.

* * * * *

4. Section 1216.202 is revised to read as follows:

§ 1216.202 Responsibility of NASA officials.

(a) Directors of Field Installations and, as appropriate, the Associate Administrator for Management at NASA Headquarters, are responsible for implementing the requirements and procedures prescribed in § 1216.204 and § 1216.205.

(b) The Assistant Associate Administrator for Facilities Management, NASA Headquarters, is responsible for overall coordination of floodplain and wetlands management activities, and for conducting periodic on-site reviews of each installation's floodplain and wetlands management activities to assure compliance with the Executive Orders.

5. Section 1216.204(a), (e)(2) and (f) are revised to read as follows:

§ 1216.204 General implementation requirements.

(a) Each NASA field installation shall prepare, if not already available, an installation base floodplain map based on the latest information and advice of the appropriate District Engineer, Corps of Engineers, or, as appropriate, the Director of the Federal Emergency Management Agency. The map shall delineate the limits of both the 100-year and 500-year floodplains. A copy of the map, approved by the Field Installation Director, will be provided to the Assistant Associate Administrator for Facilities Management, NASA Headquarters, by February 28, 1979. The map will conform to the definitions and requirements specified in the Floodplain Management Guidelines for Implementing Executive Order 11988.

* * * * *

(e) * * *

(2) Submit evidence of the successful completion of this consultation to the Assistant Associate Administrator for Facilities Management, NASA Headquarters, prior to the start of project construction.

(f) If NASA property used or visited by the general public is located in an identified flood hazard area, the installation shall provide on structures, in this area and other places where appropriate (such as where roads enter the flood hazard area), conspicuous delineation of the 100-year and 500-year flood levels, flood of record, and probable flood height in order to enhance public awareness of flood hazards. In addition, field installations shall review their storm control and disaster plans to assure that adequate provision is made to warn and evacuate the general public as well as employees. These plans will include the integration of adequate warning time into such plans. The results of this review shall be submitted to the Assistant Associate Administrator for Facilities Management, NASA Headquarters, by February 28, 1979.

* * * * *

6. Section 1216.205 is amended by revising paragraph (b)(9) to read as follows:

§ 1216.205 Procedures for evaluating NASA actions impacting floodplains and wetlands.

* * * * *

(b) * * *

(9) In accordance with § 1216.202(b), the Assistant Associate Administrator for Facilities Management, NASA Headquarters, will conduct periodic on-site reviews to assure that the action is carried out in accordance with the stated findings and plans for the proposed action, in compliance with the Executive Orders.

7. Section 1216.301 is amended by revising paragraph (b) to read as follows:

§ 1216.301 Applicability.

* * * * *

(b) The procedures established by this subpart apply to all NASA actions which may have an impact on the quality of the environment. These actions may fall within any of the four NASA budget categories: Research and Development (R&D), Construction of Facilities (CoF), Research and Program Management (R&PM), and Space Flight Control and Data Communications (SFCDC), or, if not involving budget authority or other congressional approval, may be separate from the categories.

8. Section 1216.302 is amended by revising paragraph (a) introductory text and adding paragraphs (a)(4) and (f) as follows:

§ 1216.302 Definition of key terms.

* * * * *

(a) *Budget line items.* The individual items in the annual NASA authorization legislation which are used here to classify the range of NASA actions. The four main budget line items are:

* * * * *

(4) *Space Flight, Control and Data Communications (SFCDC).* Has similar scope to R&D but covers activities which are primarily of a production and operational nature related to space flight. The content includes the national fleet of Space Shuttle orbiters, including main engines, launch site and mission operations, initial spares, production tooling and supporting activities, launch operations and tracking and data acquisition.

* * * * *

(f) *SFCDC project.* R&D type projects authorized under the SFCDC budget line item.

9. Section 1216.303 is amended by revising the introductory text of paragraph (a) and paragraph (c) to read as follows:

§ 1216.303 Responsibilities of NASA officials.

(a) The Associate Administrator for Management or designee, who is responsible for developing the procedures of this subpart and for ensuring that environmental factors are properly considered in all NASA planning and decisionmaking, shall:

* * * * *

(c) The Assistant Administrator for Congressional Relations Office is responsible for ensuring the legislative environmental impact statements accompany NASA recommendations or reports on proposals for legislation submitted to Congress. The Associate Administrator for Management, the NASA Comptroller, and the General Counsel will provide guidance as required.

10. Section 1216.304 is amended by revising the introductory text and paragraphs (a)(1) and (b)(1) as follows:

§ 1216.304 Major decision points.

The possible environmental effects of a proposed action must be considered, along with technical, economic, and other factors, in the earliest planning. At that stage, the responsible Headquarters official shall begin the necessary steps to comply with all the requirements of section 102(2) of the National Environmental Policy Act of 1969. Major NASA activities, particularly R&D (or SFCDC) and facility projects, generally have four distinct phases: The conceptual study phase; the detailed planning/definition phase; the development/construction phase; and the operation phase. (Other NASA activities have fewer, less well-defined phases, but can still be characterized by phases representing general or feasibility study, detailed planning or definition, and implementation.) Environmental documentation shall be linked to major decision points as follows:

(a) * * *

(1) Proposal of an R&D (or SFCDC) project for detailed planning and project definition;

(b) * * *

(1) Proposal of an R&D (or SFCDC) project for development/construction;

* * * * *

11. Section 1216.305 is amended by revising paragraphs (d)(1), (d)(4), and (d)(5) as follows:

§ 1216.305 Criteria for actions requiring environmental assessments.

* * * * *

(d) * * *

(1) R&D (or SFCDC) activities in space science (e.g., Physics and Astronomy Research and Analysis, Planetary Exploration Mission Operations and Data Analysis) other than specific spacecraft development and flight projects.

* * * * *

(4) R&D (or SFCDC) activities in space transportation systems engineering and scientific and technical support operations, routine transportation operations, and advanced studies.

* * * * *

(5) R&D (or SFCDC) activities in space tracking and data systems.

* * * * *

12. Section 1216.306 is amended by revising paragraphs (a), (b), and (c) to read as follows:

§ 1216.306 Preparation of environmental assessments.

(a) For each NASA action meeting the criteria of 14 CFR 1216.305(b) and for other actions as required, the responsible Headquarters official shall prepare an environmental assessment (40 CFR 1501.3 and 1508.9 of the CEQ Regulations) and, on the basis of that assessment, determine if an EIS is required; except where action meeting the criteria is strictly of a local nature under the purview of the Field Installation Director.

(b) If the determination is that no environmental impact statement is required, the Headquarters official or Field Installation Director, shall, in coordination with the Associate Administrator for Management, prepare a "Finding of No Significant Impact." (See 40 CFR 1508.13 of the CEQ Regulations.) The "Finding of No Significant Impact" shall be made available to the affected public through direct distribution and publication in the **Federal Register**, or coordinated with the State Single Point of Contact pursuant to E.O. 12372, as amended, "Intergovernmental Review of Federal Programs," as appropriate.

(c) If the determination is that an environmental impact statement is required, the Headquarters official shall proceed with the "notice of intent to prepare an EIS" (see 40 CFR 1508.22 of the CEQ Regulations). The Headquarters official shall transmit this notice to the Associate Administrator for Management for review and subsequent publication in the **Federal Register** (see 40 CFR 1507.3(e) of the CEQ Regulations). The Headquarters official shall then apply procedures set forth in 14 CFR 1216.307 to determine the scope of the EIS and proceed to prepare and release the environmental statement in accordance with the CEQ Regulations and the procedures of this subpart.

* * * * *

13. Section 1216.308 is amended by revising paragraphs (a) and (b) to read as follows:

§ 1216.308 Preparation of draft statement.

(a) The responsible Headquarters official shall prepare the draft environmental impact statement in the manner provided in 40 CFR Part 1502 of the CEQ Regulations and shall submit the draft statement and any attachments to the Associate Administrator for Management for NASA review prior to any formal review outside NASA. This submission shall be accompanied by a list of Federal, State, and local officials (40 CFR Part 1503 of the CEQ Regulations) and a list of other interested parties (40 CFR 1506.6 of the CEQ Regulations) from whom comments should be requested.

(b) After the NASA review is completed, the Associate Administrator for Management shall submit the approved draft statement to the Environmental Protection Agency (EPA), Office of Federal Activities, and shall seek the views of appropriate agencies and individuals in accordance with 40 CFR Part 1503 and § 1506.6 of the CEQ Regulations.

* * * * *

14. Section 1216.309 is revised to read as follows:

§ 1216.309 Public involvement.

(a) Interested persons can get information on NASA environmental impact statements and other aspects of NASA's NEPA process by contacting the Assistant Associate Administrator for Facilities Management, Code NX, NASA Headquarters, Washington, DC 20546, 202–453–1965. Pertinent information regarding any aspect of the NEPA process may also be mailed to the above address.

(b) Responsible Headquarters officials and NASA Field Installation Directors shall identify those persons, community organizations, and environmental interest groups who may be interested or affected by the proposed NASA action and who should be involved in the NEPA process. They shall submit a list of such persons and organizations to the Associate Administrator for Management at the same time they submit:

(1) A recommendation regarding a "Finding of No Significant Impact,"

(2) A "Notice of Intent to Prepare an EIS,"

(3) A recommendation for public hearings,

(4) A preliminary draft EIS,

(5) A preliminary final EIS,

(6) Other preliminary environmental documents (14 CFR 1216.321(d)).

(c) The Associate Administrator for Management may modify such lists referred to in paragraph (b) of this section as appropriate to ensure that NASA shall comply, to the fullest extent practicable, with 40 CFR 1506.6 of the CEQ Regulations and § 2–4(d) of Executive Order 12114.

(d) The decision whether to hold public hearings shall be made by the Associate Administrator for Management in consultation with the General Counsel.

15. Section 1216.310 is amended by revising paragraph (a) to read as follows:

§ 1216.310 Preparation of final statements.

(a) After conclusion of the review process with other Federal, State, and local agencies and the public, the responsible Headquarters official shall consider all suggestions, revise the statement as appropriate, and forward the proposed final statement to the Associate Administrator for Management. The Associate Administrator for Management shall submit the approved final statement to the EPA Office of Federal Activities, to all parties who commented, and to other interested parties in accordance with CEQ Regulations.

* * * * *

16. Section 1216.311 is revised to read as follows:

§ 1216.311 Record of the decision.

At the time of the decision on the proposed action, the originating Headquarters official shall consult with the Associate Administrator for Management and prepare a concise public record of the decision. (See 40 CFR 1505.2 of the CEQ Regulations.)

17. Section 1216.313 is amended by revising paragraph (b) and designating the text following paragraph (b) as paragraph (c) and revising it to read as follows:

§ 1216.313 Implementing and monitoring the decision.

* * * * *

(b) The responsible Headquarters official shall, as necessary, conduct the required monitoring and shall provide periodic reports as required by the Associate Administrator for Management.

(c) If the monitoring activity indicates that resulting environmental effects differ from those described in the current documents, the Headquarters official shall reassess the environmental impact and consult with the Associate Administrator for Management to determine the need for additional mitigation measures and whether to prepare a supplement to the EIS (see 40 CFR 1502.9 of the CEQ Regulations).

18. Sections 1216.315 and 1216.316 are revised to read as follows:

§ 1216.315 Processing legislative environmental impact statements.

(a) Preparation of a legislative environmental impact statement shall conform to the requirements of 40 CFR 1506.8 of the CEQ Regulations. The responsible Headquarters official, in coordination with the Associate Administrator for Management, shall identify those NASA recommendations or reports on legislation that would require preparation of environmental impact statements in accordance with criteria set forth in 14 CFR 1216.305.

(b) For the purposes of this provision, "legislation" not only excludes requests for appropriations (40 CFR 1508.17 of the CEQ Regulations), but also excludes the annual authorization bill submitted to the Congress.

§ 1216.316 Cooperating with other agencies and individuals.

(a) The Associate Administrator for Management, in coordination with the Associate Administrator for External Relations, shall ensure that NASA officials have an opportunity to cooperate with other agencies and individuals. He/she shall keep abreast of the activities of Federal, state, and local agencies, particularly activities in which NASA has expertise or jurisdiction by law (see 40 CFR 1508.15 of the CEQ Regulations). He/she shall inform the responsible Headquarters official of the need for cooperation as necessary.

(b) At the request of the Associate Administrator for Management, Headquarters officials shall initiate discussions with another Federal agency concerning those activities which may be the subject of that agency's EIS on which NASA proposes to comment.

(c) At the request of the Associate Administrator for Management, the responsible Headquarters official shall, in the interest of eliminating duplication, prepare joint analyses, assessments, and statements with state and local agencies. These joint environmental documents shall conform with the requirements of these procedures and overall NASA policy.

(d) Because of the uniqueness of the NASA's aerospace activities, it is unlikely that NASA will have the opportunity to "adopt" environmental statements prepared by other agencies (40 CFR 1506.3 of the CEQ Regulations). However, should the responsible NASA offical wish to adopt a Federal draft or final environmental impact statement or portion thereof, he/she shall consult with the Associate Administrator for Management to determine whether that statement meets NASA requirements.

(e) From time to time, there may be disagreements between NASA and other Federal agencies regarding which agency has primary responsibility to prepare an environmental impact statement in which both parties are involved. The Headquarters official with primary responsibility for the activity in question shall consult with the Associate Administrator for Management to resolve such questions in accordance with 40 CFR 1501.5 of the CEQ Regulations.

(f) Responsibility for the environmental analyses and any necessary environmental assessments and environmental impact statements required by permits, leases, easements, etc., proposed for issuance to non-Federal applicants rests with the Headquarters official responsible for granting of that permit, lease, easement, etc. The responsible Headquarters official shall consult with the Associate Administrator for Management for advice on the type of environmental information needed from the applicant and on the extent of the applicant's participation in the necessary environmental studies and their documentation.

19. Sections 1216.318 and 1216.319 are revised and the undesignated center heading is republished to read as follows:

§ 1216.318 Deviations.

From time to time there will arise good and valid reasons for a deviation from these procedures. These procedures are not intended to be a substitute for sound professional judgment. Accordingly, if and as problems arise which justify a deviation, the proposed deviation and supporting rationale shall be forwarded to the Associate Administrator for Management. Unless such documentation is received, it will be assumed that each planning and decisionmaking action is in accordance with these procedures.

Other Requirements

§ 1216.319 Environmental resources document.

Each Field Installation Director shall ensure that there exists an environmental resources document which describes the current environment at that field installation, including current information on the effects of NASA operations on the local environment. This document shall include information on the same environmental effects as included in an environmental impact statement (see 14 CFR 1216.307). This document shall be coordinated with the Associate Administrator for Management and shall be published in an appropriate NASA report category for use as a reference document in preparing other environmental documents (e.g., environmental impact statements for proposed actions to be located at the NASA field installation in question). The Director of each NASA field installation shall ensure that existing resource documents are reviewed and updated, if necessary, by December 31, 1980, and at appropriate intervals thereafter.

20. Section 1216.320 is amended by revising paragraphs (a)(3) and (b) as follows:

§ 1216.320 Environmental review and consultation requirements.

(a) * * *

(3) Executive Order 11988 (Floodplains Management) and Executive Order 11990 (Wetlands), as amended, and implemented by 14 CFR Subpart 1216.2—*Floodplains and Wetlands Management*, prescribe procedures to avoid adverse impacts associated with the occupancy and modification of floodplains and wetlands and require identification and evaluation of actions which are proposed for location in or which may affect a floodplain or wetland. A comparative evaluation of such actions shall be discussed in draft environmental impact statements and transmitted to appropriate State Single Point of Contact for comments.

(b) Other environmental review and consultation requirements peculiar to NASA, if any, may be identified in the NASA environmental impact implementation handbook.

21. Section 1216.321 is amended by revising paragraphs (a)(3) and (5), (c), (d), (e), and (f) to read as follows:

§ 1216.321 Environmental effects abroad of major Federal actions.

(a) * * *

(3) The export of products or facilities producing products (or emission/effluents) which in the United States are prohibited or strictly regulated because their effects on the environment create a serious public health risk. The Associate Administrator for Management will provide additional guidance regarding the types of chemical, physical, and biological agents involved.

* * * * *

(5) Potential environmental effects on natural and ecological resources of global importance and which the President in the future may designate (or which the Secretary of State designates pursuant to international treaty). A list of any such designations will be available from the Associate Administrator for Management.

* * * * *

(c) If the Headquarters official determines that the action will not have a significant environmental effect abroad, he/she shall prepare a memorandum for the record which states the reasoning behind such a determination. A copy of the memorandum shall be forwarded to the Associate Administrator for Management. Note that these procedures do not allow for categorical exclusions (E.O. 12114, section 2–5(d)).

(d) If the Headquarters official determines that an action may have a significant environmental effect abroad, he/she shall consult with the Associate Administrator for Management and the Director, International Relations Division. The Associate Administrator for Management, in coordination with the Director, International Relations Division, shall (as specified in E.O. 12114) make a determination whether the subject action requires:

(1) An environmental impact statement,

(2) Bilateral or multilateral environmental studies, or

(3) Concise reviews of environmental issues.

(e) When informed of the determination of the Associate Administrator for Management, the Headquarters official shall proceed to take the necessary actions in accordance with these implementing procedures.

(f) The Associate Administrator for Management shall, in coordination with the Associate Administrator for External Relations, determine when an affected nation shall be informed regarding the availability of documents referred to in paragraph (d) of this section and coordinate with the Department of State all NASA communications with foreign governments concerning environmental matters as related to E.O. 12114.

James C. Fletcher,
Administrator.

March 16, 1988.

BILLING CODE 7510-01-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 200

[Release Nos. 33–6781; 34–25484; 35–24603; 39–2151; IC–16322; IA–1109]

Approved Information Collections; Current OMB Expiration Dates

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission is amending Subpart N of Part 200 relating to collection requirements under the Paperwork Reduction Act to reflect current OMB expiration dates for approved information collections.

EFFECTIVE DATE: March 25, 1988.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Fogash, Deputy Executive Director, SEC, 450 Fifth Street, NW., Washington, DC 20549 (202) 272–2142.

SUPPLEMENTARY INFORMATION: The Commission will amend Subpart N periodically to reflect current information.

The Commission finds that this amendment, concerning the display of the control numbers and expiration dates assigned to information collection requirements of the Commission by the Office of Management and Budget pursuant to the Paperwork Reduction Act, pertains only to procedural matters; it is therefore not subject to the provisions of the Administrative Procedure Act, 5 U.S.C. 551 et seq., requiring advance notice and opportunity for comment. Accordingly, it is effective upon publication in the Federal Register.

List of Subjects in 17 CFR Part 200

Administrative practice and procedure, Freedom of Information, Privacy, Securities.

Text of Amendment

Title 17, Chapter II of the Code of Federal Regulations is amended as follows:

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

Subpart N—Commission Information Collection Requirements Under the Paperwork Reduction Act: OMB Control Nos. and Expiration Dates

1. The authority citation for Part 200, Subpart N continues to read as follows:

Authority: 44 U.S.C. 3507(f); secs. 6, 7, 8, 10, 19(a), 48 Stat. 78, 79, 81, 85; secs. 205, 209, 48 Stat. 906, 908; sec. 301, 54 Stat. 857; sec 8, 68 Stat. 685; sec. 308(a)(2), 90 Stat. 57; secs. 3(b), 12, 13, 14, 15(d), 23(a), 48 Stat. 882, 902, 904, 905, 901; secs. 203(a), 1, 3, 8, 49 Stat. 704, 1375, 1377, 1379; sec. 202, 68 Stat. 686; secs. 4, 5, 6(d), 78 Stat. 569, 570–574; secs. 1, 2, 3, 82 Stat. 454, 455; 1503; secs. 8, 9, 10, 89 Stat. 117, 118, 119; sec. 308(b), 90 Stat. 57; sec. 18, 89 Stat. 155; secs. 202, 203, 204, 91 Stat. 1494, 1498–1500; sec. 20(a), 49 Stat. 833; sec. 319, 53 Stat. 1173; sec. 38, 54, Stat. 841; 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a), 78c(b), 78l, 78m, 78n, 78o(d), 78w(a), 79t(a), 77sss(a), 80a–37.

2. Section 200.800 is amended by adding Rule 22d–1, Rule 6c–9, Rule 206(4)–4, Rule 34b–1, Rule 701, Rule 702, Rule 703, Form 701, Rule 24f–3, Rule 15Ca1–1, Rule 15Ca2–2, Rule 19b–1 and Rule 10b–6; by deleting Rule 19d–2, Rule 48(b), 22d–4; and revising certain entries in paragraph (b) as follows:

§ 200.800 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[T.D. ATF-269; Ref: Notice No. 641]

Cayuga Lake Viticultural Area, NY

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Final rule, Treasury decision.

SUMMARY: This final rule establishes a viticultural area in New York State, within the counties of Seneca, Tompkins, and Cayuga, to be known as "Cayuga Lake." The establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin in wine labeling and advertising will help consumers better identify wines they purchase. The use of this viticultural area as an appellation of origin will also help winemakers distinguish their products from wines made in other areas.

EFFECTIVE DATE: April 25, 1988.

FOR FURTHER INFORMATION CONTACT: James P. Ficaretta, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, Ariel Rios Federal Building, 1200 Pennsylvania Avenue NW., Washington, DC 20226, (202-566-7626).

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1978, ATF published Treasury Decision ATF-53 (43 FR 37672, 54624) revising regulations in 27 CFR Part 4. These regulations allow for the establishment of definite viticultural areas. The regulations also allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements.

On October 2, 1979, ATF published Treasury Decision ATF-60 (44 FR 56692) which added a new Part 9 to 27 CFR, providing for the listing of approved American viticultural areas, the names of which may be used as an appellation of origin.

Section 4.25a(e)(1), Title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features, the boundaries of which have been delineated in Subpart C of Part 9. Section 4.25a(e)(2) outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area.

Knapp Farms, Inc. and Plane's Cayuga Vineyard, Inc. petitioned ATF for the establishment of a viticultural area in west central New York State, to be known as "Cayuga Lake."

In response to this petition, ATF published a notice of proposed rulemaking (Notice No. 641) in the Federal Register on September 16, 1987 (52 FR 34927), proposing the establishment of the Cayuga Lake viticultural area.

General Description

The Cayuga Lake viticultural area is located in New York State, within the counties of Seneca, Tompkins, and Cayuga. It surrounds and is adjacent to Cayuga Lake, between Seneca Lake and Owasco Lake, and is situated within the approved Finger Lakes viticultural area. It includes eight bonded wineries and 18 vineyards, with approximately 400 acres of grapes.

Historical and current evidence regarding the name as well as the boundaries of the viticultural area includes:

(a) The body of water called Cayuga Lake received its name from the Cayuga Indians, who originally inhabited the region bordering the lake.

(b) The name figures prominently in identifying the area in the diaries of General Sullivan during his campaign to open land in upstate New York to settlers in the 1700's.

(c) Cayuga Lake is the name used by the first permanent settlers in Seneca County in 1789, and has remained the same to the present time.

(d) The large state park located in the northern section of the viticultural area is named Cayuga Lake State Park.

(e) State Route 89, which runs the length of the viticultural area, is also known as Cayuga Lake Boulevard.

Geographical features of the Cayuga Lake viticultural area include the following:

(a) Bedrock of different kinds is the main source of soil material in New York State. Within the Cayuga Lake viticultural area, the bedrock is predominantly shale. To the north of the viticultural area, it is alternating limestone and slate formations; and to the south, it is interbedded sandstone and shale.

(b) The maximum elevation within the viticultural area is no more than 800 feet above the surface of Cayuga Lake. The elevation of the areas to the east, west and south of the viticultural area, however, is 1,800–2,000 feet.

(c) The Cayuga Lake basin is one of two major land formations in the Finger Lakes that resulted from glacial activity in the Pleistocene epoch. As consistently stated in O.D. von Engeln's *The Finger Lakes Region: Its Origin and Nature*, the Cayuga Lake basin is seperated from the second major basin, Seneca Lake (west of Cayuga Lake), by both topography and soil type.

(d) The micro-climate of the viticultural area is created by both Cayuga Lake and its adjacent hills. This is discussed in an article that appeared in the July 1986 issue of *Geographical Review*, entitled "Vines, Wines, and Regional Identity in the Finger Lakes Region." As mentioned in the article, due to the cold air drainage down the valley slopes in summer, and the release of heat stored in Cayuga Lake, the risk of an early frost is reduced. This results in an extended growing season on the slopes, from an average of 145 days for much of the Finger Lakes region, to between 165 and 170 days for the Cayuga Lake viticultural area.

(e) The moderating effects of Cayuga Lake and its adjacent hills have resulted in the viticultural area having an extended heat summation period, from 2,200–2,300 degree days for much of the Finger Lakes area, to 2,400–2,500 degree days for the Cayuga Lake viticultural area.

Boundaries of the Area

The boundaries of the Cayuga Lake viticultural area may be found on one United States Geological Survey (U.S.G.S.) map (Elmira, New York; Pennsylvania).

The boundaries, as proposed by the petitioners, are described in § 9.127.

Public Comment

In response to Notice No. 641, 23 comments were received, all in support of the proposed viticultural area.

Miscellaneous

ATF does not want to give the impression that, by approving "Cayuga Lake" as a viticultural area, it is approving or endorsing the quality of the wine from this area. ATF is approving this area as being distinct, but not better than other areas. By approving this area, ATF will allow wine producers to claim a distinction on labels and in advertisements as to the origin of the grapes. Any commercial advantage can only come from consumer acceptance of "Cayuga Lake" wines.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a final regulatory flexibility analysis (5 U.S.C. 604) are not applicable to this final rule because it will not have a significant economic impact on a substantial number of small entities. The final rule will not impose, or otherwise cause, a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The final rule is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605 (b)), that this final rule will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

In compliance with Executive Order 12291, the Bureau has determined that this regulation is not a major rule since it will not result in:

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(c) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96–511, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR Part 1320, do not apply to this final rule because no requirement to collect information is imposed.

Disclosure

A copy of the petition and the comments received are available for inspection during normal business hours at the following location: ATF Reading Room, Room 4412, Office of Public Affairs and Disclosure, 1200 Pennsylvania Avenue, NW., Washington, DC.

Drafting Information

The principal author of this document is James P. Ficaretta, Wine and Beer Branch, Bureau of Alcohol, Tobacco, and Firearms.

List of Subjects in 27 CFR Part 9

Administrative practice and procedure, Consumer protection, Viticultural areas, Wine.

Authority and Issuance

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph 1. The authority citation for 27 CFR Part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

Par. 2. The table of sections in 27 CFR Part 9, Subpart C, is amended to add the heading of § 9.127 to read as follows:

Subpart C—Approved American Viticultural Areas

Sec.

* * * * *

9.127 Cayuga Lake.

Par. 3. Subpart C is amended by adding § 9.127 to read as follows:

Subpart C—Approved American Viticultural Areas

§ 9.127 Cayuga Lake.

(a) *Name.* The name of the viticultural area described in this section is "Cayuga Lake."

(b) *Approved maps.* The appropriate map for determining the boundaries of the Cayuga Lake viticultural area is one U.S.G.S. map scaled 1:250,000, titled "Elmira, New York; Pennsylvania," 1962 (revised 1978).

(c) *Boundaries.* The Cayuga Lake viticultural area is located within the counties of Seneca, Tompkins, and Cayuga, in the State of New York, within the Finger Lakes viticultural area. The boundaries are as follows:

(1) Commencing at the intersection of State Route 90 with State Route 5 in Cayuga County, north of Cayuga Lake.

(2) Then south along State Route 90 to a point approximately one mile past the intersection of State Route 90 with State Route 326.

(3) Then south along the primary, all-weather, hard surface road, approximately ¾ mile, until it becomes State Route 90 again at Union Springs.

(4) Then south/southeast along State Route 90 until it intersects the light-duty, all-weather, hard or improved surface road, approximately 1.5 miles west of King Ferry.

(5) Then south along another light-duty, all-weather, hard or improved surface road, approximately 4 miles, until it intersects State Route 34B, just south of Lake Ridge.

(6) Then follow State Route 34B in a generally southeast direction until it intersects State Route 34, at South Lansing.

(7) Then south along State Route 34, until it meets State Route 13 in Ithaca.

(8) Then southwest along State Routes 34/13, approximately 1.5 miles, until it intersects State Route 79, in Ithaca.

(9) Then west along State Route 79, approximately ½ mile, until it intersects State Route 96.

(10) Then along State Route 96, in a generally northwest direction, until it intersects State Routes 414 and 96A in Ovid.

(11) Then north along State Routes 96/414, until they divide, approximately 2.5 miles north of Ovid.

(12) Then along State Route 414, in a generally northeast direction, until it meets U.S. Route 20 in the town of Seneca Falls.

(13) Then along U.S. Route 20, in a northeast direction, until it intersects State Routes 318, 89, and 5.

(14) Then along U.S. Route 20/State Route 5, in a northeast direction, to the beginning point, at the intersection with State Route 90.

Signed: February 29, 1988.

Stephen E. Higgins,

Director.

Approved: March 7, 1988.

John P. Simpson,

Deputy Assistant Secretary (Regulatory, Trade and Tariff Enforcement).

BILLING CODE 4810-31-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

43 CFR Part 11

Natural Resource Damage Assessments

AGENCY: Department of the Interior.

ACTION: Final rule; correction.

SUMMARY: On March 20, 1987 (52 FR 9042), the Department of the Interior (the Department) published a final "type A" natural resource damage assessment rule, codified at 43 CFR Part 11. The type A rule established simplified procedures for assessing damages to natural resources in coastal and marine environments where those damages result from a discharge of oil or a release of a hazardous substance and

are compensable under either the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) or under the Clean Water Act (CWA, also known as the Federal Water Pollution Control Act). The type A rule incorporated by reference a technical document entitled "Measuring Damages to Coastal and Marine Natural Resources: Concepts and Data Relevant to CERCLA Type A Damage Assessments" (NRDAM/CME technical document). The NRDAM/CME technical document contained a computer model that must be used then a type A assessment of damages is conducted pursuant to Subpart D of 43 CFR Part 11 for coastal and marine environments. This rule amends the citations in the type A rule to effect technical corrections to the NRDAM/CME technical document incorporated by reference in the type A rule and explains the technical corrections to the source code of the NRDAM/CME computer model.

DATE: The effective date of this final rule is March 25, 1988. The incorporation by reference of certain technical corrections to the publication listed in § 11.18 of this rule was approved by the Director of the Federal Register and is effective March 25, 1988.

ADDRESS: Office of Environmental Project Review, Room 4239, Department of the Interior, 1801 C Street NW., Washington, DC 20240 (regular business hours are 7:45 a.m. to 4:15 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: David Rosenberger or Linda Burlington, (202) 343–1301.

SUPPLEMENTARY INFORMATION:

I. Background

Section 301(c) of CERCLA requires the promulgation of rules for the assessment of damages for injury to, destruction of, or loss of natural resources resulting from a discharge of oil or a release of a hazardous substance for the purposes of CERCLA and section 311(f) (4) and (5) of the CWA. Two types of procedures have been developed consistent with the requirements of section 301(c)(2) of CERCLA. The type B procedures, published August 1, 1986, at 51 FR 27674, included alternative methodologies for conducting assessments in individual cases. Type A procedures, published March 20, 1987, at 52 FR 9042, provided standard procedures for simplified assessments requiring minimal field observation.

The type A rule established simplified procedures that may be used to assess damages for injuries to natural resources in coastal and marine environments where those damages result from either a discharge of oil or a release of a hazardous substance. The procedures in the type A rule use a computer model called the Natural Resource Damage Assessment Model for Coastal and Marine Environments (NRDAM/CME). A general overview of the NRDAM/CME, its interactive submodels, data bases, and user inputs was published in the preamble to the final type A rule (see 52 FR 9045). A detailed description of the NRDAM/CME can be found in the NRDAM/CME technical document. A hard copy of the source code for the NRDAM/CME is listed in Appendix H of the NRDAM/CME technical document. Also, four computer diskettes containing the operational NRDAM/CME are provided in Appendix I of the NRDAM/CME technical document.

The type A rule incorporated by reference the NRDAM/CME technical document, including the source code listing of Appendix H (43 CFR § 11.18(a)(4)). The rule also identified at § 11.41(g)(1)(i), that version 1.1 of the NRDAM/CME is to be used for the simplified assessment of damages in coastal and marine environments. This final rule amends the type A rule citation of incorporation by reference and the version designation of the NRDAM/CME that may be used for simplified natural resource damage assessments in coastal and marine environments. These amendments are based upon the technical correction of errors in the NRDAM/CME source code listing of Appendix H. The rule now designates that version 1.2 of the NRDAM/CME is to be used in place of version 1.1.

A separate Notice in this issue of the **Federal Register** announces the availability of the errata sheet for the NRDAM/CME technical document. That Notice is applicable to those individuals currently in possession of the NRDAM/CME technical document of March 20, 1987, containing version 1.1 of the NRDAM/CME. The Notice also provides instructions for returning version 1.1 diskettes to the Department for reformatting to version 1.2.

All new requests for version 1.2 of the NRDAM/CME and the NRDAM/CME technical document should continue to be made directly to the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161; ph: (703) 487–4650. Orders to NTIS should specify document number PB87–142485, and the document title: "Measuring Damages to Coastal and Marine Natural Resources: Concepts and Data Relevant to CERCLA Type A Damage Assessments."

II. Summary of the Technical Corrections

As part of its ongoing responsibilities to promulgate the natural resource damage assessment regulations called for under section 301(c) of CERCLA, the Department is continuing to review and evaluate the regulations currently promulgated. As a result, several computer coding errors have been identified in version 1.1 of the NRDAM/CME. These coding errors are reflected in the source code listing of Appendix H to the NRDAM/CME technical document. As a result of these coding errors, version 1.1 of the NRDAM/CME may not, under certain user input conditions, perform correct mathematical computations consistent with the algorithms and the functional operations of the computer model described in the preamble to the final type A rule and in the NRDAM/CME technical document. Several of the coding errors in version 1.1 can, in some instances, result in incorrect computations of the losses and damages resulting from injury to waterfowl and beaches. Other errors pertain to specific operations of the NRDAM/CME and the graphics routines. Finally, two lines of code were inadvertently omitted from one page of the hard copy of the source code found in Appendix H of the NRDAM/CME technical document. These lines have been added. These technical corrections of coding errors have not altered the algorithms and functional operations of the NRDAM/CME, but have simply made those operations consistent with the descriptions in the final type A rule and the NRDAM/CME technical document. These coding errors and the technical corrections that have been made within version 1.2 of the NRDAM/CME are explained below.

Version Number

A new NRDAM/CME version number (1.2) has been assigned to this corrected code. Since the result of a simplified natural resource damage assessment for coastal and marine environments conducted pursuant to this rule is given the benefit of a rebuttable presumption in a court action or administrative proceeding, the Department must ensure that such assessments are performed using the corrected version. In order to do so, the Department has renumbered this corrected version of the NRDAM/CME as version 1.2 and has amended the rule at § 11.41(g)(1)(i) to reflect the renumbered version.

Physical Fates Submodel

The physical fates submodel contained an error in the graphics routine that at times provided an erroneous printout of the graphical plot of the sediment contamination levels. This graph is printed after the final mass balance output. For substances that sink to the sea floor, version 1.1 can incorrectly display sediment contamination levels within the pictorial boundary of land. The NRDAM/CME version 1.2 corrects this graphical plotting error. Changes in this plotting routine do not affect the numerical computations of the NRDAM/CME.

The physical fates submodel contains a coding routine that is used to identify the locations of a surface slick as that slick moves within the boundaries of a study area. A portion of that coding routine also detects the movement of the slick across a one-kilometer distance from a shoreline in those instances where a land boundary has been specified to occur at a study area limit. This information is used by the biological effects submodel to determine the presence or absence of waterfowl.

The biological data base, listed in Appendix B of the NRDAM/CME technical document, specifies that waterfowl are located only within one kilometer of a shoreline. Under version 1.1, of the NRDAM/CME, the coding routine did not, under some user input conditions, properly signify the movement of the slick crossing the one-kilometer distance from shoreline. As a result, a surface slick that moves beyond the one-kilometer distance from a shoreline incorrectly continued to recognize the presence of waterfowl. Also, a slick that came within the one-kilometer distance from a shoreline, under such conditions as a rapidly moving slick, was identified to have come ashore without first signifying that it had crossed the one-kilometer distance. Version 1.2 of the NRDAM/CME has corrected the coding routine to properly denote the movement of the slick crossing the one-kilometer distance from a shoreline. To effect this correction an additional "check slick location" has been added to the fates submodel. If the check signifies the movement of the slick crossing the one-kilometer distance, the frequency of write statements to the phys_bio.lnk file file is increased. (The phys_bio.lnk file is described in the section that follows.) This increased frequency of write statements is to ensure that the biological effects submodel records the slick crossing the one-kilometer distance. This additional check may result in slight changes in the estimates of losses in fish and shellfish in cases where a surface slick crosses the one-kilometer distance from a shoreline.

Physical Fates/Biological Effects Submodel Interactions

The physical fates and biological effects submodels are linked and exchange information through an internal data file called "phys_bio.lnk." This file is created within the NRDAM/CME to hold information developed by the physical fates submodel for use in the biological effects submodel. For each timestep of the physical fates submodel information is computed relating to time, location, and concentration of the substance discharged or released and sent (written) to the "phys_bio.lnk" file. At the end of the computations of the physical fates submodel, the biological effects submodel then obtains (reads) the information in that file for use in determining the effect of the discharge or release on biological organisms. The effect of the substance on biological organisms is determined based on the time, location, and concentration written to the "phys_bio.lnk" file by the physical fates submodel.

In version 1.1 of the NRDAM/CME, an inconsistent application of format coding occurred in the size of a number that was written to the "phys_bio.lnk" file by the physical fates submodel versus the size of the same number expected to be read by the biological effects submodel (i.e., a write-read mismatch). This write-read mismatch occurred in that portion of the coding that signified the movement of a slick across a one-kilometer distance from a shoreline. This write-read mismatch affected, under certain user input conditions, the proper identification of the presence or absence of waterfowl. Version 1.2 has corrected this write-read mismatch. In addition, new lines of computer code were added to ensure that the "phys_bio.lnk" file can always be located and properly accessed by the biological effects submodel. This latter correction does not affect the mathematical calculations performed by the NRDAM/CME.

Biological Effects/Economic Damages Submodel Interactions

The biological effects and economic damages submodel are linked by an internal data file called "bio_econ.lnk." This file performs functions comparable to those of the "phys_bio.lnk" file described above. New lines of code were added to ensure that the "bio_econ.lnk" file can always be located and properly accessed by the economic damages submodel. This correction does not affect the mathematical calculations performed by the NRDAM/CME.

Economic Damages Submodel

The economic damages submodel contained three coding errors. These errors relate to the computations pertaining to public beaches and waterfowl hunting losses. In computing the damages due for waterfowl, the economic damages submodel contains several routines that perform arithmetic rounding of numbers. The correct routine requires multiplication of each dollar value by 100, addition of these values, and division of this sum by 100. For waterfowl hunting losses, version 1.1 of the NRDAM/CME did not include the multiplication by 100 in the rounding routine. This error has been corrected in version 1.2 of the NRDAM/CME.

In computing damages for closure of public beaches, the economic damages submodel multiplies the length of beach closed, the number of days closed, and the monthly damage coefficient (i.e., the lost value per day per meter of beach) for the province and season of the incident. The submodel contains a coding routine that assigns an index number to each month of the year. These index numbers are cross-indexed in the code to both the number of days and damage coefficient for each month of the year. A coding error occurred in version 1.1 that assigned the index number "0" to the month of December rather than the correct index number, "12." As a result, the submodel was unable to correctly cross-index and identify the number of days and damage coefficient for the month of December. This index number has been corrected in version 1.2 of the NRDAM/CME. The discounting of beach damages was also inadvertently omitted from version 1.1 of the NRDAM/CME. This error has also been corrected in version 1.2 of the NRDAM/CME.

III. Good Cause for Immediate Effective Date

The technical computer coding corrections discussed in Section II of this preamble are necessary to ensure that the mathematical computations performed by the NRDAM/CME comply with the descriptions in the type A rule and the NRDAM/CME technical document. The type A rule was published as a proposed rule on May 5, 1986 (at 51 FR 16636), and both the draft NRDAM/CME and NRDAM/CME technical document were also made available at that time. In response to that proposed rule, the draft NRDAM/CME technical document, and the draft NRDAM/CME, over a thousand pages of

VOL 53 ISS 58 MR 25 1988 MI

comments were received by the Department. Upon review of these comments, revisions were made to the type A rule, the NRDAM/CME technical document, and to the draft NRDAM/CME. In the final type A rule, published on March 20, 1987 (at 52 FR 9042), the Department responded to the comments received on the proposed type A rule, the draft NRDAM/CME technical document, and to the draft NRDAM/CME. Because of this extensive review, the areas covered by the type A rule and the technical workings of the NRDAM/CME were given full and careful consideration. The technical corrections discussed in the preamble to this final rule do not introduce new issues or factors into that final rule, nor does it change the algorithms or data bases in the NRDAM/CME technical document. A delay in the implementation of these technical corrections in order to afford the opportunity for further public comment is, therefore, unnecessary since no new regulatory provisions or requirements are created in this final rule.

Further, section 301(c) of CERCLA called for the type A procedure to be a simplified procedure requiring minimal field observation. The type A procedure that is the subject of today's action meets this requirement by use of the computer model known as the NRDAM/CME. A reproposal of this procedure to effect corrections in the technical computations performed by the NRDAM/CME could deprive natural resource trustees of the use of this simplified method of assessing damages in the coastal and marine environments. If the type A rule were reproposed, trustees might be precluded from performing simplified assessments of damages for those incidents and having those assessments receive a rebuttable presumption for their assessments, the major advantage bestowed by Congress to the trustees. Thus, until version 1.2 could be codified in a final rule, trustees would only have version 1.1 available to perform the simplified assessments. However, version 1.1 contains technical errors that, under certain user input conditions, may result in incorrect computations. Therefore, use of version 1.1 for simplified assessments could call into question the validity of those assessments. Since it might not be generally cost-effective to perform the type B procedures, found at 43 CFR Part 11, in the type of incident for which the NRDAM/CME was designed, the trustees might not have a means to assess natural resource damages and receive a rebuttable presumption. This inability to perform an assessment and receive a rebuttable presumption for that assessment is contrary to the public interest.

Reproposing the type A rule to effect the technical corrections discussed in Section II of this preamble is unnecessary and contrary to the public interest. For these reasons, the Department finds that there is good cause under sections 553(b)(B) and (d)(3) of the Administrative Procedure Act (5 U.S.C. 551 *et seq.*) to make the corrections in a final rule without first issuing a notice of proposed rulemaking and to make the final rule immediately effective.

List of Subjects in 43 CFR Part 11

Continental shelf, Environmental protection, Fish, Forests and forest products, Grazing land, Incorporation by reference, Indian lands, Hazardous substances, Mineral resources, National forest, National parks, Natural resources, Oil pollution, Public lands, Wildlife, Wildlife refuges.

Under the authority of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and the Superfund Amendments and Reauthorization Act of 1986, and for the reasons set out in the preamble, Title 43, Subtitle A of the Code of Federal Regulations is amended as set forth below.

Dated: January 30, 1988.

Rick Venture,

Assistant Secretary, Policy, Budget and Administration.

PART 11—NATURAL RESOURCE DAMAGE ASSESSMENTS

1. The authority citation for 43 CFR Part 11 continues to read:

Authority: 42 U.S.C. 9651(c), as amended.

Subpart A—Introduction

2. Section 11.18 is amended to revise paragraph (a)(4) to read as follows:

§ 11.18 Incorporation by reference

(a) * * *

(4) Volume I and Appendices A–H of Volume II, as revised November 1987, of "Measuring Damages to Coastal and Marine Natural Resources: Concepts and Data Relevant to CERCLA Type A Damage Assessments" (NRDAM/CME technical document), prepared for the U.S. Department of the Interior by Economics Analysis, Inc., Wakefield, RI, and Applied Sciences Associates, Narragansett, RI, DOI 14–01–0001–85–C–20, January 1987, revised November 1987, available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161; PB87–142485; ph: (703) 487–4650. Reference is made to this publication in §§ 11.33(b)(1) (i), (ii), (vi), and (xi), 11.41(a)(1), (c)(1)(i), and (g)(1)(i) of this part.

* * * * *

Subpart D—Type A Assessments

3. Section 11.41 is amended to revise paragraph (g)(1)(i) to read as follows:

§ 11.41 Coastal and marine environments.

* * * * *

(g) *Coastal and marine environments—NRDAM/CME availability, security, and verification—(1) General.* (i) The NRDAM/CME that may be used for assessment of damages to coastal and marine environments under this subpart is version 1.2 of "Measuring Damages to Coastal and Marine Natural Resources: Concepts and Data Relevant to CERCLA Type A Damage Assessments," U.S. Department of the Interior (incorporated by reference, see § 11.18).

Proposed Rules

Federal Register
Vol. 53, No. 58
Friday, March 25, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 28

Revision of User Fees for Cotton Classification

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed Rule.

SUMMARY: This proposed rule would revise the cotton classification fees charged to cotton producers. The revision would decrease fees for cotton classification services under the Smith–Doxey amendment to the Cotton Statistics and Estimates Act in accordance with the formula provided in the Uniform Cotton Classing Fees Act of 1987. The Uniform Cotton Classing Fees Act provides a formula for setting the classification fee based on the estimated number of bales that will be produced in a given year and the projected operating reserve of the Cotton Division of the Agricultural Marketing Service. Reflected in the fee is an adjustment for inflation (Implicit Price Deflator for Gross National Product). The operating reserve for the 1988 season is estimated to be at a level that would warrant the addition of a surcharge which is authorized by the Uniform Cotton Classing Fees Act. No other adjustments would be warranted under the formula. The new fee would be $1.03 per sample.

DATE: Comments must be received by April 25, 1988.

ADDRESS: Fred S. Mullins, Cotton Division, AMS, USDA Room 2641–S, P.O. Box 96456, Washington, DC 20090–6456.

FOR FURTHER INFORMATION CONTACT: Fred S. Mullins, (202) 447–2145.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed in accordance with Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be "non-major" since it does not meet the criteria for a major regulatory action as stated in the order.

The Administrator, Agricultural Marketing Service (AMS, has certified that this action would not have a significant economic impact on a substantial number of small entities as defined by the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because: (1) The fees would be decreased, thereby, lessening any impact on the affected persons; (2) the cost decrease would not affect competition in the marketplace; (3) the use of classification services is voluntary. The proposed user fee revisions reflect the Secretary's authority under the Cotton Statistics and Estimated Act (7 U.S.C. 473a) to recover the costs, as nearly as practicable, of providing classification services under the provisions of the Uniform Cotton Classing Fees Act of 1987.

The information collection requirements contained in this proposed rule have been previously approved by the Office of Management and Budget and assigned OMB control numbers under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*)

Fees for Classification Under the Smith-Doxey Amendment to the Cotton Statistics and Estimates Act

The user fee charged to cotton producers for manual cotton classification services under the Smith–Doxey amendment to the Cotton Statistics and Estimates Act was $1.20 per sample during the 1987 harvest season (52 FR 35219), as determined using the formula provided in the Uniform Cotton Classing Fees Act of 1987. The changes cover salaries, cost of equipment and supplies, and other overhead and include administrative and supervisory costs. This proposed rule would decrease the fee for manual classification charged to producers from $1.20 to $1.03. This new fee would be calculated by using the 1987 base fee adjusted for the rate of inflation, the projected size of the crop and the addition of a surcharge necessary to maintain an adequate operating reserve. The 1987 base fee is $1.11. A 3.3 percent increase due to the implicit price deflator amounting to an increase of four cents would be added to the $1.11 resulting in a 1988 base fee of $1.15. The 1988 crop is currently estimated at 13,944,720 bales. The base fee would be decreased by 15 percent based on the estimated size of the 1988 crop (one percent for every 100,000 bales or portion thereof above the base of 12,500,000 bales). This percentage factor would amount to 17 cents and would be subtracted from the base fee of $1.15 resulting in a fee of $0.98. There would be a surcharge of 5 cents added to the $0.98 fee since the projected operating reserve is less than 25 percent. The projected operating reserve is 13.94 percent. This would establish the fee at $1.03. No further adjustments would be warranted under the formula.

Therefore, the fee for this service during the 1988 harvest season would be $1.03. The additional fee for High Volume Instrument (HVI) classification is 50 cents per sample (resulting in a total fee of $1.70 for 1987). Under this proposal, the fee for HVI classification would be revised to $1.53 per sample. As provided for in the Uniform Cotton Classing Fees Act of 1987, a five cent per sample discount would continue to be applied to voluntary centralized billing and collecting agents.

The fee for a manual review classification in § 28.911 would also be decreased from $1.20 to $1.03 per sample since this fee has been the same as the original classification fee. For the same reason the fee for HVI review classification would be decreased from $1.70 to $1.53 per sample.

List of Subjects in 7 CFR Part 28

Cotton samples, Standards, Cotton linters, Grades, Staples, Market news, Testing.

PART 28—[AMENDED]

1. The authority citation for Subpart D of Part 28 continues to read as follows:

Authority: Sec. 3a, 50 Stat. 62, as amended (7 U.S.C. 473a); Sec. 3c, 50) Stat. 62 (7 U.S.C. 473c); unless otherwise noted.

2. Paragraph (b) of § 28.909 would be revised to read as follows:

§ 28.909 Costs.

* * * * *

(b)The cost of manual cotton classification service to producers is $1.03 per sample.

* * * * *

3. Section 28.911 would be revised to read as follows:

§ 28.911 Review classification.

A producer may request one manual or one High Volume Instrument (HVI) review classification for each bale of eligible cotton. The fee for manual review classification is $1.03 per sample. The fee for HVI review classification is $1.53 per sample. Samples for review classification must be drawn by gins or warehouses licensed pursuant to § 28.20–28.22, or by employees of the United States Department of Agriculture. Each sample for review classification shall be taken, handled, and submitted according to § 28.908 and to supplemental instructions issued by the Director or an authorized representative of the Director. Costs incident to sampling, tagging, identification, containers, and shipment for samples for review classification shall be assumed by the producer. After classification, the samples shall become the property of the Government unless the producer requests the return of the samples. The proceeds from the sale of samples that become Government property shall be used to defray the costs of providing the services under this subpart. Producers who request return of their samples after classing will pay a fee of 25 cents per sample in addition to the fee established above in this section.

Dated: March 22, 1988.

William T. Manley,

Deputy Administrator, Marketing Programs.

BILLING CODE 3410-02-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 4

[Notice No. 656]

Alcoholic Content Statements on Labels of Wine, and the Related Type Size Requirements

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF) is proposing to amend the regulations in 27 CFR Part 4, by providing that statements of alcoholic content on labels of wine may appear in a form other than that currently prescribed. The Bureau is also proposing to increase the maximum allowable type size for such alcoholic content statements from two millimeters to three millimeters. ATF believes the proposed regulations, if adopted, will facilitate trade between domestic and foreign markets, particularly with the European Economic Community (EEC), by promoting harmonization of labeling requirements. In addition, the proposed regulations will continue to provide the consumer with adequate information as to the alcoholic content of the wine product.

DATE: Written comments must be received on or before April 25, 1988.

ADDRESS: Send written comments to: Chief, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC 20044–0385, *Attn: Notice No. 656.*

FOR FURTHER INFORMATION CONTACT: James P. Ficaretta, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, Ariel Rios Federal Building, 1200 Pennsylvania Avenue NW., Washington, DC 20226 (202–566–7626).

SUPPLEMENTARY INFORMATION:

Background

Section 5 (e) and (f) of the Federal Alcohol Administration Act (FAA Act), 27 U.S.C. 205 (e) and (f), provides, in general terms, that wine labeling and advertising shall not contain any statement which is false, deceptive, misleading, or is likely to mislead the consumer regarding the product. In addition, section 5 (e) and (f) authorizes the Secretary to prescribe such regulations as will provide the consumer with adequate information as to the identity and quality of the product except that, as specified in section 5(e), statements of alcoholic content on labels of wine are required only for products containing more than 14 percent of alcohol by volume. Section 5(f) *prohibits* statements of, or statements likely to be considered as statements of, alcoholic content of wines in advertising.

Regulations which implement the provisions of section 5 (e) and (f), as they relate to wine, are set forth in Title 27, Code of Federal Regulations (CFR), Part 4. Requirements for statements of alcoholic content on wine labels are prescribed in § 4.36(b). In essence, if a specific alcoholic content is to be disclosed, it shall appear as "Alcohol ____% by volume." If a range is to be utilized, the alcoholic content statement must read as "Alcohol ____% to ____% by volume."

The size of type requirements for the alcoholic content statements mentioned above are prescribed in § 4.38(b). Specifically, § 4.38(b)(3) reads as follows:

> Alcoholic content statements shall not appear in script, type, or printing larger or more conspicuous than 2 millimeters nor smaller than 1 millimeter on labels of containers having a capacity of 5 liters or less and shall not be set off with a border or otherwise accentuated.

Petition

ATF has received a petition, dated January 29, 1988, filed by the Wine Institute, requesting that §§ 4.36(b) and 4.38(b) be amended. The Wine Institute is an industry association of California wineries representing 538 California winery members.

Specifically, the petitioners have requested that § 4.36(b)(1) be amended to permit the alcoholic content statement to appear in an abbreviated form as "Alc. ____% vol," as an alternative to "Alcohol ____% by volume." Similarly, they have requested that § 4.36(b)(2) be amended to permit the alcoholic content statement, when given as a range, to appear as "Alc. ____% to ____% vol," as an alternative to "Alcohol ____% to ____% by volume."

The Wine Institute has also requested that § 4.38(b)(3) be amended, increasing the maximum allowable type size for alcoholic content statements from two millimeters to three millimeters.

According to the petitioners, the European Economic Community (EEC), which presently includes 12 Member States, recently established regulations prescribing the form, and type size, in which alcoholic content statements may be made on wine labels. A previous EEC regulation makes the disclosure of alcoholic content on wine labels mandatory as of May 1, 1986.

Under the new EEC regulations, the alcoholic content figure must be followed by "% vol." and may be preceded by, among other alternatives, the abbreviation "alc." The petitioners note that "[T]his requirement renders wine containers labeled in compliance with BATF regulations unacceptable for shipment to the EEC without relabeling. The necessity of relabeling would be obviated by amending the regulation (§ 4.36(b)) to accommodate EEC language."

Regarding the type size of alcoholic content statements, the EEC would require such statements to appear in printing no smaller than three millimeters. Current Federal regulations (§ 4.38(b)) require that the alcoholic content statement appear in printing *not larger* than two millimeters. Again, wine containers labeled in compliance with Federal regulations would be unacceptable for shipment to the EEC, and would have to be relabeled.

VOL
53
ISS
58
MR
25
988
MI

The petitioners state that adoption of their proposed amendments would result in cost savings to U.S. wineries, since wines for export would not have to be relabeled in order to comply with EEC requirements. Further, wineries would not have to design new labels solely for products intended for sale in the EEC.

Subsequent to the filing of the Wine Institute petition, the Bureau received a letter (dated February 23, 1988) on behalf of the National Association of Beverage Importers, Inc. (NABI), supporting the Wine Institute petition. NABI is an industry association representing over 100 member companies, that import over 90% of all alcoholic beverages brought into the U.S.

Alcoholic Content Statements (§ 4.36(b))

As mentioned, the FAA Act holds that statements of alcoholic content are required only for wines containing more than 14 percent of alcohol by volume. Whether required or optional, the wording for the alcoholic content statement, as currently prescribed in §§ 4.36(b) (1) and (2), has remained unchanged since the first wine regulations under the FAA Act were approved on December 30, 1935. However, it is the Bureau's position that § 4.36(b) was not intended to be used as an inflexible standard for statements of alcoholic content, precluding the alcoholic content from being disclosed in an abbreviated form.

Thus, over the years, the Bureau has permitted the alcoholic content of wine to be disclosed on labels in an abbreviated form. Examples of such statements include, "Alcohol ___% by vol.," "alc. ___% by volume," "alc. ___% by vol.," and "alc. ___% to ___% by vol."

ATF believes that the examples mentioned above are consistent with the intent of the law, in that they provide the consumer with adequate information as to the alcoholic content of the wine, and are not misleading. Further, they afford industry members, both domestic and foreign, additional flexibility in designing their labels.

Therefore, the Bureau is proposing to amend § 4.36(b) by providing that the alcoholic content statement may appear in an abbreviated form. However, the words "alcohol" and/or "volume," if abbreviated, shall be shown as "alc." (alc) and/or "vol." (vol), respectively. ATF believes that consumers can easily recognize the words that these abbreviations represent.

The Bureau is also proposing to amend § 4.36(b) to provide for the alcoholic content to be disclosed on the label in a form other than that currently prescribed. Examples of such statements include, "___% alcohol by volume," "___% alcohol/volume," "alcohol ___% volume," and "alcohol ___% to ___% volume." Again, if the words "alcohol" and/or "volume" are to be abbreviated, they shall be shown as "alc." (alc) and/or "vol." (vol), respectively.

Type Size Requirements (§ 4.38(b))

Under existing § 4.38(b)(3), statements of alcoholic content appearing on labels of containers having a capacity of five liters or less, may not appear in printing larger than two millimeters nor smaller than one millimeter, and shall not be set off with a border or otherwise accentuated.

There are no provisions in the FAA Act as to specific type size requirements for alcoholic content statements on labels of wine. Regulations first issued under the FAA *Act* (Regs. No. 4, Article III, Sec. 38(b), approved 12/30/35) provided, basically, that on containers having a capacity of one-half pint or more, all mandatory information (including alcoholic content) had to be in printing not smaller than 8-point gothic caps (approximately 2 millimeters).

Sec. 38(b) (27 CFR 4.38(b)) was subsequently amended by T.D. 5010, published in the Federal Register on June 5, 1948. As amended, 27 CFR 4.38(b) held that alcoholic content statements on labels of containers having a capacity of 1 gallon or less could not appear in printing *larger* than 8-point gothic caps. The rationale for having this regulation more restrictive than previous section 38(b) can best be illustrated by a comment given at the January 1947 hearings which resulted in T.D. 5010. "[T]he purpose of this [proposed regulation] seems to be a generally beneficial one in that in connection with the sale of wines we should not, and have not for many years, tried to emphasize the alcoholic content of the product."

In order to further prevent any emphasis on the alcoholic content of wine, as well as to provide for a minimum size of type for alcoholic content statements, § 4.38(b) was subsequently amended by T.D. 6319, published in the Federal Register on October 4, 1958. As amended, § 4.38(b) provided that, on containers of 1 gallon or less, alcoholic content statements shall appear in printing not smaller than 6-point gothic caps (approximately 1 millimeter), nor larger than 8-point gothic caps, and shall not be set off with a border or otherwise accentuated. From the publication of T.D. 6319, up through to the present time, § 4.38(b) has remained basically unchanged.

ATF believes that the intent of § 4.38(b) is as valid today as it was when it was first amended in June 1948, with the publication of T.D. 5010, and subsequent revisions. Namely, that the alcoholic content of wine should not be emphasized, either in size of type, or how it appears on the label (e.g., set off with a border).

However, the Bureau does not believe that raising the maximum allowable type size for alcoholic content statements one millimeter, from two millimeters to three millimeters, can be viewed as emphasizing alcoholic content. It should be noted that other mandatory information, e.g., brand name, class and type designation, etc., must appear in printing *no smaller* than two millimeters. Oftentimes, such information appears in a type size much larger than that. On the other hand, the amendment, as proposed by the petitioners, would still provide a *maximum* allowable type size for alcoholic content statements, i.e., three millimeters. Further, the Bureau continues to adhere to its position that statements of alcoholic content may not be set off with a border or otherwise accentuated.

Therefore, with the above in mind, the Bureau is proposing that § 4.38(b)(3) be amended, raising the maximum allowable type size for statements of alcoholic content from two millimeters to three millimeters.

Executive Order 12291

In compliance with Executive Order 12291, 46 FR 13193 (1981), ATF has determined that this proposal is not a major rule since it will not result in:

(a) An annual effect on the economy of $100 million or more;

(b) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(c) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this proposal because the notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities. The proposal will not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The proposal is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that this notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The requirement to collect information proposed in this notice has been submitted to the Office of Management and Budget for review under section 3504(h) of the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. Chapter 35. Comments relating to ATF's compliance with 5 CFR Part 1320—Controlling Paperwork Burdens on the Public should be submitted to: Office of Information and Regulatory Affairs, Attention: ATF Desk Officer, Office of Management and Budget, Washington, DC 20503.

Public Participation

ATF requests comments from all interested persons. Comments received on or before the closing date will be carefully considered. Comments received after that date will be given the same consideration if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closing date.

ATF will not recognize any material as confidential. Comments may be disclosed to the public. Any material which the commenter considers to be confidential or inappropriate for disclosure should not be included in the comment. The name of the person submitting the comment is not exempt from disclosure.

During the comment period, any person may request an opportunity to present oral testimony at a public hearing. However, the Director reserves the right, in light of all circumstances, to determine if a public hearing is necessary.

Disclosure

Copies of this notice, the petition, and the written comments will be available for public inspection during normal business hours at: ATF Reading Room, Disclosure Branch, Room 4412, Ariel Rios Federal Building, 1200 Pennsylvania Avenue NW., Washington, DC.

Drafting Information

The author of this document is James P. Ficaretta, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 4

Advertising, Consumer protection, Customs duties and inspection, Imports, Labeling, Packaging and containers, and Wine.

Authority and Issuance

27 CFR PART 4—LABELING AND ADVERTISING OF WINE is amended as follows:

Paragraph 1. The authority citation for 27 CFR Part 4 continues to read as follows:

Authority: 27 U.S.C. 205.

Par. 2. Section 4.36 is amended by revising the first sentence of paragraphs (b)(1) and (b)(2) as follows:

§ 4.36 Alcoholic content.

* * * * *

(b) * * *

(1) "Alcohol ___% by volume," or a similar appropriate phrase: *Provided,* that if the words "alcohol" and/or "volume" are abbreviated, they shall be shown as "alc." (alc) and/or "vol." (vol), respectively. * * *

(2) "Alcohol ___% to ___% by volume," or a similar appropriate phrase: *Provided,* that if the words "alcohol" and/or "volume" are abbreviated, they shall be shown as "alc." (alc) and/or "vol." (vol), respectively. * * *

* * * * *

Par. 3. Section 4.38(b)(3) is revised to read as follows:

§ 4.38 General requirements.

* * * * *

(b) * * *

(3) Alcoholic content statements shall not appear in script, type, or printing larger or more conspicuous than 3 millimeters nor smaller than 1 millimeter on labels of containers having a capacity of 5 liters or less and shall not be set off with a border or otherwise accentuated.

* * * * *

Signed: March 1, 1988.

Stephen E. Higgins,

Director.

Approved: March 7, 1988.

John P. Simpson,

Acting Assistant Secretary (Enforcement).

BILLING CODE 4810-31-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 702

Surface Coal Mining and Reclamation Operations; Exemption for Coal Extraction Incidental to the Extraction of Other Minerals

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Proposed rule; notice of extension of public comment period.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSMRE) of the United States Department of the Interior (DOI) published a proposed rule on June 1, 1987, relating to the exemption contained in section 701(28) of the Surface Mining Control and Reclamation Act of 1977 (the Act). The exemption concerns the extraction of coal incidental to the extraction of other minerals. The comment period on the proposed rule was reopened and is scheduled to close March 25, 1988. OSMRE is now extending the comment period.

DATE: *Written Comments:* OSMRE will accept written comments on the proposed rule until 5 p.m., Eastern time on April 4, 1988.

ADDRESSES: *Written Comments:* Hand-deliver to the Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131, 1100 L Street NW., Washington, DC, or mail to the Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5131-L, 1951 Constitution Avenue NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: James Fary, Division of Abandoned Mine Land Reclamation, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue NW., Washington, DC 20240; Telephone: 202-343-5384 (Commercial or FTS).

SUPPLEMENTARY INFORMATION: Section 701(28) of the Act, 30 U.S.C. 1291, excludes from the definition of surface coal mining operations the extraction of coal incidental to the extraction of other minerals where coal does not exceed 16⅔ percent of the tonnage of minerals removed for purposes of commercial use or sale. Operations which qualify for the exemption are not subject as surface coal mining operations to certain provisions of the Act such as bonding, permitting and abandoned mine reclamation fee payments. The proposed rule would provide guidance to the coal and noncoal mining industry and coal ragulatory authorities concerning the implementation of the exemption and would establish criteria that must be meet in order for mining operations to qualify for the exemption. The rule would also establish procedures for approval and revocation of exemptions.

OSMRE published the proposed rule concerning the exemption on June 1, 1987 (52 FR 20546). The public comment period was open until August 10, 1987. In consideration of comments submitted on the proposed rule, OSMRE reopened the comment period on February 24, 1988 (53 FR 5430). The notice to reopen the comment period also solicited comments on modifications to certain features of the proposed rule. The comment period under the reopening notice closes March 25, 1988. In response to a request by the public for additional time to submit comments, OSMRE is extending the comment period to April 4, 1988.

List of Subjects in 30 CFR Part 702

Administrative practice and procedures, Surface mining, Underground mining.

Date: March 21, 1988.

Robert Gentile,

Acting Director, Office of Surface Mining Reclamation and Enforcement.

BILLING CODE 4310-05-M

VETERANS ADMINISTRATION

38 CFR Part 17

Community Residential Care

AGENCY: Veterans Administration.

ACTION: Proposed regulations.

SUMMARY: The Veterans Administration (VA) is proposing to amend its medical regulations (38 CFR Part 17) to incorporate new sections to provide for the community residential care program. The Veterans Health Care Amendments of 1983 requires the VA to provide standards for VA approval of community residential care facilities, including health and safety criteria and criteria for the establishment of reasonable charges for care; to clarify eligibility for the program; and, to establish due process standards to govern a VA determination that a facility fails to meet those standards and that the VA, therefore, should cease to assist in referring veterans to that facility, and should offer to assist veterans in leaving the facility.

DATES: Comments must be received by April 25, 1988. Comments will be available for public inspection until May 9, 1988.

ADDRESSES: Interested persons are invited to submit written comments, suggestions or objections regarding this proposal to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420. All written comments received will be available for public inspection only in the Veterans Services Unit, Room 132 of the above address, between the hours of 8 a.m. to 4:30 p.m., Monday through Friday (except holidays) until May 9, 1988.

FOR FURTHER INFORMATION CONTACT: James R. Kelly, Acting Director, Patient Treatment Service (181), Office of Geriatrics and Extended Care, Department of Medicine and Surgery, Veterans Administration, (202) 233-3692.

SUPPLEMENTARY INFORMATION: The proposed regulations set forth in 38 CFR 17.51h through 17.51r implement the VA's authority to publish regulations for the community residential care program. Under this program, private and public facilities provide food, shelter, personal assistance and supervision in such matters as diet, medications, personal hygiene, and therapeutic and recreational activities to veterans at the veteran's expense. Prior to VA approval, facilities are to be inspected by an interdisciplinary team consisting of a physician, nurse, social worker, dietician, and fire and safety officer. The duration of the VA approval is to be dependent on continued compliance with standards.

In 1951, the Social Work Service of the VA's Department of Medicine and Surgery (DM&S) initiated a program to provide a protected living situation in the community to certain veterans who do not require institutional care but who are not able to live independently because of a physical or mental disability. Since that time, it has been variously called the foster home, the residential care home, and now, the community residential care program. At present, 125 medical centers administer a program of community residential care, with approximately 11,800 veterans in the community in 3,200 locations on any given day.

Section 104(a) of Pub. L. 98-160 (Veterans Health Care Amendments of 1983) requires VA to publish regulations in order to refer veterans to the community residential care program and, in addition, clarifies eligibility for the program. The proposed regulations reflect facility standards which have, for the most part, been informally utilized for many years and, as such, do not create new expectations for facility operators.

Regulatory Flexibility Act (RFA): The Administrator has certified that the proposed regulations will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601 and 612. The proposed regulations reflect standards which have, for the most part, been informally utilized for many years and do not create new expectations for the facility operators which would have a significant economic impact. Also, the regulations do not directly impose any administrative or regulatory burdens on small entities. They concern only the standards which will be used in determining whether the VA will refer veterans to, or aid veterans in obtaining placement in, a particular facility.

Executive Order 12291: These new proposed regulations are considered non-major under the criteria of Executive Order 12291, Federal Regulation. The regulations will not have an annual effect on the economy of $100 million or more; they will not result in major increases in costs for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; nor will they have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The collection of information requirements contained in paragraph 17.51j(i) of this proposed rule have been submitted to the Office of Management and Budget (OMB) for review under section 3504(h) of the Paperwork Reduction Act, Pub. L. 96-511. Comments on the collection of information should be forwarded to the Office of Information and Regulatory Affairs of OMB, Attn: Elaine Norden, Desk Officer for the Veterans Administration, 726 Jackson Place, NW., Washington, DC 20503, (202) 395-7316. Comments should be received within 60 days of this notice.

List of Subjects in 38 CFR Part 17

Alcoholism, Claims, Dental health, Drug abuse, Foreign relations, Government contracts, Grants programs-health, Health care, Health facilities, Health professions, Incorporation by reference, Medical devices, Medical research, Mental health programs, Nursing homes, Philippines, Veterans.

Approved: July 22, 1987.

Thomas K. Turnage,

Administrator.

PART 38—[AMENDED]

38 CFR Part 17, *Medical*, is amended by adding a new undesignated center heading and §§ 17.51h, 17.51i, 17.51j, 17.51k, 17.51l, 17.51m, 17.51n, 17.51o, 17.51p, 17.51q, and 17.51r to read as follows:

Community Residential Care

Sec.
17.51h Eligibility.
17.51i Definitions.
17.51j Approval of community residential care facilities.
17.51k Duration of approval.
17.51l Notice of noncompliance with VA standards.
17.51m Request for a hearing.
17.51n Notice and conduct of hearing.
17.51o Waiver of opportunity for hearing.
17.51p Written decision following a hearing.
17.51q Revocation of VA approval.
17.51r Availability of information.

Community Residential Care

§ 17.51h Eligibility.

VA health care personnel may assist a veteran by referring such veteran for placement in a privately or publicly-owned community residential care facility if:

(a) At the time of initiating the assistance,

(1) The veteran is receiving VA medical services on an outpatient basis or VA hospital, domiciliary, or nursing home care; or

(2) Such care or services were furnished the veteran within the preceding 12 months;

(b) The veteran does not need hospital or nursing home care but is unable to live independently because of medical (including psychiatric) conditions and has no suitable family resources to provide needed monitoring, supervision, and any necessary assistance in the veterans daily living activities; and

(c) The facility has been approved in accordance with § 17.51j.

(Authority: 38 U.S.C. 630)

§ 17.51i Definitions.

For the purposes of §§ 17.51h through 17.51r:

(a) The term "community residential care" means the monitoring, supervision, and assistance, in accordance with a statement of needed care, of the daily living activities of referred veterans in an approved home in the community by the facility's provider.

(b) The term "statement of needed care" means a written description of needed assistance in daily living activities devised by the VA for each referred veteran in the community residential care program.

(c) The term "daily living activities" includes:

(1) Walking;

(2) Bathing, shaving, brushing teeth, combing hair;

(3) Dressing;

(4) Eating;

(5) Getting in or getting out of bed;

(6) Laundry;

(7) Cleaning room;

(8) Managing money;

(9) Shopping;

(10) Using public transportation;

(11) Writing letters;

(12) Making telephone calls;

(13) Obtaining appointments;

(14) Self-administration of medications;

(15) Recreational and leisure activities; and

(16) Other similar activities.

(d) The term "paper hearing" means a review of the written evidence of record by the hearing official.

(e) The term "oral hearing" means the in person testimony of representatives of a community residential care facility and of the VA before the hearing official and the review of the written evidence of record by that official.

(f) The term "approving official" means the Director or, if designated by the Director, the Associate Director or Chief of Staff of a Veterans Administration Medical Center or Outpatient Clinic which has jurisdiction to approve a community residential care facility.

(g) The term "hearing official" means the Director or, if designated by the Director, the Associate Director or Chief of Staff of a Veterans Administration Medical Center or Outpatient Clinic which has jurisdiction to approve a community residential care facility.

(Authority: 38 U.S.C. 630)

§ 17.51j Approval of community residential care facilities.

The approving official may approve a community residential care facility, based on the report of a VA inspection and on any findings of necessary interim monitoring of the facility, if that facility meets the following standards:

(a) *Health and safety standards.* The facility must:

(1) Meet all State and local regulations including construction, maintenance, and sanitation regulations;

(2) Meet the applicable provisions of the 1985 edition of the National Fire Protection Association's Life Safety Code (which is incorporated by reference). The institution shall provide sufficient staff to assist patients in the event of fire or other emergency. Incorporation of the 1985 edition of the Life Safety Code was approved by the Director of the Federal Register on ________. The Code is available for inspection at the Office of the Federal Register, Room 8301, 1100 L Street, NW., Washington, DC. Copies may be obtained from the National Fire Protection Association, Battery March Park, Quincy, MA 02269. If any changes in this Code are also to be incorporated by reference, a notice to that effect will be published in the Federal Register; and

(3) Have safe and functioning systems for heating, hot and cold water, electricity, plumbing, sewage, cooking, laundry, artificial and natural light, and ventilation.

(b) *Health services.* The facility must agree to assist residents in implementing the statement of needed care of daily living activities developed by the Veterans Administration.

(c) *Interior plan.* The facility must:

(1) Have comfortable dining areas, adequate in size for the number of residents;

(2) Have comfortable living room areas, adequate in size to accommodate a reasonable proportion of residents;

(3) Maintain at least one functional toilet, lavatory, and bathing or shower facility for every six people living in the facility, including provider and staff.

(d) *Laundry service.* The facility must provide or arrange for laundry service.

(e) *Residents' bedrooms.* Residents' bedrooms must:

(1) Contain no more than four beds;

(2) Measure, exclusive of closet space, at least 100 square feet for a single-resident room, or 80 square feet for each resident in a multi-resident room; and

(3) Contain a suitable bed for each resident and appropriate furniture and furnishings.

(f) *Nutrition.* The facility must:

(1) Provide a safe and sanitary food service that meets individual nutritional requirements and residents' perferences;

(2) Plan menus to meet currently-recommended dietary allowances;

(g) *Activities.* The facility must plan and facilitate appropriate recreational and leisure activities to meet individual needs specified in the statement of needed care.

(h) *Residents' rights.* The facility must have written policies and procedures that ensure the following rights for each resident:

(1) Each resident has the right to:

(i) Be informed of the rights described in this section;

(ii) The confidentiality and nondisclosure of information obtained by community residential care facility staff on the residents and the residents' records subject to the requirements of applicable law;

(iii) Be able to inspect the residents' own records kept by the community residential care facility;

(iv) Exercise rights as a citizen; and

(v) Voice grievances and make recommendations concerning the policies and procedures of the facility.

(2) *Financial affairs.* Each resident must be allowed to manage their own personal financial affairs. If a resident requests assistance from the facility in managing personal financial affairs, the request must be documented.

(3) *Privacy.* Each resident must:

(i) Be treated with respect, consideration, and dignity;

(ii) Have access, in reasonable privacy, to a telephone within the facility;

(iii) Be able to send and receive mail unopened and uncensored; and

(iv) Have privacy of self and possessions.

(4) *Work.* No resident will perform household duties, other than personal housekeeping tasks, unless the resident receives compensation for these duties or is told in advance they are voluntary and the patient agrees to do them.

(5) *Freedom of association.* Each resident has the right to:

(i) Receive visitors and associate freely with persons and groups of their own choosing both within and outside the facility;

(ii) Make contacts in the community and achieve the highest level of independence, autonomy, and interaction in the community of which the resident is capable;

(iii) Leave and return freely to the facility, and

(iv) Practice the religion of their own choosing or choose to abstain from religious practice.

(6) *Transfer.* Each resident has the right to transfer to another facility or to an independent living situation.

(i) *Records.*

(1) The facility must maintain records on each resident in a secure place.

(2) Facility records must include:

(i) A copy of the statement of needed care;

(ii) Emergency notification procedures; and

(iii) A copy of all signed agreements with the resident.

(3) Records may only be disclosed with the resident's permission, or when required by law.

(j) *Staff requirements.* (1) Sufficient, qualified staff must be on duty and available to care for the resident and ensure the health and safety of each resident.

(2) The community residential care provider and staff must have the following qualifications: Adequate education, training, or experience to maintain the facility.

(k) *Cost of community residential care.* (1) Payment for the charges of community residential care is not the responsibility of the United States Government or the Veterans Administration.

(2) The resident or an authorized personal representative and a representative of the community residential care facility must agree upon the charge and payment procedures for community residential care.

(3) The charges for community residential care must be reasonable:

(i) For residents in a community residential care facility as of the effective date of this regulation, the rates charged for care are pegged to the facility's basic rate for care as of July 31, 1987. Increases in the pegged rate during any calendar year cannot exceed the annual percentage increase in the National CPI (Consumer Price Index) for that year;

(ii) For community residential care facilities approved after July 31, 1987, the rates for care shall not exceed 110 percent of the average rate for approved facilities in that State as of July 31, 1987. Increases in this rate during any calendar year cannot exceed the annual percentage increase in the National CPI for that year.

(iii) The approving official may approve a deviation from the requirements of paragraphs (k)(3) (i) through (ii) of this section for an individual's charge upon request from a community residential care facility representative, a resident in the facility, or an applicant for residency.

(Authority: 38 U.S.C. 630)

§ 17.51k Duration of approval.

(a) Approval may be valid for up to 24 months if the facility complies with all standards during each VA inspection and any necessary interim monitoring for a period of two years.

(b) Approval may be valid for up to 15 months if the facility complies with all standards except § 17.51j(i) during each VA inspection and any necessary interim monitoring.

(c) Approval may be valid for up to 12 months if the facility complies with all standards except §§ 17.51j(d) and 17.51j(i) during each VA inspection and any necessary interim monitoring.

(d) Approval may be valid for up to 9 months if the facility complies with all standards except §§ 17.51j(d), 17.51j(e), 17.51j(g), and 17.5.1j(i) during each VA inspection and any necessary interim monitoring.

(Authority: 38 U.S.C. 630)

§ 17.51l Notice of noncompliance with VA standards.

If the hearing official determines that an approved community residential care facility does not comply with the standards set forth in § 17.51j, the hearing official shall notify the community residential care facility in writing of:

(a) The standards which have not been met;

(b) The date by which the standards must be met in order to avoid revocation of VA approval;

(c) The community residential care facility's opportunity to request an oral or paper hearing under § 17.51l before VA approval is revoked; and

(d) The date by which the hearing official must receive the community residential care facility's request for a hearing, which shall not be less than 10 calendar days and not more than 20 calendar days after the date of the VA notice of noncompliance, unless the hearing official determines that noncompliance with the standards threatens the lives of community residential care residents in which case the hearing official must receive the community residential care facility's request for an oral or paper hearing within 36 hours of receipt of the VA notice.

(Authority: 38 U.S.C. 630)

§ 17.51m Request for a hearing.

The community residential care facility operator must specify in writing whether an oral or paper hearing is requested. The request for the hearing must be sent to the hearing official. Timely receipt of a request for a hearing will stay the revocation of VA approval until the hearing official issues a written decision on the community residential care facility's compliance with VA standards. The hearing official may accept a request for a hearing received after the time limit, if the community residential care facility operator shows that the failure of the request to be received by the hearing official's office by the required date was due to circumstances beyond the operator's control.

(Authority: 38 U.S.C. 630)

§ 17.51n Notice and conduct of hearing.

(a) Upon receipt of a request for an oral hearing, the hearing official shall:

(1) Notify the community residential care facility operator of the date, time, and location for the hearing and

(2) Notify the community residential care facility operator that written statements and other evidence for the record may be submitted to the hearing official before the date of the hearing. An oral hearing shall be informal. The rules of evidence shall not be followed. Witnesses shall testify under oath or affirmation. A recording or transcript of every oral hearing shall be made. The hearing official may exclude irrelevant, immaterial, or unduly repetitious testimony.

(b) Upon the receipt of a community residential care facility's request for a paper hearing, the hearing official shall notify the community residential care facility operator that written statements and other evidence must be submitted to the hearing official by a specified date in order to be considered as part of the record.

(c) In all hearings, the community residential care facility operator and the VA may be represented by counsel.

(Authority: 38 U.S.C. 630)

§ 17.51o Waiver of opportunity for hearing.

If representatives of a community residential care facility which receive a notice of noncompliance under § 17.51m fail to appear at an oral hearing of which they have been notified or fail to submit written statements for a paper hearing in accordance with § 17.51n, unless the hearing official determines that their failure was due to circumstances beyond their control, the hearing official shall:

(a) Consider the representatives of the community residential care facility to have waived their opportunity for a hearing; and,

(b) Revoke VA approval of the community residential care facility and notify the community residential care facility of this revocation.

(Authority: 38 U.S.C. 630)

§ 17.51p Written decision following a hearing.

(a) The hearing official shall issue a written decision within 20 days of the completion of the hearing. An oral hearing shall be considered completed when the hearing ceases to receive in person testimony. A paper hearing shall be considered complete on the date by which written statements must be submitted to the hearing official in order to be considered as part of the record.

(b) The hearing official's determination of a community residential care facility's noncompliance with VA standards shall be based on the preponderance of the evidence.

(c) Written decision shall include:

(1) A statement of the facts;

(2) A determination whether the community residential care facility complies with the standards set forth in § 17.51j; and

(3) A determination of the time period if any the community residential care facility shall have to remedy any noncompliance with VA standards before revocation of VA approval occurs.

(d) The hearing official's determination of any time period under § 17.51p(c)(3) shall consider the safety and health of the residents of the community residential care facility and the length of time since the community residential care facility received notice of the noncompliance.

(Authority: 38 U.S.C. 630)

§ 17.51q Revocation of VA approval.

(a) If a hearing official determines under § 17.51p that a community residential care facility does not comply with the standards set forth in § 17.51j and determines that the community residential care facility shall not have further time to remedy the noncompliance, the hearing official shall revoke approval of the community residential care facility and notify the community residential care facility of this revocation.

(b) Upon revocation of VA approval under § 17.51o of this section, VA health care personnel shall:

(1) Cease referring veterans to the community residential care facility; and,

(2) Notify any veteran residing in the community residential care facility of the facility's disapproval and request permission to assist in the veteran's removal from the facility. If a veteran has a person or entity authorized by law to give permission on behalf of the veteran, VA health care personnel shall notify that person or entity of the community residential care facility's disapproval and request permission to assist in removing the veteran from the community residential care facility.

(c) If the hearing official determines that a community residential care facility fails to comply with the standards set forth in § 17.51j and determines that the community residential care facility shall have an additional time period to remedy the noncompliance, the hearing official shall review at the end of the time period the evidence of the community residential care facility's compliance with the standards which were to have been met by the end of that time period and determine if the community residential care facility complies with the standards. If the community residential care facility fails to comply with these or any other standards, the procedures set forth in §§ 17.51l–17.51r shall be followed.

(Authority: 38 U.S.C. 630)

§ 17.51r Availability of information.

VA standards will be made available to other Federal, State and local agencies charged with the responsibility of licensing, or otherwise regulating or inspecting community residential care facilities.

(Authority: 38 U.S.C. 630)

Editorial Note: This document was received by the Office of the Federal Register on March 22, 1988.

BILLING CODE 8320-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 21

Migratory Bird Permits; Exceptions for Captive-reared Mallards

AGENCY: Fish and Wildlife Service (Service), Interior.

ACTION: Proposed rule; clarification, correction and comment period reopening.

SUMMARY: The Service is correcting the punctuation of the last proviso of 50 CFR 21.13 published on Monday, December 14, 1987 (52 FR 47428), adding information to clarify the intent of the proposed change and reopening the comment period.

DATE: Comments on the permit exceptions for captive-reared mallards part of the proposed rule published in the **Federal Register** on December 14, 1987, will be accepted until April 25, 1988.

ADDRESSES: Submit comments to Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Room 536, Matomic Building, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Keith A. Morehouse or Rollin D. Sparrowe at (202) 254–3207.

SUPPLEMENTARY INFORMATION: On Monday, December 14, 1987, the Service published a proposed rule titled "Zones in which lead shot will be prohibited for the taking of waterfowl, coots and certain other species in the 1988–89 season." This rule also proposed changes for other sections of Part 20 and one change for Part 21, Permit exceptions for captive-reared mallards.

The purpose of the proposed rule change in Part 21 (§ 21.13) was simply to correct an anomaly existing under the current regulations relating to nontoxic shot requirements (§ 20.108). The taking of *wild* waterfowl on "game farms" has been, and will continue to be, subject to the nontoxic shot requirement of the county(s) of which it is a part and other regulations of Part 20, which traditionally focus upon bag limits, season lengths, etc. Likewise, any taking of *wild* waterfowl during dog training activities or during field trial operations remains subject to Part 20 regulations. However, taking of one species of *captive-reared waterfowl*, captive-reared mallards, on "game farms," or during bona fide dog training or field trial activities, has long been specifically exempt from the Service's Part 20 hunting regulations despite the fact that all other captive-reared migratory waterfowl have traditionally been covered by the Part 20 regulations (50 CFR 21.14(d)). With the Service's adoption of the plan to phase-in nationwide nontoxic shot requirements, however, this exemption for captive-reared mallards from otherwise applicable taking requirements would have exempted "game farms," bona fide dog training activities and field trials from nontoxic shot rules as well. The Service has reason to believe that lead shot deposited or embedded on such "game farms," in bona fide dog training activities and in field trial operations is just as harmful to wild waterfowl and bald eagles as lead shot deposited or embedded at other times and places, within a county covered by nontoxic shot requirements. It is accordingly necessary to change the existing blanket exemption for all hunting regulations for captive-reared mallards to one which requires nontoxic shot rules to be applied pursuant to the phase-in, as with other captive-reared migratory waterfowl.

In context of the above, the Service wishes to emphasize the following:

- *The section proposed to be revised deals only with captive-reared mallards that are taken under the permit requirements of the Federal regulations.*
- *This proposal would not change the existing regulations restricting hunting of any other captive-reared species, or use of other captive-reared species in dog trials or dog training. The subsection to which this amendment will be added begins "Captive-reared and properly marked mallard ducks . . . may be acquired . . . and disposed of by any person without a permit, subject to the following conditions. . ."* (50 CFR 21.13, Permit exceptions for captive-reared mallards)
- *This regulation is not aimed at bona fide dog training or trials where it is apparent that no one is attempting to take migratory birds. While the words being amended might appear to relate to such trials, the section into which they fit relates only to the taking of captive-reared mallards.*
- *The proposed revision is aimed at establishing a uniform zone requirement for requiring nontoxic shot to take waterfowl, thus, eliminating the potential for wild waterfowl and bald eagles to be lead-poisoned from ingestion of lead shot. This regulatory change will ensure that when a county is phased in for nontoxic shot use the "game farms" or bona fide dog training or field trial operations within that county that are shooting captive-reared mallards are phased in at the same time.*
- *Among these other objectives, this proposal would provide regulatory consistency across nontoxic shot zones and, therefore, consistency in enforcement.*

Also, in the Part 21, § 21.13 proposed change, a comma was inadvertently misplaced that makes the last proviso language of subsection (d) read incorrectly. The selected portion of that subsection should read (and, if promulgated, will read) "(d) . . . Provided further, That the provisions of the hunting regulations (Part 20 of this subchapter), with the exception of § 20.108 (Nontoxic shot zones), and the Migratory Bird Hunting Stamp Act (duck stamp requirement) shall not apply * * *" Thus, this portion of the regulations language should clearly indicate that the traditional regulations of Part 20, bag limits, season length, etc., and a Migratory Bird Hunting Stamp are not and will not be required to hunt *captive-reared mallards* on shooting preserves or to take *captive-reared mallards* by shooting in the course of conducting field trials or during bona fide dog training activities. However, a Migratory Bird Hunting Stamp and the traditional Part 20 regulations are applicable to the taking of *wild waterfowl*, or all other captive-reared migratory waterfowl, when done either apart from or in conjunction with the taking of captive-reared mallards on shooting preserves, in field trials or during any dog training activities.

The comment period on the permit exceptions for captive-reared mallards portion of the proposed rule published on December 14, 1987, is being reopened upon publication of this notice in the Federal Register; the reopened comment period will close 30 days thereafter.

Dated: March 11, 1988.

William P. Horn,

Assistant Secretary for Fish and Wildlife and Parks.

ACTION

VISTA Literacy Corps Projects; Availability of Funds

AGENCY: ACTION.

ACTION: Notice of Availability of Funds; VISTA Literacy Corps Projects.

ACTION announces the availability of funds for fiscal year 1988 for new VISTA Literacy Corps grants authorized by section 109 of the Domestic Volunteer Service Act Amendments of 1986 (Pub. L. 99-551) in the States of New York, Pennsylvania, Georgia, and California, and the Commonwealth of Puerto Rico. VISTA Literacy Corps grants will be awarded for up to a twelve month period. No requests for renewals or continuations may be sought by grantees under this announcement.

Application packages and technical assistance on grant preparation are available from: New York and Puerto Rico—Joe Gallick, ACTION Region 2, 6 World Trade Center, Room 758, New York, NY 10048-0206, (212) 466-2936; Pennsylvania—Helen Griffin, ACTION Region 3, U.S. Customs House, 2d & Chestnut Street, Room 108, Philadelphia, PA (215) 597-0741; Georgia—Kareemah Rasheed, ACTION, Region 4, 101 Marietta Street, NW., Suite 1003, Atlanta, GA 30323, (404) 331-2859; California—Patrick Twohig, ACTION, Region 9, 211 Main Street, Room 530, San Francisco, CA 94105, (415) 974-0675.

A. Background and Purpose

Volunteers In Service to America (VISTA) is authorized under Title I, Part A of the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93-113). The statutory mandate of the VISTA program is to eliminate and alleviate poverty and its related problems in the United States. VISTA is a full-time, year-long volunteer program which encourages and enables men and women 18 years and older from all backgrounds to perform meaningful and constructive volunteer service. The Volunteers live among, and at the economic level of, the low-income people served. The VISTA program has served poor individuals most effectively by assisting low-income communities and residents to develop the facility, skills, and resources needed for achieving self-sufficiency. VISTA also enlists the commitment and support of the private sector toward attainment of this goal. Literacy training and education represent a longstanding and integral part of the VISTA mission. VISTA Volunteers have been involved in the mobilization of community efforts to combat illiteracy among disadvantaged populations since the inception of the VISTA program.

The Domestic Volunteer Service Act Amendments of 1986 directed the VISTA program to commit additional volunteers to the literacy challenge through the formation of the VISTA Literacy Corps.

The statutory purpose of the VISTA Literacy Corps is to use VISTA Volunteers in developing, strengthening, supplementing and expanding the literacy efforts of both public and private nonprofit organizations at the local, State, and Federal levels to mobilize local, State, Federal and private sector financial and volunteer resources in attacking the problem of illiteracy, particularly within low-income areas throughout the United States. In addition, the VISTA Literacy Corps will encourage public/private partnerships; promote voluntarism; heighten the visibility of the literacy issue; and increase the capacity of low-income communities to address their respective literacy needs.

Objectives

ACTION will be awarding grants for the placement of VISTA Literacy Corps Volunteers in the following States:

New York and Commonwealth of Puerto Rico (Region 2)
Pennsylvania (Region 3)
Georgia (Region 4)
California (Region 9)

The grants will utilize VISTA Volunteers in the following emphasis areas:

1. Literacy projects to provide comprehensive services that will curb the intergenerational transfer of illiteracy within low-income families by instructing parents and children together. In particular VISTA will seek literacy programs affiliated with libraries and Head Start projects that focus on the overall concerns of low-income families in need. Such programs should have the reading materials available that will entice and challenge all age groups represented in the family unit.
2. Literacy projects that provide special programs that will benefit unemployed parents. Cooperative arrangements with social services offices and job training partnership sites will receive priority consideration.
3. Literacy projects to concentrate on preventive educational training for potential school dropouts and other low-income young adults who may be "educationally at risk" as well as programs that offer retraining and remedial skills enhancement, particularly to inner-city youth.
4. Literacy projects that assist migrant and immigrant families who are seeking permanent resident status under the Immigration Control and Reform Act or other low-income individuals who would achieve literacy in English through such training.

B. Eligible Applicants

Eligible applicants for the VISTA Literacy Corps grants include: public or private nonprofit agencies; local, State and national literacy councils and organizations; community-based nonprofit organizations; local and state education agencies; local and state agencies administering adult basic education programs; educational institutions; libraries; anti-poverty organizations; and local, municipal and State governmental entities designated to administer job training plans under the Job Training Partnership Act.

C. Scope of Grant

Each grant will support 10-15 VISTA Volunteers for one year of service. The amount of each grant includes the monthly subsistence and readjustment allowance for VISTA Volunteers. This support is commensurate with the cost-of-living of the assignment area and covers the cost of food, housing and incidentals, and a monthly stipend paid to the VISTA Literacy Corps Volunteer upon completion of his/her service.

The average Federal cost of one volunteer service year, i.e. total Federal cost divided by total number of VISTA volunteers, cannot exceed $8,000 nor will the amount of Federal funding for a single grant exceed $120,000. Grants of 10–15 volunteers may range from $80,000—$120,000 in Federal funds.

Applicants should demonstrate their commitment for matching the Federal contribution toward the operation of the VISTA Literacy Corps grant in the areas of volunteer transportation, supervision, and/or training. This support can be achieved through cash or allowable in-kind contributions. In particular, there must be a 50% non-Federal match for the supervisor's salary and fringe benefits. The supervisor of the VISTA project must serve on a full-time basis.

Publication of this announcement does not obligate ACTION to award any specific number of grants or to obligate the entire amount of funds available, or any part thereof, for grants under the VISTA Literacy Corps program.

D. General Criteria for Grant Selection

The general criteria for the VISTA Literacy Corps projects are consistent with those established for the selection of VISTA sponsors and projects. All of the following elements must be incorporated in the applicant's submission.

The project must:

- Be poverty-related in scope and otherwise comply with the provisions of the Domestic Volunteer Service Act of 1973 as amended (42 U.S.C. 4951, *et seq.*) applicable to VISTA and all published regulations, guidelines and ACTION policies;
- Comply with applicable financial and fiscal requirements established by ACTION or other elements of the Federal Government;
- Show that the goals, objectives, and volunteer tasks are attainable within the time frame during which the volunteers will be working on the project and will produce a measurable and verifiable result;
- Provide for reasonable efforts to recruit and involve low-income community residents in the planning, development and implementation of the VISTA project;
- Outline specific plans for the continuation of program activities upon the completion of ACTION funding;
- Have evidence of local public and private sector support (in the form of endorsement letters limited to those organizations, government entities, and institutions that are aware of and will be involved in supporting the VISTA project's efforts);
- Have a permanent mechanism of self-evaluation;
- Provide frequent and effective supervision of the volunteers;
- Identify resources needed and make them available to volunteers to perform their tasks;
- Have the management and technical capability to implement the project successfully.

In addition to the general criteria, the authorizing statute stipulates that priority consideration will be given to the following literacy programs and projects that apply for funding:

- Those that assist individuals in greatest need of literacy training who reside in unserved or underserved areas with the highest concentration of illiteracy and of low-income individuals and families;
- Those that serve individuals reading at zero to fourth grade levels;
- Those that focus on providing literacy services to high risk populations;
- Those that operate in areas with the highest concentration of individuals and families living at or below the poverty level;
- Those providing literacy services to parents of disadvantaged children between the ages of two and eight who may be educationally at risk; and
- Statewide programs and projects that encourage the creation of new literacy efforts, encourage coordination of intrastate literacy efforts and provide technical assistance to local literacy efforts.

E. Application Review Process

ACTION Regions 2, 3, 4 and 9 will review and evaluate all eligible applications from the State/Commonwealth within their jurisdiction prior to submission to the Director of VISTA and Student Community Service Programs, ACTION, for final selection. ACTION reserves the right to ask for evidence of any claims of past performance or future capability.

F. Application Submission and Deadline

One signed original and two copies of all completed applications must be submitted to the appropriate ACTION Regional Office as noted in paragraph 2 of this announcement. The deadline for receipt of applications is 5 PM local time, Friday, May 13, 1988. Applications post-marked 5 days before the deadline date will also be accepted for consideration.

All grant applications must consist of:

a. VISTA Project Application (Form A–1421) and the VISTA Application for Federal Assistance (Form A–1421 B) with a detailed budget justification.

b. CPA certification of accounting capability.

c. Copy of recent Articles of Incorporation.

d. Proof of non-profit status or an application for non-profit status, and related documentation.

e. Current resume of potential VISTA Supervisor, if available, or the resume of the director of the applicant agency or project.

f. Organizational chart illustrating the relationship of the VISTA project to the overall objectives of the sponsor organization.

g. List of the members of the Board of Directors including their professional affiliations and/or literacy-related activities.

Signed at Washington, DC this 22d day of March, 1988.

Donna M. Alvarado,

Director.

BILLING CODE 6050-28-M

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

Advisory Committee Meeting

Pursuant to the provisions of section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), a notice is hereby given of the following committee meeting:

Name: Federal Grain Inspection Service Advisory Committee.

Date: April 15, 1988.

Place: Capitol Holiday Inn, 550 C Street, SW., Washington, DC 20024.

Time: 8:30 a.m.

Purpose: To provide advice to the Administrator of the Federal Grain Inspection Service on the efficient and economical implementation of the U.S. Grain Standards Act of 1976 and to assure the normal movement of grain in an orderly and timely manner.

The agenda includes: (1) A report from the Scientific Orientation Group; (2) financial matters; (3) updates on such items as wheat classification, oil and protein content in soybeans, CuSum, and Grain Quality Improvement Act of 1986 implementation; (4) use of independent surveyors; and (5) other matters.

The meeting will be open to the public. Public participation will be limited to written statements unless otherwise requested by the Committee Chairman. Persons, other than members, who wish to address the Committee at the meeting or submit written statements before or at the meeting should contact W. Kirk Miller, Administrator, FGIS, U.S. Department of Agriculture, P.O. Box 96454, Washington, DC 20090-6454, telephone (202) 382-0219.

Dated: March 17, 1988.

W. Kirk Miller,

Administration.

DEPARTMENT OF COMMERCE

International Trade Administration

Short-Supply Review on Certain Flat-Rolled Steel; Request for Comments

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice and request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for a short-supply determination under Article 8 of the U.S.-EC Arrangement on Certain Steel Products, with respect to certain hot-rolled sheet and strip used to manufacture bi-metal band saws.

DATE: Comments must be submitted on or before April 4, 1988.

ADDRESS: Send all comments to Nicholas C. Tolerico, Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230, (202) 377–0159.

SUPPLEMENTAL INFORMATION: Article 8 of the U.S.–EC Arrangement on Certain Steel Products provides that if the U.S." * * * determines that because of abnormal supply or demand factors, the US steel industry will be unable to meet demand in the USA for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors), an additional tonnage shall be allowed for such product or products * * *."

We have received a short-supply request for certain D6A hot-rolled alloy steel sheet and strip, ranging from 0.080 to 0.125 inch in thickness and from 10 to 16 inches in width. This material is used to produce cold-rolled steel strip for bi-metal band saws.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than April 4, 1988. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly identify the business proprietary portion of the submission and also provide a nonproprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Room B–099, Import Administration, U.S. Department of Commerce, at the above address.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

March 22, 1988.

Anhydrous Sodium Metasilicate From France, Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On January 19, 1988, the Department of Commerce published the preliminary results of its administrative review of the antidumping duty order on anhydrous sodium metasilicate from France. The review covers one exporter of this merchandise to the U.S., Rhone Poulenc Chimie de Base ("Rhone Poulenc"), and the period January 1, 1986 through December 31, 1986. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

We gave interested parties an opportunity to comment on the preliminary results. We received no comments.

FOR FURTHER INFORMATION CONTACT: Marquita Banner or Phyllis Derrick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 377–2923.

EFFECTIVE DATE: March 25, 1988.

SUPPLEMENTARY INFORMATION:

Background

On January 19, 1988, the Department of Commerce ("the Department") published in the Federal Register (53 FR 1392) the preliminary results of its administrative review of the antidumping duty order on anhydrous sodium metasilicate from France (46 FR 1677, January 7, 1981). The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

Imports covered by the review are shipments of anhydrous sodium metasilicate, a crystalline silicate (Na2Si03) which is alkaline and readily soluble in water. Applications include waste paper de-inking ore-flotation, bleach stabilization, clay processing, medium or heavy duty cleaning, and compounding into other detergent formulations. Anhydrous sodium metasilicate is currently classifiable under TSUSA number 421.3400 and HS item numbers 2839.11.00 and 2839.19.00.

The review covers one exporter of French anhydrous sodium metasilicate, Rhone Poulenc, and the period January 1, 1986 through December 31, 1986. There were no known shipments of this merchandise by Rhone Poulenc to the United States during the period and there are no known unliquidated entries.

Final Results

We gave interested parties an opportunity to comment on the preliminary results. We received no comments. The final results of our review are the same as those presented in the preliminary results of the review. Because there were no shipments during this review we based our margin determination on the last margin found in this proceeding, and we determined that the following margin exists:

Manufacturer/Exporter	Time Period	Margin (Percent)
Rhone Poulenc	1/86–12/86	[1] 60

[1] No shipments during the period.

As provided for in section 751(a)(1) of the Act, a cash deposit of estimated antidumping duties based on the above margin shall be required for this firm. For any future entries of this merchandise from a new exporter not covered in this or prior administrative reviews, whose first shipments occurred after December 31, 1986 and who is unrelated to any reviewed firm, a cash deposit of 60 percent shall be required. This deposit requirement is effective for all shipments of French anhydrous sodium metasilicate entered, or withdrawn from warehouse, for consumption on or after the date of

VOL. 53
ISS 58
MR 25
988
UMI

publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53a of the Commerce Regulations (19 CFR 353.53a).

Date: March 21, 1988.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-122-016]

Choline Chloride From Canada; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On January 8, 1988, the Department of Commerce published the preliminary results of its administrative review and tentative determination to revoke the antidumping duty order on choline chloride from Canada. The review covers Chinook Chemicals Co., Ltd. and the period November 1, 1985 through November 16, 1986.

We gave interested parties an opportunity to comment on the preliminary results and tentative determination to revoke. We received no comments. Based on our analysis, the final results of review are unchanged from those presented in the preliminary results.

EFFECTIVE DATE: March 25, 1988.

FOR FURTHER INFORMATION CONTACT: Edward Haley or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-5255.

SUPPLEMENTARY INFORMATION:

Background

On January 8, 1988, the Department of Commerce ("the Department") published in the **Federal Register** (53 FR 548) the preliminary results of its administrative review and tentative determination to revoke the antidumping duty order on choline chloride from Canada (49 FR 45469, November 16, 1984). The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

Imports covered by the review are shipments of choline chloride, currently classifiable under item 439.5055 of the Tariff Schedules of the United States Annotated and item number 2923.10.00 of the Harmonized System. Choline chloride is marketed in several forms including, but not limited to, a solution of 70 percent choline chloride in water (aqueous choline chloride) or in potencies of 50 to 60 percent dried on a cereal carrier.

The review covers Chinook Chemicals Co., Ltd. and the period November 1, 1985 through November 16, 1986.

Final Results of the Review

We invited interested parties to comment on the preliminary results. We received no comments. Based on our analysis, the final results of review are unchanged from those presented in the preliminary results, and we determine that a *de minimis* weighted-average margin of 0.06 percent exists for Chinook Chemicals Co., Ltd. for the period November 1, 1985 through November 16, 1986.

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentage stated above. The Department will issue appraisement instructions directly to the Customs Service.

Further, because the margin for Chinook is *de minimis*, the Department waives the estimated antidumping duty cash deposit required under section 751(a)(1) of the Tariff Act for that firm. For any shipments of this merchandise from an exporter whose first shipments occurred after November 16, 1986 and who is unrelated to Chinook Chemicals Co., Ltd., no cash deposit shall be required.

These cash deposit requirements and waiver are effective for all shipments of choline chloride entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1) and § 353.53a of the Commerce Regulations (19 CFR 353.53a).

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

Date: March 21, 1988.

Scripps Clinic and Research Foundation et al.; Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket Number: 88-027. *Applicant:* Scripps Clinic and Research Foundation, La Jolla, CA 92037. *Instrument:* Electron Microscope, Model CM12. *Manufacturer:* N.V. Philips, The Netherlands. *Intended Use:* See notice at 52 FR 46813, December 10, 1987. *Instrument Ordered:* August 19, 1987.

Docket Number: 88-030. *Applicant:* University of Southwestern Louisiana, Lafayette, LA 70504. *Instrument:* Electron Microscope, Model H-7000-3. *Manufacturer:* Hitachi Scientific Instruments, Japan. *Intended Use:* See notice at 52 FR 46814, December 10, 1987. *Instrument Ordered:* July 1, 1987.

Docket Number: 88-034. *Applicant:* Bethesda Eye Institute, St. Louis University School of Medicine, St. Louis, MO 63110. *Instrument:* Electron Microscope, Model JEM-1200EX. *Manufacturer:* JEOL, Ltd., Japan. *Intended Use:* See notice at 52 FR 48557, December 23, 1987. *Instrument Ordered:* July 16, 1987.

Docket Number: 88-037. *Applicant:* California State University, Chico, Chico, CA 95929. *Instrument:* Electron Microscope, Model H-300. *Manufacturer:* Hitachi Scientific Instruments, Japan. *Intended Use:* See notice at 52 FR 48557, December 23, 1987. *Instrument Ordered:* June 30, 1987.

Docket Number: 88-045. *Applicant:* University of Virginia, Charlottesville, VA 22908. *Instrument:* Electron Microscope, Model JEM-100CX. *Manufacturer:* JEOL, Ltd., Japan. *Intended Use:* See notice at 52 FR 48651, December 28, 1987. *Application Received by Commissioner of Customs:* November 25, 1987.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered. *Reasons:* Each foreign instrument is a conventional transmission electron microscope (CTEM) and is intended for research or scientific educational uses requiring a CTEM. We know of no CTEM, or any other instrument suited to these purposes, which was being manufactured in the United States either at the time of order of each instrument or at the time of receipt of application by the U.S. Customs Service.

Antidumping Duty Order of Sales at Less Than Fair Value; Stainless Steel Butt-Weld Pipe and Tube Fittings From Japan

AGENCY: International Trade Administration, Commerce.

ACTION: Notice

SUMMARY: In separate investigations concerning stainless steel butt-weld pipe and tube fittings (SSPF) from Japan, the United States Department of Commerce (the Department) and the United States International Trade Commission (the ITC) have determined that SSPF from Japan are being sold at less than fair value and that sales of SSPF from Japan are materially injuring a U.S. industry. Therefore, based on these findings, all unliquidated entries, or warehouse withdrawals of SSPF, for consumption from Japan, excluding those entries of Fuji Acetylene Industrials, Co., Ltd. (Fuji), made on or after September 16, 1987, the date on which the Department published its "Preliminary Determination" notice in the **Federal Register**, will be liable for the possible assessment of antidumping duties. Further, a cash deposit of estimated antidumpint duties must be made on all such entries, and withdrawals from warehouse, for consumption made on or after the date of publication of this antidumping duty order in the **Federal Register**.

EFFECTIVE DATE: March 25, 1988.

FOR FURTHER INFORMATION CONTACT: Judith Nehring (202)— 377-0160 or Michael Ready (202) 377-2613, Office of Investigations, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION: The products covered by this order are SSPF, whether finished or unfinished, including as-formed tubular blanks (blanks), under 14 inches in inside diameter, as provided for in the *Tariff Schedules of the United States Annotated* (TSUSA) item 610.8940. The corresponding Harmonized System (HS) number is 7307.23.00.

In accordance with section 735(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1673(a)) (the Act), on January 29, 1988, the Department made its final determination that SSPF from Japan were being sold at less than fair value (53 FR 3227, February 4, 1988). On March 14, 1988, in accordance with section 735(d) of the Act, the ITC notified the Department that such imports materially injure a U.S. industry.

Therefore, in accordance with section 736 of the Act (19 U.S.C. 1673e), the Department directs United States Customs officers to assess, upon further advice by the administering authority pursuant to section 736(a)(1) of the Act (19 U.S.C. 1673(a)(1), antidumping duties equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of SSPF from Japan. These antidumping duties will be assessed on all unliquidated entries of SSPF entered, or withdrawn from warehouse, excluding those entries of Fuji, for consumption on or after September 16, 1987, the date on which the Department published its "Preliminary Determination" notice in the **Federal Register** (52 FR 34873).

On and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins noted below:

Manufacturers/producers/exporters	Weighted-average margin percentage
Nippon Benkan Kogyo, K.K.	37.24
Fuji Acetylene Industries, Co., Ltd	[1] 0.08
Mie Horo	65.06
All others	49.31

[1] *De minimis.*

This determination constitutes an antidumping duty order with respect to SSPF from Japan, pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)) and § 353.48 of the Commerce Regulations (19 CFR 353.48). We have deleted from the Commerce Regulations, Annex I of 19 CFR Part 353, which listed antidumping duty findings and orders currently in effect. Instead, interested parties may contact the Central Records Unit, Room B-099, Import Administration, for copies of the updated list of orders currently in effect.

This notice is published in accordance with section 735(d) of the Act (19 U.S.C. 1673(d)) and § 353.48 of the Commerce Regulations (19 CFR 353.48).

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

March 20, 1988.

BILLING CODE 3510-DS-M

[A-588-068]

Steel Wire Strand for Prestressed Concrete From Japan; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On January 8, 1988, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on steel wire strand for prestressed concrete from Japan. The review covers seven manufacturers and/or exporters of this merchandise to the United States and the period December 1, 1985 through November 30, 1986.

We have interested parties an opportunity to comment on the preliminary results. We received no comments. Based on our analysis, the final results of review are unchanged from those presented in the preliminary results.

EFFECTIVE DATE: March 25, 1988.

FOR FURTHER INFORMATION CONTACT: Edward Haley or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-5255.

SUPPLEMENTARY INFORMATION:

Background

On January 8, 1988, the Department of Commerce ("the Department") published in the **Federal Register** (53 FR 551) the preliminary results of its administrative review of the antidumping finding on steel wire strand for prestressed concrete from Japan (43 FR 57599, December 8, 1978). The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

Imports covered by the review are shipments of steel wire strand, other than alloy steel, not galvanized, stress-relieved and suitable for use in prestressed concrete. Steel wire strand for prestressed concrete is currently classifiable under item 642.1120 of the Tariff Schedules of the United States Annotated and item number 7312.10.30.15 of the Harmonized System.

The review covers seven manufacturers and/or exporters of Japanese steel wire strand for prestressed concrete to the United States and the period December 1, 1985 through November 30, 1986. We deferred review of Mitsui & Co., Ltd. We will cover that firm in a separate review. We could not locate Freyssinet International, and we have no record of shipments from that firm; therefore, we did not include Freyssinet in this administrative review. Should Freyssinet begin exporting the covered merchandise to the United States, we shall treat that company as a new exporter.

There were no known shipments of this merchandise to the United States during the period, and there are no known unliquidated entries.

Final Results of the Review

We invited interested parties to comment on the preliminary results. We received no comments. Based on our analysis, the final results of review are unchanged from those presented in the preliminary results, and we determine that the following weighted-average margins exist for the period December 1, 1985 through November 30, 1986:

Manufacturer/exporter	Margin (percent)
Kokoku Steel Wire, Ltd.	(*)
Mitsubishi Corp.	(*)
Nissho Iwai Co., Ltd.	(*)
Shinko Wire Co., Ltd.	(*)
Suzuki Metal Industry Co., Ltd.	(*)
Teikoku Sangyo Co., Ltd.	(*)
Tokyo Rope Mfg. Co., Ltd.	(*)

*No shipments during the period. Margins were obtained from the last review where there were shipments.

As provided for in section 751(a)(1) of the Tariff Act, the Department will instruct the Customs Service to collect a cash deposit of estimated antidumping duties for each firm based upon the above margins. For any shipments from the remaining known manufacturers and/or exporters not covered by this review, a cash deposit shall be required at the rates published in the final results of the last administrative review for each of those firms. For any shipments from a new exporter, whose first shipments occurred after November 30, 1986 and who is unrelated to any reviewed firm, or previously reviewed firm, no cash deposit shall be required. These deposit requirements are effective for all shipments of Japanese steel wire strand for prestressed concrete entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53a of the Commerce Regulations (19 CFR 353.53a).

Date: March 21, 1988.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Initiation of Antidumping and Countervailing Duty Administrative Reviews

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of initiation of antidumping and countervailing duty administrative reviews.

SUMMARY The Department of Commerce has received requests to conduct administrative reviews of various antidumping and countervailing duty orders, findings, and suspension agreements. In accordance with the Commerce Regulations, we are initiating those administrative reviews.

EFFECTIVE DATE: March 25, 1988.

FOR FURTHER INFORMATION CONTACT: William L. Matthews or Richard W. Moreland, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-5253/2786.

SUPPLEMENTARY INFORMATION:

Background

On August 13, 1985, the Department of Commerce (the Department) published in the **Federal Register** (50 FR 32556) a notice outlining the procedures for requesting administrative reviews. The Department has received timely requests, in accordance with § 353.53a(a)(2), (a)(3), and § 355.10(a)(1) of the Commerce Regulations, for administrative reviews of various antidumping and countervailing duty orders, findings and suspension agreements.

Initiation of Reviews

In accordance with §§ 353.53a(c) and 355.10(c) of the Commerce Regulations, we are initiating administrative reviews of the following antidumping and countervailing duty orders and findings. We intend to issue the final results of these reviews no later than March 31, 1989.

Antidumping duty proceedings and firms	Periods to be reviewed
Racing plates from Canada: Niagara Forging	2/1/87-1/31/88
Steel wire strand for prestressed concrete from Japan: Mitsui	12/1/85-11/30/87

Countervailing duty proceedings	Periods to be reviewed
Unprocessed float glass from Mexico	1/1/87-12/31/87
Carbon steel wire rod from Saudi Arabia	1/1/87-12/31/87

Interested parties are encouraged to submit applications for administrative protective orders as early as possible in the review process.

These initiations and this notice are in accordance with section 751(a) of the Tariff Act of 1930 (19 U.S.C. 1675(a)) and 19 CFR 353.53a(c) and 355.10(c).

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

Date: March 21, 1988.

Canned Tuna From the Philippines; Final Results of Changed Circumstances Administrative Review and Revocation of Countervailing Duty Order

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of final results of changed circumstances administrative review and revocation of countervailing duty order.

SUMMARY: On January 20, 1988, the Department of Commerce published the preliminary results of its changed circumstances administrative review of the countervailing duty order on canned tuna from the Philippines and announced its tentative determinaion to revoke the order. The review covers the period from January 1, 1986.

We gave interested parties an opportunity to comment. We received no comments. We determine that domestic interested parties are no longer interested in continuation of the order, and we are revoking the order on merchandise entered, or withdrawn from warehouse, for consumption on or after January 1, 1986.

EFFECTIVE DATE: January 1, 1986.

FOR FURTHER INFORMATION: Christopher Beach or Bernard Carreau, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On January 20, 1988, the Department of Commerce ("the Department") published in the **Federal Register** (53 FR 1504) the preliminary results of its changed circumstances administrative review of the countervailing duty order on canned tuna from the Philippines (48 FR 50133, October 31, 1983). The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

Imports covered by the review are shipments of Philippine tuna packed and preserved in any manner, not in oil, in airtight containers. Such merchandise is currently classifiable under TSUSA item numbers 112.3020, 112.3040, and 112.3460. These imports are currently classifiable under HS item numbers 1604.14.20 and 1604.14.30. The review covers the period from January 1, 1986.

Final Results of Review and Revocation

We gave interested parties an opportunity to comment on the preliminary results and tentative determination to revoke. We received no comments.

As a result of our review, we determine that domestic interested parties are no longer interested in continuation of the countervailing duty order on canned tuna from the Philippines and that the order should be revoked on this basis.

Therefore, we are revoking the order on canned tuna from the Philippines effective January 1, 1986. We will instruct the Customs Service to liquidate, without regard to countervailing duties, all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after January 1, 1986, and to refund with interest any estimated countervailing duties collected with respect to those parties.

This administrative review, revocation, and notice are in accordance with section 751(b) and (c) of the Tariff Act (19 U.S.C. 1675(b), (c)) and 19 CFR 355.41, 355.42.

Gilbert B. Kaplan,

Acting Assistant Secretary, Import Administration.

Date: March 21, 1988.

BILLING CODE 3510-DS-M

[C-469-004]

Stainless Steel Wire Rod From Spain; Preliminary Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative review.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on stainless steel wire rod from Spain. The review covers the period January 1, 1986 through December 31, 1986 and six programs.

As a result of our review, we preliminarily determine the net subsidy to be 1.28 percent *ad valorem* during the period of review. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: March 25, 1988.

FOR FURTHER INFORMATION CONTACT: Susan Silver or Paul McGarr, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-3337.

SUPPLEMENTARY INFORMATION:

Background

On January 3, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 52) a countervailing duty order on stainless steel wire rod from Spain. On January 30, 1987, a Spanish exporter, Roldan, S.A., requested in accordance with 19 CFR 355.10 an administrative review of this order. We published the initiation of the administrative review on February 23, 1987 (52 FR 5479). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System ("HS"). In view of this, we will be providing both the appropriate Tariff Schedules of the United States Annotated ("TSUSA") item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as the TSUSA item number(s) in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultation at the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by the review are shipments of Spanish stainless steel wire rod which includes coiled, semi-finished, hot-rolled stainless steel products of approximately round solid cross-section, not under 0.20 inch nor over 0.74 inch in diameter, not tempered or treated, not partly manufactured, and valued over 4 cents per pound. Such merchandise is currently classifiable under TSUSA item number 607.2600. This product is currently classifiable under HS item numbers 7221.00.00.20 and 7221.00.00.40. We invite comments from all interested parties on this HS classification.

The review covers the period January 1, 1986 through December 31, 1986 and six programs. Roldan, S.A., was the only known Spanish exporter of stainless steel wire rod to the United States during the period of review.

Analysis of Programs

(1) Long-Term Loans

Under the Concerted Action Program established by Royal Decree 669/74, the Spanish government directs banks to make long-term loans to steel companies at below market rates. Such loans are provided for approximately ten years. Roldan received a long-term loan for financing new plant and equipment that had an outstanding balance during the

OL 53 ISS 58 MR 25 988 MI

review period. The loan was received in multiple disbursements from 1977 to 1981. Because loans under the Concerted Action Program are provided to a specific industry at rates and terms inconsistent with commercial considerations, we preliminarily determine that this loan confers a countervailable domestic subsidy.

To calculate the benefit, we treated the multiple disbursements as individual loans. We used the long-term loan methodology in the Subsidies Appendix attached to the *Final Affirmative Countervailing Duty Determination and Countervailing Duty Order on Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina* (49 FR 18006, April 26, 1984). Roldan did not obtain any comparable commercial loans in the year in which it received the preferential long-term loan. Therefore, we used as our long-term commercial benchmark the "free" long-term (three or more years) lending rate published by the Bank of Spain in its *Boletin Estadistico.* Because we were unable to obtain the national average rate of return on equity to calculate the weighted cost of capital, we used the long-term commercial benchmark rate as the discount rate.

Since these loans benefit a company's total production, we allocated the benefit over the company's total sales during the review period. On this basis, we preliminarily determine the benefit from this program to be 0.33 percent *ad valorem* during the review period.

(2) Operating Capital Loans

Until January 1, 1986, the Spanish government required banks to set aside funds for short-term operating capital loans as part of its Privileged Circuit Exporter Credit program, which provided short-term financing to exporters at preferential rates. The operating capital loans were granted for a period of up to one year. This program was phased out, pursuant to a Treasury Order of Aprl 14, 1982, and terminated effective January 1, 1986. Roldan received two loans from this program in 1985 on which interest was due during the review period. Because this program is contingent upon export performance, we preliminarily determine that it confers a countervailable benefit on exports.

To calculate the benefit, we used our short-term loan methodology as described in the Subsidies Appendix. We used as our commercial benchmark the "free" one-to-three year lending rate published in the *Boletin Estadistico*, the only available benchmark for short-term loans of up to one year.

Since operating capital loans are not tied to specific export transactions, we allocated the benefit over Roldan's total exports during the review period. On this basis, we preliminarily determine the benefit to be 0.18 percent *ad valorem.*

Because this program has been terminated effective January 1, 1986, we preliminarily determine that for this program the cash deposit of estimated countervailing duties will be zero.

(3) Prefinancing of Exports

As part of its Privileged Circuit Exporter Credit program, the Spanish government, under Royal Decree 2254/85 of November 20, 1985, required banks to set aside a specific percent of lendable funds for prefinancing exports. The maximum amount of allowable funds for prefinancing of exports was 85 percent of the invoice value until July 1, 1986, when it was reduced to 68 percent. The maximum term of these loans was 90 days and the interest rate ranged between 10 and 10.5 percent. Because this program is contingent upon export performance, we preliminarily determine that it confers a countervailable benefit on exports.

To calculate the benefit, we used our short-term loan methodology described in the Subsidies Appendix and applied the interest differential to the principal amounts of the loans. We used as our commercial benchmark the "free" three-month leading rate published in the *Boletin Estadistico.* Since Roldan was able to tie these loans to specific shipments, we allocated the benefit from loans for U.S. shipments over Roldan's exports of wire rod to the United States during the review period. We preliminarily determine the benefit from this program to be 0.75 percent *ad valorem.*

Because this program was terminated effective March 5, 1987, pursuant to Royal Decrees 321/1987 and 322/1987, we preliminarily determine that for this program the cash deposit of estimated countervailing duties will be zero.

(4) Employment Grant

Under a Ministerial Order of February 21, 1985, the Ministary of Labor and Social Security provides employment funds from the solidarity Fund for Employment. These funds are provided for "Actions that help begin employment generating projects." Roldan received a grant for investment in new plant and equipment that generated new jobs.

Eligibility for this program is not contingent upon export performance nor limited to any specific region, industry or groups of industries. The Government of Spain has provided information showing that a wide variety of industries and sectors in all regions and provinces have received employment grants from the Solidarity Fund. Therefore, because this program is not limited to a specific enterprise or industry or group of enterprises or industries, we preliminarily determine that this program does not confer a countervailable subsidy.

(5) Other Programs

We also examined the following programs and preliminarily determine that Roldan did not use them during the review period:

A. Capital Grants.

B. Regional Incentives Program.

Preliminary Results of Review

As a result of the review, we preliminarily determine the net subsidy to be 1.26 percent *ad valorem* for the period January 1, 1986 through December 31, 1986.

The Department intends to instruct the Customs Service to assess countervailing duties of 1.26 percent of the f.o.b. invoice price on all shipments of this merchandise exported on or after January 1, 1986 and on or before December 31, 1986.

The termination of two programs, operating capital loans and prefinancing of exports under the Privileged Circuit Exporter Credit program, reduces the total estimated net subsidy to 0.33 percent *ad valorem*, a rate we consider *de minimis.* Therefore, the Department intends to instruct the Customs Service to waive cash deposits of estimated countervailing duties on shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review. This waiver will remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 7 days of the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the first workday afterward. Any request for an administrative protective order must be made no later than five days after the date of publication. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.10.

Gilbert B. Kaplan,

Acting Assistant Secretary, Import Administration.

Date: March 21, 1988.

Certain Welded Carbon Steel Pipe and Tube Products From Turkey; Final Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of final results of countervailing duty administrative review.

SUMMARY: On December 15, 1987, the Department of Commerce published the preliminary results of its administrative review of the countervailing duty order on certain welded carbon steel pipe and tube products from Turkey. We have now completed that review and determine the net subsidy to be 1.43 percent *ad valorem* for Bant Boru and 12.67 percent *ad valorem* for all other firms during the period October 28, 1985 through December 31, 1986.

EFFECTIVE DATE: March 25, 1988.

FOR FURTHER INFORMATION CONTACT: Susan Silver or Paul McGarr, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-3337.

SUPPLEMENTARY INFORMATION:

Background

On December 15, 1987, the Department of Commerce ("the Department") published in the **Federal Register** (52 FR 47621) the preliminary results of its administrative review of the countervailing duty order on certain welded carbon steel pipe and tube products from Turkey (51 FR 7984; March 7, 1986). The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Imports covered by the review are shipments of certain Turkish welded carbon steel pipe and tube products ("pipe and tube") having an outside diameter of 0.375 inch but not over 16 inches, currently classifiable under TSUSA items 610.3208, 610.3209, 610.3231, 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3256, 610.3258, and 620.4925. TSUSA items 610.3208 and 610.3209 are commonly referred to by the industry as line pipe meeting American petroleum Institute (API) specifications for 5L. TSUSA items 610.3231, 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3256, 610.3258 and 620.4925 are commonly referred to by the industry as standard pipe or tube or structural tubing. Standard pipe or tube is produced to various American Society for Testing Materials (ASTM) specifications, most notably A-53, A-120 or A-135. Structural tubing is produced to various specifications most notably ASTM specifications A-500 and A-501.

Line pipe and standard pipe and tube are currently classifiable under item numbers 7306.10.10.10, 7306.10.10.50, 7306.30.10.00, 7306.30.50.25, 7306.30.50.30, 7306.30.50.40, 7306.30.50.45, 7306.30.50.50, 7306.30.50.60, 7306.30.50.65, 7306.30.50.70 and 7306.30.50.75 of the Harmonized System.

The review covers the period October 28, 1985 through December 31, 1986 and seven programs: (1) Export and supplemental tax rebates; (2) the Resource Utilization Support Fund ("RUSF"); (3) export revenue tax deductions; (4) the General Incentives Program; (5) the Support Price Stability Fund; (6) preferential export financing under Decree 84/8861; and (7) export credits under Communique No. 1.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results. We received timely written comments from the standard line pipe subcommittees of the Committee on Pipe and Tube Imports and the individual members of these subcommittees ("the petitioners"), the Government of Turkey ("the Government"), and three respondents: Bant Boru Sanayi ve Ticaret A.S. ("Bant Boru"), the Borusan Group ("Borusan"), and Erkboru Profil Sanayi ve Ticaret A.S. ("Erkboru").

Comment 1: The Government claims that the Department overstated that weighted-average country-wide assessment rate by mistakenly including in its calculations export tax rebates and RUSF payments that Yucel Boru applied for in 1986 but received in 1987.

Department's Position: We agree. Accordingly, we have revised our calculations and have determined the weighted-average country-wide assessment rate to be 12.67 percent *ad valorem.*

Comment 2: Borusan claims the variance between company rates in the preliminary results is so substantial that the Department should establish company-specific assessment rates rather than a weighted-average country-wide assessment rate.

Bant Boru also requests a company-specific assessment rate because the difference between its company rate and the weighted-average country-wide rate is greater than 10 percentage points and is, thus, significantly different according to the Department's proposed regulations.

Department's Position: The Department's policy is to treat as a significant differential between a company rate and the weighted-average country-wide rate a difference of 10 percentage points or 25 percent, whichever is greater. In this case, a significant differential does exist between the weighted-average country-wide rate and Bant Boru's company rate, and we have established a company-specific assessment rate of 1.43 perecent *ad valorem.* There is no significant differential between the weighted-average country-wide rate and any other company rates.

Comment 3: Bant Boru, Borusan, Erkboru and the Government argue that the Department should establish company-specific duty deposit rates. The proposed countervailing duty regulations of June 12, 1985 (50 FR 24207) provide that a company-specific rate is appropriate where there is a significant differential between the greater of at least 10 percentage points or 25 percent from the weighted-average net subsidy calculated on a country-wide basis.

The duty deposit rate is based on only one program, the export revenue tax deduction, where company benefits during the review period ranged from 0.45 to 9.76 percent *ad valorem.* With a weighted-average country-wide rate in the preliminary results of 6.78 percent *ad valorem*, the differential between this weighted-average rate and the rates for Bant Boru, Borusan, and Erkboru is more than 25 percent. Therefore, these companies argue that their company rates fit the circumstances described in the proposed regulations. They further argue that, with only five companies involved in this review, establishing company-specific deposit rates imposes no administrative burden on the Department.

Department's Position: Section 607 of the Tariff and Trade Act of 1984 established a statutory presumption in favor of country-wide countervailing duty rates without requiring any company-specific justification for the use of such rates. The statute provides for the possibility of company-specific rates if the Department determines that a significant differential exists. The Department's policy is to use a single

OL
53
ISS
58
MR
25
988
MI

weighted-average country-wide rate unless there is a significant differential between a company-specific rate and the weighted-average country-wide rate, i.e., 10 percentage points or 25 percent, *whichever is greater*. The Department considers Erkboru's benefit of 0.45 percent *ad valorem* to be *de minimis* and, by definition, significantly different.

Although the company rates for Bant Boru and Borusan are more than 25 percent different from the weighted-average country-wide rate, their rates are less than 10 percentage points different from that rate. Therefore, there is no significant differential between the company rates for Bant Boru and Borusan and the weighted-average country-wide rate. After excluding Erkboru from the calculation of the weighted-average, we have revised the duty deposit rate for all other firms to 7.26 percent *ad valorem*.

Comment 4: The petitioners claim that despite the elimination of the export tax rebate program on exports of iron and steel products to the United States, effective January 1, 1987, the program may still provide an incentive for Turkish pipe and tube exporters to export to the United States. The petitioners contend that an incentive to export to the United States would exist if the Turkish government determines the amount of the rebates based on total exports (including exports to the U.S.), even if rebates paid on a shipment-specific basis have been eliminated on pipe and tube exports to the United States. The Department should not adjust the duty deposit rate for this program to zero until it can be certain that pipe and tube exports to the United States are not receiving benefits through a change in the method of granting the rebate.

The Turkish government states that export tax rebates are always paid on a shipment-specific basis, not on total exports. In order to be eligible for benefits, exporters must present documentation showing the product to be exported and the country of destination. Since rebates were eliminated on pipe and tube exports to the United States, there is no benefit conferred on these exports. Borusan adds that the petitioners' allegation is based upon pure speculation and that the Turkish government is phasing out the program on all exports, as evidenced by the decline in nominal rebate rates on third country exports during 1987 as compared with 1986 rebate rates.

Department's Position: Whenever possible, we calculate the benefit from export subsidies based on shipments only to the United States. Where export subsidies are not shipment-specific, or cannot otherwise be segregated according to country of destination, we calculate the benefit based on shipments to all markets. *See, Final Results of Countervailing Duty Administrative Review on Roses and Other Cut Flowers from Columbia* (52 FR 48847, December 28, 1987).

We verified that export tax rebates are shipment-specific and that they are paid as a percentage of the value of each shipment; total exports never were and are not now a factor in calculating the amount of the export tax rebate received. These rebates would provide an incentive to export pipe and tube to the United States only if they were paid on such shipments, and we verified that they have been eliminated.

Comment 5: The petitioners claim that the Department does not know whether pipe and tube exports to the United States are included in the export revenue levels used to calculate supplemental export tax rebates. If these exports are included, this may allow exporters to receive a higher rate of supplemental rebate and provide an incentive to export to the United States. The Department should be certain that the exporters are not including pipe and tube exports to the United States in the calculation of supplemental export tax rebates before setting the duty deposit rate for the supplemental export tax rebate at zero.

The Government states that, under Article 4 of Decree No. 86/11237, a supplemental tax rebate is given on the export of an eligible product only when annual export revenue from all eligible products exceeds U.S. $2 million. Pipe and tube exports to the United States are not eligible to receive supplemental tax rebates and are not included when determining eligibility for receipt of supplemental rebates on other products. The Government further points out that, as a matter of practice, the basic and supplemental export tax rebates are applied for together. Consequently, if an export shipment is not eligible for the basic rebate, it will not be eligible for the supplemental rebate, nor will it be aggregated with other eligible exports when determining supplemental rebate levels.

Department's Position: We verified that pipe and tube exports to the United States are no longer eligible for basic or supplemental export tax rebates and that these exports cannot be counted when determining the supplemental rebate on other eligible products.

Comment 6: The petitioners express their concern that the recalculation of the rate of assessment for the review period, coupled with the change in the deposit rate to reflect the elimination of the export tax rebate and RUSF programs for exports of pipe and tube to the United States, may allow Turkish pipe and tube exports to escape countervailing duties on the export tax rebates and RUSF payments earned by Yucel Boru on 1986 exports but received in 1987. The petitioners point out that if Yucel Boru did not export in 1987 these benefits cannot be captured with countervailing duties, and they suggest that an accrual method to capture these benefits in the 1986 review may be more appropriate. The petitioners also claim that if a review for the 1987 period is not requested, these benefits will not be captured because the 1987 entires will be liquidated at the deposit rate set by this review, which is based on the elimination of benefits from these two programs. Therefore petitioners suggest that the benefits from these two programs be included in the calculation of the deposit rate.

Department's Position: We consider the benefit from these programs to occur when the payments are received, rather than accrued. If Yucel Boru did not export pipe and tube to the United States in 1987, the firm will not have received benefits subject to countervailing duties.

If we conduct a review for the 1987 period, we will calculate countervailing duties based on benefits received by the companies that exported. If a review is not requested, entries will be liquidated at the deposit rate in effect at the time of entry, in this case the deposit rate set by the countervailing duty order. The duty deposit set by this review, which reflects the termination of the export tax rebate and RUSF programs, will affect only future entries.

Final Results of Review

After considering all of the comments received, we determine the net subsidy to be 1.43 percent *ad valorem* for Bant Boru and 12.67 pescent *ad valorem* for all other firms during the period October 28, 1985 through December 31, 1986.

The Department will instruct the Customs Service to assess countervailing duties of 1.43 percent of the f.o.b. invoice price on shipments of this merchandise from Bant Boru and 12.67 percent of the f.o.b. invoice price on shipments of this merchandise from all other firms entered, or withdrawn from warehouse, for consumption on or after October 28, 1985 and exported on or before December 31, 1986.

Because of the termination of the export tax rebate and RUSF programs, the Department will instruct the Customs Service to waive cash deposits

of estimated countervailing duties on shipments of this merchandise from Erkboru and to collect a cash deposit of estimated countervailing duties of 7.26 percent of the f.o.b. invoice price on shipments of this merchandise from all other firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit requirement will remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.10.

Dated: March 21, 1988.

Gilbert B. Kaplan,

Acting Assistant Secretary, Import Administration.

BILLING CODE 3510-DS-M

Export Trade Certificate of Review

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice of application.

SUMMARY: The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, has received an application for an Export Trade Certificate of Review. This notice summarizes the conduct for which certification is sought and requests comments relevant to whether the certificate should be issued.

FOR FURTHER INFORMATION CONTACT: John E. Stiner, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (Pub. L. 97-290) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A certificate of review protects its holder and the members identified in it from private treble damage actions and from civil and criminal liability under Federal and state antitrust laws for the export conduct specified in the certificate and carried out during its effective period in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the Federal Register identifying the applicant and summarizing its proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant ot the determination whether a certificate should be issued. An original and five (5) copies should be submitted not later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, Room 5618, Washington DC 20230. Information submitted by any person is exempt from disclosure udner the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 88-00003." A summary of the application follows:

Applicant: TradeNet International of Washington, Inc. (TradeNet) 920 Pennsylvania Avenue SE., Washington, DC 20003, Telephone: (202) 544-8794.

Application #: 88-00003.

Date Deemed Submitted: March 10, 1988.

Members (in addition to applicant): none.

Summary of the Application:

Export Trade:

Products: All products.

Related Services: Consulting, product research and design, marketing via specialized promotional mailings in conjunction with trade shows and catalog and video exhibits, international market research and statistics, transportation, trade documentation and freight forwarding, communiication and processing of foreign orders to and for exporters and foreign purchasers, insurance, legal assistance, foreign exchange, financing, and taking title to goods.

Export Markets

The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

Export Trade Activities and Methods of Operation

TradeNet seeks certification to:

1. Enter into agreements with Suppliers, whereby TradeNet agrees to act as the Supplier's exclusive Export Intermediary for the export of Products and the provision of Related Services. These agreements may include the following provisions:

a. The Supplier may agree not to sell, directly or indirectly, through any other Export Intermediary, and/or

b. TradeNet will have the exclusive right to choose whether to respond to bids, invitations, or requests for bids, or other sales opportunities, on a joint or individual basis.

2. Enter into exclusive agreements with other Export Intermediaries, wherein:

a. The Export Intermediary agrees not to represent TradeNet's competitors in the sale of Products or the provision of Related Services in any Export Market, and/or

b. The Export Intermediary agrees not to buy Products or obtain Related Services from TradeNet's competitors.

3. Enter into exclusive agreements with foreign customers of the Products and Related Services, whereby the customer agrees not to purchase the Products and Related Services from TradeNet's competitors.

4. Maintain the exclusive right to specify the following for agreements outlined in paragraphs (1), (2), and (3) above:

a. The price at which Products will be sold and Related Services provided, and/or

b. The terms for any export sale, including the quantities, territories, and customers, regardless of whether a joint or individual bidding process is used.

5. Meet and negotiate with individual Suppliers or groups of Suppliers concerning the terms of their participation in each bid, invitation or request to bid, or other sales opportunity in any Export Market. During the course of these negotiations, the following may be exchanged:

a. Information that is already generally available to the trade or public,

b. Information that is specific to a particular Export Market, including, but not limited to, reports and forecasts of sales, prices, terms, customer needs, selling strategies, and product specifications by geographic area and by individual customers within the Export Market,

c. Information on expenses specific to exporting to a particular Export Market (such as ocean freight, inland freight to the terminal or port, terminal or port storage, wharfage and handling charges, insurance, agents' commissions, export sales documentation and service, and export sales financing),

d. Information on U.S. and foreign legislation and regulations affecting sales to a particular export market, and

e. Information on TradeNet's activities in the Export Markets, including, but not

BEST COPY AVAILABLE

limited to, customer complaints and quality problems, visits by customers located in the Export Markets, reports by foreign sales representatives, and matters concerning the contract between TradeNet and its Suppliers.

Date: March 21, 1988.

John E. Stiner,

Director, Office of Export Trading Company Affairs.

Mercy Hospital and Medical Center et al.; Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No.: 87–164R. *Applicant:* Mercy Hospital and Medical Center, Chicago, IL 60616. *Instrument:* Electron Microscope, Model H-300. *Manufacturer:* Nissei Sangyo America, Ltd., Japan. *Intended use:* See notice at 52 FR 18262, May 14, 1987. *Instrument ordered:* November 13, 1986.

Docket No.: 88–053. *Applicant:* University of Georgia, Athens, GA 30602. *Instrument:* Electron Microscope, Model JEM–100CX. *Manufacturer:* JEOL, Japan. *Intended use:* See notice at 53 FR 1811, January 22, 1988. *Instrument ordered:* September 29, 1987.

Docket No.: 88–057. *Applicant:* University of Alabama at Birmingham, Birmingham, AL 35294. *Instrument:* Electron Microscope, Model JEM–2000FX. *Manufacturer:* JEOL Ltd., Japan. *Intended use:* See notice at 53 FR 1811, January 22, 1988. *Application Received by Commissioner of Customs:* December 10, 1987.

Docket No.: 88–060. *Applicant:* Morehouse School of Medicine, Atlanta, GA 30310–1495. *Instrument:* Electron Microscope, Model JEM–1200EX. *Manufacturer:* JEOL, Japan. *Intended use:* See notice at 53 FR 1811, January 22, 1988. *Instrument ordered:* September 4, 1987.

Docket No.: 88–065. *Applicant:* University of Michigan, Ann Arbor, MI 48109. *Instrument:* Electron Microscope, Model CM12S. *Manufacturer:* N.V. Philips, The Netherlands. *Intended use:* See notice at 53 FR 1812, January 22, 1988. *Instrument ordered:* September 29, 1987.

Docket No.: 88–069. *Applicant:* University of South Carolina, Columbia, SC 29208. *Instrument:* Electron Microscope, Model JEM–100CX. *Manufacturer:* JEOL, Japan. *Intended use:* See notice at 532 FR 1812, January 22, 1988. *Instrument ordered:* June 15, 1987.

Docket No.: 88–071. *Applicant:* Arizona State University, Tempe, AZ 85287–1704. *Instrument:* Electron Microscope, Model JEM–2000FX. *Manufacturer:* JEOL, Japan. *Intended use:* See notice at 53 FR 1812, January 22, 1988. *Instrument ordered:* August 13, 1987.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered.

Reasons: Each foreign instrument is a conventional transmission electron microscope (CTEM) and is intended for research or scientific educational uses requiring a CTEM. We know of no CTEM, or any other instrument suited to these purposes, which was being manufactured in the United States either at the time of order of each instrument or at the time of receipt of application by the U.S. Customs Service.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510–DS–M

University of Texas at Austin et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. Law. 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket No. 87–105R. *Applicant:* University of Texas at Austin, Austin, TX 78716. *Instrument:* CD and LD Spectropolarimeter, Model J–600. *Manufacturer:* Jasco Inc., Japan. *Intended Use:* See notice at 52 FR 7916, March 13, 1987. *Reasons for This Decision:* The Foreign instrument provides simultaneous measurement of linear and circular dichroism spectra. *Advice Submitted by:* National Institutes of Health, February 9, 1988.

Docket No. 87–110R. *Applicant:* University of Miami, Coral Gables, FL 33124. *Instrument:* Stopped-Flow Scpectrophotometer, Model SF–51 with Accessories. *Manufacturer:* Hi-Tech Scientific Instrument Division, United Kingdom. *Intended Use:* See notice at 53 FR 1812, January 22, 1988. *Reasons for This Decision:* The foreign instrument employs acid resistant materials for all parts that contact reagent solutions. *Advice Submitted by:* National Institutes of Health, February 9, 1988.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as each is intended to be used, is being manufactured in the United States. The National Institutes of Health advise that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purposes and (2) they know of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to either of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510–DS–M

National Bureau of Standards

Announcement of Workshops for Users and Implementors of Integrated Services Digital Network

AGENCY: National Bureau of Standards, Commerce.

ACTION: Notice.

SUMMARY: The Institute for Computer Sciences and Technology at the National Bureau of Standards (NBS) announces two workshops of a continuing workshop series to discuss issues related to the use and implementation of Integrated Services Digital Network (ISDN) technology. These workshops are part of the North American ISDN Forum (NIU–FORUM) which was formed recently under the auspices of NBS to create a strong user voice in the implementation of ISDN and ISDN applications and to ensure that the emerging ISDN meets users' application needs.

DATES: An ISDN Users Workshop will be held in Atlantic City on June 8, 9, and 10, 1988. This workshop will start to identify, define and prioritize user applications of ISDN. Organizations primarily engaged in the manufacture, supply or vending of automated data processing or telecommunications products and/or services may not be members of the Users Workshop.

An ISDN Implementors Workshop will be held at NBS in Gaithersburg, MD on July 19, 20, and 21, 1988. This workshop will start to define implementation agreements for ISDN and sponsor multivendor demonstrations and trials. Manufacturers and service providers are invited to participate in this workshop.

ADDRESS: To obtain registration forms for the workshops, companies may contact: ISDN Workshop Series, Attn: Trudy Johnson, National Bureau of Standards, Building 225, Room A224, Gaithersburg, MD 20899, Telephone: (301) 975–2985.

Upon receipt of the completed registration form, additional registration information for the appropriate workshop(s) will then be mailed to the registrant. An NBS representative will confirm workshop registration reservations by telephone.

FOR FURTHER INFORMATION CONTACT: Steve Recicar (301) 975–2937.

SUPPLEMENTARY INFORMATION: Attendance at the workshops is limited due to space requirements and the size of the conference facility; therefore, registration is on a first come, first served basis with recommended limitation of two participants per company. A registration fee will be charged for attending the workshops. Participants are expected to make their own travel arrangements and accommodations. NBS reserves the right to cancel any part of the workshops.

Ernest Ambler,

Director.

Date: March 18, 1988.

BILLING CODE 3510–CN–M

National Oceanic and Atmospheric Administration

Scoping/Planning Meeting for the Development of an Environmental Impact Statement Governing the Incidental Take of Marine Mammals During Commercial Fishing Operations

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of intent to prepare an EIS and hold a scoping meeting.

SUMMARY: The National Marine Fisheries Service (NMFS) intends to prepare an Environmental Impact Statement (EIS) governing the incidental taking of marine mammals during commercial fishing operations within the U.S. exclusive economic zone. The NMFS is convening a scoping meeting to ensure that all interested parties have an opportunity to advise NMFS on the issues which need to be considered in developing the EIS.

DATE: The scoping meeting will be held in San Francisco, CA on April 8, 1988; 12:30 p.m.–3:00 p.m.

ADDRESS: Clarion Hotel, San Francisco Airport, San Bruno Room, 401 E. Millbrae Avenue, Millbrae, CA.

FOR FURTHER INFORMATION CONTACT: James H. Lecky or Rodney R. McInnis (213/514–6196).

SUPPLEMENTARY INFORMATION: The general permits issued under section 104 of the Marine Mammal Protection Act (16 U.S.C. 1361 *et seq*; MMPA) for 1984–1988 to domestic commercial fishermen (except yellowfin tuna purse seine fishermen) will expire on December 31, 1988. In anticipation of receiving new applications during 1988, NMFS is initiating the consultation process under the National Environmental Policy Act (42 U.S.C. 4371 *et seq.*) to consider reissuance of five-year domestic general permits and annual foreign general permits for the period January 1, 1988–December 31, 1993.

An EIS will be prepared to present information on the status of marine mammal species involved, the impact of various commercial fisheries on marine mammals, and the impact of any alternatives to issuing permits on the impacted marine mammal stocks. The public scoping meeting will be held to ensure full opportunity for interested members of the public and government agencies to advise NMFS on the issues, alternatives, and impacts which should be addressed in the DEIS.

Date: March 22, 1988.

Nancy Foster,

Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.

BILLING CODE 3510–22–M

Caribbean Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Caribbean Fishery Management Council and its Administrative Committee will convene separate public meetings as follows:

Council

On March 28, 1988, from 7:30 p.m. to 10 p.m., will hold a scoping meeting to obtain comments and recommendations regarding development of a fishery management plan, and preparation of an environmental impact statement for the queen conch (*Strombus gigas*) fishery within the Council's area of jurisdiction. The public meeting will take place at the Legislature Building, Conference Room, St. Croix, U.S. Virgin Islands.

Administrative Committee

On March 28 from 2 p.m. to 5 p.m., will hold a meeting to consider the Council's budget and other regular administrative activities. After discussion of regular administrative activities, the Committee will convene a closed session (not open to the public), to discuss personnel matters. The public meeting will take place at the Customs House Building, U.S. Park Service, Conference Room, St. Croix, U.S. Virgin Islands.

For further information contact the Caribbean Fishery Management Council, Banco de Ponce Building, Suite 1108, Hato Rey, PR 00918; (809) 753–4926.

Date: March 18, 1988.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510–22–M

Mid-Atlantic Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Mid-Atlantic Fishery Management Council will convene a public meeting, April 13, 1988, at 10 a.m. at the Radisson, Hotel Hampton, 700 Settlers Landing Road, Hampton, VA 23669, (telephone: 804–727–9700), to discuss the Surf Clam and Ocean Quahog Fishery Management Plan (FMP) Amendment #8, Bluefish and Summer Flounder FMPs, and other fishery management and administrative matters. The meeting may be lengthened or shortened depending upon progress of the agenda. The Council may convene a closed session (not open to the public) to discuss personnel and/or national security matters. The public meeting will adjourn on April 14.

For further information, contact John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, 300 South New Street, Room 2115, Federal Building, Dover, DE 19901–6790; telephone: (302) 674–2331.

Date: March 18, 1988.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Pacific Fishery Management Council and its advisory entities will convene public meetings, April 4-8, 1988, at the Clarion Hotel near the San Francisco Airport, 401 East Millbrae Avenue, Millbrae, CA, as follows:

Council

On April 5 the Council will convene at 8 a.m., with a closed session (not open to the public), to discuss litigation, and other appropriate matters. At 9 a.m., the Council will convene its open session to consider administrative and salmon management issues. After receiving comments from its advisory entities and the public, the Council will adopt 1988 ocean salmon management measures in tentative form for technical analysis. The Salmon Plan Development Team (SPDT) will report back to the Council with its impact analysis on April 7. Also on April 5 the Council will comment on the proposed National Recreational Fishery Policy drafted by the U.S. Fish and Wildlife Service.

There will be a public comment period April 5 at approximately 4 p.m., to hear comments on issues not on the agenda. Public comments on agenda items will be heard during the Council's discussion of each issue.

On April 6 the Council will convene at 9 a.m., to address groundfish management issues. The Council will consider recommendations from the advisory entities on a number of groundfish issues, including alternative management approaches given insufficient funding of data programs; adjustment of rockfish and sablefish trip limits if necessary; Pacific whiting joint venture codend limitations; experimental fishery applications; enforcement issues, and other matters.

On April 7 the Council will continue consideration of salmon management issues. After receiving the SPDT's analysis, the Council will adopt final 1988 ocean salmon management measures. It will also address 1989 salmon plan amendment issues; habitat matters; the form and function of the Indian Affairs Committee, and other matters.

The Council will reconvene at 8 a.m., April 8 if necessary, to complete unfinished business.

Scientific and Statistical Committee (SCC)—will convene at 11 a.m., April 4 to consider matters on the Council's agenda, and will reconvene at 8 a.m., April 5. The SSC will meet jointly with the Groundfish Management Team, Groundfish Select Group (GSG), and Groundfish Advisory Subpanel, (GAP) at 1:30 p.m., April 4 to address research needs and alternative management approaches. The GSG will convene following this review to address trip limit adjustments for rockfish an sablefish.

SPDT—will meet as necessary April 4-8 to analyze the impacts of the 1988 management measures.

Salmon Advisory Subpanel—will convene at 1 p.m., April 4 to address salmon management issues on the Council's agenda, and will reconvene as necessary at 8 a.m., April 5, 6, and 7 to complete its business.

Budget Committee—will convene at 3 p.m., April 4 to consider Pacific Coast Fisheries Information Network funding, and the Council's calendar year 1988 budget.

GAP—will meet at 8 a.m., April 5 to address groundfish management issues on the Council's agenda.

Habitat Committee—will meet at 5 p.m., April 6 to address current, relevant habitat matters affecting fisheries under Council jurisdiction.

Detailed agendas for all of the above meetings will be made available to the public after March 21. For further information contact Mr. Lawrence D. Six, Executive Director, Pacific Fishery Management Council, Metro Center, Suite 420, 2000 SW. First Avenue, Portland, OR 97201; telephone: (503) 221-6352.

Date: March 18, 1988.

Richard H. Schaefer,

Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

[Docket No. 80332-8032]

Information Relating to Bowhead Whales; U.S. Implementation of Strike Quota for 1988

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of information and request for public comment.

SUMMARY: Information is published by NOAA for use in the development of the U.S. position before the International Whaling Commission (IWC) on the aboriginal/subsistence take of bowhead whales and in the domestic allocation of the existing IWC quota for bowhead whales to U.S. natives. By this notice, NOAA is soliciting public comment on the proposed allocation of the IWC bowhead whale catch limit in 1988.

DATE: Comments must be submitted on or before April 25, 1988.

ADDRESS: Written comments may be mailed to the Office of International Affairs, 1825 Connecticut Avenue NW., Room 919, National Marine Fisheries Service, Washington, DC, 20235. A list of documents reviewed for this action may be obtained on request, and the documents examined during business hours (9 a.m. to 5:00 p.m.) at this address.

FOR FURTHER INFORMATION CONTACT: Becky Rootes, (202) 673-5281.

SUPPLEMENTARY INFORMATION: NOAA is responsible for implementation and enforcement of the Marine Mammal Protection Act (16 U.S.C. 1361-1407), the Endangered Species Act (16 U.S.C. 1531-1543) and the Whaling Convention Act (16 U.S.C. 916-916l). In addition, it provides staff support to the U.S. Commissioner to the IWC and to the IWC Interagency Committee. Consistent with these responsibilities, the Agency develops positions for implementation of the aboriginal/subsistence harvest of bowhead whales under Paragraph 13 of the Schedule to the International Convention on the Regulation of Whaling, December 2, 1946, 62 Stat. 1716, T.I.A.S. No. 1849 (entered into force, November 10, 1948). In order to provide for review and comment by the public of the data upon which the U.S. positions are based, the following information is provided: (1) The IWC catch level available for the U.S. aboriginal/subsistence bowhead whale harvest for 1988; (2) a summary of available bowhead scientific information including estimates of current population level and annual recruitment rates; (3) a summary of information on the nature and extent of aboriginal/subsistence need; (4) the level of aboriginal/subsistence harvest limits which could be implemented domestically; and (5) notice of the availability of those documents reviewed by NOAA and relied on by the Administrator of NOAA in making his findings on the range of harvest limits. By this notice, NOAA is soliciting public comment on the proposed domestic implementation of the IWC bowhead whale catch limit for 1988.

1. Catch Level

At the 39th Annual Meeting of the IWC, Bournemouth, U.K., June 22-26, 1987, the following catch limit was established for aboriginal/subsistence whaling: "the taking of bowhead whales from the Bering Sea stock by aborigines is permitted, but only when the meat and products of such whales are to be used exclusively for local consumption by the aborigines and further provided that: * * * For the year 1988, 35 whales may be struck." (Schedule to the Convention, Paragraph 13(b)(1).)

2. Scientific Information

The IWC Scientific Committee agreed at the 1987 IWC meeting on an estimate of 7,200 (standard error of 2,400) as the current size of the bowhead whale population (from data collected in 1985). Based on a simulation analysis conducted by scientists at the 1987 IWC meeting, estimates were made of the number of animals that can be removed which will keep the population at its current level. This is known as the replacement yield (RY) which defines the number of whales annually recruited into the population that balances the number of deaths that occur. RY values of 39 to 184 animals were estimated for the range of population estimates of 4,800 and 9,600 based on one standard error (7,200 ± 2,400). The view of the IWC Scientific Committee was that estimates of replacement yield would be most appropriate for the population size of 7,200 resulting in a replacement yield of 55 to 173 bowheads.

3. Aboriginal/Subsistence Need

The Department of the Interior (DOI) conducted the last major analysis of the nature and extent of aboriginal/subsistence need for bowhead whales and whaling in 1983. The Department of Interior has contracted a new study on the quantification of subsistence and cultural need for bowhead whales which is not yet completed. The 1983 analysis provided the basis for the U.S. submissions to the IWC concerning aboriginal/subsistence need for 1983-87. The conclusions drawn by DOI in the 1983 report are as follows:

(1) Need based on historical catch per crew, 1960-1983 = 26 landed whales;

(2) Village need based on per capita returns = 24 landed whales; and

(3) Need based on participation = 26 landed whales.

The DOI conclusion was that the Alaskan Eskimos' need would be satisfied by 26 landed whales, and, using the best estimate then available of hunting efficiency, 52 strikes. Given the Alaska Eskimo Whaling Commission (AEWC) commitment to improve hunting efficiency, the final assessment by DOI was that the Alaskan Eskimos' need could be met with 35 strikes to land 26 whales. Until the new study contracted by DOI is submitted, the best information concerning Eskimo need continues to be for 35 strikes.

4. Domestic Harvest Range

The IWC management scheme for aboriginal/subsistence whaling provides in (Schedule paragraph 13(a)(2)): "For stocks below the maximum sustainable yield (MSY) level but above a certain minimum level, aboriginal/subsistence catches shall be permitted so long as they are set at levels which allow whale stocks to move to the MSY level." Given the above stated estimates of 55-173 whales recruited into the population annually, the aboriginal/subsistence catch can be permitted so long as it is set at a level that allows the whale stock to move to the MSY level.

The catch limit for bowhead whales for 1988, established by the IWC, is 35 strikes. The number under consideration for the 1988 catch limit is 35 strikes.

5. Documents Reviewed

A list of the documents reviewed for this action may be obtained on request from the address above. The documents are available for public inspection during the 30-day public comment period at the same address.

Authority: 16 U.S.C. 1361-1407, 1531-43, 916.

Dated: March 21, 1988.

Carmen Blondin,

Special Associate for Trade, NMFS.

BILLING CODE 3510-22-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1988; Addition and Deletion

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to and deletion from procurement list.

SUMMARY: This action adds to and deletes from Procurement List 1988 services to be provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: April 25, 1988.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On November 6, and December 28, 1987, The Committee for Purchase from the Blind and Other Severely Handicapped published notice (52 FR 42704 and 48861) of proposed addition to and deletion from Procurement List 1988, December 10, 1987 (52 FR 46926).

Additions

After consideration of the relevant matter presented, the Committee has determined that the service listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77, and 41 CFR 51-2.6.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The action will not result in any additional reporting, recordkeeping, or other compliance requirements.

b. The action will not have a serious economic impact on any contractors for the service listed.

c. The action will result in authorizing small entities to provide the service procured by the Government.

Accordingly, the following service is hereby added to Procurement List 1988:

Service

Janitorial Service
Bonneville Power Administration
710 NE Hassalo Street
5804 NE Hassalo Street
5840 NE Hassalo Street
Portland, Oregon

Deletion

After consideration of the relevant matter presented, the Committee has determined that the service listed below is no longer suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77 and 41 CFR 51–2.6.

Service

Pallet Repair
Naval Supply Center
Cheatham Annex
Williamsburg, Virginia

C.W. Fletcher,

Executive Director.

Procurement List 1988; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The committee has received proposals to add to Procurement List 1988 commodities and services produced or provided by workshops for the blind or other severely handicapped.

DATES: Comments must be received on or before April 25, 1988.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77 and 41 CFR 51–2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities and services to Procurement List 1988, December 10, 1987 (52 FR 46926):

COMMODITY FUTURES TRADING COMMISSION

Chicago Mercantile Exchange Proposed Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity futures contract.

SUMMARY: The Commodity Futures Trading Commission ("Commission") previously published in the **Federal Register** a proposal of the Chicago Mercantile Exchange ("CME") for designation as a futures contract market in the Morgan Stanley Capital International EAFE (Europe, Australia and Far East) stock index. The Director of the Division of Economic Analysis ("Division") of the Commodity Futures Trading Commission, acting pursuant to the authority delegated by Commission Regulation 140.96, has determined that, in this instance, an additional period for public comment is warranted.

DATE: Comments must be received on or before April 11, 1988.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to the CME EAFE Stock Index futures contract.

FOR FURTHER INFORMATION CONTACT: Naomi Jaffe, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, (202) 254–7227.

SUPPLEMENTARY INFORMATION: On September 11, 1987, the Commission published in the **Federal Register**, for a 60-day comment period, a notice of availability of the CME's proposed terms and conditions for the EAFE Stock Index futures contract (52 FR 34404). On January 4, 1988, the Commission republished in the **Federal Register**, for a 30-day comment period, a notice of availability of this contract's proposed terms and conditions (53 FR 64). In a March 17, 1988 letter to the Commission, the CME requested that the Commission republish the terms and conditions of the proposed contract "so that the public and other interested parties may have a further opportunity to comment on the application." As noted, the Director of the Division has determined that, for this proposed contract, an additional comment period is warranted.

Copies of the terms and conditions of the proposed futures contract will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314.

Other materials submitted by the CME in support of the application for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1987)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the terms and conditions of the proposed futures contract, or with respect to other materials submitted by the CME in support of the application, should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW.,

Washington, DC 20581, by the specified date.

Issued in Washington, DC on March 22, 1988.

Paula A. Tosini,

Director, Division of Economic Analysis.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Department of the Army

Intent To Grant a Limited Exclusive Patent License to Sidney Weiser

The Department of the Army announces its intention to grant Sidney Weiser, 8502 Dakota Drive, Gaithersburg, MD 20877–4136, a limited exclusive license under U.S. Patent Appliction No. 089,893, filed August 27, 1987, entitled "Method of and Apparatus for Real Time Crystallographic Axis Orientation," by Sidney Weiser.

The proposed limited exclusive license will comply with the terms and conditions of 35 U.S.C. 209 and the Department of Commerce's regulations at 37 CFR Part 404. The proposed license may be granted unless, within 60 days from the date of this notice, the Department of the Army receives written evidence and argument which establishes that the grant of the proposed license would not serve the public interest. All comments and materials must be submitted to the Intellectual Property Counsel of the Army, Patents, Copyrights, and Trademarks Division, Office of The Judge Advocate General, Department of the Army, 5611 Columbia Pike, Falls Church, VA 22041–5013.

For further information concerning this notice, contact: Lieutenant Colonel William V. Adams, Office of The Judge Advocate General, Attention: JALS–PC, Nassif Building, Room 332A, Falls Church, VA 22041–5013, Telephone No. (Area Code 202) 756–2822.

John O. Roach II,

Army Liaison Officer with the Federal Register.

BILLING CODE 3710-08-M

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Information Technology Services, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: Interested persons are invited to submit comments on or before April 25, 1988.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Jim Houser, Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue SW., Room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 732–3915.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Information Technology Services, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Frequency of collection; (4) The affected public; (5) Reporting burden; and/or (6) Recordkeeping burden; and (7) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: March 22, 1988.

Carlos U. Rice,

Director for Information Technology Services.

Office of Secondary Education and Rehabilitation Services

Type of Review: Extension
Title: Annual Report on State Agency Independent Living Rehabilitation Services
Frequency: Annually
Affected Public: State or local governments
Reporting Burden:
  Responses: 79
  Burden Hours: 632
Recordkeeping:
  Recordkeepers: 0
  Burden Hours: 0

Abstract: State agencies that have participated in the Independent Living Rehabilitation Program submit this report to the Department. The Department uses the information to assess the accomplishments of program goals and objectives, and to prepare the Annual Report to Congress.

Office of Postsecondary Education

Type of Review: New
Title: Fiscal Operations Report for the Income Contingent Direct Loan Demonstration Project
Frequency: Annually
Affected Public: State or local governments; businesses or other for-profit; non-profit institutions
Reporting Burden:
  Responses: 10

DEPARTMENT OF ENERGY

Albuquerque Operations Office

AGENCY: Albuquerque Operations Office, DOE.

ACTION: Notice of Restricted Eligibility for Cooperative Agreement Award.

NOTICE: The Department of Energy (DOE), Albuquerque Operations Office, in accordance with 10 CFR 600.7(b), gives notice of its intent to restrict eligibility for the award of a cooperative agreement to the State of New Mexico. This agreement will provide for funding and technical assistance to the State to assist the State in enhancing its emergency response capability as a result of planned shipments of radioactive waste to the Waste Isolation Pilot Plant (WIPP) site near Carlsbad, New Mexico. This Cooperative Agreement is being entered into in accordance with the Supplemental Stripulated Agreement Dated December 27, 1982, between DOE and the State.

FOR FURTHER INFORMATION CONTACT: James L. Robbins, U.S. Department of Energy, Albuquerque Operations Office, Contracts and Industrial Relations Division, P.O. Box 5400, Albuquerque, New Mexico 87115, (505) 846–4320.

Issued in Albuquerque, New Mexico, on March 8, 1988.

James G. Hoyal, Jr.,

Director, Contracts and Industrial Relations Division.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER88–292–000 et al.]

Iowa Electric Light and Power Co., et al.; Electric Rate and Corporate Regulation Filings

Take notice that the following filings have been made with the Commission:

1. Iowa Electric Light and Power Company

[Docket No. ER88–292–000]

March 21, 1988.

Take notice that on March 15, 1988, Iowa Electric Light and Power Company (Iowa Electric) tendered for filing proposed changes in its FERC Electric Service Tariff, Original Volume I. The proposed changes would increase revenues from jurisidictional sales and service by $875,074 based on the 12-month period ending December 31, 1986. Filing requirements are submitted under § 35.13(a)(2) of the Commission's Rule and Regulations.

Iowa Electric states that, under rates currently in effect, its overall rate of return realized from service to its resale customers is inadequate and below the level of the FERC generic bench mark. The proposed rates are designed to enable Iowa Electric to increase revenues by $875,084 in two phases. In Phase I existing rates would be increased by $290,767 per annum on March 1, 1988; and in Phase II rates would be increased by an additional $584,317 per annum on March 1, 1989.

Copies of the filings were served upon the public utility's jurisdictional customers, the Iowa State Utilities Board, and Iowa Office of Consumer Advocate.

Comment date: April 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

2. Wisconsin Electric Power Company

[Docket No. ER88–160–000]

March 21, 1988.

Take notice that on March 16, 1988, Wisconsin Electric Power Company (Wisconsin Electric) tendered for filing an amendment to its filing in the above-referenced docket. The filing was made in response to an information request from the Division of Electric Power Application and Review. Rate sheets detailing the specific charges applicable for Transactions No. 1 and 2 of the assigned power sales agreement between Wisconsin Electric and Public Power Inc. SYSTEM (WPPI SYSTEM) were provided.

Wisconsin Electric renews its request for an effective date of January 1, 1988.

Copies of the filing have been served on WPPI SYSTEM, the Public Service Commission of Wisconsin, and the Michigan Public Service Commission.

Comment date: April 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

3. Fitchburg Gas and Electric Light Company

[Docket No. ER88–191–000]

March 22, 1988.

Take notice that on March 10, 1988, Fitchburg Gas and Electric Light Company (Fitchburg) tendered for filing an amendment to the initial rate schedule filed by Fitchburg on January 12, 1988, as amended February 24, 1988.

Fitchburg states that the purpose of the amendment is to adjust the rate for a change to the income tax factor. The revision results in a maximum rate of $9.55 per kilowatt-year for generation and $16.02 per kilowatt-year for transmission. There is no change in the filed energy charges.

Comment date: April 5, 1988, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining appropriate action to be taken, but will not seved to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88–6607 Filed 3–24–88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP88–280–000 et al.]

Trunkline Gas Co. et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Trunkline Gas Company

[Docket No. CP88–280-000]

March 18, 1988.

Take notice that on March 9, 1988, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP88–280–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport gas for Tenngasco Exchange Corporation (Tenngasco), a marketer of natural gas, under the certificate issued in Docket No. CP86–586–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Trunkline proposes to transport up to 150,000 dt of natural gas per day and up to 14,000,000 dt of gas per year for Tenngasco. It is stated that Trunkline would receive the gas from Tenngasco at various existing points of interconnection on Trunkline's system in Illinois, Louisiana, offshore Louisiana and Texas. Trunkline states that it would deliver the volumes for Tenngasco's account to Midwestern Gas Transmission Company (Midwestern) in Vermilion, Illinois for Midwestern's system supply. It is indicated that the transportation service would have a primary term of one month and would continue on a monthly basis thereafter.

Trunkline states that it filed an initial report in Docket No. ST88–2075–000, reporting that the service commenced January 4, 1988, under the automatic authorization provisions of § 284.223(a) of the Commission's Regulations. It is also stated that no construction of facilities would be required to effect the transportation service. Trunkline proposes to charge Tenngasco the applicable rate under Trunkline's currently effective Rate Schedule PT.

Comment date: May 2, 1988, in accordance with Standard Paragraph G at the end of this notice.

2. Mississippi River Transmission Corporation

[Docket No. CP88–271–000]

March 21, 1988.

Take notice that on March 3, 1988, Mississippi River Transmission Corporation (MRT), 9900 Clayton Road, St. Louis, Missouri 63124, filed in Docket No. CP88–271–000 a request pursuant to §§ 157.205 and 157.212 of the Regulations under the Natural Gas Act (18 CFR 157.205 and 157.212) for authorization to add a delivery point to one of its existing firm sales customers, Arkansas Louisiana Gas Company (ALG), under the certificate issued in Docket No. CP82–489–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request filed with the Commission and open to public inspection.

MRT proposes to establish the new delivery point by installing a tap and appurtenant facilities including a 2" meter and regulator station to be located within MRT's right-of-way on its mainline system in the Northwest Quarter of the Southwest Quarter (NW¼ SW¼) of Section 25, T7N, R6W, White County, Arkansas. ALG requires the delivery of gas at the proposed location to serve the City of West Point, Arkansas. MRT states that it would supply no more than 120 Mcf of natural gas on a peak day and an estimated 8,600 Mcf of natural gas on an annual basis at the proposed delivery point. It is estimated that the total for all costs associated with the installation of the proposed facilities will be $40,000. MRT states that ALG would reimburse it for all costs associated with the installation of these facilities and the application filing fee.

MRT states that its FERC Gas Tariff does not prohibit the addition of new delivery points and that it has sufficient capacity to accomplish the deliveries proposed herein without detriment or disadvantage to its other customers. MRT states that it does not propose to increase or decrease the total daily and/or annual quantities it is authorized to deliver to ALG.

Comment date: May 5, 1988, in accordance with Standard Paragraph G at the end of this notice.

3. Trunkline Gas Company

[Docket No. CP88–290–000]

March 21, 1988.

Take notice that on March 11, 1988, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP88–290–000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport gas on behalf of Intercon Gas, Inc. (Intercon), under the authorization issued in Docket No. CP86–586–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Trunkline would perform the proposed interruptible transportation service for Intercon, a gas marketer, for the system supply of four interstate pipeline companies, pursuant to a gas transportation agreement dated January 6, 1988. The term of the transportation agreement is from the initial date of service under § 284.223(a) of the regulations and would continue in effect month-to-month thereafter unless terminated by either party upon 30 days prior written notice. Trunkline proposes to transport on a peak day 80,000 dakatherm; on an average date 30,000 dakatherm; and on an annual basis 29,200,000 dekatherm of natural gas for Intercon. Trunkline proposes to receive the subject gas from various existing points of receipt on its system in Illinois, Louisiana, Offshore Louisiana, Tennessee and Texas. Trunkline would then transport and redeliver the subject gas, less 0.7 percent fuel and unaccounted for line loss, to an existing point of interconnection with: (1) United Gas Pipeline Company in St. Mary Parish, Louisiana; (2) Tennessee Gas Pipeline Company in St. Mary Parish, Louisiana; (3) Texas Eastern Transmission Company in Beauregard Parish, Louisiana; and (4) Transcontinental Gas Pipe Line Corporation in Beauregard Parish, Louisiana for the system supply of each of the Interstate pipeline companies.

Trunkline states that it would perform such transportation service for Intercom pursuant to its Rate Schedule PT. The current rate for the proposed transportation service is 14.56 cents per dekatherm received at the point of receipt, pursuant to Rate Schedule PT and the Commissions order issued April 30, 1987, in Docket No. RP87–15–006 (39 FERC § 61,100) and May 29, 1987, in Docket No. RP87–67–000 (39 FERC § 61,234). In addition to the above mentioned rate, Trunkline would charge the unit amount for the transportation of liquid and liquefiables as prescribed in its settlement in Docket No. RP80–106–010.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's regulations. Trunkline commenced such self-implementing service on January 8, 1988, in Docket No. ST88–2103–000.

Comment date: May 5, 1988, in accordance with Standard Paragraph G at the end of this notice.

4. Midwestern Gas Transmission Company

[Docket No. CP88–266–000]

March 21, 1988.

Take notice that on March 2, 1988, Midwestern Gas Transmission Company (Midwestern), P.O. Box 2511, Houston, Texas, 77252, filed an application pursuant to section 7(c) of the Natural Gas Act seeking a certificate of public convenience and necessity amending its authority to render firm transportation service for Northern States Power Company (Minnesota) a Minnesota corporation, and Northern States Power Company (Wisconsin), a Wisconsin Corporation (jointly referred to as NSP), all as more fully set forth in this application, which is on file with the Commission and open to public inspection.

Midwestern seeks authority to amend the transportation agreement comprising Rate Schedule T–9 to allow expanded service during five months of the year. Midwestern purposes for service during the Winter Season (November 1, to March 31): (1) To increase NSP's Winter Season Firm Transportation Quantity to 78,200 Dth/day; (2) to increase the Winter Season maximum receipt quantity at the Emerson Input Point to 50,360 Dth/day; and (3) to increase the firm transportation quantity downstream of the North Branch Input Point from 12,185 Dth/day to 22,200 Dth/day. It is stated that the receipt quantity at the Downstream Receipt Points would only be limited by the Firm Transportation Quantity and the aggregate deliveries from the Midwestern system downstream of these Downstream Input Points. Midwestern states that the current Annual Quantity Entitlements, and the daily quantity limits during the remainder of the year would remain unchanged.

Midwestern's proposed receipt quantities are premised upon the authorization of the transportation service proposed in Docket No. CP87-106-000, according to Midwestern. Midwestern states that if its pending application in Docket No. CP87-106-000 is not approved, it requests alternative authority to increase the maximum receipt quantity at the Emerson Input Point during the Winter Season to 45,337 Dth/day. Midwestern adds that if its application in Docket No. CP87-106-000 is later approved, that it may have pregranted authority to, at that time, increase the maximum winter season Emerson Input Point receipt quantity from 45,337 Dth/day to 50,360 Dth/day.

Midwestern states that expansion of the T-9 service is feasible due to winter operating conditions and the pattern of system deliveries. Midwestern further states that NSP needs the expanded service to meet firm demand obligations and to replace propane peak shaving facilities.

Comment date: April 11, 1988, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

5. Columbia LNG Corporation

[Docket No. CP86-304-002]

March 21, 1988.

Take notice that on March 7, 1988, Columbia LNG Corporation ("Columbia"), 20 Montchanin Road, Wilmington, Delaware 19807, filed in Docket No. CP86-304-002, an amendment to its application for the certificate of public convenience and necessity issued under section 7(c) of the Natural Gas Act, as amended, in Docket No. CP86-304-000, 35 FERC ¶ 62,185 (1986) to provide for a new point of delivery to Washington Gas Light Company ("Washington") and for authorization to construct and operate subject point of delivery and to modify Columbia's Rate Schedule X-2, all as more fully set forth in the application on file with the Commission and open for public inspection.

It is stated that Applicant seeks authorization to construct a tap facility on its existing pipeline facilities to provide a new point of delivery to Washington and to transport and redeliver quantities of natural gas to Washington at the tap pursuant to the terms and conditions of Columbia's Rate Schedule X-2, which is a gas transportation agreement between Columbia and Washington dated January 31, 1986. It is further stated that the proposed 12-inch tap will be located near Centreville, Fairfax County, Virginia, and would permit delivery by Columbia directly into Washington's facilities located in Fairfax County.

Applicant states that Washington will reimburse Columbia for all expenses incurred in the construction and installation of the tap facility and for remote supervisory control at Columbia's Loudoun measuring station.

Comment date: April 11, 1988, in accordance with Standard Paragraph F at the end of this notice.

6. El Paso Natural Gas Company

[Docket No CP88-270-000]

March 21, 1988.

Take notice that on March 3, 1988, El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP88-270-000 an application pursuant to section 7 of the Natural Gas Act (NGA) for a certificate of public convenience and necessity authorizing the revision and reinstitution of certain standby charges under its existing sales rate schedules, all as more fully set forth in the application which is on file with the commission and open to public inspection.

El Paso states that on December 31, 1987, El Paso filed, pursuant to section 4 of the NGA and Part 154 of the Commission's regulations, its notice of change of rates for natural gas service rendered to its jurisdictional customers for all rate schedules contained in its FERC Gas Tariff, Volume Nos. 1 and 1-A and certain rate schedules in Volume Nos. 2 and 2-A. El Paso states that as a part of this notice of change, it proposed *inter alia*, to reclassify certain costs from production to transmission for rate design purposes and otherwise to revise its existing rate design as reflected in its current rates established through the settlements in Docket Nos. RP85-58-000 and RP86-45-000. El Paso asserts that of particular relevance herein, as a direct consequence of the cost classification and revised rate design reflected in new rates proposed in Docket No. RP88-44-000, which is currently pending before the Commission, the existing standby charges in the existing sales rate schedules (Rate Schedules ABD-1, ABD-S,G,A-1-X and X-1) were proposed to be deleted.

El Paso States further that in a Commission order issued January 29, 1988, in Docket Nos. RP88-44-000 and CP88-203-000, the Commission accepted and suspended the effectiveness of El Paso's revised rates for five months until July 1, 1988, at which time these rates would be made effective subject to refund and certain conditions. It is stated that the Commission required that El Paso reclassify certain production area costs and revenues from transmission back to production area costs and revenues from proposed Capacity Reservation Changes and that it eliminate the differentiation in its proposed rates for interruptible transportation in its proposed rates for interruptible transportation under Rate Schedule T-1 and firm transportation under Rate Schedule T-3 between Capacity Reservation Charge Related and Non-Capacity Reservation Charge Related transportation. El Paso asserts that in doing so the Commission recognized that the requested changes might make it appropriate for El Paso to propose to add or waive certain charges through a "properly designed standby charge." El Paso feels that the Commission held that reinstatement of standby charges would require certificate authorization pursuant to Section 7 of the NGA.

El Paso further states that similar to the standby charges initially established in Docket No. RP86-45-000, the sales standby charges proposed in the instant application would be applicable to sales customers who elect to swing to transportation services while retaining their current call on sales gas. El Paso states that its customers have access to such service currently and consequently no new service is being proposed herein. El Paso believes that the standby charge would serve the necessary function of appropriately allocating the costs of providing previously authorized sales services and would provide El Paso with a means whereby those costs may be recovered from the customers on whose behalf they are incurred. El Paso asserts that the standby charge is simply a mechanism through which El Paso could be compensated for continuing to stand ready to provide sales service on demand during periods when customers are otherwise availing themselves of the opportunity to switch to transportation gas sources to meet requirements which would otherwise be served with El Paso sales gas.

El Paso explains that a customer who contracts for transportation service under Rate Schedule T-1 while retaining the current call on sales service would be billed a standby charge under the appropriate sales rate schedule on a quantity equivalent to the volume of transportation gas taken in lieu of sales gas subject to certain exceptions more fully set forth in the application. Production area charges and field transportation charges otherwise payable under El Paso Rate Schedule T-1 would not apply with respect to volumes to which the standby charge is applicable.

El Paso explains, with respect to Rate Schedule T-3, a customer who elects to reserve the right to receive either sales gas or firm transportation, the standby charge would be billed based on 95 percent of the firm transportation contract demand quantity. Further, the customer would not be subject to the standby charge if and to the extent it elects to reduce its existing entitlement to receive El Paso's sales gas and when a customer has paid a standby charge the associated production area charges and field transportation charges would not be payable.

Comment date: April 11, 1988, in accordance with Standard Paragraph F at the end of this notice.

7. United Gas Pipe Line Company

[Docket No. CP88-272-000]

March 21, 1988.

Take notice that on March 3, 1988, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, pursuant to section 7(b) of the Natural Gas Act, as amended, filed in Docket No. CP88-272-000 an application requesting an order permitting and approving abandonment of facilities located within its gas gathering system located in Brooken Field in Haskell County, Oklahoma.

United states in its Application that it has released from contract its reserves connected to the Brooken Field System since it no longer has, or foresees, a need for this gas. United also states that the Brooken Field System is located some distance from and is not connected to United's main system, and that it would be economically more efficient for United to dispose of the system rather than to continue to incur the attendant operation and maintenance expense. United has entered into an agreement of sale of the Brooken Field System to Stellar Gas Company, a Texas corporation, and submits that the present and future public interest is best served by allowing United to abandon the certificated facilities located within the Brooken Field System and thereby remove them from United's rate base, as is more fully set forth in the Application which is on file with the Commission and open for public inspection.

Comment date: April 11, 1988, in accordance with Standard Paragraph F at the end of this notice.

8. Shenandoah Gas Company

[Docket No. CP88-278-000]

March 21, 1988.

Take notice that on March 7, 1988, Shenandoah Gas Company (Shenandoah), P.O. Box 2400, Winchester, Virginia 22601 filed in Docket No. CP88-278-000 an application pursuant to section 7 of the Natural Gas Act (NGA) and § 284.224 of the Commission's regulations for a blanket certificate of public convenience and necessity authorizing transportation of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Shenandoah requests authority to use its jurisdictional transmission system to engage in self-implementing interruptible transportation of customer-owned volumes of gas to end-users located in its section 7(f) of the NGA service area in the states of Virginia and West Virginia. Shenandoah also requests that the Commission declare that it is eligible to be treated as a local distribution company for the purposes of section 311 of the Natural Gas Policy Act of 1978

Comment date: April 11, 1988, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission. 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure , a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed or if the Commission on its own motion believes that a format hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Act.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket Nos. QF88-274-000 et al.]

C-E Huntington Limited Partnership et al.; Small Power Production and Cogeneration Facilities; Qualifying Status; Certificate Applications, etc.

Comment Date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

March 22, 1988.

Take notice that the following filings have been made with the Commission.

1. C-E Huntington Limited Partnership

[Docket No. QF88-274-000]

On March 2, 1988, C-E Huntington Limited Partnership (Applicant), of 7 Waterside Crossing, Windsor, Connecticut 06095 submitted for filing an application for certification of a facility

OL.
53
ISS
58
MR
25
988
MI

as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Huntington, New York. The facility will consist of three stoker-fired waterwall steam generators and a steam turbine generator. The maximum net electric power production capacity of the facility will be 22 megawatts. The primary energy source will be Biomass in the form of municipal solid waste. Natural gas will be used for start-up, shut-down and temperature control, however, such fossil fuel usage will not exceed 15% of the total energy input to the facility during any calendar year period.

2. American REF–FUEL Company of Lehigh Valley

[Docket No. QF86–289–001]

On February 25, 1988, American REF–FUEL Company of Lehigh Valley (Applicant), of P.O. Box 3151, Houston, Texas 77253 submitted for filing an application for recertification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The facility as originally proposed was to consist of two solid waste-fired steam generators with a combined capacity of 750 tons per day and net electric power production capacity of 19.4 MW.

By order issued January 28, 1986, the Commission granted certification of the facility as a small power production facility (34 FERC ¶ 62,239).

The recertification is requested due to an increase in the steam generator's capacity and the net electric power production capacity to 1000 tons per day and 32 MW respectively.

3. A. Johnson Energy Development, Inc.

[Docket No. QF88–282–000]

On March 1, 1988, A. Johnson Energy Development, Inc. (Applicant), of 110 East 59th Street, New York, New York 10022 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Monterey County, California. The facility will consist of a fluidized bed steam generator and an extraction/condensing turbine generator. The net electric power production capacity will be approximately 16 megawatts. The primary energy source will be biomass in the form of wood waste. Natural gas will be used for start-up purposes, however, such fossil fuel usage will not exceed 1.01% of the total energy input to the facility during any calendar year period.

4. Hanover Energy Associates

[Docket No. QF88–278–000]

On February 26, 1988, Hanover Energy Associates, a Massachusetts Limited Partnership (Applicant), of 87 Elm Street, Cohasset, Massachusetts 02025, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located on Route 738, Doswell, Virginia. The facility will consist of four combustion turbine generators, four waste heat recovery steam generators and two extraction/condensing steam turbine generators. The thermal output of the facility, in the form of steam, will be used by National Energetics Company in the production of carbon dioxide. The primary energy source for the facility will be coal and natural gas. A coal gasification facility, to be located at the site, will consist of twenty-four to twenty-eight Wellman-Galusha gasifiers. The electric power production capacity of the facility will be 698 MW. The facility is expected to be operational by July 1, 1990.

5. Killingly Energy Limited Partnership

[Docket No. QF88–287–000]

On March 9, 1988, Killingly Energy Limited Partnership (Applicant), of 100 Clinton Square, Suite 400, Syracuse, New York 13202, submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The proposed small power production facility will be located at Louisa Viens Drive, Killingly, Connecticut. The Plant will consist of a boiler, condensing steam turbine generators, and cooling towers. The primary energy source will be biomass in the form of wood waste. The net electric power production capacity of the facility will be 32.2 MW. Startup of the new facility is expected to begin in January 1992.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717–01–M

[Docket No. ID–2260–001]

James J. Howard; Filing

March 22, 1988.

Take notice that on March 16, 1988, James J. Howard filed an application pursuant to section 305(b) of the Federal Power Act for Commission authorization to hold concurrently the following positions:

Position	Name of corporation
Chairman, President and Chief Executive Officer.	
Director	Northern States Power Company—Minnesota.
Director	Equitable Life Assurance Society of the United States.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 4, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717–01–M

[Docket No. CI87–265–001]

Mesa Operating Limited Partnership; Application for Extension of Blanket Limited-Term Abandonment and Certificate With Pregranted Abandonment

March 22, 1988.

Take notice that on January 14, 1988, Mesa Operating Limited Partnership, One Mesa Square, Amarillo, Texas 79189, filed an application pursuant to section 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for amendment of its blanket limited-term abandonment and certificate with pregranted abandonment previously issued by the Commission for a term expiring March 31, 1988, to extend such authorization for a three year term, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before March 29, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

N–Gas, Inc., et al.; Applications for Blanket Limited-Term Certificates With Pregranted Abandonment[1]

March 22, 1988.

Take notice that each Applicant listed herein has filed an application pursuant to section 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for a blanket certificate with pregranted abandonment authorization for the term listed herein, all as more fully set forth in the applications which are on file with the Commission and open for public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before April 7, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

---

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

[Docket No. CI88–74–001]

Panhandle Trading Co.; Application for Extension of a Blanket Limited-Term Certificate With Pregranted Abandonment

March 21, 1988.

Take notice that on March 17, 1988, Panhandle Trading Company (PTC), P.O. Box 1354, Houston, Texas 77251–1354, filed an application pursuant to section 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for amendment of its blanket limited-term certificate with pregranted abandonment previously issued by the Commission for a term expiring March 31, 1988, to extend such authorization for an unlimited term and to authorize sales by others to PTC, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before March 29, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared March 7, 1988 through March 11, 1988 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5075/76.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 24, 1987 (52 FR 13749).

Draft EISs

ERP No. D-AFS-K61091-CA, Rating LO. Shasta and Trinity Units, Revised Operation and Development Plan, Whiskeytown-Shasta-Trinity National Recreational Area, Implemenation, Shasta and Trinity National Forests, Shasta and Trinity Counties, CA

Summary:

EPA expressed a lack of objections to this project, but requests that the Forest Service record of decision commit to the DEIS mitigation measures to protect and improve water quality on the lakes and surface waters of the NRA.

Final EISs.

ERP No. F-BLM-G61031-NM, New Mexico Statewide Wilderness Study Areas, Wilderness Recommendtaions, Designation or Nondesignation, several Counties, NM. Summary:

EPA feels this project satisfactorily responds to previous concerns. EPA has no objections to the project as proposed.

ERP No. F-IBR-L39044-OR, Umatilla Basin Water Supply Project, Umatilla River Streamflows Improvement and Salmon and Steelhead Fish Runs Restoration, Implementation and Funding, Umatilla and Morrow Counties, OR.

Summary:

EPA's review of this project was not deemed necessary. No formal comments were made to the agency.

ERP No. F-SFW-L64036-AK, Yukon Delta National Wildlife Refuge, Long Term Management Plan and Wilderness Review, Implementation.

Summary:

EPA continues to have environmental concerns with the preferred alternative. EPA suggested that activities with impacts that require monitoring should be delayed until adequate funding and staff levels are assured.

Regulations

ERP No. R-ASC-A99182-00, 7 CFR Part 704; Conservation Reserve Program Interim Rule to Amend Regulation (53 FR 733).

Summary:

EPA commends ASC on the amendments authorizing filter strips and encouraging free planting on lands enrolled in the Conservation Reserve Program Program. EPA suggests additional changes to increase environmental benefits.

Dated: March 22, 1988.

William D. Dickerson,

Deputy Director Office of Federal Activities.

BILLING CODE 6560-50-M

[FRL-3354-6]

Proposed Administrative Settlement and Opportunity to Comment; Harold Dellett et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed administrative settlement and opportunity for public comment.

SUMMARY: EPA is providing notice of a proposed administrative settlement for recovery of EPA's response and oversight costs pursuant to section 122(i) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), as amended by the Superfund Amendments and Reauthorization Act of 1986. Public Comment is also solicited by this notice.

Under 42 U.S.C. 9606, EPA is authorized to enter into and to issue Orders requiring among other things, investigation and cleanup of facilities where hazardous substances may or have been released. 42 U.S.C. 9607 provides that a party responsible for the release is liable for costs expended by the United States in its response to the problem. 42 U.S.C. 122(h) provides EPA with authority to consider, compromise and settle a claim for costs incurred by the United States if the case has not been referred to the Department of Justice. Because this case is one in which the United States has incurred costs less than $500,000, EPA may compromise and settle the claim without the prior written approval of the Attorney General. This Notice pertains to the settlement of a case which has not been referred to the Department of Justice.

Three responsible parties have completed cleanup of PCB contamination at the facility which is located in Escondido, California. The responsible parties are: Harold Dellett, owner of the facility, ATI Inc, lessee, and CSI, Inc. sublessee. Cleanup activities included: demolition and off-site disposal of contaminated buildings; removal and off-site disposal of PCB-contaminated soil; and post-cleanup soil sampling to confirm that established cleanup levels were achieved.

EPA expended $179,193 over a three-year period to conduct initial soil sampling and to oversee the responsible parties' cleanup. The responsible parties have agreed to reimburse $144,000 of the total costs expended by EPA in settlement of this case. EPA believes that the settlement is fair and in the public interest.

EFFECTIVE DATE: April 25, 1988. Comments will be considered if received before the effective date.

ADDRESS: Comments may be mailed to: Betsy Curnow, United States Environmental Protection Agency, 215 Fremont Street, T-4, San Francisco, California, 94105.

FOR FURTHER INFORMATION CONTACT: Betsy Curnow, (415) 974-8364.

Dated: February 29, 1988.

Certain Chemical Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). In the **Federal Register** of November 11, 1984 (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. Notices for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of thirteen such PMNs and provides a summary of each.

DATES: Close of Review Periods:

Agency Information Collection Submitted to the Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for clearance in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Type: Extension of 3067-0120.

Title: Implementation of Coastal Barriers Resources Act.

Abstract: Section II of the Coastal Barriers Resources Act prohibits the sale of National Flood Insurance Program policies for new construction and substantial improvements of structures on undeveloped coastal barriers on or after October 1, 1983. The information collection is used by FEMA to determine that a structure is neither new construction or a substantial improvement, and, therefore, is eligible for flood insurance.

Type of Respondents: Individuals or households, State or local governments, farms, businesses or other for profit, Federal agencies or employees, nonprofit institutions, small businesses or organizations.

Number of Respondents: 25.

Burden Hours: 38.

Frequency of Recordkeeping or Reporting: On occasion.

Copies of the above information collection request and supporting documentation can be obtained by calling or writing the FEMA Clearance Officer, Linda Shiley, (202) 646-2624, 500 C. Street, SW., Washington, DC 20472.

Comments should be directed to Francine Picoult, (202) 395-7231, Office of Management and Budget, 325 NEOB, Washington, DC 20503 within two weeks of this notice.

Date: March 18, 1988.

Wesley C. Moore,

Director, Office of Administrative Support.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Algemene Bank Nederland, N.V., et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities

The organizations listed in this notice have applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statment of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than April 8, 1988.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Algemene Bank Nederland, N.V.*, Amsterdam, The Netherlands; A.B.N.—Stichting, Amsterdam, The Netherlands; ABN/LaSalle North America, Inc., Chicago, Illinois; and LaSalle National Corporation, Chicago, Illinois; to acquire 100 percent of the voting shares of Lane Data Services, Inc., Northbrook, Illinois, and thereby engage in the provision of courier services pursuant to § 225.25(b)(10) of the Board's Regulation Y.

2. *R & J Financial Corporation* Elma, Iowa; to engage in general insurance agency activities pursuant to § 225.25(b)(8)(iv) of the Board's Regulation Y. These activities will be conducted in the State of Iowa and any state or states immediately adjacent thereto plus any state in which specific insurance agency activity was conducted or approved to be conducted prior to May 1, 1982. Applicant will acquire the insurance activities from its subsidiary, Peoples Savings Bank, Elma, Iowa. Comments on this application must be received by April 15, 1988.

Board of Governors of the Federal Reserve System, March 21, 1988.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

The Sanwa Bank, Ltd., Osaka, Japan; Application To Engage in Various Securities and Financial Advisory Activities

The Sanwa Bank, Limited, Osaka, Japan, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) ("BHC Act") and § 225.23(a)(2) and (3) of the Board's Regulation Y (12 CFR 225.23(a)(2) and (3)), to acquire Brophy, Gestal, Knight & Co., L.P., New York, New York ("Company"), a primary dealer in U.S. government securities, and thereby engage in:

(1) Underwriting and dealing in obligations of the United States, general obligations of states and their political subdivisions, and other obligations that state member banks are authorized to underwrite and deal in under 12 U.S.C. 24 and 335 ("bank-eligible securities") pursuant to 12 CFR 225.25(b)(16) and engaging in activities incidental thereto including repurchase and reverse repurchase transactions and the provision of clearing, settling, accounting, record keeping and other ancillary services to those counterparties with which it deals that do not maintain accounts with clearing agencies;

(2) Engaging in futures, forward and options contracts on bank-eligible securities for hedging purposes in accordance with 12 CFR 225.142;

(3) Providing discount brokerage services in accordance with 12 CFR 225.25(b)(15);

(4) Providing portfolio investment advice and research and furnishing general economic information and advice, general economic statistical forecasting services and industry studies pursuant to 12 CFR 225.25(b)(4) (iii) and (iv) in connection with and as an incident to the proposed bank-eligible securities activities but not in connection with its brokerage activities;

(5) Providing advice in connection with financing transactions to nonaffiliated institutional customers in accordance with the limitations set forth in *Signet Banking Corporation*, 73 Federal Reserve Bulletin 59 (1987); and

(6) Acting as a futures commission merchant ("FCM") for nonaffiliated persons in the execution and clearance on major commodity exchanges of futures contracts and options on futures contracts for bullion, foreign exchange, government securities, certificates of deposit, and other money market instruments that a bank may buy or sell in the cash market for its own account; and providing investment advice to institutional Customers in conjunction therewith as permitted by 12 CFR 225.25(b)(18) and (19) respectively (until Company becomes a registered FCM, Applicant proposes that Company continue to receive customer orders to purchase and sell financial contracts and pass them on to FCM's for execution, clearing and settlement for a fee; Company would not take a position as principal in such contracts).

Applicant has also applied for approval to acquire indirectly through the Company 1 percent of the voting shares of Liberty Brokerage, Inc., New York, New York, an inter-dealer blind broker of government securities.

Applicant contends that its proposed acquisition of Company will be procompetitive, will provide Company with a stronger capital base and access to broader customer base and will not result in adverse effects.

Any views or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, not later than April 15, 1988. Any request for a hearing must, as required by 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of San Francisco.

Board of Governors of the Federal Reserve System, March 21, 1988.

James McAfee,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on February 26, 1988.

Social Security Administration

(Call Reports Clearance Officer on 301-965-4149 for copies of package.)

1. Application for Retirement Insurance Benefits —0960-0007— The information is needed to determine an applicant's eligibility to retirement insurance benefits. Respondents: Individuals or households. Number of Respondents: 1,560,000; Frequency of Response: One-time *Estimated Annual Burden:* 273,000 hours.

2. Letter to Employer Requesting Wage Information —0960-0184— This form is used by SSA to verify the wages paid to an SSI claimant or recipient to determine to what extent that person can be entitled to SSI payments. Respondents: Businesses or other for-profit, Small businesses or organizations. Number of Respondents: 259,100; Frequency of Response: Occasionally; Estimated Annual Burden: 23,750 hours.

3. Report to U.S. Social Security Administration by Person Receiving Benefits for a Child or for an Adult Unable to Handle Funds (and) Report to U.S. Social Security Administration—0960-0049—These forms are used by SSA to determine the continuing entitlement and benefit amounts of social security beneficiaries who live outside the United States. Respondents: Individuals or households. Number of Respondents: 325,000; Frequency of Response: Annually; Estimated Annual Burden: 32,500 hours.

4. Disability Return to Work Mailer—NEW—The information collected will test the effectiveness of using a mailer to identify title II disability beneficiaries who have returned to work. Respondents: Individuals or households. Number of Respondents: 23,600; Frequency of Response: One-time; Estimated Annual Burden: 4,074 hours.

OMB Desk Officer: Elaina Norden

Health Care Financing Administration

(Call Reports Clearance Officer on 301-594-1238 for copies of package.)

1. Intermediary's Request to Hospital for Medical Information on Inpatient Claims for Statutorily Excluded Services—0938-0224—This information collection is to enable intermediaries to obtain hospital medical records for inpatient claims involving statutorily excluded services. Respondents: State or local governments, Businesses or other for-profit, Non-profit institutions, Small businesses or organizations. Number of Respondents: 116; Frequency of Response: Occassionally; Estimated Annual Burden: 29 hours.

2. Intermediary Request to Skilled Nursing Facilities for Medical Information on Claims to be processed—0938-0223—This information is collected and used by fiscal intermediaries to determine medical coverage for skilled nursing facilities. Respondents: Businesses or other for-profit, Non-profit institutions. Number of Respondents: 7,381; Frequency of Response: Occasionally; Estimated Annual Burden: 176,663 hours.

3. HMO/CMP Disenrollment Survey Form—NEW—The purpose of the survey is to determine whether medicare beneficiaries disenroll for the HMO/CMP for reasons related to health care needs and their ability to get care. Respondents: Individuals or households. Number of Respondents: 13,931; Frequency of Response: One-time; Estimated Annual Burden: 3,483 hours.

OMB Desk Officer: Allison Herron.

Office of Human Development Services

(Call Reports Clearance Officer on 202–472–4415 for copies of package.)

1. State Long-Term Care Ombudsman Report—0980–0121—The Older Americans Act requires State Agencies on Aging to establish a statewide uniform reporting system to collect and analyze data relating to complaints and conditions in long term care facilities for the purpose of identifying and resolving significant problems, with provisions for submission of such data to the agency of the State responsible for licensing or certifying long term care facilities. Respondents: State or local governments. Number of Respondents: 52; Frequency of Response: One-time; Estimated Annual Burden: 832 hours.

2. Programs Performance Report for Title III of the Older Americans Act—0980–0004—The Program Performance Report monitors program operations of State Agencies to allow AoA to respond to Congress, the Department and the public; establish policy direction, and measure program impact. Respondents: State or local governments. Number of Respondents: 57; Frequency of Response: One-time; Estimated Annual Burden: 1,157 hours.

3. Child Welfare Services State Plan (Title IV–B)—0980–0142—State Plan is jointly developed by Federal and State staff as required by Title IV–B of the Social Security Act (45 USC 622). States assure compliance with law and regulation, analyze needs, develop goals and objectives, and summarize services and expenditures. States may choose format and submission period for 1, 2 or 3 years. Respondents: State or local governments; Federal agencies or employees. Number of Respondents: 55; Frequency of Response: One-time; Estimated Annual Burden: 10,000 hours.

OMB Desk Officer: Shannah Koss-McCallum.

Family Support Administration

(Call Reports Clearance Officer on 202–245–0652 for copies of package.)

1. Program Announcement, OCS–88–2 Availability of Funds and Request for Applications Under OCS Demonstration Partnership Program—NEW—The information obtained through the submission of this grant announcement will be used as the basis for awarding nine to twelve grants not exceed $250,000. The grants will test and evaluate new approaches to lessening dependency on public assistance among low income families and individuals. Respondents: State or local governments, Non-profit institutions. Number of Respondents: 120; Frequency of Response: One-time; Estimated Annual Burden: 120 hours.

OMB Desk Officer: Shannah Koss-McCallum.

Office of the Secretary

(Call Reports Clearance Officer on 202–245–6511 for copies of package.)

1. Audit of SSA's Use of the Form SSA–721, Statement of Death and Burial Expenses by Funeral Directors—NEW—The Office of the Inspector General needs information from funeral directors concerning their use of Form SSA–721, which provides notice of death to SSA. Respondents: Businesses or other for-profits, Small businesses or organizations. Number of Respondents: 100; Frequency of Response: Single-time; Estimated Annual Burden: 17 hours.

OMB Desk Officer: Elaina Norden.

Public Health Services

(Call Reports Clearance Officer on 202–245–2100 for copies of package.)

Health Resources Services Administration

1. HRSA Competing Training Grants Application, Supplements and Regulations—0915–0060—The Health Resources and Services Administration uses this information to determine the eligibility of applicants for awards, to calculate the amount of each award, and to judge the relative merit of applications. Respondents: State or local governments, Non-profit institutions. Number of Respondents: 1,964; Frequency of Response: Occasionally; Estimated Annual Burden: 123,850 hours.

Centers for Disease Control

1. Congenital Syphilis Followup—0920–0128—This data collection will provide surveillance data on the extent and trend of congenital syphilis (Under 1 year of age) in the U.S. It will serve as an epidemiologic aid in the diagnosis and followup of cases and will provide local areas with a standardized collection method to assure accurate diagnosis of early congenital syphilis. Respondents: State or local governments. Number of Respondents: 59; Frequency of Response: Occasionally; Estimated Annual Burden: 350 hours.

OMB Desk Officer: Shannah Koss-McCallum.

As mentioned above, copies of the information collection clearance packages can be obtained by calling the Reports Clearance Officer, on one of the following numbers:

PHS: 202–245–2100
HDS: 202–472–4415
SSA: 301–965–4149
HCFA: 301–594–1238
FSA: 202–245–0652
OS: 202–245–6511

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503. Attn: (name of OMB Desk Officer)

Date: March 22, 1988.

James F. Trickett,

Deputy Assistant Secretary, Administrative and Management Services.

BILLING CODE 4150-04-M

Food and Drug Administration

[Docket No. 88N–0106]

Animal Drug Export; Baytril® (Enrofloxacin) Tablets

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Mobay Corp. has filed an application requesting approval for the export of the animal drug Baytril® (enrofloxacin) Tablets for dogs to Canada.

ADDRESS: Relevant information on this application may be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of animal drugs under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: Beverly E. Bartolomeo, Center for Veterinary Medicine (HFV–102), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4500.

SUPPLEMENTARY INFORMATION: The Drug Export Amendments Act of 1986 (Pub. L. 99–660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of drugs that are not currently approved in the United States. The approval process is governed by section 802(b) of the act. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Mobay Corp., Box 390, Shawnee Mission, KS 66201, has filed an application requesting approval for the export of the animal drug Baytril® (enrofloxacin) Tablets for dogs, to Canada. The drug is indicted for treatment of susceptible bacterial pathogens. The application was received and filed in the Center for Veterinary Medicine on March 14, 1988, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by April 4, 1988, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802, Pub. L. 99–660 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Veterinary Medicine (21 CFR 5.44).

Dated: March 21, 1988.

Richard A. Carnevale,

Deputy Associate Director, Office of New Animal Drug Evaluation Center for Veterinary Medicine.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Program Announcement for Three Programs: Advanced Nurse Education Grants, Nurse Practitioner and Nurse Midwifery Grants, and Nursing Special Project Grants, and Proposed Special Consideration for Nursing Special Project Grants (Purpose 2)

The Health Resources and Services Administration announces that applications for the following nursing programs will be accepted in Fiscal Year 1988 and invites comments on the proposed special consideration set forth below for Nursing Special Project Grants, Purpose 2.

(1) Advanced Nurse Education Grants

(2) Nurse Practitioner and Nurse Midwifery Grants

(3) Nursing Special Project Grants

1. Advanced Nurse Education Grants

Section 821 of the Public Health Service Act, as implemented by 42 CFR Part 57, Subpart Z, authorizes assistance to meet the costs of projects to (a) plan, develop and operate, (b) significantly expand, or (c) maintain programs which lead to masters' and doctoral degrees and which prepare nurses to serve as nurse educators, administrators, or researchers or to serve in clinical nurse specialities determied by the Secretary of Health and Human Services to require advanced education.

Eligible Applicants: Public and nonprofit private collegiate schools of nursing.

Section 821(a), requires that the Secretary give priority in geriatric and gerontological nursing.

Special considerations

Applicant institutions that indicate a clear financial need, and plan to sustain programs beyond the period during which Federal assistance is available, and have either a 3-year average enrollment of minority students in graduate nursing education in excess of the national avarage or have proposed new projects aimed at attracting minority students will receive special consideration. The current national average of graduate minority students in nursing is four percent.

Approximately $16.5 million is being made available by the Department of Health and Human Services appropriations for Fiscal Year 1988, (Pub. L. 100–202). In addition to funding noncompeting continuations, it is estimated that 45 competing projects averaging $150,000 will be supported.

Review Criteria

The review of applications will take into consideration the following criteria:

(1) The need for the proposed project including, with respect to projects to provide education in professional nursing specialties determined by the Secretary to require advanced education,

(a) The current or anticipated need for professional nurses educated in the specialty; and

(b) The relative number of program offering advanced education in the specialty;

(2) The need for nurses in the specialty in which education is to be provided in the State in which the education program is located, as compared with the need for these nurses in other States;

(3) The degree to which the applicant proposes to recruit students from States in need of nurses in the specialty in which the education is to be provided, and to promote their return to these States following education;

(4) The degree to which the applicant proposes to encourage graduates to practice in States in need of nurses in the specialty in which the education is to be provided;

(5) The potential effectiveness of the proposed project in carrying out the educational purposes of section 821 of the Act; and

(6) The capability of the applicant to carry out the proposed project.

This program is listed at 13.299 in the *Catalog of Federal Domestic Assistance.*

2. Nurse Practitioner and Nurse Midwifery Grants

Section 822(a) of the Public Health Service Act, as implemented by 42 CFR Part 57, Subpart Y, authorizes assistance to meet the costs of projects to (a) plan, develop and operate, (b) expand, or (c) maintain programs for the education of nurse practitioners and/or nurse midwives.

In accordance with the statute, the Secretary will give special consideration to applications for grants for programs for the education of nurse practitioners and nurse midwives who will practice in health manpower shortage areas (designated under section 332 of the PHS Act) and for programs for the education of nurse practitioners which emphasize education with respect to the special problems of geriatric patients (particularly problems in the delivery of preventive care, acute care and long-term care (including home health care and institutional care)) to such patients and education to meet the particular

BEST COPY AVAILABLE

needs of nursing home patients and patients who are confined to their homes.

Eligible Applicants: Public or nonprofit private schools of nursing and public health, public or nonprofit private schools of medicine which received grants or contracts and under section 882(a) prior to October 1, 1985, public or nonprofit private hospitals, and other public or nonprofit private entities.

Review Critreria

The review of applications will take into consideration the following criteria:

(1) The adequacy of the qualifications and experience of the program director, staff and faculty to carry out the program;

(2) The administrative and managerial ability of the applicant to carry out the proposed project; and

(3) The extent to which the applicant will recruit trainees who are residents of health manpower shortage areas.

Special Considerations

Applicants that indicate a clear, financial need, and plan to sustain programs beyond the period during which Federal assistance is available, and have either a 3-year average enrollment of minority students in graduate nursing education in excess of the national average or have proposed new projects aimed at attracting minority students will receive special consideration.

Approximately $11.3 million is being made available by the Department of Health and Human Services appropriations for Fiscal Year 1988, (Pub. L. 100–202). In addition to funding noncompeting continuations, it is estimated that 23 competing projects averaging $185,000 will be supported. This program is listed at 13.298 in the Catalog of Federal Domestic Assistance.

3. Nursing Special Project Grants

Section 820 of the Public Health Service Act, as implemented by 42 CFR Part 57, Subpart T, authorizes assistance in meeting the costs of special projects to carry out the following designated purposes:

(1) To increase nursing education opportunities for individuals from disadvantaged backgrounds, as determined in accordance with criteria prescribed by the Secretary of Health and Human Services, by:

(A) Identifying, recruiting, and selecting such individuals,

Facilitating the entry of such individuals into schools of nursing,

(C) Providing counseling or other services designed to assist such individuals to complete successfully their nursing education,

(D) Providing, for a period prior to the entry of such individuals into the regular course of education at a school of nursing, preliminary education designed to assist them to complete successfully such regular course of education,

(E) Paying such stipends (including allowances for travel and dependents) as the Secretary may determine for such individuals for any period of nursing education, and

(F) Publicizing, especially to licensed vocational or practical nurses, existing sources of financial aid available to persons enrolled in schools of nursing or who are undertaking training necessary to qualify them to enroll in such schools;

(2) To provide continuing education for nurses;

(3) To provide appropriate retraining opportunities for nurses who (after periods of professional inactivity) desire again actively to engage in the nursing profession;

(4) To demonstrate improved geriatric training in preventive care, acute care and long term care (including home health care and institutional care);

(5) To help to increase the supply or improve the distribution by geographic area or by specialty group of adequately trained nursing personnel (including nursing personnel who are bilingual) needed to meet the health needs of the Nation, including the need to increase the availability of personal health services and the need to promote preventive health care; or

(6) To provide training and education to upgrade the skills of licensed vocational practical or vocational nurses, nursing assistants, and other paraprofessional nursing personnel.

(7) To demonstrate clinical nurse education programs which combine educational curricula and clinical practice in health care delivery organizations, including acute care facilities, long-term care facilities and ambulatory care facilities.

(8) To demonstrate methods to improve access to nursing services in noninstitutional settings through support of nursing practice arrangements in communities.

(9) To demonstrate methods to encurage nursing graduates to practice in health manpower shortage areas (designated under Section 332 of the PHS Act) in order to improve the specialty and geographical distribution of nurses in the United States.

Under section 820(d)(1) funds for special projects under purposes (1) through (6) above must be obligated as follows: not less than 20 percent of the appropriated funds for projects to increase education opportunities for individuals from disadvantaged backgrounds (which may include stipends) (purpose 1); not less than 20 percent of the appropriated funds to demonstrate improved geriatric training (purpose 4); and not less than 10 percent of the appropriated funds to help increase the supply or improve the distribution by geographic area or by specialty groups of adequately trained nursing personnel (purpose 5). The remaining appropriated funds will be awarded for purposes (2), (3) and (6).

Section 820(d)(2) requires that in making grants from funds appropriated for purposes (7) through (9), the Secretary shall give priority to applications for purpose (8).

Eligible Applicants: Public or nonprofit private schools of nursing or other public or nonprofit private entities.

Review Criteria

The review of applications will take into consideration the following criteria:

(1) The national or special local need which the particular project proposes to serve;

(2) The potential effectiveness of the proposed project in carrying out such purposes;

(3) The administrative and managerial capability of the applicant to carry out the proposed project;

(4) The adequacy of the facilities and resources available to the applicant to carry out the proposed project;

(5) The qualifications of the project director and proposed staff;

(6) The reasonableness of the proposed budget in relation to the proposed project; and

(7) The potential of the project to continue on a self-sustaining basis after the period of grant support.

This program is listed at 13.359 in the *Catalog of Federal Domestic Assistance.*

Special Considerations

Special consideration will be given to those projects under purpose 1 (to increase nursing education opportunities for individuals from disadvantaged backgrounds) that propose to use at least 20 percent of grant funding as stipends given directly to nursing students.

Special consideration will be given to special projects under purposes 1 through 6 that plan to continue beyond the period in which Federal funding is available and meet a clear, financial need.

For purposes 7, 8 and 9, special consideration will be given to:

(1) Projects which include a target population of minority or disadvantaged persons.

(2) Projects that plan to continue beyond the period in which Federal funding is available and meet a clear financial need.

(3) Projects which demonstrate efforts to recruit and retain minority nurses.

The reasons for these special considerations are:

(1) To help ensure that grant funds are awarded to educational institutions with a demonstrated need for them;

(2) To encourage grantee institutions to continue grant supported programs after grant support ends; and

(3) To increase the percentage of minority enrollment of students in graduate nursing programs. Minority students are currently underrepresented in these programs.

Approximately $9.0 million is being made available for purposes 1 through 6 by the Department of Health and Human Services appropriations for Fiscal year 1988, (Pub. L. 100-202). In addition to funding noncompeting continuations, it is estimated that 41 competing projects averaging $112,804 will be supported.

Approximately $2.5 million is being made available for purposes 7 through 9. In addition to funding noncompeting continuations, it is estimated that 5 competing projects averaging $145,000 will be supported.

Proposed Special Consideration for Special Project Grants, Purpose 2

Special consideration is being proposed for Purpose 2 for those approved applications with projects which provide expansion of current or development and implementation of new curriculum concerning the prevention of HIV-infection and the care of HIV-infected persons, including AIDS patients. Nursing personnel are increasingly required to provide a wide range of services to HIV-infected persons, including AIDS patients in both inpatient and outpatient settings. However, organized formal curricular offerings for these personnel are not in place. The proposed priority is designed to encourage new offerings.

Interested persons are invited to comment on the proposed special consideration for Special Project Grants, Purpose 2. Normally, the comment period would be 60 days. However, due to the need to implement any changes for the Fiscal Year 1988 award cycle, the comment period has been reduced to 30 days. All comments received on or before April 25, 1988 will be considered before the final special consideration is established. No funds will be allocated or final selections made until a final notice is published indicating whether the special consideration will be applied.

Written comments should be addressed to: Director, Division of Nursing, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 5C-25, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and copying at the Division of Nursing, Bureau of Health Professions, at the above address weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5:00 p.m.

Application Deadlines

Three review cycles are held annually for Advanced Nurse Education Grants, Nurse Practitioner and Nurse Midwifery Grants, and Nursing Special Project Grants.

To receive consideration, applications must meet a deadline of July 1, 1988. Any application not meeting a particular deadline will be reviewed with applications meeting the subsequent deadline. Applications shall be considered as meeting the deadline if they are either:

(1) *Received* on or before the deadline date, or

(2) *Postmarked* on or before the deadline date, and received in time for submission to the independent review group.

A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

The standard application form and general instructions Form PHS 6025-1 HRSA Competing Training Grant Application and Supplements for each of the above grant programs have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB clearance number is 0915–0060.

For specific guidelines and information regarding these programs, contact: Division of Nursing, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 5C-26, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443-5786.

Questions regarding grants policy should be directed to: Grants Management Officer, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8C-22, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443-6915.

These programs are not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR Part 100).

Dated: February 19, 1988.

David N. Sundwall,

Administrator, Assistant Surgeon General.

BILLING CODE 4160-15-M

Public Health Service

Privacy Act of 1974; Amendment of Existing System of Records

AGENCY: Public Health Service, Department of Health and Human Services.

ACTION: Notification of an amendment of an existing system of records.

SUMMARY: In accordance with the requirements of the Privacy Act, the Public Health Service (PHS) is publishing notice of a proposal to expand a routine use of system 09–10–0002, Regulated Industry Employee Enforcements Records, HHS/FDA/OMO.

DATES: PHS invites interested parties to submit comments on the amended routine use on or before April 25, 1988. The amendment will become effective 30 days after publication unless PHS receives comments which would result in a contrary determination.

ADDRESS: Comments should be addressed to: FDA Privacy Act Coordinator, Food and Drug Administration, 5600 Fishers Lane, HFI–30, Rockville, MD 20857.

Comments will be available for inspection in room 12A–30 at the above address, Monday through Friday, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: Gerald H. Deighton, Privacy Act Coordinator, Food and Drug Administration, 5600 Fishers Lane, HFI–30, Rockville, MD 20857, Telephone: (301) 443–1813.

SUPPLEMENTARY INFORMATION: The Food and Drug Administration (FDA) is proposing to expand the first routine use of system 09–10–0002, Regulated Industry Employee Enforcement Records, HHS/FDA/OMO, to show that, in addition to the Department of Justice, FDA is also required to disclose records from this system to other appropriate Federal agencies. FDA has also made other minor alterations to this system

VOL 53
ISS 58
MR 25 1988
UMI

notice to update system locations, system managers and addresses including Appendix A which lists the addresses and working hours of FDA Field/District Offices. For convenience and clarity, FDA is publishing the entire text of this notice.

Dated: March 17, 1988.

Wilford J. Forbush,

Deputy Assistant Secretary for Health Operations, and Director, Office of Management.

09-10-0002

SYSTEM NAME:

Regulated Industry Employee Enforcement Records. HHS/FDA/OMO.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Administrative Services Branch (HFA-210), 5600 Fishers Lane, Rockville, MD 20857
Investigations Operations Branch (HFC-132), 5600 Fishers Lane, Rockville, MD 20857

Administrative, Investigations, and Compliance Branches at Field/District Offices. For the location of Field/District Offices, see Appendix A.

For the location of Federal Archives and Records Centers, see Appendix B.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees of enterprises regulated by the Food and Drug Administration (FDA) and other individuals subject to FDA enforcement actions.

CATEGORIES OF RECORDS IN THE SYSTEM:

Includes correspondence, memoranda, inspection reports, and related documents that are investigatory material compiled for law enforcement purposes.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Federal Food, Drug and Cosmetic Act (21 U.S.C. 321 et seq.), the Public Health Service Act (42 U.S.C. 201 et seq.), and authority delegated to the Commissioner, 21 CFR Part 5.

PURPOSE(S):

To provide records used by FDA employees in investigations of possible violation of the law.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

1. Records that indicate violation or potential violation of law may be: (1) Referred for investigation and possible enforcement action under the applicable Federal, State, or foreign laws to the Department of Justice and other appropriate Federal agencies; an appropriate State food and drug enforcement health agency or licensing authority; or, the government of a foreign country; or (2) disclosed in administrative or court proceeding in determining whether a record is relevant to an Agency decision concerning documents of investigatory materials.

2. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from that congressional office at the request of that individual.

3. The Department of Health and Human Services (HHS) may disclose information from this system of records to the Department of Justice, or to a court or other tribunal, when

(a) HHS, or any component thereof; or

(b) Any HHS employee in his or her official capacity; or

(c) Any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or

(d) The United States or any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components,

Is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the court or other tribunal, is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manual files are maintained in letter-size folders. Automated files are maintained on computer discs and tapes stored in a locked safe.

RETRIEVABILITY:

Indexed by company or subject, sometimes with individual name in a cross-index on an automated index system.

SAFEGUARDS:

1. *Authorized users:* Administrative Services Branch and Office of Regulatory Affairs personnel.

2. *Physical safeguards:* Records are kept in locked cabinets in a secured area, locked rooms, locked buildings and limited access to authorized personnel. Computer tapes and discs are stored in a locked safe.

3. *Procedural (or technical) safeguards:* Computer software providing restricted commands.

4. *Implementation guidelines:* Safeguards are established in accordance with Chapter 45–13 and PHS hf: 45–13 of the Department's General Administration Manual and Part 6 of the Department's ADP Systems Manual.

RETENTION AND DISPOSAL:

Records may be retired to a Federal Records Center and subsequently disposed of in accordance with FDA's Records Control Schedule. The Records Control Schedule and disposal standard for these records may be obtained by writing to the system manager at the address below.

SYSTEM MANAGER(S) AND ADDRESS:

The policy coordinating official for this system of records is also the system manager for the Office of Regulatory Affairs.

Chief, Administrative Services Branch (HFA-210), 5600 Fishers Lane, Rockville, MD 20857
Assistant to the Director, Investigations Operations Branch (HFC-132), Office of Regulatory Affairs, 5600 Fishers Lane, Rockville, MD 20857

Administrative, Investigative and Compliance Branches at Field/District Offices, see Appendix A.

NOTIFICATION PROCEDURE:

An individual may learn if a record exists about him or her upon written request, with notarized signature if request is made by mail, or with identification if request is made in person, directed to:

FDA Privacy Act Coordinator (HFI-30), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857

RECORD ACCESS PROCEDURES:

Same as notification procedures. Requesters should also reasonably specify the record contents being sought. Access to record systems which have been granted an exemption from the Privacy Act access requirement may be made at the discretion of the system manager. If access is denied to requested records, an appeal may be made to:

Commissioner, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857

You may also request an accounting of disclosures that have been made of your record, if any.

CONTESTING RECORD PROCEDURES:

If access has been granted, contact the official at the address specified under notification procedures and reasonably identify the record, specify the information being contested, the corrective action sought, and your reasons for requesting the correction, along with supporting information to show how the record is inaccurate, incomplete, untimely or irrelevant.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained, from third parties such as consumers, scientists, representatives of other companies, state agencies; or developed by FDA during investigations for law enforcement purposes.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

This system is exempt from access and contest and certain other provisions of the Privacy Act (5 U.S.C. 552a (c)(3), (d)(1) to (4), (e)(3), (e)(4)(G) to (H) and (f), to the extent that it includes investigatory material compiled for law enforcement purposes, including criminal law enforcement purposes, where access would be likely to prejudice the conduct of the investigation.

Appendix A—Addresses and working hours of the Food and Drug Administration Field Offices

The following is a list of the Food and Drug Administration Field Offices, their addresses and working hours where individuals may have access to records in Food and Drug Administration Privacy Act Record Systems:

Northeast Region

Regional Office

850 Third Avenue, Brooklyn, NY 11232, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)

District Offices

585 Commercial Street, Boston, MA 02109, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)
850 Third Avenue, 4th Floor, Brooklyn, NY 11232, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)
599 Delaware Avenue, Buffalo, NY 14202, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)
Fernandez Juncos Ave., Stop 8½, Puerta de Tierra, San Juan, PR 00906-5719, Office hours: 8:00 a.m. to 4:30 p.m. (a.t.)

Regional Laboratory

850 Third Avenue, 4th Floor, Brooklyn, NY 11232, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)
Winchester Engineering and Analytical Center (WEAC), 109 Holton Street, Winchester, MA 01890

Mid-Atlantic Region

Regional Office

900 US Customhouse, 2nd and Chestnut Streets, Philadelphia, PA 19106, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)

District Offices

900 U.S. Customhouse, 2nd and Chestnut Streets, Philadelphia, PA 19106, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)
61 Main Street, West Orange, NJ 07052, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)
900 Madison Avenue, Baltimore, MD 21201, Office hours: 7:45 a.m. to 4:15 p.m. (e.s.t.)
1141 Central Parkway, Cincinnati, OH 45202-1097, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)

Southeast Region

Regional Office

60 Eighth Street NE., Atlanta, GA 30309; Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)

District Offices

60 Eighth Street, NE., Atlanta, GA 30309, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)
297 Plus Park Boulevard, Nashville, TN 37217, Office hours: 8:00 a.m. to 4:30 p.m. (c.t.)
7200 Lake Ellenor Drive, Suite 120, Orlando, FL 32809, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)
4298 Elysian Fields Avenue, New Orleans, LA 70122, Office hours: 8:00 a.m. to 4:30 p.m. (c.t.)

Regional Laboratory

60 Eighth Street, NE., Atlanta, GA 30309, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)

Midwest Region

Regional Office

20 N. Michigan Avenue, Room 580, Chicago, IL 60602; Working hours: 8:00 a.m. to 4:30 p.m. (c.s.t.)

District Offices

1222 PO Building, 433 W. Van Buren Street, Chicago, IL 60607; Working hours: 8:00 a.m. to 4:30 p.m. (c.s.t.)
1560 East Jefferson Avenue, Detroit, MI 48207, Office hours: 8:00 a.m. to 4:30 p.m. (e.s.t.)
240 Hennepin Avenue, Minneapolis, MN 55401, Office hours: 8:00 a.m. to 4:30 p.m. (c.t.)

Southwest Region

Regional Office

3032 Bryan Street, Dallas, TX 75204; Office hours: 8:00 a.m. to 4:30 (c.t.)

District Offices

3032 Bryan Street, Dallas, TX 75204; Office hours: 8:00 a.m. to 4:30 (c.t.)
1009 Cherry Street, Kansas City, MO 64106, Office hours: 8:00 a.m. to 4:30 p.m. (c.t.)
Denver Federal Center, Building 20, P.O. Box 25087 Denver, CO 80225-0087; Working hours: 8:00 a.m. to 4:30 p.m. (m.t.)

Pacific Region

Regional Office

Federal Office Building, Room 506, 50 U.N. Plaza, San Francisco, CA 94102, Working hours: 8:00 a.m. to 4:30 p.m. (p.t.)

District Offices

Federal Office Building, Room 506, 50 U.N. Plaza, San Francisco, CA 94102, Working hours: 8:00 a.m. to 4:30 p.m. (p.t.)
1521 W. Pico Boulevard, Los Angeles, CA 90015-2486, Office hours: 8:00 a.m. to 4:30 p.m. (p.t.)
909 1st Avenue, Seattle, WA 98174, Office hours: 8:00 a.m. to 4:30 p.m. (p.t.)

BILLING CODE 4160-01-M

Social Security Administration

Study of Payment Process

AGENCY: Social Security Administration, HHS.

ACTION: Notice of study.

SUMMARY: This notice is to advise the general public that the Social Security Administration's (SSA) Office of Hearings and Appeals (OHA) is conducting a study of the attorney fee payment process as directed by recent legislation. Through this notice, we are soliciting the views of anyone who wishes to offer comments.

DATE: Comments will be accepted through April 22, 1988. Any comments received after that date will not be considered for inclusion in the study.

ADDRESS: Comments should be addressed to Jean H. Hinckley, Director, Office of Policy and Procedures, Office of Hearings and Appeals, 101 Webb, P.O. Box 3200, Arlington, VA 22203.

FOR FURTHER INFORMATION CONTACT: Jean Hinckley, (703) 235-8489.

SUPPLEMENTARY INFORMATION: Section 9021 of Pub. L. 100-203 requires the Secretary of Health and Human Services to conduct a study of the attorney fee payment process under Title II of the Social Security Act. Specifically, the law requires that the study shall:

- Assess levels of reimbursement to attorneys taking into account the contingent nature of most agreements between claimants and their legal representatives;
- Propose alternative methods for establishing fees which take into account the nature of these contingent agreements; and
- Suggest changes which simplify and streamline the fee payment process.

In addition, the law directs us to consult with individuals who represent the views of attorneys and with others who represent the views of claimants and to report our findings, together with any recommendations, to Congress by July 1, 1988.

To ensure that our study and report is comprehensive and complete, we are particularly interested in receiving public comments on the areas listed below. However, all comments on matters relating to the attorney fee payment process will be considered.

1. Under both the American Bar Association (ABA) Model Code of Professional Responsibilities and Model Rules of Professional Conduct, contingent fee arrangements are subject to a reasonableness standard. To what degree should an attorney be required to show that a fee based on a contingency arrangement is reasonable?

How would your proposal differ from the standards for evaluating a request for approval of a fee presently published in the Secretary's regulations at 20 CFR 404.1725(b)?

2. As a matter of public policy, the ethics rules of the various unified bars prohibit entering into contingent fee arrangements in domestic relations matters and criminal cases (cf. ABA Model Code and Model Rules). On the other hand, contingent fee arrangements are accepted in other types of cases because they often provide the only practical means by which an individual can afford to hire an attorney. Should contingent fee arrangements based upon a percentage of past-due benefits payable upon successful resolution of a claim be permitted in Social Security programs, the purpose of which is to provide economic security for beneficiaries?

If so, how can an individual claimant's interest in paying a reasonable fee for services be balanced with the broader purpose of contingency fee arrangements to encourage access to representation generally? Can the risks and burdens of litigation be equitably apportioned in Social Security cases without resorting to contingent fee arrangements based on a percentage of past-due benefits payable to a claimant?

3. In Social Security adjudication or litigation, the fund produced by successful prosecution of the claim is the amount of past-due benefits payable. Since the amount of past-due benefits payable, and consequently the contingent fee, are determined in part by the length of time it takes to process a case, is there potential for a conflict of interest between an attorney and a client in vigorously expediting final resolution of a claim? If so, should the past-due benefits subject to the contingent agreement be limited?

4. Should there be a dollar limitation on the amount of attorney fees payable on an individual claim for benefits?

If so, how should such a limitation be established and at what amount should the limitation be set?

5. Should there be a sliding precentage schedule for contingent fee arrangements, such as 25% of the first $5,000 of past-due benefits payable, 15% of the next $5,000 and 10% of any amount over $10,000?

If so, what sort of percentage scale would be appropriate?

6. Would it be appropriate to establish a flat rate or rate schedule for legal services provided to claimants, such as $400.00 for any case decided on the record and $750.00 for any case involving a hearing?

If so, how should such a rate be established and at what amounts should the rate or rate schedule be set?

7. Should attorney fees determined by application of dollar limitations, percentage schedule or flat rate be subject to approval by any administrative official or to challenge by the claimant and the attorney? If so, should the approving administrative official be authorized to exceed or reduce the amount so established in exceptional circumstances?

Would it be appropriate for the agency to forego the supervision traditionally exercised by the courts in contingent fees in view of the remedial intent of social security legislation?

8. Many fee shifting statutes base attorney fees on an hourly rate established by law or the hourly rate customarily charged for the same or similar services by attorneys with similar levels of skill and competence. Would it be equitable to establish a "lodestar" hourly amount for represenatation in Social Security cases and then to enhance the attorney fee payable to take into account the contingent fee arrangement or other exceptional circumstances?

If so, how should an appropriate "lodestar" hourly amount be established, what should it be, and how should it be enhanced?

9. Would you favor no longer having the Agency authorize attorney fees if, as a concomitant result, attorney fees were no longer withheld from past-due benefits payable to a claimant?

10. Would it be appropriate to establish special admittance or certification procedures for these individuals (both attorneys and persons other than attorneys) who wish to represent claimants for a fee before the Social Security Administration?

If so, what sort of qualifications or requirements should be satisfied prior to an individual's recognition as a claimant's representative?

11. Can the present procedures for requesting approval of an attorney fee be simplified? If so, what steps should be undertaken to modify the process?

Can the information required in the written request for approval be simplified? If so, in what manner?

Does the present procedure for obtaining review of a fee determination provide a satisfactory remedy to both the attorney and the client? If not, how can it be improved?

Dated: March 22, 1988.

Dorcas R. Hardy,

Commissioner of Social Security.

BILLING CODE 4190-11-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Natural Resource Damage Assessments

AGENCY: Department of the Interior.

ACTION: Notice of availability.

SUMMARY: Elsewhere in this issue the Department of the Interior (the Department) published a final rule making technical corrections in a technical document and computer model that were incorporated by reference in the "type A" natural resource damage assessment rule, published March 20, 1987 (52 FR 9042), and codified at 43 CFR Part II. That rule as codified established simplified type A procedures for assessing damages to natural resources in coastal and marine environments where those damages result from a discharge of oil or a release of a hazardous substance and are compensable under either the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) or under the Clean Water Act (CWA) (also known as the Federal Water Pollution Control Act). The technical document incorporated by reference in the rule is entitled "Measuring Damages to Coastal and Marine Natural Resources: Concepts and Data Relevant to CERCLA Type A Damage Assessments" (NRDAM/CME technical document). The NRDAM/CME technical document also contained a computer model on four diskettes that must be used when conducting a type A assessment of damages in coastal and marine environments. This Notice announces the availability of and the procedures for obtaining the errata sheet to this technical document and the revised computer diskettes containing the model.

DATE: This action is effective April 25, 1988.

ADDRESS: Office of Environmental Project Review, Room 4239, Department of the Interior, 1801 C Street NW, Washington, DC 20240 (regular business hours are 7:45 a.m. to 4:15 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: David Rosenberger or Linda Burlington (202) 343-1301.

SUPPLEMENTARY INFORMATION:

Background

Section 301(c) of CERCLA requires the promulgation of rules for the assessment of damages for injury to, destruction of, or loss of natural resources resulting from a discharge of oil or a release of a hazardous substance for the purposes of CERCLA and section 311(f)(4) and (5) of the CWA. Section 301(c)(2) of CERCLA specifies two types of procedures to be developed. The type A procedures are to be standard procedures for simplified assessments requiring minimal field observation. The type B procedures are to include alternative methodologies for conducting assessments in individual cases.

The type A rule was published March 20, 1987, at 52 FR 9045 and codified at 43 CFR Part 11. That rule may be used to assess damages for injuries to natural resources in coastal and marine environments where those damages result from either a discharge of oil or a release of a hazardous substance. Assessments performed under that rule require the use of a computer model called the Natural Resource Damage Assessment Model for Coastal and Marine Environments (NRDAM/CME). A general overview of the NRDAM/CME, its interactive submodels, data bases, and user inputs was published in the preamble tothe final type A rule (see 52 FR 9045). A detailed description of the NRDAM/CME was published in the NRDAM/CME technical document. A hard copy of the source code for the NRDAM/CME was listed in apendix H of the NRDAM/CME technical document.

A final rule published elsewhere in this issue of the **Federal Register** amends the type A rule incorporation by reference citation and the version designation of the NRDAM/CME that is to be used for natural resource damage assessments. These amendments are based upon the correction of technical errors in the NRDAM/CME source code listing of Appendix H of the NRDAM/CME technical document. A discussion of the technical corrections is provided in the preamble to the final rule published elsewhere in this issue of the **Federal Register.**

Availability

This Notice is to inform the public that anyone who received from the Department or NTIS the original NRDAM/CME technical document and version 1.1 of the NRDAM/CME published March 20, 1987, may return the four computer diskettes containing the NRDAM/CME to the address given at the front of this Notice. The Department will reformat those diskettes and copy version 1.2 of the NRDAM/CME onto the diskettes. The diskettes will then be returned to the owner, at no charge. Please ensure that a correct return address is enclosed with the diskettes.

Do not return the NRDAM/CME technical document. The Department cannot accept and return that technical document. The Department will also enclose a copy of the errata sheet for the NRDAM/CME technical document with the returned computer diskettes. If only the errata sheet for the NRDAM/CME technical document is desired, written requests should be made to the same Department address. The Department will accept requests for an errata sheet for the NRDAM/CME technical document and for version 1.2 of the NRDAM/CME until [90 days from date of publication].

All *new* requests for the NRDAM/CME technical document and version 1.2 of the NRDAM/CME should continue to be made directly to the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161; ph: (703) 487-4650. Orders to NTIS should specify document number PB87-142485, and the document title: "Measuring Damages to Coastal and Marine Natural Resources: Concepts and Data Relevant to CERCLA Type A Damage Assessments." Orders to NTIS will receive the errata sheet and the four diskettes containing version 1.2 of the NRDAM/CME.

In the preamble to the type A rule published on March 20, 1987, the Department stated, at 52 FR 9061, that the final source code for version 1.1 of the NRDAM/CME was available on diskette upon request and payment of a reasonable duplication fee. Anyone currently in possession of the source code for version 1.1 of the NRDAM/CME on diskette may return that diskette to the address given at the front of this Notice. The Department will reformat that diskette and copy the corrected version of the source code for version 1.2 of the NRDAM/CME onto the diskette. The diskette will then be returned to the owner, at no charge. Any *new* requests for version 1.2 of the source code on diskette should be made, in writing, to the address given at the front of this Notice. Again, a reasonable duplication fee will be charged for each new request.

Because of the nature and importance of the damage assessment procedure, the Department wants to ensure that all those who may have need of the NRDAM/CME will be working only with the corrected version 1.2. If there are any questions concerning this Notice, please contact the Office at the address given at the front of this Notice.

Dated: December 11, 1987.

Bruce Blanchard,

Director, Office of Environmental Project Review.

BILLING CODE 4310-RG-M

Bureau of Land Management

[CA-930-08-4332-13; FES 88-9]

Availability of Final Environmental Impact Statement; Arcata Resource Area Wilderness, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Availability of Final Environmental Impact Statement (EIS) on the Wilderness Recommendations for the King Range and Chemise Mountain WSAs in California.

SUMMARY: This EIS assesses the environmental consequences of managing two Wilderness Study Areas (WSAs) as wilderness or non-wilderness. The alternatives assessed include: (1) A "no wilderness/no action" alternative for each WSA, (2) an "all wilderness" alternative for each WSA and (3) two "partial wilderness" alternatives for one of the WSAs.

The total acreage, and the proposed actions for the two WSAs are as follows:

King Range—32,900 acres; 20,620 acres suitable, 12,280 acres nonsuitable.

Chemise Mountain—4,340 acres; 4,340 suitable, 0 acres nonsuitable.

The Bureau of Land Management wilderness proposal will ultimately be forwarded by the Secretary of the Interior to the President and from the President to Congress. The final decision on wilderness designation rests with Congress.

In any case, no final decision on these proposals can be made by the Secretary during the 30 days following the filing of this EIS. This complies with the Council on Environmental Quality Regulations, 40 CFR 1506.1b(2).

SUPPLEMENTARY INFORMATION: A limited number of individual copies of the EIS may be obtained from the Area Manager, Arcata Resource Area, P.O. Box 1112, Arcata, California 95521. Copies are also available for inspection at the following locations:

Department of the Interior, Bureau of Land Management, 18th and C Street, NW., Washington, D.C. 20240
or
Bureau of Land Management, California State Office, 2800 Cottage Way, Room E-2841, Sacramento, CA 95825
or
Bureau of Land Management, Ukiah District Office, 555 Leslie Street, Ukiah, CA 95482.

FOR FURTHER INFORMATION CONTACT: John Lloyd, Area Manager, Arcata Resource Area, P.O. Box 1112, Arcata, CA 95521, (707) 822-7648.

Bruce Blanchard,

Director, Office of Environmental Project Review.

Date: March 10, 1988.

BILLING CODE 4310-40-M

Bureau of Reclamation

Final Supplement to the Final Environmental Statement, Colorado-Big Thompson, Windy Gap Projects, Green Mountain Reservoir Water Sale, CO

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability of final supplement environmental statement to the final environmental statement.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior has prepared a final supplement to the final environmental impact statement for the Colorado-Big Thompson, Windy Gap Project (INT FES 81-20) on a proposed water sale from Green Mountain Reservoir that would provide for future water demands that include industrial (primarily snowmaking and oil shale), municipal, recreation, wildlife, and fisheries.

FOR FURTHER INFORMATION CONTACT: This final supplement was prepared from a draft supplement filed with the Environmental Protection Agency in September 1985 that evaluated an array of water sale level scenarios for Green Mountain Reservoir.

ADDRESSES: Copies are available for inspection at the following locations:

Director, Office of Environmental Affairs, Bureau of Reclamation, Room 7425 Washington, DC 20240, Telephone: (202) 343-4991;
Management Operation Center, Document Systems Management Branch, Library Section, Code 822, Engineering and Research Center, Denver Federal Center, Denver CO 80225, Telephone: (303) 236-6763;
Regional Director, Bureau of Reclamation, P.O. Box 36900, Federal Office Building, Billings, MT 59107-6900, Telephone: (406) 657-6214;
Eastern Colorado Projects, Office, Bureau of Reclamation, 855 Wilson Avenue, P.O. Box 449, Loveland, CO 80539, Telephone: (303) 667-4410.

Single copies of the final supplement may be obtained on request to the Director, Office of Environmental Affairs, Bureau of Reclamation, the Eastern Colorado Projects Office, or the Regional Director, at the above addresses. Copies will also be available for inspection at the following libraries in the project vicinity:

Colorado State University Library, Fort Collins, CO 80521;
Glenwood Springs Branch Library, 413 9th Street, Glenwood Springs, CO 81601;
University of Colorado, Library, Boulder Campus, Boulder, CO 80302.

Date: March 18, 1988.

BILLING CODE 4310-09-M

National Park Service

Intention To Negotiate Concession Permit; Adventure Bound, Inc., et al.

Public notice as given on February 3, 1988 (52 FR 3083), stated that sixty (60) days thereafter the Department of Interior, through the Director of the National Park Service proposes to negotiate permits with sixteen (16) existing river running operators authorizing them to continue to provide guided white water interpretive river trips for the public at Canyonlands National Park, Utah for period of five (5) years from January 1, 1987, through December 31, 1991. The Secretary has amended the Statement of Requirements whereas the premit five (5) year term is extended to seven (7) years from

January 1, 1987, through December 31, 1993.

The earlier public notice provisions remain in full effect. Interested parties should contact the Regional Director, Rocky Mountain Region, P.O. Box 25287, Denver, Colorado for information as to the amended requirements of the proposed permit.

Homer L. Rouse,

Acting Regional Director, Rocky Mountain Region.

Date: March 16, 1988.

BILLING CODE 4310-70-M

Martin Luther King, Jr., National Historic Site Advisory Commission; Meeting

AGENCY: National Park Service, Interior.

ACTION: Notice of Advisory Commission Meeting.

SUMMARY: Notice is hereby given in accordance with the Federal Advisory Commission Act that a meeting of the Martin Luther King, Jr., National Historic Site Advisory Commission will be held at 10:30 a.m. at the following location and date.

DATE: April 20, 1988.

ADDRESS: The Southern Bell Center, Room 512, 675 West Peachtree Street, Atlanta, Georgia 30375.

FOR FURTHER INFORMATION CONTACT: Mr. Randolph Scott, Superintendent, Martin Luther King, Jr., National Historic Site, 522 Auburn Avenue NE., Atlanta, Georgia 30312, Telephone (404) 331-4979.

SUPPLEMENTARY INFORMATION: The purpose of the Martin Luther King, Jr., National Historic Site Advisory Commission is to consult and advise with the Secretary of the Interior or his designee on matters of planning and administration of the Martin Luther King, Jr., National Historic Site. The members of the Advisory Commission are as follows:

Ms. Portia Scott, Chairperson
Mr. William W. Allison
Mr. John H. Calhoun
Mr. Arthur J. Clement
Mr. John Cox
Mrs. Christine King Farris
Mrs. Valena Henderson
Mr. C. Randy Humphrey
Dr. Elizabeth A. Lyon
Mr. Daniel H. Nall
Rev. Joseph L. Roberts, Jr.
Mrs. Coretta Scott King, Ex-Officio Member
Director, National Park Service, Ex-Offico Member

The matters to be discussed at this meeting will include: (1) The status of park development and interpretive activities.

The meeting will be open to the public. However, facilities and space for accommodating members of the public are limited. Any member of the public may file with the Commission a written statement concerning the matters to be discussed. Written statements may also be submitted to the Superintendent at the address above. Minutes of the meeting will be available at Park Headquarters for public inspection approximately 4 weeks after the meeting.

Frank Cattroppa,

Acting Regional Director, Southeast Region.

Date: March 15, 1988.

BILLING CODE 4310-70-M

Management Policies

AGENCY: National Park Service, Interior.

ACTION: Notice of availability of proposed revised management policies with request for review and comments.

SUMMARY: The National Park Service is proposing revised policies for management of areas of the national park system. These policies will provide guidance to NPS managers, planners and others in areas concerning preservation and use of park system areas.

DATE: Written comments will be accepted until May 10, 1988.

ADDRESS: Comments should be directed to: Chief, Office of Policy, National Park Service, P.O. Box 37127, MIB-MS1226, Washington, DC 20013-7127.

Single copies of the draft management policies may be requested from National Park Service, Office of Policy, 18th and C Streets NW., MIB-MS1226, Washington, DC 20013-7127. Copies are available for review in the National Park Service Washington Office, regional offices all units of the National Park System, and GPO repository libraries. Addresses of the Washington Office and regional offices are:

National Park Service, 18th and C Streets NW., Main Interior Building, Room 1226, Washington, DC 20013-7127
Alaska Regional Office, National Park Service, 2525 Gambell Street, Room 107, Anchorage, AK 99503
Mid-Atlantic Regional Office, National Park Service, 143 South Third Street, Philadelphia, PA 19106
Midwest Regional Office, National Park Service, 1709 Jackson Street, Omaha, NE 68102
National Capital Parks, National Park Service, 1100 Ohio Drive SW., Washington, DC 20242

Pacific Northwest Regional Office, National Park Service, 83 South King Street, Suite 212, Seattle, WA 98104
Rocky Mountain Regional Office, National Park Service, 12795 West Alameda Parkway, P.O. Box 25287, Lakewood, CO 80225
Southeast Regional Office, National Park Service, 75 Spring Street SW., Atlanta, GA 30303
Southwest Regional Office, National Park Service, P.O. Box 728, Santa Fe, New Mexico 87504-0728
Western Regional Office, National Park Service, 450 Golden Gate Avenue, Box 36063, San Francisco, CA 94102

FOR FURTHER INFORMATION CONTACT: Office of Policy, 202/343-4298 or 7456.

SUPPLEMENTARY INFORMATION: The National Park Service has completed a comprehensive review and revision of policies on management of the national park system—something that has not been done since 1978. Changes which resulted are primarily due to new legislation, revisions of regulations, shifts in program emphasis and new concerns and responsibilities. Nevertheless, for the most part, this document represents an update more so than a revision.

Management policies address the role of the National Park Service as legislatively mandated in preserving the Nation's natural and cultural resources, park planning, park facilities, natural resource management, cultural resource management, wilderness preservation, use of the parks, concessions management and land protection. The management policies provide guidance to National Park Service managers, superintendents, planners, and others concerning preservation and use of park system areas.

The Service is hereby soliciting comment from any and all interested groups or individuals on these policies. We urge you to be specific as to how the policy might be changed or strengthened. All comments will be reviewed and, where appropriate, incorporated. The policies will remain on review for 45 days. The revised final policy an an explanation of how comments were addressed will be available to the public. Notice of availability of the final document will appear in the **Federal Register**. These policies, in final form, will become the

BILLING CODE 7035-01-M

[Docket No. AB-55 (Sub-No. 236X)]

CSX Transportation, Inc.; Exemption for Abandonment and Discontinuance of Trackage Rights in Wilmington, DE

Applicant has filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments and Discontinuances* (1) to abandon its .9-mile line of railroad between milepost 2.0 and milepost 2.9, and (2) to discontinue its trackage rights over Conrail between milepost 2.9 and milepost 3.0, in Wilmington, DE, a total distance of 1 mile.

Applicant has certified that (1) no local traffic has moved over the line for at least 2 years and that overhead traffic has been rerouted, and (2) that no formal complaint filed by a user of rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10505(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on April 24, 1988 (unless stayed pending reconsideration). Petitions to stay and formal expressions of intent to file an offer [1] of financial assistance under 49 CFR 1152.27(c)(2) must be filed by April 4, 1988, and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by April 14, 1988 with:

Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative:

Lawrence H. Richmond, CSX Transportation, 100 North Charles Street, Baltimore, MD 21201,

and

Charles M. Rosenberger, Senior Counsel, Patricia Vail, Counsel, CSX Transportation, 500 Water Street, Jacksonville, FL 32202.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

Applicant has filed an environmental report which addresses environmental or energy impacts, if any, from this abandonment.

The Section of Energy and Environment (SEE) will prepare an environmental assessment (EA). SEE will serve the EA on all parties by March 30, 1988. Other interested persons may obtain a copy of the EA from SEE by writing to it (Room 3115, Interstate Commerce Commission, Washington, DC 20423) or by calling Carl Bausch, Chief, SEE at (202) 275-7316.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: March 15, 1988.

By the Commission, Joseph H. Dettmar, Acting Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

DEPARTMENT OF JUSTICE

Lodging of Consent Decree; Inmar Associates, Inc.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed Consent Decree in *United States v. Inmar Associates, Inc.* has been lodged with the United States District Court for the District of New Jersey. The consent decree addresses claims under sections 106(b) and 107 of the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") for violations alleged of an Administrative Order, Index No. II CERCLA—50115, issued to Inmar Associates, Inc. by the United States Environmental Protection Agency, and for federal response costs associated with implementation and oversight of that administrative order. The consent decree provides that Inmar Associates, Inc. will pay $545,000 in settlement of those claims.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. Inmar Associates, Inc.*, D.J. Ref. 90-11-2-162.

The proposed Consent Decree may be examined at the office of the United States Attorney, District of New Jersey, 502 Federal Building, 970 Broad Street, Newark, New Jersey 07102, and at the Office of Regional Counsel, United States Environmental Protection Agency, Region II, 26 Federal Plaza, Rm. 437, New York, New York 10278. Copies of the Consent Decree may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1517, Ninth Street and Pennsylvania Ave., NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice. In requesting a copy, please refer to *United States v. Inmar Associates, Inc.*, D.J. Reference #90-11-2-162 and enclose a check in the amount of $1.00 (ten cents per page reproduction cost) payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-10-M

DEPARTMENT OF LABOR

Employment and Training Administration

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance; Fletcher Paper Co. et al.

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period March 7, 1988—March 11, 1988 and March 14, 1988—March 18, 1988.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the worker's firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-20,391; Fletcher Paper Co., Alpina, MI

TA-W-20,398; Sealed Power Div., Sealed Power Corp., Muskegon, MI

TA-W-20,397; Eyelet Specialty Co., Inc., Subsidiary of Risdon Corp., Wallingford, CT

TA-W-20,351; Steven Knitting Mills, Inc., New York, NY

TA-W-20,405; Excel Handbag Co., Miami, FL

TA-W-20,339; Beaumont Co., Morgantown, WV

TA-W-20,428; Camphill Manufacturing, Camphill, AL

TA-W-20,349; Reichert Stamping Co., Toldeo, OH

TA-W-20,409; Heraeus Amersil, Inc., Sayreville, NJ

TA-W-20,420; Allison Abrasive Co., Shelton, CT

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-20,481; The Wiser Oil Co., Leeco, KY

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,387; Bethlehem Steel Corp., Sparrows Point Plant, Sparrows Point, MD

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,400; Gregory and Cook, Inc., Houston, TX

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-20,365; Wean Industries, Inc., Henricks Road Plant, Youngstown, OH

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,465; Maine Guide, Bath, ME

U.S. imports of womens, misses and childrens coats and jackets decreased absolutely in Jan-Sept 1987 compared to the same period in 1986.

TA-W-20,358; International Paper Co., Androscoggin Mill, Jay, ME

Increased imports did not contribute importantly to workers separations at the firm.

Affirmative Determinations

TA-W-20,386; Apache Corporation, Denver, CO

A certification was issued covering all workers of the firm separated on or after December 10, 1986.

TA-W-20,410; Inmos Corporation, Colorado Springs, CO

A certification was issued covering all workers of the firm separated on or after January 14, 1987 and before March 31, 1988.

TA-W-20,385; The Okonite Co., Phillipsdale, RI

A certification was issued covering all workers of the firm separated on or after January 4, 1987.

TA-W-20,491; Muller Manufacturing Co., Syracuse, NY

A certification was issued covering all workers of the firm separated on or after February 12, 1987.

TA-W-20,380; Ciba-Geigy Corp., Glens Falls, NY

A certification was issued covering all workers of the firm separated on or after March 30, 1988.

TA-W-20,364; Baxter Travenol, Kingstree, SC

A certification was issued covering all workers of the firm separated on or after December 17, 1986.

TA-W-20,382; General Motors Corp., Fisher Guide Div., Trenton, NJ

A certification was issued covering all workers of the firm separated on or after January 10, 1987.

TA-W-20,431; Ladd Petroleum Corporation, Mid-Continent Region

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,431A; Ladd Petroleum Corporation, Corporate Office, Denver, CO

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,431B; Ladd Petroleum Corporation, Tulsa, OK

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,431C; Ladd Petroleum Corporation, Enid, OK

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,431D; Ladd Petroleum Corporation, Bethany, OK

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,431E; Ladd Petroleum Corporation, Ballas, OK

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,431F; Ladd Petroleum Corporation, Magnolia, AR

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,432; Ladd Petroleum Corporation, Rocky Mountain Region

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,432A; Ladd Petroleum Corporation, Denver, CO

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,432B; Ladd Petroleum Corporation, Dickinson, ND

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,432C; Ladd Petroleum Corporation, Dagmar, MT

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,432D; Ladd Petroleum Corporation, Farmington, NM

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,432E; Ladd Petroleum Corporation, Midland, TX

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,432F; Ladd Petroleum Corporation, Ozona, TX

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,433; Ladd Petroleum Corporation, Gulf Coast Region

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,433A; Ladd Petroleum Corporation, Houston, TX

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,433B; Ladd Petroleum Corporation, Carlton, AL

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,433C; Ladd Petroleum Corporation, Bayou Boeuf, LA

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

TA-W-20,433D; Ladd Petroleum Corporation, Springtown, TX

A certification was issued covering all workers of the firm separated on or after January 20, 1987.

I hereby certify that the aforementioned determinations were issued during the period March 7-11, 1988 and March 14-18, 1988. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street NW., Washington, DC 20213 during normal business hours or will be mailed to persons who write to the above address.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Dated: March 22, 1988.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-87-275-C]

Kelly Energy Co., Inc.; Petition for Modification of Application of Mandatory Safety Standard

Kelly Energy Company, Inc., P.O. Box 478, Clintwood, Virginia 24228-0478 has filed a petition to modify the application of 30 CFR 75.1710 (cabs and canopies) to its No. 5 Mine (I.D. No. 44-06406) located in Wise County, Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requriement that cabs or canopies be installed on the mine's electric face equipment.

2. The No. 5 mine was 72 plus inches in height when first established. Canopies were installed on the equipment at that time, however, as mining progressed the mine height decreased. The mine now ranges from 43 to 53 inches in height, and has a soft bottom that tears up on occasion causing a very uneven bottom with an up an down effect.

3. Petitioner states that the canopies shear off roof bolts and tear down check or line curtains, thereby disrupting ventilation, limiting visibility and causing cramped conditions for the operator.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April

25, 1988. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

Date: March 16, 1988.

BILLING CODE 4510-43-M

Pension and Welfare Benefits Administration

[Prohibited Transaction Exemption 88-19; Exemption Application No. D-6762 et al.]

Grant of Individual Exemptions; Philip Specialty Co. et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Notices were published in the Federal Register of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applicants have been available for public inspection at the Department of Washington, DC. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of pendency were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries, and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

Philip Specialty Company restated Profit Sharing Plan (the Plan)

[Prohibited Transaction Exemption 88-19; Exemption Application No. D-6762]

Exemption

The restrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the sale of improved real property located in Dallas County, Texas, by the Plan to Philip Specialty Company for $119,000 in cash, provided that all of the terms of the proposed sale are as favorable to the Plan as those obtainable in an arm's-length transaction with an unrelated party on the date the transaction is consummated.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on January 28, 1988 at 53 FR 2104.

FOR FURTHER INFORMATION CONTACT: Alan H. Levitas of the Department, telephone (202) 523-8194. (This is not a toll-free number.)

Individual Retirement Account of Robert R. Black (the IRA) Located in Dallas, Texas.

[Prohibited Transaction Exemption 88-20; Exemption Application No. D-6866]

Exemption

The sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the sale of a parcel of real property (the Property) located in Keller, Texas, by the IRA to Mr. Robert R. Black for $333,000 in cash, provided such amount is not less than the fair market value of the Property on the date of the sale.[1]

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on January 28, 1988 at 53 FR 2106.

FOR FURTHER INFORMATION CONTACT: Gary H. Lefkowitz of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Central States, Southeast and Southwest Areas Pension Fund (the Plan) Located in Chicago, Illinois

[Prohibited Transaction Exemption 88-21; Exemption Application No. D-6978]

Amendments to Exemption

The Department hereby modifies a portion of Prohibited Transaction Exemption (PTE) 85-211 (50 FR 53222, December 30, 1985) issued to Morgan Stanley Group Inc., the Named Fiduciary (the Named Fiduciary) on behalf of the Plan. Authority to grant the amendments to the exemption is given the Department under section 408(a) of the Act, section 4975(c)(2) of the Code and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).

Accordingly, paragraph (A) of PTE 85-211 is restated so that the restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (D) of the Code shall not apply until January 21, 1992 to the adjustment, disposition, and/or continuation by investment managers of any pre-existing loan, lease, service agreement, or other arrangement, or the holding by the Plan of any pre-existing employer security or real property (as described in Part VIII of PTE 77-11 (42 FR 54041, October 7, 1977) and PTE 84-114 (49 FR 30809, July 31, 1984)), but only to the extent that PTE 84-14 (49 FR 9494, March 13, 1984) is not applicable with respect to such transactions by reason of any of the following: (1) The assets of the Plan represent more than 20 percent of the total client assets under the management of the investment manager at the time of the transaction; (2) the investment manager does not satisfy the definition contained in Part V(a)(4) of PTE 84-14; or (3) the transaction is between the Plan and the Central States, Southeast and Southwest Areas Health and Welfare Fund, or the transaction is between the Plan and a person which is a party in interest and at the time of the transaction (as defined in Part V(i) of PTE 84-14) either such party in interest or its "affiliate" (as defined in Part V(c) of PTE 84-14) has the authority or, during the preceding one year, has exercised the authority: (a) To appoint or terminate the Named Fiduciary of the Plan or (b) to otherwise alter the terms under which a person serves as the Named Fiduciary of the Plan.

---

[1] Because the IRA does not meet the conditions described in 29 CFR 2510.3-2(d), there is no jurisdiction under Title I of the Act. However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

For a more complete statement of the facts and representations supporting the Department's decision to grant the amendments to this exemption refer to the proposed amendments to the exemption that were published on January 13, 1988 at 53 FR 811.

Effective Date: The amendments are effective January 1, 1985. They will expire on January 21, 1992.

For Further Information Contact: Ms. Jan D. Broady of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

William H. Kimball, Inc. Profit Sharing Plan (the Plan) Located in Orinda, California

[Prohibited Transaction Exemption 88-22; Exemption Application No. D-7238]

Exemption

The sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the purchase by the Plan for cash of certain real property (the Real Property) from William H. Kimball, a disqualified person with respect to the Plan, provided that the price paid is no more than the fair market value of the Real Property on the date of sale.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on January 28, 1988 at 53 FR 2107.

For Further Information Contact: Joseph L. Roberts III of the Department, telephone (202) 523-8194. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 22nd day of March 1988.

Robert J. Doyle,

Acting Associate Director for Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (88-28)]

NASA Advisory Council (NAC), Aeronautics Advisory Committee (AAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee, Ad Hoc Review Team on Aeronautics Technology Competitiveness.

DATE AND TIME: April 12, 1988, 8 a.m. to 4:30 p.m.

ADDRESS: National Aeronautics and Space Administration, Room 625, Federal Office Building 10B, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. John S. Barks, Office of Aeronautics and Space Technology, National Aeronautics and Space Administration, Washington, DC 20546, 202/453-2807.

SUPPLEMENTARY INFORMATION: The NAC Aeronautics Advisory Committee (AAC) was established to provide overall guidance to the Office of Aeronautics and Space Technology (OAST) on aeronautics research and technology activities. Special ad hoc review teams are formed to address specific topics. The Ad Hoc Review Team on Aeronautics Technology Competitiveness, chaired by Mr. Louis F. Harrington, is comprised of ten members. The meeting will be open to the public up to the seating capacity of the room (approximately 25 persons including the team members and other participants).

Type of Meeting: Open.

Agenda

April 12, 1988

8 a.m.—Review of Action Groups Assignments.
1 p.m.—Continued Review of Action Groups Assignments.
2 p.m.—Presentation of Contractor Technology Assessment.
3 p.m.—Summary By Chairman and Task Assignments.
4:30 p.m.—Adjourn.

March 17, 1988.

Ann Bradley,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

Administration, Washington, DC 20546, 292/453–2775.

SUPPLEMENTARY INFORMATION: The NAC Aeronautics Advisory Committee (AAC) was established to provide overall guidance to the Office of Aeronautics and Space Technology (OAST) on aeronautics research and technology activities. The Committee, chaired by Mr. Robert B. Ormsby, is comprised of 23 members. The meeting will be open to the public up to the seating capacity of the room (approximately 40 persons including the committee members and other participants).

Type of Meeting: Open.

Agenda

April 13, 1988
8:30 a.m.—Aeronautics Overview: Budget Strategy, Plans and Issues.
9:45 a.m.—Technology Development & Validation Plan.
10:15 a.m.—Discussion of FY 90–92 Program Requirements.
11:15 a.m.—Actions from AAC/ARTS Meeting.
1 p.m.—Reports of Ad Hoc Teams.
3:15 p.m.—Committee New Business.
4:30 p.m.—Adjourn.

March 16, 1988.

BILLING CODE 7510-01-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel; Meetings

AGENCY: National Endowment for the Humanities, NFAH.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provisions of the Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue NW., Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506; telephone 202/786-0322.

SUPPLEMENTARY INFORMATION: The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; or (3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), (6), and (9)(B) of section 552 of Title 5, United States Code.

1. *Date:* April 14–15, 1988.
Time: 7:30 a.m. to 5:30 p.m.
Room: 415
Program: This meeting will review applications submitted for Humanities Projects in Media, submitted to the Division of General Programs, for projects beginning after October 1, 1988.

2. *Date:* April 21–22, 1988.
Time: 7:30 a.m. to 5:30 p.m.
Room: 415
Program: This meeting will review applications submitted for Humanities Projects in Media, submitted to the Division of General Programs, for projects beginning after October 1, 1988.

3. *Date:* April 26–27, 1988.
Time: 7:30 a.m. to 5:30 p.m.
Room: 415
Program: This meeting will review applications submitted for Humanities Projects in Media, submitted to the Division of General Programs, for projects beginning after October 1, 1988.

4. *Date:* April 28, 1988.
Time: 8:30 a.m. to 5:30 p.m.
Room: 316-2
Program: This meeting will review Summer Seminars for College Teachers applications in English and American Literature, submitted to the Division of Fellowships and Seminars, for projects beginning after October 1, 1988.

5. *Date:* April 29, 1988.
Time: 8:30 a.m. to 5:30 p.m.
Room: 316-2
Program: This meeting will review Summer Seminars for College Teachers applications in Arts, submitted to the Division of Fellowships and Seminars, for projects beginning after October 1, 1988.

Stephen J. McCleary,

Advisory Committee Management Officer

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Archaeometry; Meeting

Name: Advisory Panel for Archaeometry.

Date and Time: April 15, 1988, 9:00 AM-5:00 PM each day.

Place: National Science Foundation, 1800 G Street NW. Room 642, Washington, DC.

Type of Meeting: Closed.

Contact Person: Dr. John E. Yellen, Program Director, Anthropology Program, Room 320, National Science Foundation, Washington, DC 20550 Telephone (202) 357-7804.

Minutes: May be obtained from contact person listed above.

Purpose of Meeting: To provide advice and recommendations concerning support for research in archaeometry.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions 4 and 6 of the Government in the Sunshine Act.

Advisory Panel for Economics; Meeting

The National Science Foundation announces the following meeting:

Name: Advisory Panel for Economics.

Date/Time:

Thursday, April 14, 1988—9:00 a.m. to 5:00 p.m.
Friday, April 15, 1988—9:00 a.m. to 5:00 p.m.
Saturday, April 16, 1988—9:00 a.m. to 1:00 p.m.

Place: National Science Foundation, Room 543, 1800 G Street NW., Washington, DC 20550.

Type of Meeting: Closed.

Contact Person: Dr. Daniel H. Newlon or Dr. Lynn A. Pollnow, Program Directors, Division of Social and Economic Science, Room 336, National Science Foundation, Washington, DC 20550, telephone (202) 357-9674.

Summary Minutes: May be obtained from the Contact Persons at the above address.

Purpose of Meeting: To provide advice and recommendations concerning support for research in economics.

Agenda: Closed—To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

M. Rebecca Winkler,

Committee Management Officer.

Directorate for Engineering, Division of Mechanics, Structures, and Materials Engineering Advisory Committee; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Science Foundation announces the following meeting:

Name: Committee for the Division of Mechanics, Structures, and Materials Engineering.

Date & Time

April 11, 1988 8:30 a.m. to 5:00 p.m.
April 12, 1988 8:30 a.m. to 4:00 p.m.

Type of Meeting: Open.

Contact Person: Ms. Hope Duckett, National Science Foundation, Room 1110, Washington, DC 20550.

Summary Minutes: May be obtained from the Contact Person.

Agenda:

Monday, April 11, 1988

8:30–9:15 a.m.	Call to Order and Welcoming Remarks.
9:15–10:00 a.m.	Status of Program Plans.
10:00–10:30 a.m.	Remarks by Acting Assistant Director for Engineering.
10:45–12:00 NOON.	Status of Program Plans.
12:00–1:30 p.m.	Lunch.
1:30–5:00 p.m.	Discussion of Program Status and Plans.

Tuesday, April 12, 1988

8:30–10:00 a.m.	Task Group Reports.
10:30–NOON.	Discussion and Closing Remarks by Acting Assistant Director for Engineering.
1:00–4:00 p.m.	Drafting of Meeting Report and Summary Remarks.
4:00 p.m.	Adjourn.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-424]

Georgia Power Co. et al., Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the schedular requirements of § 50.71(e)(3)(i) to 10 CFR Part 50 to the

OL
53
ISS
58
MR
25
988
MI

Georgia Power Company, et al. (the licensee) for the Vogtle Electric Generating Plant, Units 1 located on the licensee's site in Burke County, Georgia.

Environmental Assessment

Identification of Proposed Action

The proposed action would grant an exemption from the requirement of 10 CFR 50.71(e) to submit an updated Final Safety Analysis Report (UFSAR) for Unit 1 of the Vogtle Electric Generating Plant (VEGP) within 24 months of the issuance of the operating license. A low power operating license was issued for VEGP Unit 1 on January 16, 1987. By letter dated January 15, 1988, the licensee requested an exemption to 10 CFR 50.71(e), which would defer submittal of the UFSAR for VEGP Unit 1 until one year following issuance of a full power operating license for VEGP Unit 2 on the basis that the present Final Safety Analysis Report (FSAR) applies to both units. The FSAR has been updated on May 6, 1987, and August 31, 1987, and will continue to be updated to support the licensing of VEGP Unit 2 and to provide updated information on VEGP Unit 1.

The Need for the Proposed Action

10 CFR 50.34 requires that, until VEGP Unit 2 receives an operating license, the information contained in the FSAR docketed with the operating license application be maintained current. Therefore, if an extension to the submittal date for the UFSAR is not granted, the licensee would be required to maintain current both the present FSAR as well as the UFSAR until VEGP Unit 2 is licensed. Maintaining two versions of the same document for the two VEGP units would cause a hardship, could lead to ambiguities and confusion and would serve no useful purpose if the existing FSAR is maintained up-to-date until VEGP Unit 2 is licensed. Therfore, an extension is needed to eliminate the hardship of maintaining two versions of the same document.

Environmental Impacts of the Proposed Action

The proposed exemption affects only the require date for submitting the UFSAR and does not affect plant operation or the risk of facility accidents. Accordingly, the exemption will not increase the probability or consequences of any dominate reactor accident sequence and will not otherwise affect any other radiological impact associated with the facility. Consequently, the Commission concludes that there are no significant radiological impacts associated with the proposed exemption.

With regard to potential nonradiological impacts, the proposed exemption does not affect nonradiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associate with the proposed exemption.

Alternative to the Proposed Action

Because the staff has concluded that there is no significant environmental impact associated with the proposed exemption, any alternative to this exemption will have either no significantly different environmental impact or greater environmental impact.

The prinicpal alternative would be to deny the requested exemption. This would not reduce environmental impacts as a result of plant operations.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in connection with the "Final Environmental Statement related to the operation of the Vogtle Electric Generating Plant, Units 1 and 2" dated March 1985.

Agencies and Persons Consulted

The NRC staff has reviewed the licensee's request that supports the proposed exemption. The NRC staff did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the request for the exemption dated January 15, 1988, which is available for public inspection at the Commission's Public Document Room 1717 H Street, NW., Washington, DC, and at the Burke County Library, 4th Street, Waynesboro, Georgia 30830.

Dated at Rockville, Maryland, this 21st day of March 1988.

For the Nuclear Regulatory Commission.

Lawrence P. Crocker,

Acting Director, Project Directorate II-3, Division of Reactor Projects I/II.

[FR Doc. 88-6558 Filed 3-24-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-498 OL]

Houston Lighting and Power Co.; South Texas Project, Unit 1

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has denied a Petition under 10 CFR 2.206 (DD-88-3) filed by Ms. Billie P. Garde and Mr. Richard E. Condit on behalf of the Government Accountability Project (GAP or Petitioner). The Petitioner asked the Nuclear Regulatory Commission (NRC) to delay the Commission's consideration of a full-power license for the South Texas Project, Unit 1. The Petitioner alleged that insufficient review had been performed of concerns which had been provided to GAP by workers associated with the South Texas Project.

The Petitioner's request has been denied for the reasons fully described in the "Director's Decision Under 10 CFR 2.206," issued on this date, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555, and the Local Public Document Rooms for the South Texas Nuclear Project located at the Austin Public Library, 810 Guadalupe Street, Austin, Texas 78701 and at the Wharton County Junior College, J. M. Hodges Learning Center, 911 Bowling Highway, Wharton, Texas 77488.

A copy of the Decision will be filed with the Secretary for the Commission's review in accordance with 10 CFR 2.206(c). As provided in this regulation, the Decision will constitute the final action of the Commission twenty-five (25) days after issuance, unless the Commission, on its own motion, institutes review of the Decision within that time period.

Dated at Rockville, Maryland, this 18th day of March 1988.

For The Nuclear Regulatory Commission.

Thomas E. Murley,

Director, Office of Nuclear Reactor Regulation.

[FR Doc. 88-6559 Filed 3-24-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos.: STN 50-454, STN 50-455, STN 50-456 and STN 50-457]

Commonwealth Edison Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity For Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF-37 and NPF-66, issued to Commonwealth Edison Company (the licensee), for operation of Byron Station, Units 1 and 2 located in Ogle County, Illinois, and Facility Operating License Nos. NPF-72 and NPF-75, issued to the licensee for operation of Braidwood Station, Units 1 and 2, located in Will County, Illinois.

The amendments would change Technical Specification 4.6.1.6.1.d. to reduce the containment tendon design stresses.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 25, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petitions for leave to intervene. Requests for a hearing and petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularly the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference schedule in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine wtinesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-800-325-6000 (in Missouri 1-800-342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Daniel R. Muller: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Michael Miller, Esq., Sidley and Austin, One First National Plaza, Chicago, Illinois 60603, attorney for the licensee.

Nontimely filing of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated March 2, 1988, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC; the Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois 61101; and the Wilmington Township Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481.

Dated at Rockville, Maryland, this 18th day of March 1988.

For the Nuclear Regulatory Commission.

Daniel R. Muller,

Director, Project Directorate III-2, Division of Reactor Projects—III, IV, V and Special Projects.

[FR Doc. 88-6560 Filed 3-24-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-341]

Detroit Edison Co. and Wolverine Power Supply Cooperative, Inc.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-43, issued to the Detroit Edison Company and Wolverine Power Supply Cooperative, Inc. (the licensees), for operation of Fermi-2 located in Monroe County, Michigan.

In accordance with the licensees' application for amendment dated November 20, 1987, the amendment would revise the provisions in the Technical Specifications to correct an error in Table 3.3.7.12-1, "Radioactive Gaseous Effluent Monitoring Instrumentation," by deleting Item 3.d, Effluent System Flow Rate Monitor for the Standby Gas Treatment System (SGTS). The correction would make Table 3.3.7.12-1 consistent with the Surveillance Requirements of Technical Specification Table 4.3.7.12-1.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 25, 1988, the licensees may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions that are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-800-325-6000 (in Missouri 1-800-342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Martin J. Virgilio: (petitioner's name and telephone number); (date petition was mailed); (plant name); and (publication date and page number of this Federal Register notice). A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to John Flynn, Esq., Detroit Edison Company, 2000 Second Avenue, Detroit, Michigan 48226, attorney for Detroit Edison Company.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated November 20, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and at the Monroe County Library System, 3700 S. Custer Road, Monroe, Michigan 48161.

Dated at Rockville, Maryland, this 15th day of March 1988.

For the Nuclear Regulatory Commission.

Theodore R. Quay,

Project Manager, Project Directorate III–1, Division of Reactor Projects III, IV, V & Special Projects.

BILLING CODE 7590-01-M

[Dockets Nos. 50-282 and 50-306]

Northern States Power Co.; Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating Licenses Nos. DPR-42 and DPR-60, issued to Northern States Power Company (the licensee), for operation of the Prairie Island Nuclear Generating Plant, Units Nos. 1 and 2, located in Goodhue, Minnesota.

In accordance with the licensee's application for amendments dated November 3, 1987, the amendments would change the protective instrumentation setting for the automatic reactor trip associated with high flux, power range (low setpoint) from equal to or less than 25% of rated power to equal to or less than 40% of rated power. This instrumentation setting applies only for reactor startup protection.

Prior to issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 25, 1988, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing or petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an

Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularly the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions that are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendments under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-800-325-6000 (in Missouri 1-800-342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Martin J. Virgilio:

Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Jay Silberg, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated November 3, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and at the Technology and Science Department, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

Dated at Rockville, Maryland, this 15th day of March 1988.

For the Nuclear Regulatory Commission.

Dominic Dilanni,

Project Manager, Project Directorate III–1, Division of Reactor Projects III, IV, V, and Special Projects.

BILLING CODE 7590-01-M

[Docket Nos. 50-259, 50-260 and 50-296]

Tennessee Valley Authority (Browns Ferry Nuclear Plant, Units 1, 2 and 3;) Exemption

I

The Tennessee Valley Authority (the licensee) is the holder of Facility Operating Licenses No. DPR–33, DPR–52, and DPR–68 which authorize operation of the Browns Ferry Nuclear Plants, Units 1, 2, and 3, respectively. These licenses provide that, among other things, the facility is subject to all rules, regulations, and orders of the commission now or hereafter in effect.

II

10 CFR 50.55a(g)(4)(ii) requires that in-service examinations of components, in-service tests to verify operational readiness of pumps and valves whose function is required for safety, and system pressure tests, conducted during the successive 120-month inspection intervals shall comply with the requirements of the latest edition and addenda of the Code incorporated by reference in paragraph (b) of the applicable section.

The Licensee would be required to update its Browns Ferry ASME Section XI pump and valve program to a later edition of the code at the end of the initial 120-month inspection interval which would be no later than March 1, 1988. However, as a result of discussions between TVA and the NRC, TVA agreed to revise and update its pump and valve (IST) program to the later code edition earlier than was required. This revised program was submitted to the NRC on August 31, 1982, which was 5 years into the initial 10-year IST inspection interval.

By letter dated April 6, 1983, TVA requested an exemption to allow Browns Ferry to utilize the updated IST program for a full 10-year interval beginning on August 31, 1982, the date of the revised program submittal. The Licensee revised its exemption request on February 17, 1988 in accordance with the requirements of 10 CFR 50.12(a)(2) pertaining to special circumstances.

With regard to this exemption request, the staff concludes that permitting the 120-month interval for pumps and valves to be extended for all units until August 31, 1992 is acceptable since the Browns Ferry program would not exceed a ten-year period without updating to a more recent edition of the code as required by the rule. The Licensee's revised IST program was submitted on August 31, 1982, mid-way through the first ten-years IST interval. The revised program was

BEST COPY AVAILABLE

VOL 53 ISS 58 MR 25 1988 UMI

based upon the most recent edition of the ASME Code which was the 1980 edition of the Code through the Winter Addenda. Granting the exemption results in updating to a revised ASME Code Edition two times in a 180-months period compared to two times in a 240-months period permitted under the rule. Therefore, granting the exemption would not result in the IST program exceeding the 10-year interval without receiving an ASME code update. In addition, the staff has compared the requirements of the 1980 edition of the Code requirements which would apply in March 1987 if the exemption were not granted (i.e., the 1983 Edition and Addenda through the Summer 1983 Addenda) and has determined that there is no significant difference in the testing requirements for pumps and valves. Therefore, the staff finds that an exemption from the requirements of 10 CFR 50.55a(g)(4) is justified.

III

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, the exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. The Commission further determines that special circumstances as provided in 10 CFR 50.12(a)(2)(ii) are present and justify the exemptions—namely, that application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule in that at no point would granting the exemption result in the IST program exceeding ten years without receiving an ASME code update.

The Commission hereby grants an exemption from the requirements of 10 CFR 50.55a(g)(4)(ii) to the Licensee for the operation of the Browns Ferry Plant, Units 1, 2, and 3, in that the revised IST program of August 31, 1982 complied with the requirements of the latest edition and agenda of the Code and, therefore, the Browns Ferry IST program will not exceed the 120-month interval without an update to a more recent ASME Code update.

Pursuant to 10 CFR 51.21, the Commission has determined that the issuance of this exemption will have no significant impact on the environment (53 FR 8521, March 15, 1988).

For further details with respect to this action, see the request for exemption dated April 6, 1983, as supplemented February 17, 1988, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Athens Public Library, South Street, Athens, Alabama 35611.

This exemption is effective upon issuance.

Dated at Bethesda, this 18th day of March 1988.

BILLING CODE 7590-01-M

Toledo Edison Co. et al.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-3, issued to the Toledo Edison Company and the Cleveland Electric Illuminating Company (the licensees), for operation of the Davis-Besse Nuclear Power Station, Unit No. 1, located in Ottawa County, Ohio.

The proposed amendment would revise the provisions in the Davis-Besse Nuclear Power Station, Unit No. 1, Technical Specifications (TS's), relating to once through steam generator (OTSG) tube sample selection and inspection requirements. Specifically, the proposed amendment would revise TS Surveillance Requirement 4.4.5.2 by adding an additional special interest tube group. The new special interest group would consist of the tubes near the center of each OTSG.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 25, 1988, the licensees may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition, and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may

be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-800-325-6000 (in Missouri 1-800-342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Kenneth E. Perkins: (petitioner's name and telephone number); (date Petition was mailed); (plant name); and (publication date and page number of this Federal Register notice). A copy of the petition should also be sent to the Office of the General Counsel-Rockville, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its intent to make a no significant hazards consideration finding in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated January 11, 1988, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Dated at Rockville, Maryland, this 18th day of March, 1988.

For The Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

OFFICE OF MANAGEMENT AND BUDGET

Performance of Commercial Activities; Revision to Circular No. A-76

AGENCY: Office of Management and Budget.

ACTION: Revisions to Circular No. A-76, "Performance of Commercial Activities".

SUMMARY: This notice contains Transmittal Memorandum No. 6, dated March 7, 1988, to Circular No. A-76, "Performance of Commercial Activities."

The transmittal memorandum updates the retirement cost factors and inflation factors for personnel and non-pay costs used by Executive Branch agencies in cost comparison studies under OMB Circular No. A-76.

The revised retirement cost factors represent the amount the Government contributes to the basic defined benefit fund of the retirement system. The rate excludes the Government's contribution to Social Security (OASDI) and thrift plan costs in the Federal Employees Retirement System (FERS) as required by the FERS Act of 1986.

This change reflects composite factors that are derived from the six (1988–1993) yearly dynamic normal cost rates developed by the Office of Personnel Management actuary.

This change uses the same rates and percentage of payroll assumptions included in OMB Bulletin No. 88-08 of December 24, 1987.

The revised employee pay and non-pay factors reflect the same economic assumptions contained in the President's Fiscal Year 1989 Budget of the U.S. Government.

The revision does not require any agency to (1) create or maintain a duplicative control/monitoring/reporting system or (2) adopt any additional controls if presently in compliance with the Federal Acquisition Regulations (FAR).

FOR FURTHER INFORMATION CONTACT: Sandra Popham, Office of Federal Procurement Policy, Office of Management and Budget, (202) 395-6810.

James C. Miller III,

Director.

March 4, 1988.

CIRCULAR NO. A-76

Revised Transmittal Memorandum No. 6

TO THE HEADS OF EXECUTIVE
DEPARTMENTS AND AGENCIES

SUBJECT: Revised Retirement Cost Factors

This transmittal memorandum updates the standard retirement cost factor and inflation factors used for computing Government personnel and non-pay costs under OMB Circular No. A-76, dated August 4, 1983.

The revised standard retirement cost factor to be used is 19.1 percent for all agencies except the Department of Medicine and Surgery (DM&S) within the Veterans Administration (VA). The factor for DM&S is 8.8 percent. The composite factors are derived from the six (1988–1993) yearly dynamic normal cost rates developed by the Office of Personnel Management. The standard factor represents the Government's share of the full dynamic normal costs of the Civil Service Retirement System (CSRS) and the Federal Employees' Retirement System (FERS). The factors do not include the Government's contributions to Social Security (OASDI) and thrift savings plan costs. The DM&S factor reflects only the actual costs the VA contributes to the two retirement funds.

The revised standard retirement cost factors for cost comparisons which contain special class employees are 23.5 percent for air traffic controllers and 25.5 percent for law enforcement and fire protection employees.

The President's FY 1989 Budget contains revised economic assumptions for Federal employee pay and non-pay cost increases covering FY 1988 through FY 1993. The following factors should be applied per paragraph C of the Supplement to Circular No. A-76 on pages IV-6 and 7:

Federal pay raise assumptions	Inflation factors	
Effective date	Military	Civilian
January 1988	2.0	2.0
January 1989	4.3	2.0
January 1990	4.6	3.0
January 1991	4.5	3.0
January 1992	4.2	3.0
January 1993	4.0	3.0

Non-Pay Categories (supplies, equipment, etc.)	
FY 1988	3.3
FY 1989	3.9
FY 1990	3.6
FY 1991	3.3
FY 1992	2.8
FY 1993	2.3

The wage base to compute the medicare benefit factor (1.45 percent) will increase on a fiscal year basis as shown below. This factor should be applied per paragraph D.3.g. of the Supplement on page IV-10.

FICA wage base	
FY 1988	$44,700
FY 1989	$46,125
FY 1990	$48,525
FY 1991	$51,450
FY 1992	$54,450
FY 1993	$57,450

These revisions are effective upon publication and shall apply to all studies in process where the bids or proposals have not been opened.

James C. Miller III,

Director.

POSTAL SERVICE

Postal Service Owned Invention; Availability for Licensing

AGENCY: Postal Service.

ACTION: Notice of availability of invention for licensing.

SUMMARY: The invention listed below is assigned to the Postal Service and is made available for licensing. A postal industry technical briefing was given to potential users on January 29, 1988 at which time the compression methodology covered by the patent was disclosed.

It is the policy of the Postal Service to make available royalty-free licenses for this patent to contractors that directly provide the Postal Service with equipment or services. Requests for such royalty-free licenses should be made to: David F. Letts, Contracting Officer, Office of Procurement, U.S. Postal Service, 475 L'Enfant Plaza, SW., Washington, DC 20260-6234.

It is also the policy of the Postal Service to make available royalty-bearing licenses to any others who may be interested. Such persons or firms are invited to purchase a license or enter into a royalty agreement. Inquiries should be made to Arthur D. Little Enterprises, Inc., 25 Acorn Park, Cambridge Massachuetts, 02140-2390, which will act as agent for the Postal Service.

DATE: March 25, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. W. J. Maloney, Jr., Program Director, Office of Operations Research & Systems Requirements, Technology Resources Department, U.S. Postal Service, 475 L'Enfant Plaza SW., Washington DC, 20260-8112, Telephone (202)- 268 3861.

Patent Application #144380: "Method and System for Storing and Retrieving Compressed Data" January 15, 1988.

BILLING CODE 7710-12-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-25493; File No. SR-MSE-88-2]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval to Proposed Rule Change by the Midwest Stock Exchange, Incorporated Relating to the Extension of the Portfolio Execution System Pilot Program

On February 18, 1988, the Midwest Stock Exchange, Inc. ("MSE" or "Exchange"), submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder,[2] a proposed rule change to extend the approval of the portfolio execution system pilot program until such time as the Commission makes a final determination on whether or not approval of the pilot program should be granted on a permanent basis.

On February 12, 1986, the Commission approved on a one-year pilot basis four proposed changes to the Midwest's Automatic Execution System ("MAX") (see SR-MSE-85-11; Release No. 34-22896).

The pilot program, as approved on February 12, 1986, consists of four changes to MAX procedures. These changes apply only to portfolio executions. The MSE's current proposal seeks the extension of these four changes until such time as a filing for permanent approval of the pilot is made by the Exchange and considered by the Commission. The first of the four changes will allow principal orders for portfolio executions to be sent over MAX. This change will enable member firms to execute more efficiently a portfolio for the firm's own account as well as for customers.

Second, the time frame between the time a market order is entered into MAX and the time it is automatically executed will be reduced from 15 seconds to 0 seconds.[3] According to the MSE, the need for a timely execution is significantly more important to the customer and the firm in this type of transaction than the possibility that a better fill may be obtained in a particular issue in a portfolio by exposing the order for 15 seconds.

The third change clarifies that specialist participation in a portfolio execution is voluntary for principal orders or agency orders above 1,099 shares. The MSE notes that this is consistent with the current MAX requirements. Portfolio executions over MAX beyond the existing MAX requirements only will be executed in accordance with arrangements agreed upon in advance by the specialist and the order entry firm.

The fourth change precludes the use of the MAX System for portfolio executions before 9:00 a.m. and after 2:45 p.m. (Central Standard Time).[4] According to the MSE, this restriction will avoid creating any problems at the opening or closing in periods of heavy volume.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6 and 11A, and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in that accelerated approval will enable the Exchange to continue the use of the portfolio execution system while the Commission continues to examine the appropriateness of the proposed modifications to MAX. Extension of the pilot program will permit the MSE to assess and develop further its procedures under the program.

As the Commission noted in the initial approval of the pilot program, however, the reduction of order exposure time through MAX from 15 seconds to zero seconds for portfolio executions represents an exception from procedures for executing orders in individual securities based on the need by member firms for timely execution of portfolios. The Commission recognizes the pricing benefits that may adhere to the exposure of orders in individual securities are significantly reduced in the context of the simultaneous execution of a number of securities

---

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b-4 (1986).

[3] We note that the current order exposure time for MAX orders is based on a pilot program that reduces order exposure from 30 seconds to 15 seconds. *See* SR-MSE-85-6, Release No. 22357, 52 FR 35080 (Aug. 20, 1985).

[4] The Commissions February 12, 1986 approval of the pilot program provided that the MAX system could not be used before 9:30 am. The Exchange, however, amended its rules to commence trading one-half hour earlier, at 8:30 a.m. instead of 9:00 a.m. central time. [*See* MSE-85-9, Release No. 22474, 50 FR 41280, (Sept. 28, 1985)]. In light of this change, the Exchange proposes that the use of the MAX system for portfolio executions be precluded before 9:00 a.m. instead of 9:30 a.m. as originally approved in the pilot. This will maintain the 30 minute delay from the opening of trading in which portfolio executions through MAX are currently prohibited.

comprising a portfolio. In this regard, the Commission will continue to examine the appropriateness of eliminating any exposure time for portfolio executions.[5]

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 15, 1988.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[6] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[7]

Dated: March 21, 1988.

Jonathan G. Katz,

Secretary.

[Release No. 34-25489; File No. SR-MSRB-87-12]

Self-Regulatory Organizations; Municipal Securities Rulemaking Board; Order Approving Proposed Rule Change

On October , 1987, the Municipal Securities Rulemaking Board ("MSRB") filed with the Commission, pursuant to section 19 of the Securities Exchange Act of 1934 ("Act"), a proposed rule change that amends MSRB rules concerning the delivery of interchangeable municipal securities ("interchangeables")[1] and the confirmation of transactions for those securities. The proposal would permit a delivery of municipal securities to be in either registered or bearer form unless the parties to the transaction specifically agree to a particular form. The Commission published notice of the Proposal on December 10, 1987.[2] No comments were received. This Order approves the proposal.

I. Description

Currently, MSRB rules provide that certain deliveries of interchangeables must be in bearer form unless the parties agree to registered form certificates.[3] The proposal would eliminate that presumption in favor of bearer certificates and permit deliveries of interchangeables to be in bearer or registered form, unless there is an agreement between parties on a specific form of delivery. The proposal provides that it will become effective six months from the date of approval, on September 18, 1988. The proposal also would eliminate a reclamation provision that currently allows a receiving party to return registered securities to the delivering party if registered securities were not specified at the time of the trade.[4] Finally, the proposal would eliminate an MSRB requirement that confirmations disclose whether interchangeables are in registered form.[5]

II. Rationale

The MSRB believes that its proposal should benefit depositories, brokers, dealers, and customers. The MSRB states in its filing that the proposal would facilitate depository conversion of bearer certificates to registered certificates, which would reduce depository costs associated with housing and processing bearer certificates. The MSRB also believes dealers would experience a reduction in the number of failed transactions and missed call notices. Customers, according to the MSRB, would benefit from better call notification, prompt interest payments, and reduced risk of certificate theft or loss offered by registered certificates. Accordingly, the MSRB believes that the proposal is consistent with section 15B(b)(2)(c) of the Act.

The MSRB solicited comments on the proposals in an exposure draft published in June 1987. The MSRB states in its filing that 18 comment letters were received. Thirteen commentators supported the proposal, and five opposed the proposal. Supporting commentators believed the proposal would promote the efficiencies of registered-form municipal securities. Opposing commenters believed the proposal would restrict their ability to service customers who prefer bearer securities. As noted above, however, no comments were received by the Commission.

III. Discussion

The Commission is approving the proposal because it believes the proposal is consistent with the Act, and Sections 15B and 17A in particular. As discussed below, the Commission believes that the proposal is designed to promote efficiencies and reduced risk associated with the use of registered-form municipal securities. The Commission believes that those efficiencies benefit depositories, dealers, and customers. The Commission also believes that the proposal should reduce the number of failed transaction settlements that result from current rules that create a presumption in favor of delivery of bearer certificates.

Since the enactment of TEFRA, most municipal securities have been issued in registered rather than bearer form. Moreover, the majority of municipal securities deliveries in primary distributions and in secondary-market transactions currently are effected by book-entry deliveries at depositories.[6] Although brokers and dealers that use depositories must accept book-entry deliveries of interchangeable issues, not all municipal securities brokers and dealers use depositories and many interchangeable issues are not eligible for depository services. Current MSRB rules that presume deliveries of interchangeables must be in bearer form, unless specified otherwise, have hampered centralized automated processing of municipal securities transactions. Those rules effectively prevent depositories from converting interchangeable bearer securities on deposit to registered form, because many depository participants now need the ability to withdraw bearer certificates to satisfy delivery obligations to other dealers.[7] Moreover, those deliveries often are made physically and not by book-entry movements at depositories. As discussed below, current procedures create unnecessary cost and risk to depositories, brokers and dealers, and customers.

---

[1] Interchangeables are municipal securities issues that may be held in registered or bearer form and converted from one form to the other.

[2] *See* Securities Exchange Act Release No. 25172 (December 4, 1987), 52 FR 46875.

[3] *See* MSRB Rules G-12(e)(vi)(a) and G-15(c)(iv)(A). Since July 1, 1983, the Tax Equity and fiscal Responsibility Act of 1982 ("TEFRA") has made the tax-exempt status of new municipal bond issues contingent, in part, upon issuance of the securities in registered form. According to the MSRB, almost all municipal securities issued since that date have been in registered form. Current MSRB rules that would be amended by the proposal were adopted before TEFRA.

[4] *See* MSRB Rule G-12(g)(iii)(4).

[5] *See* MSRB Rules G-12(c)(vi)(B) and G-15(a)(iii)(B). Under the proposal, if parties do agree on a specific form of delivery, it would have to be noted on the confirmation as a special condition to the trade.

[6] In 1983, the Commission approved an MSRB proposal requiring dealers, brokers, and customers that participate in registered clearing agencies to use automated clearing agency facilities to process their municipal securities transactions. The proposal was intended to bring more municipal securities transactions into the National Clearance and Settlement System. *See* Securities Exchange Act Release No. 20465 (November 14, 1983), 48 FR 52531 corrected at 48 FR 54310.

Depository costs and risk from maintaining interchangeables in bearer form are significant. Each bearer certificate must be individually maintained in the depository's vault, because bearer certificates cannot be consolidated into large-denomination certificates. Prior to interest payment dates, depositories must manually retrieve each bearer bond, physically "clip" the interest coupon, and physically deliver coupons to appropriate paying agents. Depositories also must monitor hundreds of newspapers and financial periodicals to determine which bearer bonds in their custody have been called for redemption by issuers. Depositories often incur significant interest costs when a call is missed.[8] In contrast, depositories can consolidate registered certificates into "jumbo" certificates and bond trustees send interest payments and call notices directly to depositories.

The proposal should benefit brokers and dealers by lowering depository costs,[9] which participants pay through depository fees, and reducing costs and risk resulting from physical deliveries. Currently, brokers and dealers that discover they have sold interchangeables,[10] without specifying registered-form delivery, must withdraw bearer certificates (and pay withdrawal fees) and physically deliver certificates to a receiving party that does not use a depository.[11] Bearer certificates are readily negotiable and present risk from loss or theft. If those brokers or dealers attempt to deliver registered certificates, they face reclamation under MSRB rules by the receiving party and must finance the position until physical delivery of bearer certificates can be made.

Although the Commission understand that some customers continue to prefer bearer certificates, registered certificates offer lower costs and risk to customers without any discernible detriment.[12] Like depositories, individual holders of registered certificates receive interest payments and call notices directly from bond trustees. The Commission understands that individual holders of bearer certificates are the most likely holders to miss call notices and often absorb resulting interest loss. Moreover, when individuals lose bearer certificates, trustees often require that the investor pay the cost of new printing plates in addition to a replacement bond, which together can exceed the face amount of the lost bond. The cost of printing plates is not incurred in replacement of registered bonds, because transfer agents maintain blank certificates for transfer or replacement purposes.

In commenting on an exposure draft published by the MSRB in June 1987, commentators opposing the proposal believed it would restrict their ability to service customers preferring bearer securities. Those commentators cited the ease of transferring bearer securities and the possibility of transfer fees as reasons for customer preferences for bearer securities. The Commission believes that registered certificates can be negotiated easily and with less risk of improper negotiation and resulting loss to investors. The Commission believes the efficiencies promoted by the proposal outweigh any burden the proposal may place on customers preferring bearer securities or parties servicing those customers.

IV. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the Act and, in particular, with Sections 15B and 17A.

It is therefore ordered, pursuant to section 19 of the Act, that the proposed rule change (SR–MSRB–87–12) be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. 17 CFR 200.30–3.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. IC–16328(812–6966)]

AIM Convertible Securities, Inc., et al.; Application

March 21, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: AIM Convertible Securities, Inc., AIM Government Funds, Inc., AIM Tax-Exempt Funds, Inc., The Constellation Growth Fund, Inc., Cortland Trust, The Greenway Fund, Inc., High Yield Securities, Inc., Short-Term Investments Co., Summit Investors Fund, Inc., Tax-Free Investments Trust and Weingarten Equity Fund, Inc.

Relevant 1940 Act Sections: Exemption requested under section 6(c) from section 32(a)(1).

Summary of Application: Applications seek an order to permit them and any open-end management investment company and any series, class or portfolio thereof that are sponsored, advised or administered now or in the future by AIM Advisors, Inc., AIM Capital Management, Inc. or their affiliates and are not required by law to hold annual shareholder meetings to file with the SEC financial statements signed or certified by an independent

public accountant selected at a board of directors or trustees meeting held more than thirty but not more than ninety days before or after the beginning of their respective fiscal years.

Filing Date: The application was filed on January 25, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m. on April 14, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for attorneys, by certificate. Request notification of the date of the hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicants, Eleven Greenway Plaza, Suite 1919, Houston, Texas 77046.

FOR FURTHER INFORMATION CONTACT: Sherry Hutchins Perkins, Staff Attorney, (202) 272–3082 or Brion R. Thompson, Special Counsel, (202) 272–3016.

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier, (800) 231–3282 (in Maryland, (301 258–4300).

Applicants' Representations

1. Applicants are open-end management investment companies registered under the 1940 Act. All of the Applicants are Maryland corporations except for Tax-Free Ivestments Trust, Short-Term Investments Co. and Cortland Trust, which are Massachusetts business trusts. Each Applicant is advised by AIM Advisors, Inc. or AIM Capital Management, Inc. Applicants' fiscal years range from March 31 to December 31.

2. The Boards of Directors or Trustees (hereinafter, the "Boards") of each Applicant currently select an independent public accountant at a meeting held prior to mailing the proxy soliciting material for those Applicants that held annual meetings, and within thirty days before or after the beginning of the fiscal year for those Applicants that do not hold annual meetings. Applicants (other than Tax-Free Investments Trust, Short-Term Investments Co. and Cortland Trust) have in the past generally held an annual meeting of shareholders.

3. Tax-Free Investments Trust, Short-Term Investments Co. and Cortland Trust, as Massachusetts business trusts, are not required to hold annual shareholder meetings. Recently, Maryland State law has been changed so that it no longer requires annual meetings if the charter or by-laws of a Maryland corporation registered under the 1940 Act provides that such corporation need not hold annual meetings except when required in certain specific circumstances. At their most recent meetings, the Boards of Applicants that are incorporated in Maryland took such action as was necessary so that such Applicants need no longer hold annual meetings. Therefore, unless shareholder action is required under the 1940 Act for (i) election of directors, (ii) approval of the investment advisory agreement, (iii) ratification of the selection of independent public accountants or (iv) approval of the distribution agreement, annual meetings will not be held for any of the Applicants.

4. The procedures which have been followed by Applicants for the selection of independent public accountants rely on the work of the Audit Committee which is comprised of the same directors for all Applicants, except Cortland Trust and Tax-Free Investments Trust which have their own Audit Committees. Each of their Audit Committees is composed of "distinterested" directors (as contemplated in section 2(a)(19) of the 1940 Act) who meet with the independent public accountants at least twice a year.

5. The Audit Committees meet to discuss the scope of the audits, the significant audit procedures to be applied and the estimated costs. The Audit Committees also review the results of the annual audits, including such factors as the cooperation given by the investment manager's personnel, any changes in accounting practices and principles, and questions about the independent public accountant's qualifications or independence and the actual fees. Based on its work, the Audit Committee makes its recommendation to the respective Board of each Applicant regarding the selection of the independent public accountant.

6. Under the provisions of section 32(a)(1) of the 1940 Act, Applicants which do not hold regular annual meetings will now be required to select their independent public accountant within thirty days before or after the beginning of each Applicant's fiscal year. This would require a meeting of the Boards almost monthly due to the range of fiscal year-ends from March 31 to December 31.

7. Typically, the Boards of all of the Applicants meet at the same time which is more convenient for the board members and officers of the Applicants and which results in a substantial savings in meeting costs. To select the independent public accountant within thirty days before or after the beginning of each Applicant's fiscal year as required under section 32(a)(1) would require a change in the existing procedures of the Applicants, would be more inconvenient and costly and would not change the results.

8. Accordingly, to assure that the purposes expressed in the language of the 1940 Act are met while at the same time making an effective use of each Boards' time, it is proposed that the time frame in which meetings of the Boards could consider the selection of an independent public accountant be expanded from thirty days to ninety days before or after the beginning of the fiscal year. By so doing, the Board meetings on a complex-wide basis could be arranged so that the selection of an independent public accountant need be considered only twice each year.

Applicants' Legal Analysis

1. Each Applicant submits that it would be desirable for it to consider the selection of its independent public accountant at a regularly scheduled Board meeting during its fiscal year. Expanding the thirty day window under section 32(a)(1) to ninety days will permit a regular and structural consideration of the independent public accountant for complexes at a meaningful interval of time. This is preferable to the almost monthly selection which would be required if the interval is not expanded.

2. By permitting the scheduling of the selection of the independent public accountant through expanding the window from thirty to ninety days, the SEC will allow a member of each Board to review procedures to be put in place that will ensure the selection of the Applicants' independent public accountants is considered on a systematic basis that will (i) provide detailed review of the services furnished by the independent public accountants and (ii) result in the Boards' consideration of all information developed by the Audit Committees. Further, the process will more accurately reflect the reality of doing business in complexes having a substantial number of investment companies, which is different from the

---

[7] The Commission understands that after this proposal takes effect, depositories likely will begin comprehensive conversion of interchangeables to registered form, a process that could take several years. The effect of such a conversion would be to reduce the available supply of bearer certificates. Because that conversion could change a depository participant's current ability to withdraw interchangeables in bearer form, the Commission expects depositories to file any such policy change with the Commission under section 19 of the Act and Rule 19b–4.

[8] Recently, the improvement of municipal bond call notification has been of concern to the Commission. *See* Securities Exchange Act Release No. 23856 (December 3, 1986), 51 FR 44398. In that release, the Commission endorsed standards aimed at improving the processing of muncipal securities redemptions. The standards were endorsed at a meeting of industry organizations, self-regulatory organizations, and Federal regulatory agencies.

[9] One estimate indicates that a depository that currently holds over 15 million interchangeable bearer certificates could save $1.00 per certificate per year if those certificates were converted to registered form. Letter from Robert N. Downey, Chairman, Public Securities Association, Municipal Securities Division, to Angela Desmond, General Counsel, MSRB, dated March 31, 1987 ("PSA letter").

[10] The Commission understands that over 50% of municipal bonds issued prior to TEFRA are interchangeable, but that there is no readily available source to determine whether a particular bond is interchangeable.

[11] Estimates indicate that physical deliveries cost $10 to $15 more per trade to process than book-entry deliveries at depositories. *See, e.g.*, SEC, Division of Market Regulation, *Progress and Prospects: Depository Immobilization of Securities and Use of Book-Entry Systems*, Draft Staff Report (June 14, 1985).

[12] The Commission notes that the Public Securities Association and Depository Trust Company have committed to take steps to inform brokers, dealers, and investors of the implications of the proposal before the proposal's effective date. *See* PSA letter.

time the 1940 Act was passed when investment companies were operated on an individual basis or in small investment company groups.

For the Commission, by the Division of Investment Management, under developed authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-16325; 812-6960]

The Chase Manhattan Bank, N.A.; Application

March 18, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicant: The Chase Manhattan Bank, N.A.

Relevant 1940 Act Sections: Exemption requested under section 6(c) from the provisions of section 17(f).

Summary of Application: Applicant seeks an order to permit it to continue to deposit the securities and assets of U.S. registered management investment companies with Nederlandse Credietbank N.V. ("NCB") in The Netherlands, in accordance with prior orders, notwithstanding the fact that Applicant has transferred its interest in NCB.

Filing Date: The application was filed on January 20, 1988 and amended on March 9, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on April 12, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, One Chase Manhattan Plaza, New York, NY 10081.

FOR FURTHER INFORMATION CONTACT: Victor R. Siclari, Staff Attorney (202) 272-3028, or Curtis R. Hilliard, Special Councel (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations

1. In Investment Company Act Release No. 12053 (November 20, 1981), the SEC granted an order exempting Applicant, any subcustodian of Applicant, any custodian for which Applicant acts as subcustodian and any management, investment company registered under the 1940 Act other than an investment company registered under section 7(d) of the 1940 Act ("Company") from the provisions of section 17(f) of the 1940 Act and Rule 17f-4 thereunder to the extent necessary to permit Applicant, as the custodian of securities and other assets of a Company ("Securities") or as the subcustodian of such Securities as to which any other entity is acting as custodian, and such other entity for which Applicant so acts, to deposit or to cause or permit the deposit of such Securities in certain foreign banks and foreign securities depositories under certain conditions. The term "Securities" does not include securities issued by the Government of the United States or by any state or any political subdivision thereof or by any agency thereof or any securities issued by any entity organized under the laws of the United States or any state thereof (other than certificates of deposit, evidences of indebtedness and other securities, issued or guranteed by an entity so organized which have been issued and sold outside the United States). In Investment Company Act Release No. 14184 (October 9, 1984), the SEC amended the order so that it would confrom to certain conditions in Rule 17f-5 under the 1940 Act which was adopted by the SEC in Investment Company Act Release No. 14132 (September 7, 1984) (the orders collectively referred to as "Existing Orders"). The Existing Orders provide, among other things, that any Company relying on the Existing Orders may maintain its Securities in the custody of only eligible foreign custodians as defined therein, which include: (i) a banking institution or trust company incorporated or organized under the laws of a country other than the United States that is regulated as such by that country's government or an agency thereof, and that has shareholders' equity in excess of $200 million (U.S. $ or U.S. $ equivalent) and (ii) a majority-owned direct or indirect subsidiary of a qualified U.S. bank or bank holding company that is incorpoated or organized under the laws of a country other than the United States and that has shareholders' equity in excess of $100 million (U.S. $ or U.S. $ equivalent).

2. In Investment Company Act Release No. 14687 (August 28, 1985), the SEC granted an order ("NCB Order") under section 6(c) of the 1940 Act exempting Applicant, any Company and NCB from the provisions of section 17(f) to the extent necessary to permit Applicant to deposit, or to cause or permit the deposit of, Securities of any Company with NCB in The Netherlands. At that time, NCB was an indirect, wholly-owned subsidiary of Applicant and regulated as a banking institution by the Central Bank of The Netherlands. However, NCB had shareholders' equity of less than U.S. $100 million, and thus, did not satisfy the maximum requirement to qualify as an "eligible foreign custodian" under the existing Orders, as modified by Rule 17f-5 under the 1940 Act. Pursuant to the terms of the NCB Order, Applicant can make deposits with NCB only in accordance with an agreement, which agreement is required to remain in effect at all times during which NCB does not meet the requirements of the Existing Orders relating to shareholders' equity, among (a) the Company or a custodian of the Securities of the Company for which Applicant acts as subcustodian, (b) Applicant and (c) NCB, pursuant to the terms of which Applicant would act as the custodian or subcustodian, as the case may be, of the Securities of the Company and NCB would be delegated such duties and obligations of Applicant thereunder as would be necessary to permit NCB to hold in custody the Securities of the Company in The Netherlands, provided that such delegation would not relieve Applicant of any responsibility to the Company for any loss due to such delegation, except such loss as may result from political risk (*e.g.*, exchange control restrictions, confiscation, expropriation, nationalization, insurrection, civil strife or armed hostilities) and other risk of loss (excluding bankruptcy or insolvency of NCB) for which neither Applicant nor NCB would be liable under the Existing Orders (*e.g.*, despite the exercise of reasonable care, loss due to Act of God, nuclear incident and the like).

3. In Investment Company Act Release No. 14711 (September 11, 1985), the SEC adopted amendments to Rule 17f-5 under the 1940 Act to clarify

certain aspects of the Rule. The release stated that the clarifications are equally applicable to the Existing Orders which incorporate the rule requirements.

4. On December 31, 1987, Applicant transferred its entire interest in NCB to Credit Lyonnais Bank Nederland N.V., a majority-owned direct subsidiary of Credit Lyonnais S.A. ("Credit Lyonnais"). Credit Lyonnais, a banking organization formed under the laws of France in 1863, is the second largest commercial bank in France and is regulated as a banking institution by the French government. Nothwithstanding the sale of Applicant's interest in NCB, Applicant requests an order to permit it to continue to deposit Securities of any Company in The Netherlands with NCB so long as such deposit is made in accordance with the terms of the Existing Orders as modified by the NCB Order.

Applicant's Legal Conclusions

The exemption requested should be granted because it is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act. In support thereof, the proposed foreign custodian arrangements with NCB would continue to comply with the requirements of the Existing Orders as modified by Rule 17f-5 under the 1940 Act and the NCB Order.

Applicant's Conditions

Applicant agrees that the requested order may be expressly conditioned on the following:

Applicant will comply with all the terms of the Existing Orders, as modified by Rule 17f-5 under the 1940 Act, except those relating to shareholders' equity and those which would have to be modified to accommodate the requirements of the NCB Order.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. IC-16326; File No. 812-7093]

Robert A. Katz; Filing of Application

March 21, 1988.

Notice is hereby given that Robert A. Katz ("Katz" or "Applicant") 200 East 56th Street, New York, New York 10022, has filed an application ("Application") and amendment thereto requesting an order of the Commission pursuant to section 9(c) of the Investment Company Act of 1940, as amended (the "Act"), that would grant a permanent exemption from the prohibitions of section 9(a)(2) of the Act, applicable to him by virtue of an injunction entered in 1977. Katz requests relief only to the extent necessary to serve as a trustee of the Eclispe Financial Asset Trust.

The application states that Katz is an attorney who has been in private practice in New York City and, before that, in Chicago, for more than 22 years. He received an A.B. degree in 1946 from Harvard University where he also did post-graduate work from 1947 to 1948, and he received an LL.B. degree from the Boston University School of Law in 1954. The Application further states that Katz has been a member in good standing of the Illinois bar since 1954, the Connecticut bar since 1960 and the New York bar since 1966. In addition to practicing law, Applicant was an officer of Jospeh E. Seagram & Sons in New York City from 1965 to 1969. He served as chairman of the executive committee and director of Bevis Industries, Inc., in Providence, Rhode Island from 1969 to 1972, and as chairman of McGrath Services Corp. from 1973 to 1974. He served in the United States National Reserve from 1944 to 1946. In addition to maintaining his private legal practice, Applicant currently serves as an officer and director of Opportunity Press, Inc., in Chicago, Illinois.

From January to June 1987, Applicant served as a disinterested trustee of Eclipse Financial Asset Trust (the "Trust"), an open-end management investmenet company registered under the Act. Applicant resigned as a trustee of the Trust upon learning that he is prohibited, for the reasons discussed below, from serving in such capacity under section 9(a) of the Act.

In 1972, Applicant was named as one of approximately 20 defendants in an action commenced in the United States District Court for the District of Columbia entitled *SEC v. National Student Marketing Corporation,* Civ. Action No. 225-72 (D.D.C. filed Feb. 3, 1972) (the "Action"). In its complaint the Commission alleged, among other things, that Applicant violated and aided and abetted in the violation of the antifraud and reporting provisions of the Federal securities laws by issuing legal opinions which he knew or should have known were materially false and misleading and would be relief upon by third parties.

In April 1977, Applicant executed a stipulation in which he consented, without admitting or denying the allegations of the complaint except as to jurisdiction, to entry of a Final Judgment of Permanent Injunction (the "Final Judgment"). The Final Judgment, which was entered on April 28, 1977, permanently enjoined Applicant from

> making materially false and misleading statements, or omitting to state any material fact necessary in order to make the statements made, in light of the circumstances under which they were made, not misleading, including but not limited to issuing any legal opinion, in the form of a letter or otherwise, which he knows or reasonably should know is materially false or misleading in whole or part, to any company registered with the Commission or to any officer, director, employee, agent, accountant or attorney for such a company; or
>
> engaging in any act, practice or course of business which operates or would operate as a fraud or deceit upon any person, including but not limited to, issuing to any accountant, attorney, firm, company or any other person any proposed or actual contract, purchase and/or sale agreement, promissory note, management agreement or other legal instrument which he knows or reasonably should know is wholly or partially designed to or will likely be used to conceal the true nature of, or to materially promote, a transaction which is a sham or illusory in commercial or economic substance and which transaction he knows or reasonably should know could be misleading to stockholders of any company involved in the transaction or to the investing public.

In the Final Judgment, it was further ordered that any written legal opinion issued by Applicant to any issuer registered with the Commission (or to certain persons connected with such an issuer) and relied on in connection with the filing with the Commission of any required information clearly describe (i) the identity of any person or entity to whom and for whose benefit such opinion is rendered, (ii) the purpose for which such opinion is designed to be utilized, and (iii) any restriction on the use to which such opinion is put. In addition, pursuant to the Final Judgment, Applicant, who represents that he has not practiced law before the Commission since 1971, agreed to notify the Commission in writing prior to resuming such practice.

No evidence against Applicant was received in the Action and the Court did not make any findings of fact or conclusions of law regarding Katz in entering the Final Judgment.

Section 9(a) of the Act provides, in relevant part, that it is unlawful for any person to serve or act in the capacity of employee, officer, director, member of an advisory board, investment adviser or depositor of any registered investment company is such person, by reason of any misconduct, is permanently or temporarily enjoined from engaging in or continuing any conduct or practice in connection with the purchase or sale of any security.

Section 9(c) of the Act provides that upon application, the Commission shall be order grant an exemption, either unconditionally or on an appropriate temporary or other conditional basis, if it is established that the prohibitions of section 9(a), as applied to the applicant, are unduly or disproportionately severe or that the conduct of such person has been such as not to make it against the public interest or the protection of investors to grant such application.

The provisions of section 9(a) would preclude Applicant from serving as trustee for the Trust unless the relief requested pursuant to section 9(c) of the Act in this Application is granted. Applicant submits that the prohibitions of section 9(a) of the Act would be unduly and disproportionately severe as applied to him, and that his conduct has been such as to make it not against the public interest or the protection of investors to grant him an exemption from its provisions.

In support of this contention, Applicant submits that:

1. There were no factual findings or admissions of misconduct by Applicant in the Action. Moreover, the complaint filed by the Commission contained no allegations of self-dealing by Applicant.

2. More than 10 years have elapsed since Applicant consented to entry of the Final Judgment, and he has complied in all respects with its terms since its imposition. Applicant has taken all steps necessary to ensure that his legal practice is conducted in accordance with the terms of the Final Judgment.

3. At no time other than in the Action has Applicant been the subject of any federal or state enforcement or other administrative or judicial disciplinary proceeding, nor has he been named as a defendant in any other action relating to the securities laws. Applicant has not previously filed an application for relief pursuant to section 9(c) of the Act.

4. Applicant's participation as a disinterested trustee of the Trust would be in the best interests of investors in the Trust, and in the public interest, since his experience and expertise in the areas of law and business, and his personal integrity and commitment, make him especially well-suited to serve as trustee to the Trust. If Applicant is not permitted to serve as trustee for the Trust pursuant to an exemption under section 9(c) of the Act, investors will be deprived of the benefit of his experience and expertise.

5. The allegations in the Commission's complaint against Applicant, and the actions enjoined in the Final Judgment, involve Applicant's legal practice. Applicant will not be retained to render legal counsel to the Trust, nor will he resume practice before the Commission in connection with his position as trustee. To prohibit him from serving as trustee for the Trust would place an undue and disproportionate limitation on his activities.

6. Applying the prohibitions of section 9(a) to Applicant would result in detriment to investors in the Trust and deprive Applicant of his ability to serve as trustee for the Trust even though Applicant's contemplated activities as trustee of the Trust are completely unrelated to the activities and capacity in connection with which he was enjoined and he has complied fully with the terms of the Final Judgment.

Based upon the foregoing, Applicant states that the prohibitions of section 9(a) would be unduly and disproportionately severe as applied to him, and that it is not against the public interest or the protection of investors to grant the order of exemption requested in this Application. Applicant therefore requests that the Commission, pursuant to section 9(c) of the Act, grant him a permanent exemption from the provisions of section 9(a) operative as a result of the injunction entered against him in 1977, to the extent necessary to permit him to serve as a trustee of the Trust.

Applicant represents that he acknowledges, understands, and agrees that the Commission's issuance of the order requested by the Application shall not prejudice nor limit the Commission's rights in any manner with respect to any investigation, enforcement action, or proceeding under section 9(b) of the Investment Company Act, based, in whole or in part, upon conduct other than that giving rise to the Application.

Notice is further given that any interested person may, not later than April 20, 1988, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the Application, accompanied by a statement as to the nature of his or her interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted. Any such request should be addressed to: Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the Application herein will be issued as of course following said date unless the Commission orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponement thereof.

By the Commission.

Jonathan G. Katz,

Secretary.

[FR Doc. 88-6602 Filed 3-24-88; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 16324; (812-6956)]

USAA Mutual Fund, Inc., et al.; Application

March 18, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: USAA Mutual Fund, Inc. (consisting of: USAA Growth Fund, USAA Sunbelt Era Fund, USAA Income Stock Fund, USAA Income Fund and USAA Money Market Fund), USAA Tax Exempt Fund, Inc. (consisting of: USAA High Yield Fund, USAA Intermediate-Term Fund, USAA Short-term Fund and USAA Tax Exempt Money Market Fund), and USAA Investment Trust (consisting of: USAA Cornerstone Fund and USAA Gold Fund).

Relevant 1940 Act Sections: Exemption requested under section 6(c) from section 32(a)(1).

Summary of Application: Applicants seek an order to permit them and any future funds, trusts or series which become part of the USAA Group of Funds to file with the SEC financial statements signed or certified by an independent public accountant selected at a board of directors or trustees meeting held within sixty days after their respective fiscal years.

Filing Date: The application was filed on February 4, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m. on April 11, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either

personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for attorneys, by certificate. Request notification of the date of the hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549. Applicants, USAA Building, 9800 Fredericksburg Road, San Antonio, Texas 78288.

FOR FURTHER INFORMATION CONTACT: Sherry Hutchins Perkins, Staff Attorney, (202) 272-3022 or Brion R. Thompson, Special Counsel, (202) 272-3016.

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier, (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations: 1. Each Applicant is a registered open-end management investment company under the 1940 Act incorporated under the laws of Maryland, except USAA Investment Trust which is organized as a Massachusetts business trust. Each Applicant is a series company which is advised by USAA Management Company, an affiliate of United Services Automobile Association, a major property and casualty insurer.

2. Each of the Applicants has a Board of Directors or Board of Trustees (hereinafter "Board" or "directors"). Traditionally, Applicants have held concurrent quarterly meetings of their Boards and selected independent public accountants at the first quarterly meeting held subsequent to each Applicant's fiscal year end. Neither the corporate laws of Maryland nor applicable business trust law of Massachusetts require Applicants to hold annual shareholders' meetings.

3. Therefore, unless shareholder action is required for some other reason, it is the intention of Applicants that annual meetings not be held. Accordingly, under the provisions of section 32(a)(1) of the 1940 Act, Applicants are required to select their independent public accountant within thirty days before or after the beginning of each Applicant's fiscal year.

4. According to the application, the thirty day period for the selection of an independent public accountant mandated by section 32(a)(1) does not provide adequate time for Applicants' Combined Audit Committee (the "Committee") to review the audit findings in detail and formulate recommendations for the Boards. The selection of an independent public accountant for each Applicant is predicated on the recommendations of the Committee, which is composed of "disinterested directors" (as contemplated in section 2(a)(19) of the 1940 Act) serving on the Board of each Applicant. The Committee meets at least twice a year with the independent public accountant to discuss the audit plan, significant audit procedures to be implemented and projected costs. Upon completing the audits of the Applicants, the Committee reviews the results and formulates recommendations for consideration by the Boards. The Committee's recommendations are based on such criteria as: accountant's qualifications, ability to meet deadlines, suggested changes in accounting practices and principles, and actual fees.

5. Accordingly, to ensure that the purpose expressed in the language of section 32(a)(1) of the 1940 Act is met while at the same time ensuring that each Applicant's Board has the benefit of the Committee's recommendations prior to their selection of an independent public accountant, Applicants propose to allow the thirty day period in which meetings of directors could consider the selection of an independent public accountant be expanded to sixty days after the end of their respective fiscal years.

6. The fiscal year-ends of Applicants are March 31 for USAA Tax Exempt Fund, Inc., and September 30 for USAA Mutual Fund, Inc. and USAA Investment Trust. The expanded period for selection would enable Board meetings on a complex-wide basis to be arranged so that the selection of an independent public accountant need be considered only twice each year at a time sufficient to provide for a detailed review by the Committee and the Boards of the previous year's audit results.

Applicants' Legal Analysis

1. Each Applicant submits that it would be desirable for it to consider the selection of its independent public accountant at a regularly scheduled Board meeting during its fiscal year. Applicants believe that the exemption is appropriate and in the public interest, is consistent with the protection of investors, and is consistent with the purposes intended by the policy and provisions of the 1940 Act.

2. By permitting the scheduling of the selection of the independent public accountant through expanding the window form thirty to sixty days, the SEC will allow review procedures that would (i) provide the Committee with a more realistic timeframe for a detailed review of the services and results furnished by the independent public accountant to Applicants and (ii) enable each Board to give sufficient consideration to all of the information submitted by the Committee prior to making their selection. Further, the process will more accurately reflect the practicalities of doing business in complexes having a substantial number of investment companies, as opposed to investment companies operated on an individual basis or in small investment company groups.

For the Commission, by the Division of Investment Mangement, under delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[File No. 1-8940]

Issuer Delisting; Application To Withdraw From Listing and Registration; USR Industries, Inc.

March 21, 1988.

USR Industries, Inc. ("Company") (Common Stock, $1.00 par value), has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 and Rule 12d2-2(d) promulgated thereunder, to withdraw the above specified securities from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The Company concluded that, given its relatively small size and the additional costs required for compliance with Amex requirements, the Company should not continue its listing on the Amex. In addition, the Company does not fully satisfy all of the Amex's financial guidelines for continued listing. The Company has listed its common stock on the National Association of Securities Dealers Automated Quotation System ("NASDAQ"). Trading in the Company's common stock over NASDAQ commenced on January 25, 1988.

Any interested person may, on or before April 11, 1988, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order

VOL 53
ISS 58
MR 25
1988
UMI

granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. IP 88-02; Notice 01]

Goodyear Tire and Rubber Co.; Receipt of Petition for Determination of Inconsequential Noncompliance

Goodyear Tire and Rubber Company (Goodyear), of Akron, Ohio, has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for an apparent noncompliance with 49 CFR 571.109, Federal Motor Vehicle Safety Standard No. 109, "New Pneumatic Tires," on the basis that it is inconsequential as it relates to motor vehicle safety.

This Notice of receipt of a petition is published under section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Paragraph S4.3(e) of Federal Motor Vehicle Safety Standard No. 109 requires that the actual number of plies in the sidewall, and the actual number of plies in the tread area if different, be permanently molded into or onto both sidewalls. Goodyear produced and labeled 17,894 P195/60HR15 Eagle GT+4 tires with the incorrect number of plies in tread.

The tires in question were marked as follows:

Tread 6 Plies: 2 Polyester cord + 2 Steel Cord + 2 Nylon Cord Sidewall 2 Plies Polyester Cord.

The correct marking should be:

Tread 5 Plies: 2 Polyester Cord + 2 Steel Cord + 1 Nylon Cord Sidewall 2 Plies Polyester Cord.

Goodyear believes that the incorrect stamping has no effect on the tire performance or safety. The company supports the petition for inconsequential noncompliance "because the tires meet all test requirements of FMVSS No. 109, including tire strength, tire endurance, high speed performance, tubeless tire resistance to bead unseating, and physical dimensions." In addition, "the tires meet the temperature resistance requirement of § 575.14 of Title 49 Code of Federal Regulation, Uniform Tire Quality Grading Standard."

Interested persons are invited to submit written data, views and arguments on the petition of Goodyear Tire and Rubber Company, described above. Comments should refer to the Docket Number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street SW., Washington, DC 20590. It is requested but not required that six copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, the Notice will be published in the Federal Register pursuant to the authority indicated below.

Comment closing date: April 25, 1988.

(Sec. 102 Pub.L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on March 22, 1988.

Barry Felrice,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

[Docket 79-17; Notice 37]

New Car Assessment Program (NCAP); Review of Studies Which Compare NCAP Crash Test Results and Real-World Crash Data

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Request for comments.

SUMMARY: Over the past few years, several studies have been conducted in an attempt to compare the experimental New Car Assessment Program (NCAP) crash test results with real-world crash injury/fatality data. These studies reflect divergent views on whether NCAP results show a positive correlation to the real world. In an effort to assess the validity of these studies, the methodologies and conclusions of each study were reviewed and documented.

From a purely analytical perspective, the agency believes that the real-world crash data necessary to conduct a statistically valid real-world correlation should match the NCAP crash test conditions as closely as possible in terms of vehicle parameters (i.e., model year, make, model, and body style), impact direction and speed, safety belt usage, and injury descriptions to the head, chest and femurs. However, it is recognized that perfect real-world crash data are not available in sufficient amounts to conduct an ideal correlation. Thus, any study of the relationship between NCAP crash test results and real-world crash data must apply certain assumptions and adjustments to the two data sets in an effort to develop sufficient data that are as similar as possible for legitimate correlation analyses. It is within this context that the seven studies known to the agency were reviewed.

The agency seeks written comments on its review of the various studies. Additionally, the agency seeks comments and suggestions on the best method(s) and assumptions for conducting a real-world correlation analysis of NCAP which will provide statistically valid conclusions based on a logical, defendable methodology.

Copies of the individual studies and the agency's review of them are contained in a report titled, "Comparison of New Car Assessment Program Crash Test Results With Real-World Crash Data—Summary and Analysis of Existing Studies." The report is available for review in the NHTSA Docket Section, at the following address, under Docket Number 79-17-GR, item number 080. Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street SW., Washington, DC 20590.

DATE: Written comments on this notice must be submitted no later than May 24, 1988.

ADDRESSES: Comments on this notice must refer to the docket and notice numbers set forth above and be submitted (preferably in 10 copies) to the Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street SW., Washington, DC 20590. Submissions containing information for which confidential treatment is requested should be submitted (3 copies) to Chief Counsel, National Highway Traffic Safety Administration, Room 5219, 400 Seventh Street SW., Washington, DC 20590, and 7 additional copies from which the purportedly confidential information has been deleted should be sent to the Docket Section.

FOR FURTHER INFORMATION CONTACT: Charles L. Gauthier, Office of Market Incentives, National Highway Traffic Safety Administration (NRM-22), 400

Seventh Street SW., Washington, DC 20590 (202-366-4805).

SUPPLEMENTARY INFORMATION: Title II of the Motor Vehicle Information and Cost Savings Act requires the development and dissemination of comparative information on the crashworthiness, damage susceptibility, and ease of diagnosis and repair of motor vehicles. The foundation of Title II is the belief that, if consumers have valid comparative information on important motor vehicle characteristics, they will use that information in their vehicle purchasing decisions, thereby encouraging motor vehicle manufacturers to improve the safety and reliability of their products. The experimental NCAP addresses the crashworthiness aspect of Title II by providing comparative frontal crashworthiness safety performance information, in the form of dummy injury measurements, on selected vehicles which are crashed head-on into a fixed barrier at 35 mph.

Since its inception in 1979, NCAP has been not only an important information dissemination tool, but also an important crashworthiness improvement mechanism. Many manufacturers have voluntarily made changes (oftentimes small but significant) to their vehicles in an effort to improve the vehicle's NCAP performance. Additionally, NCAP has been the catalyst for many improvements in crash testing and related test procedures, e.g., instrumentation accuracy and dummy placement. NCAP has made it possible to examine a variety of issues, such as crash test repeatability and instrumentation accuracy through the waveform signal generator, and was the motivation for exploring alternative crash test configurations—frontal deformable moving barrier testing. Although NCAP remains an "experimental" program, it has provided significant benefits to consumers and the agency.

NCAP is termed "experimental" in that it is unclear whether the program will provide a long-term basis for comparing the crashworthiness and safety performance built into new production vehicles. As a result, NCAP is more properly characterized as a program which provides consumers with comparative information on a limited aspect of vehicle crashworthiness—high-speed frontal impacts. And while NCAP has led to vehicle improvements and enhanced consumer information, the agency recognizes the limitations on the data it presents (e.g., comparisons should be made only with comparable weight vehicles, only one car per model tested, etc.) and so informs the public in its news releases.

There are several reasons why NCAP by itself cannot be used as a "ratings" program to compare the crashworthiness of all vehicles in all crash modes. These are the appropriateness of the test configuration (frontal impact, fixed barrier, one test speed); the ability of the test dummies to measure only certain types of injury (e.g., abdominal injuries cannot be replicated with the current test dummies); and the running of only one test per vehicle type (i.e., repeat tests might give slightly different results). Thus, NCAP only measures the performance of vehicles in one type of crash (frontal), at one speed (35 mph barrier equivalent velocity), in terms of reducing certain types of injuries (head, chest, and femurs). It does not attempt to measure performance in other crash configurations or in ameliorating other types of injuries. (Of course, the speed and configuration in which NCAP is conducted represent the single crash situation which causes the most serious injuries and fatalities.) Also of concern is the relationship of test results to real-world accidents, which inherently involves the other concerns to various degrees. The agency believes the real-world relevancy of NCAP is an important question to be resolved. Thus, the agency has undertaken a review of the various studies that have assessed the NCAP/real-world correlation.

From a purely analytical perspective, the agency believes that the real-world crash data necessary to conduct a statistically valid real-world correlation should match the NCAP crash test conditions as closely as possible, including:

- Vehicle model year
- Vehicle make
- Vehicle model/body style
- Impact direction
- Impact speed and/or delta-V
- Occupant protection device (use of belts, automatic belts, or air bags at the driver and passenger seating positions)
- Specific injury data (head, chest, femurs)

However, it is recognized that perfect real-world crash data are not available in sufficient amounts to conduct an ideal correlation. Thus, any study of the relationship between NCAP crash test results and real-world crash data must apply certian assumptions and adjustments to the two data sets in an effort to develop sufficient data that are as similar as possible for legitimate correlation analyses. For example, precise impact speed information is rarely available, and reported use of occupant protection devices is sparse or questionable. In reviewing any study, one of the major issues to be assessed is the reasonableness of the assumptions made by the authors in their efforts to obtain sufficient data for analysis.

Over the past five years, several studies have been conducted which attempt to determine whether a relationship exists between NCAP test results and real-world crash injuries and/or fatalities. The agency is aware of seven studies in this area and these are reviewed in the report, "Comparison of New Car Assessment Program Crash Test Results With Real-World Crash Data—Summary and Analysis of Existing Studies."

The report concludes that each study contains some element in its statistical approach or data compilations which prevents direct comparisons between NCAP crash test results and real-world crash data. The primary issue and the agency has found which affects all of the studies is the lack of an adequate crash data source for drawing comparisons. Such a source should, ideally, include sufficient data on injuries and fatalities for front seat occupants using the available occupant protection devices in high-speed frontal accidents for the various years/makes/models tested in NCAP.

The agency is continuing its efforts to establish a correlation between NCAP crash test results and real-world accidents. With the increase in safety belt usage in the United States as a result of safety belt use laws and the number of vehicles on the road with automatic crash protection systems, the amount of crash data on belted occupants and occupants protected by automatic crash protection should increase substantially over the next few years. The agency is planning further work on the relationship between NCAP and real-world crashes using these data. Any comments on the conduct of such analyses would be welcome.

Interested persons are invited to submit comments. It is requested, but not required, that 10 copies be submitted. A 60-day comment period is provided.

All comments must be limited not to exceed 15 pages in length (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including the purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the address given above, and seven copies, from which the purportedly confidential information has been deleted, should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation (49 CFR Part 512).

All comments received before the close of business on the comment closing date indicated above will be accepted, and will be available for examination in the docket at the above address both before and after that date. The agency will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the public docket should enclose, in the envelope with their comments, a self-addressed stamped postcard. Upon receiving the comments, the docket supervisor will return the postcard by mail.

Issued on March 22, 1988.

Barry Felrice,

Associate Administrator for Rulemaking.

Corrections

Federal Register
Vol. 53, No. 58
Friday, March 25, 1988

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

Handicapped Special Studies Program; Proposed Annual Evaluation Priorities

Correction

In notice document 88-4807 beginning on page 7294 in the issue of Monday, March 7, 1988, make the following corrections:

1. "Existing" should read "exiting" in the following places on page 7294:

a. In the second column, in the "Priority 2" heading, in the second line;

b. In the second column, in the last paragraph, in the fifth line;

c. In the third column, in the sixth line;

d. In the third column, in the first complete paragraph, in the 23rd line.

2. On the same page, in the third column, in the 23rd line after "school", insert a period.

Title 3—

The President

Proclamation 5779 of March 23, 1988

Modifying the Implementation of the Generalized System of Preferences and the Caribbean Basin Economic Recovery Act

By the President of the United States of America

A Proclamation

1. I have determined that, under section 802(b) of the Trade Act of 1974 (the Act) (19 U.S.C. 2492(b)), as amended by the Anti-Drug Abuse Act of 1986 (Pub. L. 99-570, 100 Stat. 3207), during the previous year Panama has not cooperated fully with the United States, and has not taken adequate steps on its own, in preventing narcotic and psychotropic drugs and other controlled substances produced or processed, in whole or in part, in Panama or transported through Panama, from being sold illegally within the jurisdiction of Panama to United States Government personnel or their dependents or from being transported, directly or indirectly, into the United States, and in preventing and punishing the laundering in that country of drug-related profits or drug-related monies.

2. Pursuant to section 802(a) of the Act (19 U.S.C. 2492(a)), I have decided to deny until further notice the preferential tariff treatment under the Generalized System of Preferences (GSP) and the Caribbean Basin Economic Recovery Act (CBERA) now being afforded to articles that are currently eligible for such treatment and that are imported from Panama.

3. Section 604 of the Act (19 U.S.C. 2483) confers authority upon the President to embody in the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202) the relevant provisions of that Act, of other acts affecting import treatment, and of actions taken thereunder.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes of the United States of America, including but not limited to sections 604 and 802 of the Act, do proclaim that:

(1) General headnote 3(e)(v)(A) to the TSUS is modified by striking out "Panama" from the enumeration of independent countries whose products are eligible for benefits under the GSP.

(2) General headnote 3(e)(vii)(A) to the TSUS is modified by striking out "Panama" from the enumeration of designated beneficiary countries whose products are eligible for preferential treatment under the CBERA.

(3) No article the product of Panama and entered, or withdrawn from warehouse for consumption, into the United States on or after the effective date of this Proclamation shall be eligible for preferential tariff treatment under the GSP or under the CBERA.

(4) This Proclamation shall be effective with respect to articles entered, or withdrawn from warehouse for consumption, on or after the fifteenth day following the date of the publication of this Proclamation in the Federal Register.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of March, in the year of our Lord nineteen hundred and eighty-eight, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Presidential Documents

Executive Order 12632 of March 23, 1988

Exclusions From the Federal Labor-Management Relations Program

By virtue of the authority vested in me as President by the Constitution and laws of the United States of America, including Section 7103(b) of Title 5 of the United States Code, and in order to exempt certain agencies or subdivisions thereof from coverage of the Federal Labor-Management Relations Program, it is hereby ordered as follows:

Section 1. *Determinations.* The agencies or subdivisions thereof set forth in Section 3 of this Order are hereby determined to have as a primary function intelligence, counterintelligence, investigative, or national security work. It is also hereby determined that Chapter 71 of Title 5 of the United States Code cannot be applied to these agencies or subdivisions in a manner consistent with national security requirements and considerations. These agencies or subdivisions thereof are hereby excluded from coverage under Chapter 71 of Title 5 of the United States Code.

Sec. 2. *Relationship to Executive Order No. 12559.* The determinations set forth in Section 1 of this Order are the same determinations that I made at the time of and as a predicate to my issuance on May 20, 1986, of Executive Order No. 12559, which was issued for the same purpose as this Order. On July 10, 1987, Executive Order No. 12559 was held by a United States District Court to be incomplete as a matter of form, and therefore invalid, because it did not expressly set forth these determinations. *AFGE* v. *Reagan,* Civil No. 86-1587 (D.D.C.). These determinations were not expressly set forth in the text of Executive Order No. 12559 because all that Order did was amend Executive Order No. 12171 by adding the agencies or subdivisions referred to in Section 1 of this Order to the list in Executive Order No. 12171 of entities excluded from coverage of the Federal Labor-Management Relations Program, and these determinations were already expressly set forth in the text of Executive Order No. 12171, which remains in effect (as amended). This Order is not intended to reflect any belief that the form of Executive Order No. 12559 was invalid, but is intended solely to accomplish the purpose of that Order.

Sec. 3. *Amendment of Executive Order No. 12171.* Executive Order No. 12171 is amended by deleting Section 1-209 and inserting in its place:

Sec. 1-209. *Agencies or subdivisions of the Department of Justice.* (a) The Office of Enforcement and the Office of Intelligence, including all domestic field offices and intelligence units, of the Drug Enforcement Administration.

(b) The Office of Special Operations, the Threat Analysis Group, the Enforcement Operations Division, the Witness Security Division and the Court Security Division in the Office of the Director and the Enforcement Division in Offices of the United States Marshals in the United States Marshals Service.

Ronald Reagan

Briefings on How To Use the Federal Register—
For information on briefings in Washington, DC, and Boston, MA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 15; at 9:00 a.m.
WHERE: Office of the Federal Register,
First Floor Conference Room,
1100 L Street NW., Washington, DC
RESERVATIONS: Carolyn Payne, 202-523-3187

BOSTON, MA

WHEN: April 19; at 9 a.m.
WHERE: Thomas P. O'Neill, Jr. Federal Building,
Auditorium,
10 Causeway Street,
Boston, MA
RESERVATIONS: Call the Boston Federal Information Center, 617-565-8123

Rules and Regulations

Federal Register
Vol. 53, No. 59
Monday, March 28, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1106

Milk in the Southwest Plains Marketing Area; Order Suspending Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules.

SUMMARY: This action for the Southwest Plains market suspends, for the months of March through August 1988, the shipping standards for supply plants and the monthly requirement that a dairy farmer's milk be received at a pool plant in order to be eligible for diversion to nonpool plants. The action was requested by Mid-America Dairymen, Inc., a cooperative association that represents producers who supply milk for the market. The action is necessary to assure the efficient disposition of an increasing supply of milk produced by dairy farmers who have historically supplied the market's fluid milk requirements.

EFFECTIVE DATE: Upon publication of this document in the **Federal Register** for the months of March through August 1988.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 447-2089.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension: Issued February 25, 1988; published March 1, 1988 (53 FR 6158). The Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. Such action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers supplying the market's fluid needs will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing. This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under the criteria contained therein.

This suspension order is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and of the order regulating the handling of milk in the Southwest Plains marketing area.

Notice of proposed rulemaking was published in the **Federal Register** on March 1, 1988 (53 FR 6158). Such notice invited comments on a proposal to suspend certain provisions of the Southwest Plains order. Interested parties were given seven days after the notice was published in the **Federal Register** to file comments on the proposed action. No opposing views were received.

After consideration of all relevant material, including the proposal in the notice and other available information, it is hereby found and determined that for the months of March-August 1988 the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. In § 1106.6, the words "during the month".

2. In § 1106.7(b)(1), the words "until any month of such period in which less than 20 percent of the milk received or diverted as previously specified, is shipped to plants described in paragraph (a) of this section. A plant not meeting such 20 percent requirement in any month of such February-August period shall be qualified in any remaining month of such period only if transfers and diversions pursuant to paragraph (b)(2) of this section to plants described in paragraph (a) of the section are not less than 50 percent of receipts or diversions, as previously specified. A plant that was a pool supply plant under the Neosho Valley, Wichita, Red River Valley or Oklahoma Metropolitan orders (or any combination thereof) during the months of September through December 1982 shall qualify as a pool plant in each of the months of February through August 1983 until any month of such period in which the plant fails to meet the 20 percent shipping requirement".

3. In § 1106.13, paragraph (d)(1) in its entirety.

Statement of Consideration

This action for the Southwest Plains market suspends, for the months of March through August 1988, the shipping standards for supply plants and the monthly requirement that a dairy farmer's milk be received at a pool plant in order to be eligible for diversion to nonpool plants.

The order defines a supply plant as a plant from which fluid milk products are transferred or diverted to distributing plants during the month. It further provides that a supply plant which was pooled under the order during each of the immediately preceding months of September through January shall continue to be pooled during the following months of February through August if 20 percent of the plant's receipts are shipped to distributing plants. The order also provides that a dairy farmer's milk may be diverted to nonpool plants and still be priced under the order if at least one day's production of such person is physically received at a pool plant during the month.

The suspension was requested by Mid-America Dairymen, Inc. (Mid-Am), a cooperative association that supplies a substantial portion of the milk for this market. The action is supported by Kraft, Inc., the operator of a pool supply plant at Bentonville, Arkansas and a nonpool manufacturing plant at Springfield, Missouri.

The action is needed because the market's milk production has increased dramatically since the termination of the whole-herd buyout program. Ample supplies of direct-ship milk, which are produced near the market's distributing plants, are available to supply the milk needs of such plants during the months of March-August this year and supplemental shipments from supply plants will not be necessary. Thus, no purpose would be served by requiring that supply plants make shipments to distributing plants in such months or that the milk of distant dairy farmers be delivered to a pool plant at least once during each month. The milk of producers can be marketed more

988
MI

economically during this six-month period by supplying the needs of distributing plants regularly with direct-ship milk from producers who are favorably located near such plants and by continuously moving the milk of distant producers directly from the farm to manufacturing plants situated in the procurement area.

A suspension of these requirements is needed to give market suppliers the necessary additional flexibility to efficiently handle the market's increasing milk production. If the requirements are not suspended, costly and inefficient movements of milk will have to be made to assure the continued pooling of milk produced by dairy farmers who historically have been supplying the market's fluid needs.

Mid-Am asked that the requirements be suspended for the months of February–August. Although comments were invited on a proposal to suspend the provisions for such seven-month period, it was not possible to complete the required procedures and include February in the suspension period. Therefore, the suspension would apply for the months of March–August 1988.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to assure orderly marketing in the marketing area in that such action will eliminate unnecessary milk movements and will insure that dairy farmers who regularly have supplied the market's fluid needs will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded an opportunity to file written data, views or arguments concerning this suspension. No opposing views were received.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register** for the months of March–August 1988.

List of Subjects in 7 CFR Part 1106

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, That the following provisions in §§ 1106.6, 1106.7(b)(1) and 1106.13(d)(1) are hereby suspended for the months of March–August 1988.

PART 1106—MILK IN SOUTHWEST PLAINS MARKETING AREA

1. The authority citation for 7 CFR Part 1106 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1106.6 [Amended]

2. In § 1106.6, the words "during the month" are suspended.

§ 1106.7 [Amended]

3. In § 1106.7(b)(1), the words "until any month of such period in which less than 20 percent of the milk received or diverted as previously specified, is shipped to plants described in paragraph (a) of this section. A plant not meeting such 20 percent requirement in any month of such February–August period shall be qualified in any remaining month of such period only if transfers and diversions pursuant to paragraph (b)(2) of this section to plants described in paragraph (a) of the section are not less than 50 percent of receipts or diversions, as previously specified. A plant that was a pool supply plant under the Neosho Valley, Wichita, Red River Valley or Oklahoma Metropolitan orders (or any combination thereof) during the months of September through December 1982 shall qualify as a pool plant in each of the months of February through August 1983 until any month of such period in which the plant fails to meet the 20 percent shipping requirement" are suspended.

§ 1106.13 [Amended]

4. In § 1106.13, paragraph (d)(1) is suspended in its entirety.

Signed at Washington, DC, on March 21, 1988.

Kenneth A. Gilles,

Assistant Secretary for Marketing and Inspection Services.

7 CFR Part 1260

Beef Promotion and Research Program; Procedures for Conduct of Referendum

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to adopt as a final rule, with some changes, a proposed rule which was published in the **Federal Register** on January 8, 1988 (53 FR 509). Pursuant to the Beef Promotion and Research Act of 1985, a referendum among cattle producers and cattle and beef importers will be conducted by the Secretary to determine whether the Beef Promotion and Research Order which was implemented July 18, 1986 should be continued. The Act requires the Secretary to conduct such referendum not later than 22 months after the issuance of the Order. This final rule establishes the procedures for conducting the required initial referendum which will be held on May 10, 1988, in all locations except for the State of West Virginia where the referendum will be held on May 9, 1988.

DATE: March 28, 1988.

ADDRESS: Ralph L. Tapp, Chief, Marketing Programs and Procurement Branch, Livestock and Seed Division, Agricultural Marketing Service (AMS), USDA, Room 2610–S, P.O. Box 96456, Washington, DC 20090–6456.

FOR FURTHER INFORMATION CONTACT: Ralph L. Tapp, Chief, Marketing Programs and Procurement Branch (202) 447–2650.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established to implement Executive Order No. 12291 and Departmental Regulation No. 1512–1 and has been classified as a non-major rule under the criteria contained therein.

This action also was reviewed under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* This rule establishes procedures for the conduct of a referendum to determine whether the Beef Promotion and Research Order (Order) should be continued. It permits all eligible cattle producers and importers of cattle, beef, and beef products to register and vote. Participation in the referendun is voluntary. In addition, the referendum is required by statute; therefore, a regulatory flexibility analysis was not prepared. The Administrator of the Agricultural Marketing Service (AMS), has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

The Beef Promotion and Research Act of 1985 (Act) (7 U.S.C. 2901 *et seq.*) provides for the establishment of a coordinated program of promotion and research designed to strengthen the beef industry's position in the marketplace and to maintain and expand domestic and foreign markets and uses for beef and beef products. The program is financed by a $1-per-head assessment on domestic and imported cattle and an equivalent amount on imported beef and beef products. Pursuant to the Act, an Order was made effective July 18, 1986, and the collection of assessments began on October 1, 1986.

The Act requires that a referendum be conducted not later than 22 months after the issuance of the Order to determine whether the Order should be continued. The initial referendum is to be conducted among persons who were producers of cattle or importers of cattle, beef, or beef products during a representative period specified by the Secretary for the purpose of determining whether the initial Order should be continued. The Secretary has established the representative period as October 1, 1986, to March 31, 1988, and announced those dates in an official Department press release dated February 8, 1988. The Order shall be continued only if it is approved by a majority of persons voting in the referendum. If continuation of the Order is not approved by a majority of those persons voting in the referendum, the Secretary shall terminate collection of assessments under the Order. This will be done within 6 months after the Secretary determines that the continuance of the Order is not favored by a majority of those persons voting in the referendum and the Secretary shall terminate the Order in an orderly manner as soon as practicable after such determination.

The Act specifies that the referendum shall be held on a date established by the Secretary and that eligible persons must register and vote on the same day. The Secretary has established that date as May 10, 1988. That date was announced in an official Department press release dated February 8, 1988. The Act also provides that the referendum shall be conducted at county offices of the U.S. Department of Agriculture's Extension Service.

On January 8, 1988, the (Agricultural Marketing Service) AMS published in the **Federal Register** (53 FR 509) a proposed rule which set forth procedures for the conduct of an initial referendum including provisions concerning definitions, supervision of the referendum, registration, voting procedures, reporting the referendum results, disposition of the ballots and records, and the participation of the Agricultural Stabilization and Conservation Service (ASCS) of the Department, in the conduct of the referendum by: (1) Counting ballots, (2) determining the eligibility of challenged voters, and (3) reporting referendum results.

The proposed rule was published with a request for comments to be submitted by February 8, 1988. The Department of Agriculture received 41 written comments. Five commentors, including two cattle producer associations, one breed association, one national farm organization, and one individual supported the referendum procedures as proposed. Twenty-one commentors expressed support for or opposition to the Beef Promotion and Research Order, but did not comment on the proposed procedures for the conduct of the referendum. The remaining 15 commentors, which included 10 individuals, the Cattlemen's Beef Promotion and Research Board, a State department of agriculture, a milk marketing cooperative, an importer association, and a State beef council, generally supported the proposed procedures for the conduct of the referendum with certain qualifications.

The substantive changes suggested by the commentors are discussed below. Several commentors expressed concern about the established date of May 10, 1988, for the referendum. They were primarily concerned that this date was during a very busy time of the year for many cattle producers and pointed out that it would not be convenient for them to take time out from their farming and ranching activities to vote. They believed an earlier date would be more convenient. The date of the referendum was recommended by the Cattlemen's Beef Promotion and Research Board and approved by the Secretary and announced in an official Department press release dated February 8, 1988. However, since that time, information has come to the Department's attention that the county Extension offices in the State of West Virginia will be closed on May 10, 1988. Accordingly, the referendum will be conducted in the State of West Virginia on May 9, 1988. In all other locations, the referendum will be conducted as announced on May 10, 1988. Conducting a referendum requires advanced preparations including printing of ballots, notifying those persons who will conduct the referendum and those who are eligible to vote in sufficient time to permit participation in the referendum process. In addition, the provision for mail-in absentee ballots as required by the Act and contained in this final rule will provide an opportunity for any cattle producer or importer to participate in the referendum even though they may not be able to personally visit the county extension office to register and cast their ballots.

Numerous commentors expressed the opinion that the period for the conduct of the referendum should be longer than 1 day to afford more persons the opportunity to vote. The length of the period for the referendum is established by the Act. Section 7 of the Act which states in part "Any referendum conducted under this section shall be conducted on a date established by the Secretary * * *." Based on this language, it is clear that the Act contemplates that the referendum should be conducted in any given location in a single day. The Act does not provide the Secretary with the latitude to extend the period beyond 1 day. Accordingly, the 1-day period for the conduct of the referendum is adopted as proposed. In related comments, four commentors proposed that the referendum be conducted by mail rather than in person. The commentors suggested that it would be more convenient to register and vote by mail thus increasing voter participation in the referendum. However, the Act clearly contemplates an in-person vote. Section 7 of the Act states that "Each referendum shall be conducted at county extension offices and there shall be provision for an absentee mail ballot on request." If the Act had not contemplated voting in person it would not have provided for a designated polling place or provided for an absentee mail ballot. Absentee ballots and registration forms will be available upon written request from the State Extension Service Office during the period beginning April 1, 1988, and continuing until close of business April 29, 1988. Accordingly, this proposed change has not been adopted.

Three commentors requested a clarification of voter eligibility. One commentor inquired as to whether all members of a partnership could vote in the referendum. One commentor questioned whether a wife in a family farming operation in which all cattle were sold in the husband's name could vote in the husband's absence and suggested that if a wife could vote in such a situation, it could increase producer participation in the referendum.

The Act contemplates that each producer or importer shall be entitled to only one vote, regardless of whether such producer or importer is an individual or a corporation, partnership, or other entity. Section 3 of the Act defines a producer, in part, as "any person who owns or acquires ownership of cattle * * *" and an importer as "any person who imports cattle, beef, or beef products from outside the United States."

A person is defined in the Act as "any individual, group of individuals, partnership, corporation, association, cooperative, or any other entity." As established by these definitions, a partnership is considered to be a producer entity as is an individual producer or importer and thus is entitled to only one vote in the referendum as provided in § 1260.428 of this final rule. Any members of the partnership may vote as an individual if they are eligible producers or importers separate from the partnership. Likewise, other forms of joint interest groups such as a family-farming operation are entitled to only one vote. In the case of the family-farming operation, either spouse or any other family member who is a part of the family-farming operation may vote as an authorized representative on behalf of the family farm. However, both husband and wife may not register to vote on behalf of the family farm. Individual family members who own cattle in their own right separate from the family-farming operation would be individual producers and would be eligible to vote.

One commentor suggested that the definition of importer in § 1260.414 be changed so that it references the definition of importer contained in U.S. Customs regulation at 19 CFR 101.1 (1). The definition of importer as published in the proposed rule in § 1260.414 is the same definition contained in the Act and the Order. That definition has been used to identify persons, who as importers, have been subject to assessments since the issuance of the Order on July 18, 1986. It is the intent of the Act and Order that those persons who are subject to assessments shall be eligible to register and vote in the referendum. Accordingly, there is no justification for changing the definition of importers for purposes of the referendum. The Agency does not anticipate that the definition of importer in the Act, and as adopted in the Order, will raise any questions concerning the eligibility of persons who may vote as importers in the referendum. Therefore, the term importer as set forth in the proposed rule is adopted in this final rule. A similar suggestion of using the U.S. Customs definition of importer was made in response to the proposed Order which was published for comment on March 14, 1986. That suggestion was not adopted at that time. The Agency's reasons for not adopting that suggestion are discussed in the supplementary information section of the Order at 51 FR 26134. Those reasons are still valid.

One commentor believed that all dairy cattle farmers should be allowed to vote. The Act provides that any person who owns or acquires ownership of cattle may register and vote as an eligible producer. Since cattle are defined in the Act as "live, domesticated, bovine animals of any age " dairy animals are considered cattle. Consequently, dairy cattle farmers would be eligible to register and vote.

One commentor recommended that all referendum documents (i.e., registration forms and ballots) which request a person to certify that he or she is a "producer" pursuant to the referendum rules include a statement that that person has met all of the requirements of being a "producer" as set forth in §§ 1260.417 and 1260.116. In the commentor's opinion, it is important to make clear that the definition of "producer" for purposes of the referendum is the same as the definition of "producer" under the Order. The definition of producer in § 1260.417 of these rules on *Procedures for Conduct of the Referendum* is the identical definition contained in § 1260.116 of the Order. This same definition has identified producers for purposes of assessments since the Order's issuance on July 18, 1986. The publication of this same definition in both the Order and in these procedures for conducting the referendum is sufficient for purposes of identifying persons who are eligible producers. The Act and the Order make clear that persons who are defined as producers therein and subject to assessments shall be eligible to register and vote in the referendum. Accordingly, documents used in connection with the registration process will require persons to certify that they are producers. However, including references to §§ 1260.417 and 1260.116 on such documents would unnecessarily complicate the registration and certification process without providing additional control over producer self-certification. The provision for challenging the eligibility of persons to register and vote as producers during and immediately following the referendum will help assure that only eligible producers as defined in the Act, Order, and this rule governing the procedure of the referendum are permitted to vote.

One commentor recommended that the representative period to be established by the Secretary be for a period which ends at least 1 month (30 days) prior to the date of the referendum. The commentor believed that establishing the ending date for the representative period well in advance of the referendum would prevent the creation of "producers" solely for the purpose of voting. The inclusive dates of the representative period are established at the discretion of the Secretary. Concurrent with the establishment of May 10 as the date of the referendum, the Secretary established the representative period as October 1, 1986, the date assessments began under the Order, to March 31, 1988. These inclusive dates for the representative period were published together with the date of the referendum in the previously mentioned official Department press release dated February 8, 1988. The dates of the representative period will be included on documents used in connection with registration and certification. The March 31, 1988, ending date is over 1 month prior to date of the referendum.

Two commentors expressed concern that all counties may not have county extension offices and recommended that a county extension office be opened, and staffed in the county seat of every county on the day of the referendum to assure that all producers have easy access to the designated polling place.

The Act requires that the referendum be conducted at county extension offices. The referendum will be conducted at county extension offices in existence and fully operational at the time of the referendum. Despite the fact that there are some counties which do not have a county extension office within the county, such counties are served by county extension offices in adjacent or neighboring counties. Therefore, persons desiring to vote in the referendum will have a polling place for in-person voting. For those persons who are unable to vote in person there are provisions contained in this final rule for voting by absentee ballot.

In a related comment, it was suggested that persons be allowed to vote in the county extension office nearest their residence. The commentor pointed out that in some instances a person's residence may be closer to a county extension office located in a county other than the person's county of residence and it would be more convenient for the person to vote at the nearest county extension office. While such a provision for in-person voting might be more convenient, the entire referendum process including registration, voting, ballot verification, challenging of voter eligibility, and resolution of challenges for both in-person and absentee voting is based on registering and voting in a person's county of residence. To permit persons to vote at the county extension office nearest their residence would create major recordkeeping problems and impair the Department's ability to conduct the referendum in a manner that will ensure the integrity of the vote. For these reasons this suggestion is not adopted in this final rule.

One commentor suggested that the "normal business hours" of county extension offices referenced in § 1260.429 be defined as the time from which the county extension office opens to the time it closes on a normal daily basis and all hours in-between to ensure that all offices would be open during the lunch hour (12 noon to 1 p.m.). The commentor believes that it is necessary to keep offices open during the lunch hour so that producers may take advantage of the time to travel to the offices and vote. While the Agency believes that this suggestion could serve to facilitate voting, the normal business hours of each county extension office and the staffing of the office are regulated by the county or State Extension Service director. All county extension offices are being encouraged to remain open during the lunch hour on the day of the referendum. Additionally, the hours during which a county extension office will be open on the day of the referendum will be included along with other pertinent information in public notices on the referendum. For the above reason this suggestion is not being adopted.

One commentor recommended that § 1260.432(b) be amended to require that an extra envelope pre-addressed with the appropriate county extension office address be provided for mailing the absentee ballots to the county ES office and suggested amendatory language. The commentor contended that providing pre-addressed envelopes would be beneficial by: (1) Eliminating confusion among absentee voters as to which county extension office to mail the absentee ballot, (2) preventing illegible or mis-addressed envelopes, and (3) facilitating the receipt and processing of absentee ballots by the county extension office personnel. There is merit in this suggestion and it is being adopted with certain modifications. In developing the proposed referendum procedures, the envelope marked "Beef Referendum" was intended to be the outer mailing envelope for the completed ballot. Section 1260.432(b) will be revised to indicate that the envelopes marked "Beef Referendum" shall be pre-addressed with the address of the appropriate county extension office if: (1) The person requesting the absentee ballot provides the State ES office with his or her county of residence or location of its main office, if a corporation or other entity, or (2) such county can otherwise be determined. In a related suggestion, this same commentor also recommended that persons requesting absentee ballots be requested to include in their address the county in which they reside. While individuals and corporations or other entities are encouraged to include the county of their residence or location of their main office, as appropriate, it is unnecessary to require such information by regulation.

One commentor pointed out an inconsistency in the procedures for transmitting to the county ASCS office the completed Absentee Voter Request List prepared by the State ES office and suggested that a technical correction was required. The commentor cited § 1260.436(a) which provides that a copy of the applicable Absentee Voter Request List (Form LS–39–3) prepared by the State ES office shall be provided to each ASCS county for absentee voter verification. Additionally, § 1260.436 requires the county ES agent to deliver the Absentee Voter Request List to the ASCS county office. The commentor is concerned that the proposed rules do not specify that the Absentee Voter Request List will be provided to the county ES agent by the State ES office. Section 1260.436(a) is revised in this final rule to reflect that the State ES office will provide to the county ES agent, a copy of the Absentee Voter Request List.

Two commentors suggested changes in the dates absentee ballots are due in county extension offices. One commentor suggested that the proposed due date of 5 working days before the date of the referendum be changed to a postmarked date of May 3, 1988. The other commentor also suggested that the required date be expanded to include: (1) A postmarked date of at least 8 days in advance of the date of the referendum and received by the date of the referendum, and (2) the date mailed by certified or registered mail but no less than 6 business days prior to the date of the referendum and received by the date of the referendum. Both commentors were concerned that delays in mail over which voters have no control would cause absentee ballots to be delivered after the date on which they were due in the county extension office thus making them invalid. Such concern is understandable. However, it is necessary that absentee ballots be received not later than 5 business days before the date of the referendum so that county ES agents will have sufficient time to properly record the names of absentee voters so that they can be reviewed on the day of the referendum and again on the second business day after the referendum at the ASCS county office for purposes of an eligibility challenge and voter verification. Accordingly, this suggestion is not adopted in this final rule.

One commentor suggested that § 1260.432 be modified to provide eligible producers an opportunity to vote in instances where they did not receive an absentee ballot in a timely manner or were not included on the list of absentee voters. The Procedures for the Conduct of the Referendum as proposed do not prevent a person who requests an absentee ballot, but who does not file it for whatever reason, from casting a ballot in person on the day of the referendum. Likewise, if there is no record of a person's absentee ballot being received by the county ES office, in accordance with applicable sections of this final rule, such person, if otherwise eligible, may vote in person on the day of the referendum. Section 1260.432 provides that each eligible producer or importer who has not voted by means of an absentee ballot may cast a ballot in person. Consequently, it is clear that a person who has requested, but not used an absentee ballot is entitled to vote in person. However, it is not clear that a person who casts an absentee ballot that is not recorded as being received or that is not received in the county extension office by the specified date is entitled to vote in person. Accordingly, that section is being clarified in this final rule.

One commentor raised a question about an inconsistency in § 1260.437 "ASCS County Office Report" and cited two sentences in that section. The commentor pointed out that the first sentence states that the results of the referendum in each county *may* be made available to the public. However, the next sentence states that a copy of the report of the results *shall* be posted for 30 days in the ASCS county office in a conspicuous place accessible to the public.

The intent of this section as proposed was that the referendum results in each county could be released immediately upon completion of the counting of ballots and any required review for the verification for accuracy. Additionally, such results would be posted thereafter for a 30 day period. Accordingly, the applicable sentences in § 1260.437 are revised in this final rule to clarify their intent.

Two comments were received concerning the requirements for reporting of the referendum results in each county by the ASCS county office. Both commentors were concerned that no time period had been specified to ensure the prompt compilation and reporting of referendum results by county offices. It was one commentor's belief that without such specified time periods, there could be market disruptions, numerous compliance problems, and general confusion with the program. That commentor suggested that the results of the referendum in each county be reported by the county ASCS office to the State ASCS office as soon as possible after the ballots have been counted. The other commentor suggested that county ASCS offices be required to report referendum results in each county to the State ASCS office no later than the 11th day following the referendum. The Department acknowledges the importance of timely and accurate reporting of the referendum results and recognizes the potentially disrupting influence which any delay in the reporting of results could have in the marketplace and shares the commentor's concern. It was the Department's intent in setting forth the reporting requirements in §§ 1260.437, 1260.438, and 1260.439 that the results of the referendum in each county would be reported promptly to the State ASCS office by the county ASCS office after the counting of ballots on the 10th business day following the date of the referendum. The Department anticipates that most county ASCS offices will be able to report the referendum results to State ASCS offices by the close of business on the day the ballots are counted. Detailed, written instructions are being provided to all county offices which contain specific reporting requirements and which emphasize the necessity for timely and accurate reporting of results. However, to require absolute time limits in these rules for reporting would impose unreasonable and unduly restrictive limitations on each county's ability to compile, verify, and report accurate results, particularly in view of the magnitude of the reporting process. Over 2900 county ASCS offices will be reporting results to the 50 State ASCS offices, which in turn will compile and report State results to area ASCS offices. Area results will be reported to the ASCS Administrator's office in Washington, DC. For the above stated reason, this suggestion is not being adopted in this final rule.

In order to carry out the statutory timetable for the conduct of the referendum, it is necessary that this final rule be effective on the date of publication in the Federal Register. Accordingly, pursuant to 5 U.S.C. 553, it is hereby found that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register.

List of Subjects in 7 CFR Part 1260

Administrative practice and procedure, Marketing Agreements, Meat and Meat Products, Beef and Beef Products.

For the reasons set forth in the preamble, Title 7 of the CFR, Part 1260 is amended as follows:

PART 1260—BEEF PROMOTION AND RESEARCH

1. The authority citation for 7 CFR Part 1260 continues to read as follows:

Authority: 7 U.S.C. 2901 *et seq.*

2. Subpart C, consisting of §§ 1260.500 through 1260.640 is redesignated as Subpart D.

3. Add new "Subpart C" to read as follows:

Subpart C—Procedure for the Conduct of Referendum

Definitions

Sec.
1260.401 Act.
1260.402 Administrator.
1260.403 Agricultural Stabilization and Conservation County Committee.

Subpart C—Procedure for the Conduct of Referendum

Definitions

§ 1260.401 Act.

"Act" means the Beef Promotion and Research Act of 1985 set forth in Title XVI, Subtitle A of the Food Security Act of 1985 (Pub. L. 99–198) and any amendments thereto.

§ 1260.402 Administrator.

"Administrator" means the Administrator of the Agricultural Marketing Service, or any officer or employee of the Department to whom there has heretofore been delegated or may hereafter be delegated, the authority to act in the Administrator's stead.

§ 1260.403 Agricultural Stabilization and Conservation County Committee.

"Agricultural Stabilization and Conservation County Committee," also referred to as "ASC County Committee" means the group of persons within a county elected to act as the county Agricultural Stabilization and Conservation Committee.

§ 1260.404 Agricultural Stabilization and Conservation Service.

"Agricultural Stabilization and Conservation Service," also referred to as "ASCS" means the Agricultural Stabilization and Conservation Service of the Department.

§ 1260.405 Agricultural Stabilization and Conservation Service County Executive Director.

"Agricultural Stabilization and Conservation Service County Executive Director," also referred to as "ASCS county Executive Director" means the person employed by the ASC county committee to execute the policies of the ASC county committee and be responsible for the day-to-day operation of the ASCS county office, or the person acting in such capacity.

§ 1260.406 Beef.

"Beef" means flesh of cattle.

§ 1260.407 Beef Products.

"Beef Products" means edible products produced in whole or in part from beef, exclusive of milk and products made therefrom.

§ 1260.408 Cattle.

"Cattle" means live domesticated bovine animals regardless of age.

§ 1260.409 Department.

"Department" means the United States Department of Agriculture.

§ 1260.410 Deputy Administrator.

"Deputy Administrator" means the Deputy or Acting Deputy Administrator, State and County Operations, Agriculture Stabilization and Conservation Service, U.S. Department of Agriculture.

§ 1260.411 Extension Service.

"Extension Service" also referred to as "ES" means the Extension Service of the Department.

§ 1260.412 Extension Service Agent.

"Extension Service Agent" also referred to as "ES Agent" or designee means an employee of the Extension Service of the Department.

§ 1260.413 Imported Beef and Beef Products.

"Imported Beef and Beef Products" means products which are imported into the United States which the Secretary determines contain a substantial amount of beef including those products which have been assigned one or more of the following numbers in the Tariff Schedule of the United States: 106.1020, 106.1040, 106.1060, 106.1080, 107.2000, 107.2520, 107.4000, 107.4500, 107.4820, 107.4840, 107.5220, 107.5240, 107.5500, 107.6100, 107.6200, 107.6300.

§ 1260.414 Importer.

"Importer" means any person who imports cattle, beef or beef products from outside the United States.

§ 1260.415 Order.

"Order" means the Beef Promotion and Research Order.

§ 1260.416 Person.

"Person" means any individual, group of individuals, partnership, corporation, association, cooperative, or any other entity.

§ 1260.417 Producer.

"Producer" means any person who owns or acquires ownership of cattle; provided, however, that a person shall not be considered a producer within the meaning of this subpart if (a) the person's only share in the proceeds of a sale of cattle or beef is a sales commission, handling fee, or other service fee; or (b) the person (1) acquired ownership of cattle to facilitate the transfer of ownership of such cattle from the seller to a third party, (2) resold such cattle no later than ten (10) days from the date on which the person acquired ownership, and (3) certified, as required by regulations prescribed by the Board and approved by the Secretary, that the requirements of this provision have been satisfied.

§ 1260.418 Public Notice.

"Public Notice" means information regarding a referendum which shall be provided by the Secretary, without advertising expenses, through press releases and by State and county ES offices and county ASCS offices, by means of newspapers, television, radio, county newsletters, and the like. Such notice shall contain the referendum date, registration and voting requirements, and other pertinent information.

§ 1260.419 Referendum.

"Referendum" means the initial referendum to be conducted pursuant to the Act by the Secretary not later than 22 months after issuance of an Order whereby producers and importers shall be given the opportunity to vote to determine whether the continuance of the Order is favored by a majority of producers and importers voting.

§ 1260.420 Registration period.

"Registration period" means a 1-day period to be announced by the Secretary for registration of producers and importers desiring to vote in a referendum. The registration period shall be the same day as the voting period.

§ 1260.421 Representative period.

"Representative period" means the period designated by the Secretary pursuant to section 7(a) of the Act.

§ 1260.422 Secretary.

"Secretary" means the Secretary of Agriculture of the United States or any other officer or employee of the Department to whom there has heretofore been delegated, or to whom there may hereafter be delegated, the authority to act in the Secretary's stead.

§ 1260.423 State.

"State" means each of the 50 States.

§ 1260.424 United States.

"United States" means the 50 States and the District of Columbia.

§ 1260.425 Voting period.

"Voting period" means a 1-day period to be announced by the Secretary for voting in a referendum.

Referendum

§ 1260.426 General.

(a) A referendum to determine whether eligible producers and importers favor the continuance of the Order shall be conducted in accordance with this subpart.

(b) The Order shall continue only if the Secretary determines that the Order is approved or favored by a majority of the producers and importers casting valid ballots in a referendum.

(c) The referendum shall be conducted at the county offices of the Extension Service of the Department.

(d) The Agricultural Stabilization and Conservation Service of the Departmemt shall assist in the conduct of the referendum.

§ 1260.427 Supervision of referendum.

The Administrator (AMS) shall be responsible for conducting the referendum in accordance with this subpart.

§ 1260.428 Eligibility.

(a) *Eligible Producers.* Each person who was a producer during the representative period is entitled to register and vote in the referendum. Each producer entity shall be entitled to cast only one ballot in the referendum.

(b) *Eligible Importers.* Each person who was an importer during the representative period is entitled to register and vote in the referendum. Each importer entity shall be entitled to cast only one ballot in the referendum.

(c) *Proxy registration and voting.* Proxy registration and voting is not authorized except that an officer or employee of a corporate producer or corporate importer, or any guardian, administrator, executor, or trustee of a producer's or importer's estate, or an authorized representative of any eligible producer entity or eligible importer entity (other than an individual producer or importer), such as a corporation or partnership, may register and cast a ballot on behalf of such entity. Any individual registering to vote in the referendum on behalf of any producer or importer entity shall certify that he or she is authorized by such entity to take such action.

(d) *Joint and group interest.* A group of individuals, such as members of a family, joint tenants, tenants in common, a partnership, owners of community property, or a corporation, engaged in the production of cattle as a producer entity or in the importation of cattle, beef, or beef products into the United States as an importer entity shall be entitled to only one vote; provided, however, that any member of a group may register to vote as a producer or importer if he or she is an eligible producer or importer separate from the group.

VOL 53 ISS 59 MR 28 1988 UMI

§ 1260.429 Time and place of registration and voting.

The referendum shall be held for 1 day on a date to be determined by the Secretary. Eligible persons shall register and vote following the procedures in § 1260.432. Except for absentee ballots, the registration and voting shall take place during the normal business hours of each county ES office.

§ 1260.430 Facilities for registering and voting.

Each county ES office shall provide: (1) Adequate facilities and space to permit producers and importers to register and to mark their ballots in secret and (2) a sealed box or other suitable receptacle for registration forms and ballots which shall be kept under observation during office hours and secured at all times. Copies of the Order shall be available for review.

§ 1260.431 Registration form and ballot.

A registration form/envelope marked "Beef Referendum" (Form LS–40–2) and ballot (Form LS–40) shall be used for voting in person. The information required on the registration form, which is printed on an envelope, includes name, address, phone number, and voter status (producer or importer). The registration form/envelope also contains a certification statement, referenced in § 1260.432(a)(1). The ballot requires producers and importers to check a "yes" or a "no." A similar registration form and ballot (Form LS–39) shall be used for absentee voting.

§ 1260.432 Registration and voting procedure.

(a) *Registering and voting in person.* (1) Each producer and importer desiring to vote in the referendum shall register on the day of voting at the county ES office in which the producer's or importer's residence is located or at the county ES office serving the county in which the producer's or importer's residence is located. Producer or importer entities other than individuals shall register at the county ES office in the county in which their headquarters office or business is located or at the county ES office serving the county in which the entities' headquarters office or business is located. Producers and importers will be required to list their names on the voter registration list (Form LS–40–3) prior to receiving a registration form and ballot. To register, each producer or importer shall complete the registration form/envelope and certify that: (1) They or the entity they represent were producers or importers during the specified representative period and (2) if voting on behalf of an entity referred to in § 1260.428, they are authorized to do so.

(2) Each eligible producer or importer who has not voted by means of an absentee ballot may cast a ballot in person at the location and time set forth in § 1260.429 and on a date to be announced by the Secretary. Eligible persons who enter their names on the voter registration list (Form LS–40–3) will receive a registration form/envelope (Form LS–40–2) and a ballot (Form LS–40). Voting shall be by secret ballot under the supervision of the local county ES agent or designee. The ballot shall be marked by the voter to indicate "yes" or "no." Voters shall place their marked ballots in an envelope marked "Beef Ballot", seal it and place it in the completed and signed registration form/envelope, seal that envelope and personally place it in a box marked "Ballot Box" or other suitable receptacle.

(b) *Absentee voting.* (1) Eligible producers or importers unable to vote in person may request and obtain a combined absentee registration form and absentee ballot (Form LS–39) and two envelopes—one marked "BEEF BALLOT" and the other marked "BEEF REFERENDUM" by mail from the State ES office of the State in which they reside if individuals, or where their main office is located, if a corporation or other entity. To facilitate mailing of absentee ballots the "BEEF REFERENDUM" envelope will be preaddressed with the address of the county ES office in which the person requesting the absentee ballot resides or has its main office, or the county ES office serving the county in which the person requesting the absentee ballot resides or has its main office if: (1) The person requesting the absentee ballot includes in the address his or her county of residence or the county where its main office is located or (2) if such county can be otherwise determined. Only one absentee registration form and absentee ballot will be provided to each eligible producer or importer. Form LS–39 must be requested in writing and will be available from State ES offices during a specified time period which will be announced by the Secretary. The State ES office shall enter on the absentee voter request list (Form LS–39–3) the name and address of each person or entity requesting an absentee ballot, and the date the Form LS–39 was mailed. A copy of the applicable absentee voter request list (Form LS–39–3) prepared by the State ES office shall be provided to the appropriate county ES agent who shall deliver it to each ASCS county office as provided for in § 1260.436 for absentee voter verification.

(2) To register, eligible producers or importers must complete and sign the registration form (Form LS–39), and certify that (1) they or the entity they represent were producers or importers during the specified representative period and (2) if voting on behalf of an entity referred to in § 1260.428, they are authorized to do so.

(3) A producer or importer, after completing the registration form and marking the ballot, shall remove the ballot portion of Form LS–39 and seal the completed ballot in a separate envelope marked "BEEF BALLOT" and place it in a second envelope marked "BEEF REFERENDUM" along with the signed registration form. Producers and importers shall print and sign their names on the envelope marked "BEEF REFERENDUM" and mail it to the local county ES office of the county in which they reside or the county ES office serving the county in which they reside. In the case of a partnership, corporation, estate, or other entity, the registration form and ballot must be mailed to the county ES office in the county in which its main office is located or the county ES office in the county serving the county in which its main office is located.

(4) Absentee ballots must be received in the county ES office by the close of business, 5 business days before the date of the referendum. Absentee ballots received after that date shall be counted as invalid ballots. Upon receiving the "BEEF REFERENDUM" envelope containing the registration form and ballot, the county ES agent or designee shall place it, unopened in a secure ballot box. The county ES agent or designee shall enter the names of absentee voters on the voter registration list (Form LS–40–3).

(5) A person casting an absentee ballot which is not recorded as being received or which is received after the deadline specified in this section may vote in person at the appropriate county ES office on the day of the referendum.

§ 1260.433 List of registered producers and importers.

The voter registration list (Form LS–40–3) shall be available for inspection on the day of the referendum at the county ES office and subsequently at the ASCS county office. It shall be posted during regular office hours in a conspicuous public location at the ASCS county office on the second business day following the date of the referendum.

§ 1260.434 Challenge of eligibility.

(a) *Challenge period.* On the day of the referendum, the names of challenged voters may be reported to the ES county agent who will refer them to the ASCS county office. After that, the names of challenged voters shall be referred directly to the ASCS county office. A challenge of a person's eligibility to vote may be made no later than the close of business on the second business day after the date of the referendum.

(b) *Who may challenge.* A person's eligibility to vote may be challenged by any person.

(c) *Determination of challenges.* The ASC county committee or its representative shall make a determination concerning the eligibility of a producer or importer who has been challenged and notify challenged producers and importers as soon as practicable, but not later than 5 business days after the date of the referendum. If the ASC county committee or its representative is unable to determine whether a person was a producer or importer during the representative period, it may require the person to submit records such as tax returns, sales documents, purchase documents, or other similar documents to prove that the person was a producer or importer during the representative period.

(d) *Challenged ballot.* The registration form/envelopes (Form LS–40–2) containing the ballots cast by producers and importers voting in person whose eligibility is challenged shall be removed from the ballot box and placed in a separate box until the challenge has been resolved. Envelopes containing absentee voter registration forms and absentee ballots (Form LS–39) of challenged absentee voters also shall be removed from the ballot box and placed in the box containing ballots of challenged producers and importers. A challenged ballot shall be determined to have been resolved if the determination of the ASC county committee or its representative is not appealed within the time allowed for appeal or there has been a determination by the ASC county committee after an appeal.

(e) *Appeal.* A person declared to be ineligible to register and vote by the ASC county committee or its representative may file an appeal at the ASCS county office within 3 business days after notification of such decision. Such person may be required to provide documentation such as tax returns, sales documents, or purchase documents in order to demonstrate his or her eligibility. An appeal shall be determined by the ASC county committee as soon as practicable, but in all cases not later than the 9th business day after the date of the referendum. The ASC county committee's determination on an appeal is final.

§ 1260.435 Receiving ballots.

A ballot shall be considered to have been received during the voting period if: (a) It was cast in the county ES office prior to the close of business on the day of the referendum or (b) an absentee ballot was received in the county ES office not later than close of business 5 business days before the date of the referendum.

§ 1260.436 Canvassing ballots.

(a) *Counting the ballots.* The county ES agent or designee shall deliver: (1) The sealed ballot box, (2) the voter registration list (Form LS–40–3) and (3) the absentee voter request list (Form LS–39–3) to the ASCS county office by the close of business on the first business day following the date of the referendum. ASCS county employees and the county ES agent or designee shall check the registration forms of all voters against the voter registration list (Form LS–40–3) and the absentee voter request list (Form LS–39–3) to determine properly registered voters. The ballots of producers or importers voting in person whose names are not on the voter registration list (Form LS–40–3) shall be declared invalid. Likewise, the ballots of producers or importers voting absentee, whose names are not on the absentee voter request list (Form LS–39–3) shall be declared invalid. Ballots declared invalid and all ballots of challenged voters declared ineligible shall be kept separate from the other ballots and the envelopes containing these ballots shall not be opened. The valid ballots shall be counted on the 10th business day after the referendum date. ASCS county office employees shall remove the sealed "BEEF BALLOT" envelopes from the registration form/envelopes or absentee ballot envelopes of all eligible voters and all challenged voters determined to be eligible. When removing the "BEEF BALLOT" envelopes, steps shall be taken to ensure that the voter's name cannot be identified. After removing all "BEEF BALLOT" envelopes, ASCS county employees shall open them and count the ballots. The ballots shall be tabulated as follows: (1) Number of eligible producers and importers casting valid ballots, (2) number of producers and importers favoring the order, (3) number of producers and importers not favoring the order, (4) the number of challenged ballots, (5) the number of challenged ballots deemed ineligible, (6) number of invalid ballots, and (7) the number of spoiled ballots.

(b) *Invalid Ballots.* Ballots shall be declared invalid if a producer or importer voting in person has failed to sign the voter registration list (Form LS–40–3), or an absentee voter's name is not on the absentee voter request list (Form LS–39–3), or the registration form or ballot was incomplete or incorrectly completed.

(c) *Spoiled ballots.* Ballots shall be considered as spoiled ballots when they are mutilated or marked in such a way that it cannot be determined whether it is a "yes" or a "no" vote. Spoiled ballots shall not be considered as approving or disapproving the Order, or as a ballot cast in the referendum.

(d) *Confidentiality.* All ballots shall be confidential and the contents of the ballots shall not be divulged except as the Secretary may direct. The public may witness the opening of the ballot box and tabulation of the votes but may not interfere with the process.

§ 1260.437 ASCS county office report.

The ASCS county office shall notify the ASCS State office of the results of the referendum. Each ASCS county office shall transmit the results of the referendum in its county to the ASCS State office. Such report shall include the information listed in § 1260.436(a). The results of the referendum in each county may be made available to the public immediately after the ballots have been counted and any verification for accuracy has been completed. A copy of the report of those results shall be posted for 30 days in the ASCS county office in a conspicuous place accessible to the public, and a copy shall be kept on file in the ASCS county office for a period of at least 12 months.

§ 1260.438 ASCS State office report.

Each ASCS State office shall transmit to the Deputy Administrator, ASCS, a written summary of the results of the referendum received from all the ASCS county offices within the State. The summary shall include the information on the referendum results contained in the reports from all county offices within each State and be certified by the ASCS State executive director. The ASCS State office shall maintain a copy of the summary where it shall be available for public inspection for a period of not less than 12 months.

§ 1260.439 Results of the referendum.

(a) The Deputy Administrator, ASCS, shall submit to the Administrator, AMS, the results of the referendum. The Administrator shall prepare and submit

OL

ISS
59
MR
28
988
MI

to the Secretary a report of the results of the referendum. The results of the referendun shall be issued by the Department in an official press release and published in the Federal Register. State reports, and related papers shall be available for public inspection in the office of the Marketing Programs and Procurement Branch, Livestock and Seed Division, Agricultural Marketing Service, USDA, Room 2610 South Agriculture Building, 14th and Independence Avenue, SW., Washington, DC.

(b) If the Secretary deems it necessary, the report of any State or county shall be re-examined and checked by such persons that may be designated by the Deputy Administrator, ASCS, or the Secretary.

§ 1260.440 Disposition of ballots and records.

Each ASCS county executive director shall place in sealed containers marked with the identification of the referendum, the voter registration list, absentee voter request list, voted ballots, challenged registration forms/envelopes, challenged absentee voter registration forms, challenged ballots found to be ineligible, invalid ballots, spoiled ballots, and county summaries. Such records shall be placed under lock in a safe place under the custody of the ASCS county executive director for a period of not less than 12 months after the referendum. If no notice to the contrary is received from the Deputy Administrator, ASCS, by the end of such time, the records shall be destroyed.

§ 1260.441 Instructions and forms.

The Administrator is hereby authorized to prescribe additional instructions and forms not inconsistent with the provisions of this subpart to govern the conduct of the referendum.

Done at Washington, DC, on March 22, 1988.

William T. Manley,

Deputy Administrator, Marketing Programs.

[FR Doc. 88-6556 Filed 3-25-88; 8:45 am]

BILLING CODE 3410-05-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 245a

[INS Number: 1052-88]

Definitions of Felony and Misdemeanor

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This final rule defines the terms "felony" and "misdemeanor" that are set forth at 8 CFR 245a.1(o) and 8 CFR 245a.1(p), respectively. The purpose of this rule is to alleviate the harsh effect that the prior definition had on certain otherwise eligible aliens who apply for temporary resident status under section 245A of the Immigration and Nationality Act.

EFFECTIVE DATE: March 28, 1988.

FOR FURTHER INFORMATION CONTACT: Lori Scialabba, 202-633-2895, 425 I Street., NW., Room 7048, Washington, DC 20536.

SUPPLEMENTARY INFORMATION: The Immigration Reform and Control Act of 1986 (IRCA) established a program whereby certain aliens who have been residing unlawfully in the United States since January 1, 1982, can legalize their status. IRCA set forth a number of statutory criteria that an alien has to meet in order to legalize his or her status. One of these criteria is that the alien must establish that he or she "has not been convicted of any felony or of three or more misdemeanors committed in the United States." (8 U.S.C. 1255a(a)(4)(B)). After a notice and comment period the Immigration and Naturalization Service (Service) promulgated final regulations implementing the legalization program and defining the terms "felony" and "misdemeanor." (See 52 FR 16205–16216 (May 1, 1987)).

The term "felony" was defined as "a crime committed in the United States, punishable by imprisonment for a term of more than one year, regardless of the term such alien actually served, if any." (8 CFR 245a.1(p)). The term "misdemeanor" was defined as "a crime committed in the United States punishable by imprisonment for a term of one year or less but more than five days, regardless of the term such alien actually served, if any." (8 CFR 245a.1(o)).

Since May 5, 1987, aliens have been applying for temporary resident status under the legalization program. During this time the Service has had an opportunity to review the effect of the regulations implementing this provision. Based on that review the Service proposed, on September 30, 1987, 52 FR 36582, that the definitions of "felony" and "misdemeanor" be amended. INS Legalization Offices and the Regional Processing Facilities were informed of the proposed change and instructed to hold the final adjudication of applications that would be affected by the proposed change to the regulations.

Comments on the proposed change were received and are discussed below. Several suggestions from commenters have been incorporated into the final rule.

Comments

Some commenters suggested that the "sentence actually imposed" should determine whether the conviction is to be treated as a "misdemeanor" or "felony" for purposes of legalization. One commenter suggested that the definitions of "misdemeanor" and "felony" follow the guidelines in section 212(a)(9) of the Immigration and Nationality Act ("INA"), in order to address the problem of varying maximum sentences among the states for identical crimes.

The Service has considered and rejected this suggestion based upon the legislative history relating to section 245a(a)(4)(B) of IRCA which provided the definitions of "felony" and "misdemeanor" which were published in the May 1, 1987 regulations, 52 FR 16205. The Senate report on S.1200, dated August 28, 1985 clearly indicates that Congress did not want the Service to consider the term actually served when determining whether an applicant had been convicted of a "felony" or "misdemeanor."

> * * * He must show * * *; that he has not been convicted of any felony (crime punishable at the time of conviction by imprisonment for a term of more than 1 year, regardless of the term such alien actually served, if any) or three or more misdemeanors (crimes each of which was punishable at the time of conviction by imprisonment for a term of 1 year or less, regardless of the term such alien actually served, if any) * * *.

S. Rept. No. 132, 99th Cong., 1st Sess. at 45–46 (1985). The definitions contained in the regulation reflect the intent of Congress. For this reason the Service has rejected the suggestion. However, the term "sentence imposed" which is used in the exception contained in the proposed "felony" definition will be amended to read "sentence actually imposed."

The Service is concerned that certain States' criminal statutes have maximum terms of imprisonment for more than one year, while other States have a maximum term of imprisonment for less than one year for the same offenses. This discrepancy is particularly unfair for purposes of determining whether a crime is a felony, since one felony will render an applicant ineligible for legalization. The regulation proposed on September 30, 1987, which provided an exception to the "felony" definition, was

the Service's response to the effect the May 1, 1987 regulations were having on legalization applicants.

Several commenters also suggested that the exception contained in the definition of felony be amended to read "sentence served" rather than "sentence imposed." The commenters suggested this change because the term "sentence imposed" is difficult to interpret, particularly when a defendant is granted probation. The Service has rejected this suggestion, since it is also contrary to legislative intent. However, the following discussion addresses the issues raised by these commenters.

"Sentence Actually Imposed"

Under U.S. law, courts may do the following regarding sentencing persons convicted of crimes: The court may (1) impose a sentence, or (2) suspend imposition of the sentence. If the court imposes a sentence, it may suspend execution of that sentence.

It is the Service's position that when imposition of the sentence is suspended, no sentence has been actually imposed. When a sentencing court issues such an order, the defendant is generally placed on probation. In this situation the alien will not have had a sentence of more than one year actually imposed. Therefore, assuming the offense is defined as a misdemeanor by the state, the offense would be a misdemeanor for purposes of legalization eligibility. However, if the crime renders the alien excludable under 212(a) (9), (10) or (23) of the INA, the classification of the crime as a "misdemeanor" or "felony" will be irrelevant.

In a case where the execution of the sentence is suspended, a sentence has actually been imposed, even though probation may also be granted. In this situation, the sentence that was suspended would have to be one year or less for the crime to be considered "misdemeanor" under the felony exception.

The reason for this distinction is that when imposition of the sentence is suspended, the trial court may, on revocation of probation, impose any sentence it might originally have imposed. However, if the sentence is imposed and its execution is suspended, the sentence may not be increased when probation is revoked.

Another aspect of this issue is whether probation itself is a "sentence." There may be instances in which probation is the actual sentence imposed, rather than the court suspending the imposition of the sentence or suspending the execution of the sentence. The Circuit Courts are split on this point. However, for purposes of interpreting the term "sentence actually imposed" in the felony exception, the Service will not consider probation to be a sentence. Therefore, an alien who is sentenced to probation, as opposed to having the execution of the sentence suspended and being granted a period of probation, will not have been sentenced to more than one year and may qualify for legalization under the felony exception.

Comments: "Felony" Definition

One commenter pointed out that the exception to the proposed "felony" definition is inconsistent with the proposed definition of "misdemeanor." The exception to the proposed "felony" definition provided that any offense that carried a possible sentence of more than one year would not be considered a felony for purposes of legalization if the state defined the offense as a misdemeanor and the sentence imposed was less than one year. This exception is inconsistent with the proposed definition of "misdemeanor," which provided that any crime punishable by imprisonment for a term of one year or less but more than five days, regardless of the term such alien actually served, if any, is a misdemeanor for purposes of legalization. The commenter suggested that the exception to the "felony" definition be worded the same as the definition for "misdemeanor." The Service has accepted this suggestion in part.

The exception to the "felony" definition in the proposed rule provided that the sentence imposed must be less than one year. The exception to the "felony" definition has been amended to provide that the crime committed shall be considered a misdemeanor if the state defines the offense as a misdemeanor and the sentence actually imposed is one year or less. This change clarifies that the exception includes a sentence of one year.

The exception to the "felony" definition will not, however, include the language in the proposed "misdemeanor" definition that relates to the five-day petty offense provision. The purpose of the felony exception is to alleviate the harsh effect of the "felony" definition on the eligibility of an alien for legalization. The inclusion of the five-day petty offense provision in the felony exception would allow an applicant, who has been convicted of a crime punishable by a term of imprisonment of more than one year, a "felony," to have that conviction reduced to a petty offense. For this reason the exception to the felony definition will not include the five-day petty offense provision contained in the proposed "misdemeanor" definition.

Comments: "Misdemeanor" Definition

The Service received no comments directly related to the proposed "misdemeanor" definition. However, it was apparent from the comments received that the proposed "misdemeanor" definition did not clearly indicate the policy of the Service with regard to the five-day petty offense provision. The policy of the Service is that any crime which carries a maximum sentence of five days will not be considered a misdemeanor for purposes of legalization. In order to clarify this policy the "misdemeanor" definition has been amended.

Conclusion

Accordingly, consistent with the spirit of the legalization program, the Service is amending the definition of "felony" by creating an exception to the definition when the offense is defined by the state as a misdemeanor and the sentence actually imposed is one year or less. The definition of "misdemeanor" is amended to include any crime which meets the requirements of the exception under the "felony" definition and to clarify the five-day petty offense exception.

In accordance with 5 U.S.C. 605(b), the Commissioner of the Immigration and Naturalization Service certifies that this rule would not, if promulgated, have a significant impact on a substantial number of small entities.

This rule is not a major rule within the meaning of section 1(b) of E.O. 12291.

List of Subjects in 8 CFR Part 245a

Aliens, Temporary resident status and permanent resident status.

PART 245a—[AMENDED]

1. The authority citation for Part 245a continues to read as follows:

Authority: Pub. L. 99-603, 100 Stat. 3359; 8 U.S.C. 1101 note.

2. In § 245a.1, paragraphs (o) and (p) are revised to read as follows:

§ 245a.1 Definitions.

* * * * *

(o) "Misdemeanor" means a crime committed in the United States, either (1) punishable by imprisonment for a term of one year or less, regardless of the term such alien actually served, if any, or (2) a crime treated as a misdemeanor under 8 CFR 245a.1(p). For purposes of this definition, any crime punishable by imprisonment for a maximum term of five days or less shall not be considered a misdemeanor.

(p) "Felony" means a crime committed in the United States, punishable by imprisonment for a term of more than one year, regardless of the term such alien actually served, if any, except: When the offense is defined by the State as a misdemeanor and the sentence actually imposed is one year or less regardless of the term such alien actually served. Under this exception, for purposes of 8 CFR Part 245a, the crime shall be treated as a misdemeanor.

Dated: March 17, 1988.

Mark W. Everson,

Deputy Commissioner, INS.

BILLING CODE 4410-10-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87-NM-149-AD; Amdt. 39-5884]

Airworthiness Directives; Boeing Model 737-300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Model 737-300 series airplanes, which requires modification of the escape slide, packing method, and installation on the forward doors. This amendment is prompted by reports of slide girt material interfering with the girt bar stowage brackets during door opening, arresting the door opening motion. This condition, if not corrected, could cause delay during an emergency evacuation.

EFFECTIVE DATE: May 9, 1988.

ADDRESSES: The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124; and from Air Cruisers Company, P.O. Box 180, Belmar, New Jersey 07719. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Jeff Gardlin, Airframe Branch, ANM-120S; telephone (206) 431-1932. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive which requires modification of the forward escape slides and containers of certain Model 737-300 series airplanes, was published in the **Federal Register** on December 14, 1987 (52 FR 47399).

In the preamble to the Notice of Proposed Rulemaking (NPRM), it was stated that The Boeing Company was developing a service bulletin which would contain specific instructions for the accomplishment of the proposed modifications. The FAA has now reviewed and approved Boeing Alert Service Bulletin 737-25A1221, dated December 17, 1987, which references Air Cruisers Service Bulletin 103-25-11, and contains instructions for installing the required modifications. Paragraph A. of the final rule has been revised to reflect this particular modification as an acceptable means of compliance.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the two comments received.

One commenter directed its comments at the content of Boeing Alert Service Bulletin 737-25A1221. The commenter questioned the effectiveness of the modification described in that service bulletin as a remedy for the problem and proposed a different modification. The operator also objected to the use of a placard (depicting the proper stowed configuration of the girt) described in the Boeing service bulletin, believing this will require inspection by the flight crew prior to each flight. While there may be other modifications which would effectively correct the girt retention problem, and which, therefore, may be used in accordance with paragraph B. of the AD, the FAA finds that Boeing Alert Service Bulletin 737-25A1221 describes a satisfactory modification. With respect to operational impact of the modification, it is not intended that flight crewmembers be required to maintain the escape slide in its modified configuration. The service bulletin does describe provisions for a placard that is visible to crewmembers; however, the placard illustrates the proper configuration should the slide be inadvertently altered.

The second commenter noted that the proposed modifications might require more manhours than stated in the NPRM, and requested an extension of the compliance time from 6 months to 15 months to allow the work to be done at more convenient "C" check intervals. The FAA agrees that more manhours would be required to accomplish the modification in accordance with Boeing Alert Service Bulletin 737-25A1221. Accordingly, the estimated economic impact, as discussed below, has been revised to reflect an increase from 4 manhours to 9 manhours per airplane to accomplish the required actions.

With respect to the compliance time, the FAA has determined that a 6-month compliance time is appropriate for accomplishing this modification. Parts are readily available and the required modifications allow flexibility in how they are accomplished. Spares can be rotated into the fleet to avoid down time. Therefore, the compliance time remains at 6 months, as proposed.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the following rule.

It is estimated that 175 airplanes of U.S. registry will be affected by this AD, that it will take approximately 9 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. The cost of parts is estimated to be $76 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $76,300.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities, because few, if any, Model 737-300 series airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Boeing: Applies to all Model 737-300 series airplanes, as listed in Boeing Alert Service Bulletin 737-25A1221, dated December 17, 1987, certificated in any category. Compliance required within 6 months after the effective date of this amendment, unless previously accomplished.

To prevent failure or interference of opening of the forward doors during an emergency evacuation, accomplish the following:

A. Modify escape slide packing and slide containers in accordance with Boeing Alert Service Bulletin 737-25A1221, dated December 17, 1987, or later FAA-approved revision.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124; and Air Cruisers Company, P.O. Box 180, Belmar, New Jersey 07719. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective May 9, 1988.

Issued in Seattle, Washington, on March 21, 1988.

Wayne J. Barlow,

Director, Northwest Mountain Region.

[FR Doc. 88-6823 Filed 3-25-88; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 87-ASW-42; Amdt. 39-5875]

Airworthiness Directives; Robinson Helicopter Model R22 Series Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the **Federal Register** and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective as to all known U.S. owners and operators of Robinson Model R22 series helicopters, certificated in any category, by individual priority letters. The AD requires visual inspection and checks to determine if cracks are present in components of each main rotor pitch link assembly with immediate replacement of any component found to contain a crack. Additionally, the AD requires replacement of a particular pitch link component within 10 hours' time in service, regardless of condition. The AD is needed to prevent loss of control of the helicopter.

DATES: *Effective Date:* April 25, 1988, as to all persons except those persons to whom it was made immediately effective by priority letter AD 87-18-03, issued August 28, 1987, which contained this amendment.

Compliance: As stated in the body of the AD.

ADDRESSES: The applicable Service Bulletin No. 57 and the maintenance manual information may be obtained from Robinson Helicopter Company, 24747 Crenshaw Boulevard, Torrance, California 90505. A copy of this Service Bulletin is contained in the Rules Docket at the Office of Regional Counsel, Federal Aviation Administration, Southwest Region, Fort Worth, Texas, 76193-0007.

FOR FURTHER INFORMATION CONTACT: Charles W. Matheis, Airframe Section, ANM-172W, FAA, Northwest Mountain Region, Western Aircraft Certification Office, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009-2007; telephone (213) 297-1358.

SUPPLEMENTARY INFORMATION: On August 28, 1987, priority letter AD No. 87-18-03 was issued and made effective immediately to all known U.S. owners and operators of certain Robinson Model R22 series helicopters. The AD requires inspection and checks of components of the main rotor pitch link assembly to determine if cracks are present and immediate replacement of any component found to contain a crack. The AD was prompted by a report of the discovery of cracks or material flaws in bar stock from a metal heat from which the components were manufactured. Failure of the pitch link assembly could lead to loss of control and subsequent loss of the helicopter.

Since it was found that immediate corrective action was required, it was determined that notice and public procedure thereon were impracticable and contrary to public interest, and good cause existed to make the AD effective immediately by individual priority letters issued August 28, 1987, to all known U.S. owners and operators of Robinson Model R22 series helicopters. These conditions still exist, and the AD is hereby published in the **Federal Register**, with minor editorial changes in paragraphs (a), (a)(1), (a)(4) and its note, and (a)(4) (i) and (v), as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

BEST COPY AVAILABLE

Robinson Helicopter Company: Applies to Model R22 series helicopters, certificated in any category, Serial Numbers 0680 through 0644, and helicopters which have had the A258–1 main rotor pitch link assembly, A258–2 fitting, A258–3 link, or A258–4 link assembly replaced between August 15, 1986, and May 7, 1987.

Compliance is required as indicated, unless already accomplished.

(a) Prior to further flight after the effective date of this AD, visually inspect main rotor pitch link assembly A258–1 (two per aircraft) as follows:

(1) Remove paint and visually inspect the A258–1 pitch link assembly using a 3X or greater magnifying glass.

(2) If a crack is found in the A258–2 upper fitting, replace it with a like serviceable part, prior to further flight.

(3) If a crack is found in the A258–3 lower link, replace the A258–1 pitch link assembly with a like serviceable part, prior to further flight.

Note: The A258–3 lower link and the B163–1 rod end make up the lower end A258–4 link assembly, as shown in Figure 2 of Robinson Helicopter Company Service Bulletin No. 57, dated May 11, 1987.

(4) Replace the A258–2 upper fitting in the pitch link assembly using the following steps:

Note: Reference the procedure given in Part B of Robinson Helicopter Company, Service Bulletin No. 57, dated May 11, 1987.

(i) Color code swashplate arms, pitch horns, and both pitch control link rod ends. If matching color marks are lost or length of pitch link assembly changes, track and balance the main rotor blades per Section 10.280, Track and Balance, dated May 22, 1987, of Robinson Helicopter Company maintenance manual or an approved equivalent.

(ii) Remove pitch links and measure overall length using a caliper or large micrometer. Record length to nearest 0.001 inch.

(iii) Disassemble pitch link. Do not remove rod end attached to A258–3 link assembly. Replace A258–2 fitting with like serviceable part.

(iv) Reassemble pitch link(s), keeping overall length to within ±0.005 of length measured before disassembly.

(v) Install on helicopter and torque attaching bolts to 160 inch-lbs., plus nut drag per Section 8.412, Swashplate Installation, dated May 22, 1987, of Robinson Helicopter Company maintenance manual or an approved equivalent.

(vi) Touch up paint using an epoxy primer and grey exterior paint. Mark all joints with a torque stripe.

(b) If no cracks are found in a link assembly, upper fitting or lower link, after visual inspection in paragraph (a)(1), the helicopter may be returned to service for an interval of time not to exceed 10 hours' time in service.

(c) Prior to each flight during the time interval specified in paragraph (b), visually check for cracks in the link assembly. The checks required by this AD may be performed by the pilot and must be recorded in accordance with FAR Section 43.9.

(d) Within the next 10 hours' time in service after receipt of this AD, remove and replace A258–2 fittings with serviceable parts. Conduct a dye penetrant or equivalent inspection for crack indications in the A258–3 link. Install airworthy parts in accordance with paragraph (a)(4).

(e) Replacement of all A258–2 fittings specified in this AD with serviceable fittings and inspection of the A258–3 links terminate action for the repetitive checks required by this AD.

(f) An alternate method of compliance with this AD, which provides an equivalent level of safety, may be used when approved by the Manager, Western Aircraft Certification Office, FAA, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009-2007.

This amendment becomes effective on April 25, 1988, as to all persons except those persons to whom it was made immediately effective by priority letter AD 87–18–03, issued August 28, 1987, which contained this amendment.

Issued in Fort Worth, Texas, on March 3, 1988.

Don P. Watson,

Acting Director, Southwest Region.

[FR Doc. 88–6622 Filed 3–25–88; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 87–ANE–46; Amdt. 39–5862]

Airworthiness Directives; Teledyne Continental Motors IO–520BA, BB, IO–550B, and TSIO–520BE, LB, UB, and WB Series Engines Equipped With Air Conditioners

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the Federal Register and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective as to all known U.S. owners and operators of certain Teledyne Continental Motors IO–520BA, BB, IO–550B, and TSIO–520BE, LB, UB, and WB series engines by individual priority letter. The AD requires the removal of the air conditioner compressor drive belt on those engine installations so equipped. The AD is needed to prevent possible starter adapter shaftgear assembly failure which could result in loss of lubricating oil and complete loss of engine power.

DATES: Effective April 17, 1988, as to all persons except those to whom it was made immediately effective by individual priority letter AD 87–26–01, issued December 16, 1987, which contained this amendment.

Compliance is required before further flight, unless already accomplished.

ADDRESSES: The applicable Service Bulletin may be obtained from Teledyne Continental Motors, P.O. Box 90, Mobile, Alabama 36601. A copy of the Service Bulletin is contained in the Rules Docket Number 87–ANE–46, Office of the Regional Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and may be examined between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jerry Robinette, Aerospace Engineer, Propulsion Branch, ACE–140A, Atlanta Aircraft Certification Office, Federal Aviation Administration, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia 30349; telephone (404) 991–3810.

SUPPLEMENTARY INFORMATION: On December 16, 1987, priority letter AD 87–26–01, was issued and made effective immediately as to all known U.S. owners and operators of certain Teledyne Continental Motors IO–520, IO–550, and TSIO–520 series engines. The AD requires the removal of the air conditioner compressor drive belt on those engine installations so equipped. There have been four failures of the starter adapter shaftgear resulting in forced landings. The shaftgear failures are partially due to loads imposed by the air conditioner drive belt. AD action was necessary to prevent possible starter adapter shaftgear assembly failure with resultant loss of lubrication oil and complete loss of engine power.

Since it was found that immediate corrective action was required, notice and public procedure thereon were impracticable and contrary to public interest, and good cause existed to make the AD effective immediately by individual priority letter, issued December 16, 1987, as to all known U.S. owners and operators of certain Teledyne Continental Motors IO–520, IO–550, and TSIO–520 series engines. These conditions still exist, and the AD is hereby published in the Federal Register as an amendment to Section 39.13 of Part 39 of the Federal Aviation Regulations to make it effective as to all persons.

Conclusion

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11304; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT".

List of Subjects in 14 CFR Part 39

Engines, Air transportation, Aircraft, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding to § 39.13 the following new airworthiness directive (AD):

Teledyne Continental Motors (TCM): Applies to IO–520BA, BB, IO–550B, and TSIO–520BE, LB, UB, and WB series engines equipped with an air conditioner.

Compliance is required before further flight, unless already accomplished.

To prevent possible starter adapter shaftgear assembly failure, accomplish the following:

(a) Remove the top engine cowl and gain access to the air conditioner (freon compressor) drive pulley.

(b) With a light and mirror, determine if the sheave attach nut is a steel locking type. (Reference paragraph II of TCM Service Bulletin (SB) M87–24, dated December 15, 1987.)

(1) If the nut is a steel locking type, remove the freon compressor drive belt.

(2) If the nut is castellated, determine via log books and maintenance records that the castellated nut is the original nut and has not been substituted for a steel locking type nut.

(i) If the castellated nut is the original, no further action is required, proceed to paragraph (c).

(ii) If the castellated nut is not the original, but a substitution for the original installed steel locking type nut, remove the freon compressor drive belt.

(iii) If it cannot be determined that the castellated nut is the original, remove the freon compressor drive belt.

(c) Replace top engine cowl.

(d) Make appropriate log book entry showing compliance with this AD.

(e) Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Atlanta Aircraft Certification Office, Federal Aviation Administration, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia 30349.

Notes: 1. This action is an interim measure. Additional instructions to restore use of the air conditioner will be promulgated as soon as possible.

2. TCM SB No. M87–24, dated December 15, 1987, refers to this subject.

3. Compliance with this AD is required independently of those requirements of AD 87–14–02, (52 FR 36755; October 1, 1987).

This amendment becomes effective April 17, 1988, as to all persons except those persons to whom it was made immediately effective by priority letter AD, issued December 16, 1987, which contained this amendment.

Issued in Burlington, Massachusetts, on March 17, 1988.

Jack A. Sain,

Acting Director, New England Region.

14 CFR Part 71

[Airspace Docket No. 87–ASO–13]

Designation of Transition Area, Jackson, KY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: This action amends the description of the transition area centered on the Julian Carroll Airport by correcting the geographical coordinates. This is a typographical correction.

EFFECTIVE DATE: 0901 UTC, April 6, 1988.

FOR FURTHER INFORMATION CONTACT: Earnest Joyce, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763–7646.

SUPPLEMENTARY INFORMATION:

History

On Thursday, January 21, 1988, the FAA adopted an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by designating the Jackson, Kentucky, transition area (53 FR 1614). Inadvertently, there was a typographical error made in the description of the transition area. The final rule provides controlled airspace for aircraft executing a new instrument approach procedure to Julian Carroll Airport. The operating status of the airport was changed to IFR. Interested parties were invited to participate in this rulemaking proceeding (52 FR 44138) by submitting written comments on the proposal to the FAA. This amendment conforms the final rule to that contained in the notice. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6C dated January 2, 1987.

The Rule

This correction to the amendment to Part 71 of the Federal Aviation Regulations correctly designates the Jackson, Kentucky, transition area and lowers the base of controlled airspace in the vicinity of Julian Carroll Airport from 1200′ to 700′ above the surface.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. In consideration of the safety need to lower the base of controlled airspace, I find that good cause exists for making this rule effective in less than 30 days in order to promote the safe and efficient handling of air traffic in that area.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. Section 71.171 is amended as follows:

Jackson, Kentucky (New)

That airspace extending upward from 700′ above the surface within a 6.5 mile radius of the Julian Carroll Airport (Lat. 37°35′19″N., Long. 83°19′03″W.); within 2.5 miles either side of the 348° radial from Hazard VOR (Lat. 37°23′23″N., Long. 83°15′59″W.), extending from the 6.5 mile radius to 7.5 miles south of the airport.

Issued in East Point, Georgia, on March 8, 1988.

William D. Wood,

Acting Manager, Air Traffic Division, Southern Region.

14 CFR Parts 71 and 75

[Airspace Docket No. 87-AGL-26]

Alteration of VOR Federal Airways and Jet Routes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: These amendments alter the descriptions of Federal Airway V-181 and Jet Routes J-107, J-515 and J-532 by changing the name Pembina, ND, to Humboldt, MN. Also, the name of the Pembina, ND, High and Low Altitude Compulsory Reporting Points have been changed to Humboldt, MN. These actions are the result of the name change of the Pembina VORTAC to Humboldt and an error in the state location of the VORTAC.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-9250.

The Rule

These amendments to Parts 71 and 75 of the Federal Aviation Regulations amend the descriptions of VOR Federal Airway V-181 and Jet Routes J-107, J-515 and J-532 by changing the name Pembina to Humboldt wherever the name appears in the descriptions. In addition, the name of the High and Low Altitude Compulsory Reporting Points have been changed from Pembina, ND, to Humboldt, MN. Because this only involves a name change, I find that notice and public procedure under 5 U.S.C. 533(b) are unnecessary because these actions are minor technical amendments in which the public would not be particularly interested. Sections 71.123, 71.203, 71.207 and 75.100 of Parts 71 and 75 of the Federal Aviation Regulations were republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Parts 71 and 75

Aviation safety, VOR Federal airways, Compulsory reporting points and jet routes.

Adoption of the Amendments

Accordingly, pursuant to the authority delegated to me, Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) are amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.123 [Amended]

2. Section 71.123 is amended as follows:

V-181 [Amended]

By removing the words "Pembina, ND; INT Pembina 356° radial" and substituting the words "Humboldt, MN; INT Humboldt 356° radial"

§ 71.203 [Amended]

3. Section 71.203 is amended as follows:

Pembina, ND [Removed]

Humboldt, MN [New]

§ 71.207 [Amended]

4. Section 71.207 is amended as follows:

Pembina, ND [Removed]

Humboldt, MN [New]

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

5. The authority citation for Part 75 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 75.100 [Amended]

6. Section 75.100 is amended as follows:

J-107, J-515 and J-532 [Amended]

Wherever the words "Pembina, ND" appear substitute the words "Humboldt, MN"

Wherever the word "Pembina" appears substitute the word "Humboldt"

Issued in Washington, DC, on March 10, 1988.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

[Docket No. R-88-796]

Fair Housing Assistance Program; Program Description and Eligibility Criteria

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Technical amendment.

SUMMARY: This document amends 24 CFR Part 111 of HUD regulations to include OMB control numbers at the end of §§ 111.106 and 111.108 where current information collection requirements are described.

EFFECTIVE DATE: March 28, 1988.

FOR FURTHER INFORMATION CONTACT: Maxine B. Cunningham, Director, Federal, State and Local Programs Division, Office of the Deputy Assistant Secretary for Enforcement and Compliance, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, telephone (202) 755-0455. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

The information collection requirements contained in the regulatory sections listed below have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and assigned the control number listed below.

Text of the Amendments

Accordingly, following the text at the end of §§ 111.106(f) and 111.108(d) of Title 24, add the following statement:

(Approved by the Office of Management and Budget under OMB control number 2529-0005)

Date: March 23, 1988.

Mortgage Insurance for the Allegany Reservation of the Seneca Nation of Indians; Announcement of Effective Date

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of announcement of effective date for interim rule.

SUMMARY: This notice announces the effective date for an interim rule published in the Federal Register on December 21, 1987 (52 FR 48197). The rule explained the conditions under which the Secretary will insure mortgages on certain leased property in Salamanca, New York, within the Allegany Reservation of the Seneca Nation of Indians, as authorized by section 203(q) of the National Housing Act. The effective date section of the rule stated that the rule would become effective upon expiration of the first period of 30 calendar days of continuous session of Congress after publication, and announced that future notice of the effectiveness of the rule would be published in the Federal Register.

Thirty calendar days of continuous session of Congress have expired in the present Congress since the rule was published.

EFFECTIVE DATE: The effective date for the interim rule published December 21, 1987 (52 FR 48197) is March 28, 1988.

FOR FURTHER INFORMATION CONTACT: John Coonts, Deputy Director, Insured Single Family Housing, Department of Housing and Urban Development, Room 9266, 451 Seventh Street SW., Washington, DC 20410, telephone (202) 755-3046. (This is not a toll-free number.)

Dated: March 23, 1988.

[Docket No. N-88-1788; FR-2498]

Mortgage Insurance; Changes to the Maximum Mortgage Limits for Single Family Residences, Condominiums and Manufactured Homes and Lots

AGENCY: Office of the Assistant Secretary for Housing–Federal Housing Commissioner, HUD.

ACTION: Notice of revisions to FHA maximum mortgage limits for high-cost areas.

SUMMARY: This Notice amends the listing of areas eligible for "high-cost" mortgage limits under certain of HUD's insuring authorities under the National Housing Act by adding the mortgage limits for Rensselaer County, New York. Mortgage limits are adjusted in an area when the Secretary determines that middle- and moderate-income persons have limited housing opportunities because of high prevailing housing sales prices.

EFFECTIVE DATE: March 28, 1988.

FOR FURTHER INFORMATION CONTACT: For single family: Morris Carter, Director, Single Family Development Division, Room 9270; telephone (202) 755-6720. For manufactured homes: Christopher Peterson, Director, Office of Manufactured Housing and Regulatory Functions, Room 9158; telephone (202) 755-5210; 451 Seventh Street SW., Washington, DC 20410. (These are not toll-free numbers.).

SUPPLEMENTARY INFORMATION:

Background

The National Housing Act (NHA), 12 U.S.C. (1710-1749), authorizes HUD to insure mortgages for single family residences (from one- to four-family structures), condominiums, manufactured homes, manufactured home lots, and combination manufactured home lots. The NHA, as amended by the Housing and Community Development Amendments of 1980 and the Housing and Community Development Amendments of 1981, permits HUD to increase the maximum mortgage limits under most of these programs to reflect regional differences in the cost of housing. In addition, sections 2(b) and 214 of the NHA provide for special high-cost limits for insured mortgages in Alaska, Guam and Hawaii.

On March 3, 1988 (53 FR 6822), the Department published its most recent annual complete listing of areas eligible for "high-cost" mortgage limits under certain of HUD's insuring authorities under the National Housing Act, and their applicable limits for each area.

This Document

Today's document adds high-cost mortgage amounts for Rensselaer County, New York.

These amendments to the high-cost areas appear in two parts. Part I explains high-cost limits for mortgages insured under Title I of the National Housing Act. Part II lists changes for single family residences insured under section 203(b) or 234(c) of the National Housing Act.

National Housing Act High Cost Mortgage Limits

I. Title I: Method of Computing Limits

A. *Section 2(b)(1)(D). Combination manufactured home and lot (excluding Alaska, Guam and Hawaii):* To determine the high-cost limit for a combination manufactured home and lot loan, multiply the dollar amount in the "one family" column of Part II of this list by .80. For example, Rensselaer County (New York) has a one-family limit of $75,900. The combination home and lot loan limit for Rensselaer County is $75,900 x .80, or $60,720.

B. *Section 2(b)(1)(E): Lot only (excluding Alaska, Guam and Hawaii):* To determine the high-cost limit for a lot loan, multiply the dollar amount in the "one-family" column of Part II of this list by .20. For example, Rensselaer County (New York) has a one-family limit of $75,900. The lot-only loan limit for Rensselaer County is $75,900 x .20, or $15,180.

C. *Section 2(b)(2). Alaska, Guam and Hawaii limits:* The maximum dollar limits for Alaska, Guam and Hawaii may be 140% of the statutory loan limits set out in section 2(b)(1).

Accordingly, the dollar limits for Alaska, Guam and Hawaii are as follows:

1. For manufactured homes: $56,700. (40,500 X 140%).
2. For combination manufactured homes and lots: 75,600. ($54,000 X 140%).
3. For lots only: $18,900. (13,500 X 140%).

II. Title II: Updating of FHA Sections 203(b), 234(c) and 214 Area Wide Mortgage Limits

REGION II.—HUD FIELD OFFICE—ALBANY OFFICE

Market area designation and local	1-family and condo unit	2-family	3-family	4-family
Rensselaer County	$75,900	$85,450	$105,050	$119,850

Date: March 21, 1988.

James E. Schoenberger,

General Deputy Assistant Secretary for Housing-Federal Housing Commissioner.

BILLING CODE 4210-27-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 1 and 602

[T.D. 8188]

Income Tax; Consolidated Return Regulations; Adjustment on Disposition of Stock of Subsidiary; Corrections

AGENCY: Internal Revenue Service, Treasury.

ACTION: Corrections to temporary regulations.

SUMMARY: This document contains corrections to temporary regulations that were published in the Federal Register on Thursday, March 17, 1988 (53 FR 8747) as Treasury Decision 8188. The rules relate to the addition of new § 1.1502-32T to the consolidated return regulations and supplement the adjustment under § 1.1502-32(g) on the disposition by a member of stock of a subsidiary.

FOR FURTHER INFORMATION CONTACT: Judith Winkler, at 202-566-3458 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations that are the subject of these corrections reflect the addition of temporary regulations § 1.1502-32T to Part 1 of Title 26 of the Code of Federal Regulations.

Need For Corrections

As published, Treasury Decision 8188 contains three omissions. This document corrects those omissions.

Corrections of Publication

Accordingly, the publication of temporary regulations (T.D. 8188), which was the subject of FR. Doc. 88-5907, is corrected as follows:

Paragraph 1. On page 8749, first column, the following language should be inserted after the fourth line to read:

List of Subjects in 26 CFR Part 602

Reporting and recordkeeping requirements.

Par. 2. On page 8749, first column, current lines 7 and 8, the language "Accordingly, 26 CFR Part 1 is amended as follows:" is corrected to read "Accordingly, 26 CFR Parts 1 and 602 are amended as follows:"

Par. 3. On page 8750, first column, immediately following the second paragraph which ends with the language "made to the basis reduction account." The following should be inserted:

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 4. The authority citation for 26 CFR Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.101 [Amended]

Par. 5. Section 602.101(c) is amended by inserting in the appropriate places in the table

"§ 1.1502-32T.............................. 1545-1021",

Donald E. Osteen,

Director, Legislation and Regulations Division.

[FR Doc. 88-6689 Filed 3-25-88; 8:45 am]

26 CFR Parts 1 and 602

[T.D. 8189]

Income Taxes; 2-percent Floor on Miscellaneous Itemized Deductions

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final and temporary regulations.

SUMMARY: This document provides temporary regulations under new section 67 of the Internal Revenue Code relating to the 2-percent floor on miscellaneous itemized deductions. The text to the temporary regulations set forth in this document also serves as the text of proposed regulations cross-referenced in the notice of proposed rulemaking in the Proposed Rules section of this issue of the Federal Register.

DATES: The regulations apply to taxable years beginning after December 31, 1986.

FOR FURTHER INFORMATION CONTACT: Beverly A. Baughman of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attention: CC:LR:T) (202-566-3287, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This document contains temporary Income Tax Regulations under section 132 of the Tax Reform Act of 1986 (Pub. L. 99-514, 100 Stat. 2113). That section added new section 67 to the Internal Revenue Code. Section 67(c) directs that regulations be issued relating to the indirect deduction through pass-through entities of amounts for expenses that would be subject to the 2-percent floor on miscellaneous itemized deductions if paid or incurred directly by an individual. In addition section 67(c) directs that regulations be issued relating to the reporting requirements that are necessary to carry out the purposes of the section.

These temporary regulations are issued under the authority contained in Internal Revenue Code sections 67(c) and 7805 (100 Stat. 2114, 26 U.S.C. 67(c); 68A Stat. 917, 26 U.S.C. 7805, respectively).

2-Percent Floor on Miscellaneous Itemized Deductions

Pursuant to section 67 of the Code, § 1.67-1T(a)(1) of the temporary regulations disallows deductions for miscellaneous itemized deductions in computing the taxable income of individuals (*i.e.*, so-called "below-the-line" deductions) to the extent that the aggregate of such expenses does not exceed 2 percent of the individual's adjusted gross income. Examples of expenses that, if otherwise deductible, are subject to the 2-percent floor include unreimbursed employee business expenses, expenses for the production or collection of income such as investment advisory fees and the cost of safe deposit boxes, and expenses for tax advice. To the extent that any other limitation is placed on the amount of a miscellaneous deduction, that limitation generally applies prior to the application of the 2-percent floor. For example, pursuant to section 274(n) the amount allowable as a deduction for meal and entertainment expenses cannot exceed 80 percent of the amount of such expense that is otherwise deductible. The 2-percent floor is applied to the amount allowable after application of the 80-percent limitation.

The term "miscellaneous itemized deduction" means the deductions alowable from adjusted gross income in determining taxable income other than the deductions listed in § 1.67-1T(b) of the temporary regulations, such as the deductions under sections 163, 164, and 217 relating to interest, taxes, and moving expenses, respectively.

Temporary § 1.67-1T(c) provides that, if a taxpayer incurs expenses that relate to both a trade or business activity and a production of income or tax preparation activity, the taxpayer shall allocate such expense between the activities on a reasonable basis.

Members of Congress

Section 1.67-1T(d) of the temporary regulations provides that the 2-percent floor is applied prior to the application of the $3,000 limitation on deductions for living expenses of Members of Congress referred to in section 162(a). The amount of miscellaneous itemized deductions of a Member of Congress that is disallowed because of the 2-percent floor is allocated between deductions for living expenses (within the meaning of section 162(a)) and other miscellaneous itemized deductions of a Member of Congress.

Reimbursed and Unreimbursed Employee Expenses

Temporary § 1.62-1T(e)(1) provides that expenses paid or incurred by an employee that are otherwise deductible from gross income in computing taxable income and for which the employee is reimbursed by the employer, its agent, or third party (for whom the employee performs a benefit as an employee of the employer) under an express agreement for reimbursement or pursuant to an express expense allowance arrangement may be deducted from gross income in computing adjusted gross income (*i.e.*, so-called "above-the-line" deductions). The same rules apply with respect to amounts allowable as a deduction under section 162(h)(1)(B) to state legislators that are reimbursed by the State.

Section 1.62-1T(e)(1) of the temporary regulations provides generally that, if an employee is reimbursed by his or her employer, its agent, or a third party in an amount less than the total expenses paid or incurred by the employee, the determination of to which of the employee's business expenses the reimbursement applies and the amount of each expense that is covered by the reimbursement is made on the basis of all of the facts and circumstances of the particular case. Section 1.62-1T(e)(2) of the temporary regulations provides rules for allocating reimbursements between meal and entertainment expenses and other business expenses when the facts and circumstances are not clear and the employee pays or incurs meal or entertainment expenses. Section 274(a)(2) excepts from the 80-percent limitation contained in section 274(n), by cross-reference to section 274(e)(3), expenses paid or incurred by an employee, in connection with the performance by the employee of services for the employer, under a reimbursement or other expense allowance arrangement with the employer, but only to the extent the employer does not treat such expenses under section 274(e)(2) as compensation to the employee and as wages for purposes of withholding. In this situation the 80-percent limitation applies to the employer.

For taxable years beginning after December 31, 1986, any portion of the amount allowable to state legislators as a deduction pursuant to section 162(h)(1)(B) that is not reimbursed by the state or a third party is allocated among expenses for lodging, meals, and incidental expenses in the manner described in § 1.62-1T(e)(4) of the temporary regulations.

Temporary § 1.62-1T(f) defines the phrase "reimbursement or other expense allowance arrangement." In addition, a payment under a reimbursement or other expense allowance arrangement must be identified either by making a separate payment or by specifically indicating the separate amount if both wages and the reimbursement or expense allowance are combined in a single payment. It shall be presumed that any amounts treated as compensation to an employee by an employer on the employer's return of tax under chapter 1 of the Code and as wages to such employee for purposes of chapter 24 of the Code (relating to withholding of income tax at source of wages) do not constitute reimbursements or other expense allowances for purposes of section 62. This presumption may be rebutted by clear and convincing evidence to the contrary that includes evidence of an obligation by the employee to make an adequate accounting to the employer for the employee's business expenses.

Treatment of Pass-Through Entities

Temporary § 1.67-2T provides rules for the application of section 67 to holders of interests in pass-through entities. In general, an "affected investor" in a pass-through entity is required to separately take into account as an item of both income and expense an amount equal to his or her allocable share of the "affected expenses" of the pass-through entity for purposes of determining his or her taxable income. In general, the expenses so taken into account are treated as paid or incurred by the affected investor in the same manner as paid or incurred by the pass-through entity.

A pass-through entity includes, pursuant to temporary § 1.67-2T(g), a grantor trust, a partnership, an S corporation, a common trust fund, a nonpublicly offered regulated investment company, and a real estate mortgage investment conduit (REMIC). It does not include an estate, a nongrantor trust, a cooperative, a real estate investment trust, or other entities such as a qualified pension plan, an individual retirement account, or an insurance company holding assets in a separate asset account to fund certain variable contracts.

Section 1.67-2T(b) of the temporary regulations provides rules for the application of section 67 to affected investors in partnerships, S corporations, and grantor trusts and temporary § 1.67-2T(d) provides such rules for affected investors in common trust funds. In addition, section 1.67-2T(c) of the temporary regulations cross-references temporary § 1.67-3T for rules regarding the application of section 67 to holders of interests in REMICs. Temporary § 1.67-2T(p) reserves on the rules regarding publicly offered regulated investment companies. The rules for the application of section 67 to REMICs, estates, and nongrantor trusts are the subject of separate regulations projects. The application of section 67 to estates and trusts and their beneficiaries is the subject of pending technical corrections legislation. Guidance on this issue will be published separately.

The application of section 67 to affected investors that are shareholders in a nonpublicly offered regulated investment company is described in temporary § 1.67-2T(e). In general, an affected investor shall be treated both as having received or accrued a dividend and as having paid or incurred an expense described in section 212. The amount of the dividend and the amount of the expense are each equal to the affected investor's allocable share of the affected RIC expenses of the nonpublicly offered regulated investment company. The affected investor shall take into account such amounts in the affected investor's taxable year with which (or within which) the calendar year with respect to which the expenses are allocated ends. A shareholder of a nonpublicly offered regulated investment company that is

MI

not an affected investor does not take into account in computing its taxable income any amount of its allocable share of affected RIC expenses.

Definitions of Certain Terms

The term "affected investor" generally means a partner, shareholder, beneficiary, participant (or other interest holder in a pass-through entity), that is (a) an individual (other than certain nonresident aliens), (b) a person that computes its taxable income in the same manner as in the case of an individual, or (c) a pass-through entity, interests in which are owned by affected investors.

In general, the term "affected expenses" means expenses that, if paid or incurred by an individual, would be deductible, if at all, as miscellaneous itemized deductions. In the case of a nonpublicly offered regulated investment company, the term "affected expenses" means only affected RIC expenses. Temporary § 1.67–2T(j)(1) generally defines the term "affected RIC expenses" as the excess of (a) the aggregate amount of the expenses paid or incurred in the calendar year that are allowable as a deduction in determining the investment company taxable income (without regard to section 852(b)(2)(D)) of the nonpublicly offered regulated investment company for a taxable year that begins or ends with or within the calendar year, over (b) certain expenses, such as registration fees, directors' or trustees' fees, transfer agent fees, and certain legal and accounting fees. For this purpose deductions described in section 62(a)(3) and § 1.67–1T(b) (*e.g.*, losses from the sale or exchange of property, taxes, and interest) are excluded. A nonpublicly offered regulated investment company must determine the amount of the affected RIC expenses on a calendar year basis regardless of whether its taxable year is the calendar year.

Section 1.67–2T(j)(2) of the temporary regulations provides an elective safe harbor under which a nonpublicity offered regulated investment company may treat 40 percent of certain deductions for the calendar year as its affected RIC expenses for that year. The election once made remains in effect for each succeeding calendar year unless revoked with the consent of the Commissioner.

Allocation of Expenses by Nonpublicly Offered Regulated Investment Companies

A nonpublicly offered regulated investment company is required to allocate to each of its affected investors that is a shareholder at any time during the calendar year the affected investor's allocable share of the affected RIC expenses of the nonpublic offered regulated investment company for that calendar year. (This allocable share is the amount that the affected shareholder is treated as having received or accrued as a dividend and paid or incurred as an expense described in section 212.) A nonpublicly offered regulated investment company may use any reasonable method to make the allocation. Temporary § 1.67–2T(k)(1) provides that an allocation method shall not be reasonable if, for example, it can be expected to have the effect (a) of allocating to the shareholders an amount of affected RIC expenses that is less than the affected RIC expenses of the nonpublicly offered regulated investment company for the calendar year or (b) of allocating a disproportionately high share of the affected RIC expenses of the nonpublicly offered regulated investment company to either (1) shareholders that are not affected investors, or (2) affected investors, the amount of whose miscellaneous itemized deductions exceed the 2-percent floor described in section 67.

Section 1.67–2T(k)(2) of the temporary regulations describes a reasonable allocation method. In general, under this method an affected investor's allocable share of the affected RIC expenses of a nonpublicly offered regulated investment company is the amount that bears the same ratio to the amount of affected RIC expenses of the nonpublicly offered regulated investment company for the calendar year as the amount of dividends paid to the affected investor during the calendar year bears to the sum of (a) the aggregate amount of dividends paid by the nonpublicly offered regulated investment company during the calendar year to all shareholders and (b) any amount on which tax is imposed under section 852(b)(1) for any taxable year of the nonpublicly offered regulated investment company ending within or with the calendar year. If a nonpublicly offered regulated investment company does not make a reasonable allocation of affected RIC expenses to its affected investors, a reasonable allocation shall be made by an appropriate District Director.

Special Rules

The amount of dividend income that an affected investor is treated as receiving as a result of an allocation of affected RIC expenses is not subject to backup withholding under section 3406.

Temporary § 1.67–2T(m) describes persons who may, for certain purposes, treat an affected investor's allocable share of the affected RIC expenses of a nonpublicly offered regulated investment company as being an amount determined on the basis of a reasonable estimate published by the nonpublicly offered regulated investment company in a widely available financial publication (*e.g.*, *Wall Street Journal* or *Standard and Poor's Weekly Dividend Record*). For example, a nominee who is required to report dividends paid by a nonpublicly offered regulated investment company to the Internal Revenue Service and to the person to whom the payment is made may rely on the estimate for purposes of such reporting. In addition, the affected investor to which the nominee reports may rely on the estimate for purposes of calculating its taxable income and the amount of its affected expenses.

Reporting Requirements

If a nonpublicly offered regulated investment company is required to make an information return to the Internal Revenue Service pursuant to section 6042 (or would be required to make such a return but for the $10 threshold described in section 6042(a)(1) (A) and (B)) with respect to an affected investor to which an allocation of affected RIC expenses is required to be made, the nonpublicly offered regulated investment shall report to the Internal Revenue Service the amount of affected RIC expenses required to be allocated to the affected investor for the calendar year, as well as certain other information. Temporary § 1.67–2T(n)(1)(ii) requires a nonpublicly offered regulated investment company to provide to each affected investor for each calendar year (whether or not the nonpublicly offered regulated investment company is required to make an information return with respect to the affected investor pursuant to section 6042), a written statement that includes the amount of affected RIC expenses required to be allocated to the affected investor for the calendar year and certain other information. If an affected investor's shares in a nonpublicly offered regulated investment company are held in the name of a nominee, the nonpublicly offered regulated investment company may make the information return with respect to the nominee and provide the written statement to the nominee. Section 1.67–2T(n)(2) of the temporary regulations provides reporting requirements for nominees to which a nonpublicly offered regulated investment company provides a written statement. These requirements are similar to the ones with which regulated investment companies must comply.

Pursuant to temporary § 1.67–2T(n)(5), a nonpublicly offered regulated investment company or a nominee fulfills its reporting obligations with respect to an affected investor (a) by the timely filing with the Internal Revenue Service of an information return pursuant to section 6042 (*i.e.*, Form 1099–DIV) that contains the required information and (b) by furnishing the affected investor with a copy of such information return. Thus, a nonpublicly offered regulated investment company or a nominee is not required to file more than one Form 1099–DIV with respect to an affected investor.

With respect to each affected investor, temporary § 1.67–2T(o) requires a common trust fund to state on the return it is required to make pursuant to section 6032 the amount of the affected investor's proportionate share of the affected expenses for the taxable year as well as certain other information.

Special Analyses

No general notice of proposed rulemaking is required by 5 U.S.C. 553(b) for temporary regulations. Accordingly, the Regulatory Flexibility Act does not apply and no Regulatory Flexibility Analysis is required for this rule. The Commissioner of Internal Revenue has determined that this temporary rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. The reporting requirements added by this document have been submitted to the Office of Management and Budget (OMB) in accordance with the requirements of the Paperwork Reduction Act of 1980. The reporting requirements have been approved by OMB.

Drafting Information

The principal author of these temporary regulations is Beverly A. Baughman of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Income taxes, Taxable income, Deductions, Exemptions.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 1 is amended as follows:

PART 1—[AMENDED]

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Sections 1.67–2T and 1. 67–3T also issued under 26 U.S.C. 67 (c).

§ 1.62–1 [Removed]

Par. 2. Section 1.62–1 is removed and a new § 1.62–1T is added in its place to read as follows:

§ 1.62–1T Adjusted gross income (temporary).

(a) *Basis for determining the amount of certain deductions.* The term "adjusted gross income" means the gross income computed under section 61 minus such of the deductions allowed by chapter 1 of the Code as are specified in section 62(a). Adjusted gross income is used as the basis for determining the following:

(1) The limitation on the amount of miscellaneous itemized deductions (under section 67).

(2) The limitation on the amount of the deduction for casualty losses (under section 165(h)(2)).

(3) The limitation on the amount of the deduction for charitable contributions (under section 170(b)(1)).

(4) The limitation on the amount of the deduction for medical and dental expenses (under section 213).

(5) The limitation on the amount of the deduction for qualified retirement contributions for active participants in certain pension plans (under section 219(g)), and

(6) The phase-out of the exemption from the disallowance of passive activity losses and credits (under section 469(i)(3)).

(b) *Double deduction not permitted.* Section 62 (a) merely specifies which of the deductions provided in chapter 1 of the Code shall be allowed in computing adjusted gross income. It does not create any new deductions. The fact that a particular item may be described in more than one of the paragraphs under section 62(a) does not permit the item to be deducted twice in computing adjusted gross income or taxable income.

(c) *Deductions allowable in computing adjusted gross income.* The deductions specified in section 62(a) for purposes of computing adjusted gross income are:

(1) Deductions allowable under chapter 1 of the Code (other than by part VII (section 211 and folllowing), subchapter B of such chapter) that are attributable to a trade or business carried on by the taxpayer not consisting of services performed as an employee;

(2) Deductions allowable under part VI (section 161 and following), subchapter B, chapter 1 of the Code, that consist of exprenses paid or incurred by the taxpayer in connection with the performances of services by him or her as an employee under an express reimbursement or other expense allowance arrangement (as defined in paragraph (f) of this section) with his or her employer;

(3) For taxable years beginning after December 31, 1986, deductions allowable under section 162 that consist of expenses paid or incurred by a qualified performing artist (as defined in section 62(b)) in connection with the performance by him or her of services in the performing arts as an employee;

(4) Deductions allowable under part VI as losses from the sale or exchange of property;

(5) Deductions allowable under part VI, section 212, or section 611 that are attributable to property held for the production of rents or royalties;

(6) Deductions for depreciation or depletion allowable under sections 167 or 611 to a life tenant of property or to an income beneficiary of property held in trust or to an heir, legatee, or devisee of an estate;

(7) Deductions allowed by section 404 for contributions on behalf of a self-employed individual;

(8) Deductions allowed by section 219 for contributions to an individual retirement account described in section 408(a), or for an individual retirement annuity described in section 408(b);

(9) Deductions allowed by section 402(e)(3) with respect to a lump-sum distribution;

(10) For taxable years beginning after December 31, 1972, deductions allowed by section 165 for losses incurred in any transaction entered into for profit though not connected with a trade or business, to the extent that such losses include amounts forfeited to a bank, mutual savings bank, savings and loan association, building and loan association, cooperative bank or homestead association as a penalty for premature withdrawal of funds from a time savings account, certificate of deposit, or similar class of deposit;

(11) For taxable years beginning after December 31, 1976, deductions for

alimony and separate maintenance payments allowed by section 215;

(12) Deductions allowed by section 194 for the amortization of reforestation expenditures; and

(13) Deductions allowed by section 165 for the repayment (made in a taxable year beginning after December 28, 1980) to a trust described in paragraph (9) or (17) of section 501(c) of supplemental unemployment compensation benefits received from such trust if such repayment is required because of the receipt of trade readjustment allowances under section 231 or 232 of the Trade Act of 1974 (19 U.S.C. 2291 and 2292).

(d) *Expenses directly related to a trade or business.* For the purpose of the deductions specified in section 62, the performance of personal services as an employee does not constitute the carrying on of a trade or business, except as otherwise expressly provided. The practice of a profession, not as an employee, is considered the conduct of a trade or business within the meaning of such section. To be deductible for the purposes of determining adjusted gross income, expenses must be those directly, and not those merely remotely, connected with the conduct of a trade or business. For example, taxes are deductible in arriving at adjusted gross income only if they constitute expenditures directly attributable to a trade or business or to property from which rents or royalties are derived. Thus, property taxes paid or incurred on real property used in a trade or business are deductible, but state taxes on net income are not deductible even though the taxpayer's income is derived from the conduct of a trade or business.

(e) *Reimbursed and unreimbursed employee expenses*—(1) *In general.* Expenses paid or incurred by an employee that are deductible from gross income under part VI in computing taxable income (determined without regard to section 67) and for which the employee is reimbursed by the employer, its agent, or third party (for whom the employee performs a benefit as an employee of the employer) under an express agreement for reimbursement or pursuant to an *express* expense allowance arrangement may be deducted from gross income in computing adjusted gross income. Except as provided in paragraphs (e)(2) and (e)(4) of this section, for taxable years beginning after December 31, 1986, if the amount of a reimbursement (as defined in paragraph (f) of this section) made by an employer, its agent, or third party to an employee is less than the total amount of the business expenses paid or incurred by the employee, the determination of to which of the employee's business expenses the reimbursement applies and the amount of each expense that is covered by the reimbursement is made on the basis of all of the facts and circumstances of the particular case.

(2) *Facts and circumstances unclear on business expenses for meals and entertainment.* If—

(i) The facts and circumstances do not make clear—

(A) That a reimbursement does not apply to business expenses for meals or entertainment, or

(B) The amount of business expenses for meals or entertainment that is covered by the reimbursement, and

(ii) The employee pays or incurs business expenses for meals or entertainment,

the amount of the reimbursement that applies to such expenses (or portion thereof with respect to which the facts and circumstances are unclear) shall be determined by multiplying the amount of the employee's business expenses for meals and entertainment (or portion thereof with respect to which the facts and circumstances are unclear) by a fraction, the numerator of which is the total amount of the reimbursement (or portion thereof with respect to which the facts and circumstances are unclear) and the denominator of which is the aggregate amount of all the business expenses of the employee (or portion thereof with respect to which the facts and circumstances are unclear).

(3) *Deductibility of unreimbursed expenses.* The amount of expenses that is determined not to be reimbursed pursuant to paragraph (e) (1) or (2) of this section is deductible from adjusted gross income in determining the employee's taxable income subject to the limitations applicable to such expenses (*e.g.*, the 2-percent floor of section 67 and the 80-percent limitation on meal and entertainment expenses provided for in section 274(n)).

(4) *Unreimbursed expenses of State legislators.* For taxable years beginning after December 31, 1986, any portion of the amount allowed as a deduction to State legislators pursuant to section 162(h)1)(B) that is not reimbursed by the State or a third party shall be allocated between lodging and meals in the same ratio as the amounts allowable for lodging and meals under the Federal per diem applicable to the legislator's State capital at the end of the legislator's taxable year (see Appendix 1–A of the Federal Travel Regulations (FTR), which as of March 28, 1988, are contained in GSA Bulletin FPMR A–40, Supplement 20). For purposes of this paragraph (e)(4), the amount allowable for meals under the Federal per diem shall be the amount of the Federal per diem allowable for meals and incidental expenses reduced by $2 per legislative day (or other amount allocated to incidental expenses in 1–7.5(a)(2) of the FTR). The unreimbursed portion of each type of expense is deductible from adjusted gross income in determining the State legislator's taxable income subject to the limitations applicable to such expenses. For example, the unreimbursed portion allocable to meals shall be reduced by 20 percent pursuant to section 274(n) before being subjected to the 2-percent floor of section 67 for purposes of computing the taxable income of a State legislator. See § 1.67–1T(a)(2).

(5) *Expenses paid directly by an employer, its agent, or third party.* In the case of an employer, its agent, or a third party who provides property or services to an employee or who pays an employee's expenses directly instead of reimbursing the employee, see section 132 and the regulations thereunder for the income tax treatment of such expenses.

(6) *Examples.* The provisions of this paragraph (e) may be illustrated by the following examples:

Example (1). During 1987, A, an employee, while on business trips away from home pays $300 for travel fares, $200 for lodging and $100 for meals. In addition, A pays $50 for business meals in the area of his place of employment ("local meals"), $250 for continuing education courses, and $100 for business-related entertainment (other than meals). The total amount of the reimbursements received by A for his employee expenses from his employer is $750, and it is assumed that A's expenses meet the deductibility requirements of sections 162 and 274. A includes the amount of the reimbursement in his gross income. A's employer designates the reimbursement to cover in full A's expenses for travel fares, lodging, and meals while away from home, local meals, and entertainment, and no facts or circumstances indicate a contrary intention of the employer. Because the facts and circumstances make clear the amount of A's business expenses for meals and entertainment that is covered by the reimbursement, the reimbursement will be allocated to these expenses. In determining his adjusted gross income under section 62, A may deduct the full amount of the reimbursement for travel fares, lodging, and meals while away from home, local meals, and entertainment. In determining his taxable income under section 63, A may deduct his expenses for continuing education courses to the extent allowable by sections 67 and 162.

Example (2). Assume the facts are the same as in example (1) except that the facts and circumstances make clear that the reimbursement covers all types of deductible expenses but they do not make clear the amount of each type of expense that is covered by the reimbursement. The amount of the reimbursement that is allocated to A's business expenses for meals and entertainment is $187.50. This amount is determined by multiplying the total amount of A's business expenses for meals and entertainment ($250) by the ratio of A's total reimbursement to A's total business expenses ($750/$1,000). The remaining amount of the reimbursement, $562.50 ($750−$187.50), is allocated to A's business expenses other than meal and entertainment expenses. Therefore, in determining his adjusted gross income under section 62, A may deduct $750 for reimbursed business expenses (including meals and entertainment). In determining his taxable income under section 63, A may deduct (subject to the limitations and conditions of sections 67, 162, and 274) the unreimbursed portion of his expenses for meals and entertainment ($62.50 ($250−$187.50)), and other employee business expenses ($187.50 ($750−$562.50)).

Example (3). Assume the facts are the same as in example (1) except that the amount of the reimbursement is $500. Assume further that the facts and circumstances make clear that the reimbursement covers $100 of expenses for meals and that the remaining $400 of the reimbursement covers all types of deductible expenses (including any expenses for meals in excess of the $100 already designated) other than expenses for entertainment. The amount of the reimbursement that is allocated to A's business expenses for meals and entertainment is $125. This amount is equal to the sum of the amount of the reimbursement that clearly applies to meals ($100) and the amount of the reimbursement with respect to which the facts are unclear that is allocated to meals ($25). The latter amount is determined by multiplying the total amount of A's business expenses for meals and entertainment with respect to which the facts are unclear ($50) by the ratio of A's total reimbursement with respect to which the facts are unclear to A's total business expenses with respect to which the facts are unclear ($400/$800). The remaining amount of the reimbursement, $375 ($500−$125) is allocated to A's business expenses other than meals and entertainment. Therefore, in determining his adjusted gross income under section 62, A may deduct $500 for reimbursed business expenses (including meals). In determining his taxable income under section 63, A may deduct (subject to the limitations and conditions of sections 67, 162, and 274) the unreimbursed portion of his expenses for meals ($25 ($150−$125)), entertainment ($100), and other employee business expenses ($375 ($750−$375)).

Example (4). During 1987 B, a research scientist, is employed by Corporation X. B gives a speech before members of Association Y, a professional organization of scientists, describing her most recent research findings. Pursuant to a reimbursement arrangement, Y reimburses B for the full amount of her travel fares to the site of the speech and for the full amount of her expenses for lodging and meals while there. B includes the amount of the reimbursement in her gross income. B may deduct the full amount of her travel expenses pursuant to section 62(a)(2)(A) in computing her adjusted gross income.

(f) *Reimbursement or other expense allowance arrangement.* For purposes of this section, the phrase "reimbursement or other expense allowance arrangement" means advances, allowances (including per diem allowances and mileage allowances), or reimbursements received by a taxpayer for business expenses that are allowable as deductions by part VI and paid or incurred by the taxpayer in connection with the performance of services by him or her as an employee under a reimbursement or other expense allowance arrangement with the employer (whether the reimbursement is actually received from the employer, its agent, or a third party for whom the employee performs a benefit as an employee of the employer), as well as amounts charged directly or indirectly to the employer through credit card systems or otherwise. In addition, the reimbursement or other expense allowance arrangement must be identified either by making a separate payment or by specifically indicating the separate amount if both wages and the reimbursement or expense allowance are combined in a single payment. It shall be presumed that any amounts treated as compensation to an employee by an employer on the employer's return of tax under chapter 1 of the Code and as wages to such employee for purposes of chapter 24 of the Code (relating to withholding of income tax at source on wages) do not constitute reimbursements or other expense allowances for purposes of section 62 and this section. This presumption may be rebutted by clear and convincing evidence to the contrary that includes evidence of an obligation by the employee to make an adequate accounting (as defined in § 1.274–5(e)(4)) to the employer for the employee's business expenses.

(g) *Moving expenses.* For taxable years beginning after December 31, 1986, a taxpayer described in section 217(a) shall not take into account the deduction described in section 217 relating to moving expenses in computing adjusted gross income under section 62 even if the taxpayer is reimbursed for his or her moving expenses. Such a taxpayer shall include the amount of any reimbursement for moving expenses in income pursuant to section 82. The deduction described in section 217 shall be taken into account in computing the taxable income of the taxpayer under section 63. Pursuant to section 67(b)(6), the 2-percent floor described in section 67(a) does not apply to moving expenses.

(h) *Cross-reference.* See 26 CFR 1.62–1 (Rev. as of April 1, 1986) with respect to pre-1987 deductions for travel, meal, lodging, transportation, and other trade or business expenses of an employee, reimbursed expenses of an employee, expenses of an outside salesperson, long-term capital gains, contributions described in section 405(c) to a bond purchase plan on behalf of a self-employed individual, moving expenses, amounts not received as benefits pursuant to section 1379(b)(3), and retirement bonds described in section 409 (allowed by section 219).

Par. 3. Immediately after § 1.63–2, new §§ 1.67–1T and 1.67–2T are added, and a heading for § 1.67–4T is added. The added provisions read as follows:

§ 1.67–1T 2-percent floor on miscellaneous itemized deductions (temporary).

(a) *Type of expenses subject to the floor*—(1) *In general.* With respect to individuals, section 67 disallows deductions for miscellaneous itemized deductions (as defined in paragraph (b) of this section) in computing taxable income (*i.e.*, so-called "below-the-line" deductions) to the extent that such otherwise allowable deductions do not exceed 2 percent of the individual's adjusted gross income (as defined in section 62 and the regulations thereunder). Examples of expenses that, if otherwise deductible, are subject to the 2-percent floor include but are not limited to—

(i) Unreimbursed employee expenses, such as expenses for transportation, travel fares and lodging while away from home, business meals and entertainment, continuing education courses, subscriptions to professional journals, union or professional dues, professional uniforms, job hunting, and the business use of the employee's home.

(ii) Expenses for the production or collection of income for which a deduction is otherwise allowable under section 212 (1) and (2), such as investment advisory fees, subscriptions to investment advisory publications, certain attorneys' fees, and the cost of safe deposit boxes.

(iii) Expenses for the determination of any tax for which a deduction is otherwise allowable under section 212(3), such as tax counsel fees and appraisal fees, and

(iv) Expenses for an activity for which a deduction is otherwise allowable under section 183.

See section 62 with respect to deductions that are allowable in computing adjusted gross income (*i.e.*, so-called "above-the-line" deductions).

(2) *Other limitations.* Except as otherwise provided in paragraph (d) of this section, to the extent that any limitation or restriction is placed on the amount of a miscellaneous itemized deduction, that limitation shall apply prior to the application of the 2-percent floor. For example, in the case of an expense for food or beverages, only 80 percent of which is allowable as a deduction because of the limitations provided in section 274(n), the otherwise deductible 80 percent of the expense is treated as a miscellaneous itemized deduction and is subject to the 2-percent limitation of section 67.

(b) *Definition of miscellaneous itemized deductions.* For purposes of this section, the term "miscellaneous itemized deductions" means the deductions allowable from adjusted gross income in determining taxable income, as defined in section 63, other than—

(1) The standard deduction as defined in section 63(c),

(2) Any deduction allowable for impairment-related work expenses as defined in section 67(d),

(3) The deduction under section 72(b)(3) (relating to deductions if annuity payments cease before the investment is recovered),

(4) The deductions allowable under section 151 for personal exemptions,

(5) The deduction under section 163 (relating to interest),

(6) The deduction under section 164 (relating to taxes),

(7) The deduction under section 165(a) for losses described in subsection (c)(3) or (d) of section 165,

(8) The deduction under section 170 (relating to charitable contributions and gifts),

(9) The deduction under section 171 (relating to deductions for amortizable bond premiums),

(10) The deduction under section 213 (relating to medical and dental expenses),

(11) The deduction under section 216 (relating to deductions in connection with cooperative housing corporations),

(12) The deduction under section 217 (relating to moving expenses),

(13) The deduction under section 691(c) (relating to the deduction for estate taxes in the case of income in respect of the decedent),

(14) The deduction under 1341 (relating to the computation of tax if a taxpayer restores a substantial amount held under claim of right), and

(15) Any deduction allowable in connection with personal property used in a short sale.

(c) *Allocation of expenses.* If a taxpayer incurs expenses that relate to both a trade or business activity (within the meaning of section 162) and a production of income or tax preparation activity (within the meaning of section 212), the taxpayer shall allocate such expenses between the activities on a reasonable basis.

(d) *Members of Congress*—(1) *In general.* With respect to the deduction for living expenses of Members of Congress referred to in section 162(a), the 2-percent floor described in section 67 and paragraph (a) of this section shall be applied to the deduction before the application of the $3,000 limitation on deductions for living expenses referred to in section 162(a). (For purposes of this paragraph (d), the term "Member(s) of Congress" include any Delegate or Resident Commissioner.) The amount of miscellaneous itemized deductions of a Member of Congress that is disallowed pursuant to section 67 and paragraph (a) of this section shall be allocated between deductions for living expenses (within the meaning of section 162(a)) and other miscellaneous itemized deductions. The amount of deductions for living expenses of a Member of Congress that is disallowed pursuant to section 67 and paragraph (a) of this section is determined by multiplying the aggregate amount of such living expenses (determined without regard to the $3,000 limitation of section 162(a) but with regard to any other limitations) by a fraction, the numerator of which is the aggregate amount disallowed pursuant to section 67 and paragraph (a) of this section with respect to miscellaneous itemized deductions of the Member of Congress and the denominator of which is the amount of miscellaneous itemized deductions (including deductions for living expenses) of the Member of Congress (determined without regard to the $3,000 limitation of section 162(a) but without regard to any other limitations). The amount of deductions for miscellaneous itemized deductions (other than deductions for living expenses) of a Member of Congress that are disallowed pursuant to section 67 and paragraph (a) of this section is determined by multiplying the amount of miscellaneous itemized deductions (other than deductions for living expenses) of the Member of Congress (determined with regard to any limitations) by the fraction described in the preceding sentence.

(2) *Example.* The provisions of this paragraph (d) may be illustrated by the following example:

Example. For 1987 A, a Member of Congress, has adjusted gross income of $100,000, and miscellaneous itemized deductions of $10,750 of which $3,750 is for meals, $3,000 is for other living expenses, and $4,000 is for other miscellaneous itemized deductions (none of which is subject to any percentage limitations other than the 2-percent floor of section 67). The amount of A's business meal expenses that are disallowed under section 274(n) is $750 ($3,750×20%). The amount of A's miscellaneous itemized deductions that are disallowed under section 67 is $2,000 ($100,000×2%). The portion of the amount disallowed under section 67 that is allocated to A's living expenses is $1,200. This portion is equal to the amount of A's deductions for living expenses allowable after the application of section 274(n) and before the application of section 67 ($6,000) multiplied by the ratio of A's total miscellaneous itemized deductions disallowed under section 67 to A's total miscellaneous itemized deductions, determined without regard to the $3,000 limitation of section 162(a) ($2,000/$10,000). Thus, after application of section 274(n) and section 67, A's deduction for living expenses is $4,800 ($6,750−$750−$1,200). However, pursuant to section 162(a), A may deduct only $3,000 of such expenses. The amount of A's other miscellaneous itemized deductions that are disallowed under section 67 is $800 ($4,000×$2,000/$10,000). Thus, $3,200 ($4,000−$800) of A's miscellaneous itemized deductions (other than deductions for living expenses) are allowable after application of section 67. A's total allowable miscellaneous itemized deductions are $6,200 ($3,000+$3,200).

(e) *State legislators.* See § 1.62–1T(e)(4) with respect to rules regarding state legislator's expenses.

§ 1.67–2T Treatment of pass-through entities (temporary).

(a) *Application of section 67.* This section provides rules for the application of section 67 to partners, shareholders, beneficiaries, participants, and others with respect to their interests in pass-through entities (as defined in paragraph (g) of this section). In general, an affected investor (as defined in paragraph (h) of this section) in a pass-through entity shall separately take into account as an item of income and as an item of expense an amount equal to his or her allocable share of the affected expenses (as defined in paragraph (i) of this section) of the pass-through entity for purposes of determining his or her taxable income. Except as provided in paragraph (e)(1)(ii)(B) of this section, the expenses so taken into account shall be treated as paid or incurred by the affected investor in the same manner as paid or incurred by the pass-through entity. For rules regarding the application of section 67 to affected investors in—

(1) Partnerships, S corporations, and grantor trusts, see paragraph (b) of this section,

(2) Real estate mortgage investment conduits, see paragraph (c) of this section,

(3) Common trust funds, see paragraph (d) of this section,

(4) Nonpublicly offered regulated investment companies, see paragraph (e) of this section, and

(5) Publicly offered regulated investment companies, see paragraph (p) of this section.

(b) *Partnerships, S corporations, and grantor trusts*—(1) *In general.* Pursuant to section 702(a) and 1366(a) of the Code and the regulations thereunder, each partner of a partnership or shareholder of an S corporation shall take into account separately his or her distributive or pro rata share of any items of deduction of such partnership or corporation that are defined as miscellaneous itemized deductions pursuant to section 67(b). The 2-percent limitation described in section 67 does not apply to the partnership or corporation with respect to such deductions, but such deductions shall be included in the deductions of the partner or shareholder to which that limitation applies. Similarly, the limitation applies to the grantor or other person treated as the owner of a grantor trust with respect to items that are paid or incurred by a grantor trust and are treated as miscellaneous itemized deductions of the grantor or other person pursuant to subpart E, part 1, subchapter J, chapter 1 of the Code, but not to the trust itself. The 2-percent limitation applies to amounts otherwise deductible in taxable years of partners, shareholders, or grantors beginning after December 31, 1986, regardless of the taxable year of the partnership, corporation, or trust.

(2) *Example.* The provisions of this paragraph (b) may be illustrated by the following example:

Example. P, a partnership, incurs $1,000 in expenses to which section 212 applies during its taxable year. A, an individual, is a partner in P. A's distributive share of the expenses to which section 212 applies is $20, determined without regard to the 2-percent limitation of section 67. Pursuant to section 702(a), A must take $20 of expenses to which section 212 applies into account in determining his income tax. Pursuant to section 67, in determining his taxable income A may deduct his miscellaneous itemized deductions (including his $20 distributive share of deductions from P) to the extent the total amount exceeds 2 percent of his adjusted gross income.

(c) *Real estate mortgage investment conduit.* See § 1.67–3T for rules regarding the application of section 67 to holders of interests in REMICs.

(d) *Common trust funds*—(1) *In general.* For purposes of determining the taxable income of an affected investor that is a participant in a common trust fund—

(i) The ordinary taxable income and ordinary net loss of the common trust fund shall be computed under section 584(d)(2) without taking into account any affected expenses, and

(ii) Each affected investor shall be treated as having paid or incurred an expense described in section 212 in an amount equal to the affected investor's proportionate share of the affected expenses.

The 2-percent limitation described in section 67 applies to amounts otherwise deductible in taxable years of participants beginning after December 31, 1986, regardless of the taxable year of the common trust fund.

(2) *Example.* The provisions of this paragraph (d) may be illustrated by the following example:

Example. During 1987, the gross income and deductions of common trust fund C, a calendar year taxpayer, consist of the following items: (i) $50,000 of short-term capital gains; (ii) $150,000 of long-term capital gains; (iii) $1,000,000 of dividend income; (iv) $10,000 of deductions that are not affected expenses; and (v) $80,000 of deductions that are affected expenses. The proportionate share of Trust T in the income and losses of C is one percent. In computing its taxable income for 1987, T, a calendar year taxpayer, shall take into account the following items: (A) $500 of short-term capital gains (one percent of $50,000, C's short-term capital gains); (B) $1,500 of long-term capital gains (one percent of $150,000, C's long-term capital gains); (C) $9,900 of ordinary taxable income (one percent of $990,000, the excess of $100,000, C's gross income after excluding capital gains and losses, over $10,000, C's deductions that are not affected expenses); (D) $800 of expenses described in section 212 (one percent of $80,000, C's affected expenses).

(e) *Nonpublicly offered regulated investment companies*—(1) *In general.* For purposes of determining the taxable income of an affected investor that is a shareholder of a nonpublicly offered regulated investment company (as defined in paragraph (g)(3) of this section) during a calendar year—

(i) The current earnings and profits of the nonpublicly offered regulated investment company shall be computed without taking into account any affected RIC expenses that are allocated among affected investors, and

(ii) The affected investor shall be treated—

(A) As having received or accrued a dividend in an amount equal to the affected investor's allocable share of the affected RIC expenses of the nonpublicly offered regulated investment company for the calendar year, and

(B) As having paid or incurred an expense described in section 212 (or section 162 in the case of an affected investor that is a nonpublicly offered regulated investment company) in an amount equal to the affected investor's allocable share of the affected RIC expenses of the nonpublicly offered regulated investment company for the calendar year

in the affected investor's taxable year with which (or within which) the calendar year with respect to which the expenses are allocated ends. An affected investor's allocable share of the affected RIC expenses is the amount allocated to that affected investor pursuant to paragraph (k) of this section.

(2) *Shareholders that are not affected investors.* A shareholder of a nonpublicly offered regulated investment company that is not an affected investor shall not take into account in computing its taxable income any amount of income or expense with respect to its allocable share of affected RIC expenses.

(3) *Example.* The provisions of this paragraph (e) may be illustrated by the following example:

Example. During calendar year 1987, nonpublicly offered regulated investment company M distributes to individual shareholder A, a calendar year taxpayer, capital gain dividends of $1,000 and other dividends of $5,000. A's allocable share of the affected RIC expenses of M is $200. In computing A's taxable income for 1987, A shall take into account the following items: (i) $1,000 of long-term capital gains (the capital gain dividends received by A); (ii) $5,200 of dividend income (the sum of the other dividends received by A and A's allocable share of the affected RIC expenses of M); and (iii) $200 of expenses described in section 212 (A's allocable share of the affected RIC expenses of M). A is allowed a deduction for miscellaneous itemized deductions (including A's $200 allocable share of the affected RIC expenses of M, which is treated as an expense described in section 212) for 1987 only to the extent the aggregate of such deductions exceeds 2 percent of A's adjusted gross income for 1987.

(f) *Cross-reference.* See § 1.67–1T with respect to limitations on deductions for expenses described in section 212 (including amounts treated as such expenses under this section).

(g) *Pass-through entity*—(1) *In general.* Except as provided in paragraph (g)(2) of this section, for purposes of section 67(c) and this section, a pass-through entity is—

(i) A trust (or any portion thereof) to which subpart E, part 1, subchapter J, chapter 1 of the Code applies,

(ii) A partnership,

(iii) An S corporation,

(iv) A common trust fund described in section 584,

(v) A nonpublicly offered regulated investment company,

(vi) A real estate mortgage investment conduit, and

(vii) Any other person—

(A) Which is not subject to the income tax imposed by subtitle A, chapter 1, or which is allowed a deduction in computing such tax for distributions to owners or beneficiaries, and

(B) The character of the income of which may affect the character of the income recognized with respect to that person by its owners or beneficiaries.

Entities that do not meet the requirements of paragraph (g)(1)(vii) (A) and (B) of this section, such as qualified pension plans, individual retirement accounts, and insurance companies holding assets in separate asset accounts to fund variable contracts defined in section 817(d), are not described in this paragraph (g)(1).

(2) *Exception.* For purposes of section 67(c) and this section, a pass-through entity does not include:

(i) An estate;

(ii) A trust (or any portion thereof) not described in paragraph (g)(1)(i) of this section,

(iii) A cooperative described in section 1381(a)(2), determined without regard to subparagraphs (A) and (C) thereof, or

(iv) A real estate investment trust.

(3) *Nonpublicly offered regulated investment company—(i) In general.* For purposes of this section, the term "nonpublicly offered regulated investment company" means a regulated investment company to which Part I of Subchapter M of the Code applies that is not a publicly offered regulated investment company.

(ii) *Publicly offered regulated investment company.* For purposes of this section, the term "publicly offered regulated investment company" means a regulated investment company to which Part I of Subchapter M of the Code applies the shares of which are—

(A) Continuously offered pursuant to a public offering (within the meaning of section 4 of the Securities Act of 1933, as amended (15 U.S.C. 77a to 77aa)),

(B) Regularly traded on an established securities market, or

(C) Held by or for no fewer than 500 persons at all times during the taxable year.

(h) *Affected investor*—(1) *In general.* For purposes of this section, the term "affected investor" means a partner, shareholder, beneficiary, participant, or other interest holder in a pass-through entity at any time during the pass-through entity's taxable year that is—

(i) An individual (other than a nonresident alien whose income with respect to his or her interest in the pass-through entity is not effectively connected with the conduct of a trade or business within the United States),

(ii) A person, including a trust or estate, that computes its taxable income in the same manner as in the case of an individual; or

(iii) A pass-through entity if one or more of its partners, shareholders, beneficiaries, participants, or other interest holders is (A) a pass-through entity or (B) a person described in paragraph (h)(1) (i) or (ii) of this section.

(2) *Examples.* The provisions of this paragraph (h) may be illustrated by the following examples:

Example (1). Corporation X holds shares of nonpublicly offered regulated investment company R in its capacity as a nominee or custodian for individual A, the beneficial owner of the shares. Because the owner of the shares for Federal income tax purposes is an individual, the shares are owned by an affected investor.

Example (2). Individual retirement account I owns shares of a nonpublicly offered regulated investment company. Because an individual retirement account is not a person described in paragraph (h)(1) of this section, the shares are not owned by an affected investor.

(i) *Affected expenses— (1) In general.* In general, for purposes of this section, the term "affected expenses" means expenses that, if paid or incurred by an individual, would be deductible, if at all, as miscellaneous itemized deductions as defined in section 67(b).

(2) *Special rule for nonpublicly offered regulated investment companies.* In the case of a nonpublicly offered regulated investment company, the term "affected expenses" means only affected RIC expenses.

(j) *Affected RIC expenses*—(1) *In general.* In general, for purposes of this section the term "affected RIC expenses" means the excess of—

(i) The aggregate amount of the expenses (other than expenses described in sections 62(a)(3) and 67(b) and § 1.67–1T(b)) paid or incurred in the calendar year that are allowable as a deduction in determining the investment company taxable income (without regard to section 852(b)(2)(D)) of the nonpublicly offered regulated investment company for a taxable year that begins or ends with or within the calendar year, over

(ii) The amount of expenses taken into account under paragraph (j)(1)(i) of this section that are allocable to the following items (whether paid separately or included as part of a fee paid to an investment advisor or other person for a variety of services):

(A) Registration fees;

(B) Directors' or trustees' fees;

(C) Periodic meetings of directors, trustees, or shareholders;

(D) Transfer agent fees;

(E) Legal and accounting fees (other than fees for income tax return preparation or income tax advice); and

(F) Shareholder communications required by law (*e.g.* the preparation and mailing of prospectuses and proxy statements).

Expenses described in paragraph (j)(1)(ii) (A) through (F) of this section do not include, for example, expenses allocable to investment advice, marketing activities, shareholder communications and other services not specifically described in paragraph (j)(1)(ii) (A) through (F) of this section, and custodian fees.

(2) *Safe harbor.* If a nonpublicly offered regulated investment company makes an election under this paragraph (j)(2), the affected RIC expenses for a calendar year shall be treated as equal to 40 percent of the amount determined under paragraph (j)(1)(i) of this section for that calendar year. The nonpublicly offered regulated investment company shall make the election by attaching to its income tax return for the taxable year that includes the last day of the first calendar year for which the nonpublicly offered regulated investment company makes the election a statement that it is making an election under paragraph (j)(2) of this section. An election made pursuant to this paragraph (j)(2) shall remain in effect for all subsequent calendar years unless revoked with the consent of the Commissioner.

(3) *Reduction for unused RIC expenses.* The amount determined under paragraph (j)(1)(i) of this section shall be reduced by the nonpublicly offered regulated investment company's net operating loss, if any, for the taxable year ending with or within the calendar year. In computing the nonpublicly offered regulated investment company's net operating loss for purposes of this section, the deduction for dividends paid shall not be allowed and any net capital gain for the taxable year shall be excluded.

(4) *Exception.* The affected RIC expenses of a nonpublicly offered regulated investment company will be treated as zero if the amount of its gross income for the calendar year (determined without regard to capital gain net income) is not greater than 1 percent of the sum of (i) such gross income and (ii) the amount of its interest income for the calendar year that is not includible in gross income pursuant to section 103.

(k) *Allocation of expenses among nonpublicly offered regulated investment company shareholders*—(1) *General rule.* A nonpublicly offered regulated investment company shall allocate to each of its affected investors that is a shareholder at any time during the calendar year, the affected investor's allocable share of the affected RIC expenses of the nonpublicly offered regulated investment company for that calendar year. (See paragraph (m) of this section for rules regarding estimates with respect to the amount of an affected investor's share of affected RIC expenses upon which certain persons can rely for certain purposes.) A nonpublicly offered regulated investment company may use any reasonable method to make the allocation. A method of allocation shall not be reasonable if—

(i) The method can be expected to have the effect, if applied to all affected RIC expenses and all shareholders (whether or not affected investors), of allocating to the shareholders an amount of affected RIC expenses that is less than the affected RIC expenses of the nonpublicly offered regulated investment company for the calendar year,

(ii) The method can be expected to have the effect of allocating a disproportionately high share of the affected RIC expenses of the nonpublicly offered regulated investment company to shareholders that are not affected investors or affected investors, the amount of whose miscellaneous itemized deductions (including their allocable share of affected RIC expenses) exceeds the 2-percent floor described in section 67, or

(iii) A principal purpose of the method of allocation is to avoid allocating affected RIC expenses to persons described in paragraph (h)(1) (i) or (ii) of this section whose miscellaneous itemized deductions (inclusive of their allocable share of affected RIC expenses) may not exceed the 2-percent floor described in section 67.

(2) *Reasonable allocation method described*—(i) *In general.* The allocation method described in this paragraph (k)(2) shall be treated as a reasonable allocation method. Under the method described in this paragraph, an affected investor's allocable share of the affected RIC expenses of a nonpublicly offered regulated investment company is the amount that bears the same ratio to the amount of affected RIC expenses of the nonpublicly offered regulated investment company for the calendar year as—

(A) The amount of dividends paid to the affected investor during the calendar year, bears to

(B) The sum of—

(*1*) The aggregate amount of dividends paid by the nonpublicly offered regulated investment company during the calendar year to all shareholders, and

(*2*) Any amount on which tax is imposed under section 852(b)(1) for any taxable year of the nonpublicly offered regulated investment company ending within or with the calendar year.

(ii) *Exception.* Paragraph (k)(2)(i) of this section does not apply if the amount of the deduction for dividends paid during the calendar year is zero.

(iii) *Dividends paid.* For purposes of this paragraph (k)(2)—

(A) Dividends that are treated as paid during a calendar year pursuant to section 852(b)(7) are treated as paid during that calendar year and not during the succeeding calendar year.

(B) The term "dividends paid" does not include capital gain dividends (as defined in section 852(b)(3)(C)), exempt-interest dividends (as defined in section 852(b)(5)(A)), or any amount to which section 302(a) applies.

(C) The dividends paid during a calendar year is determined without regard to section 855(a).

(3) *Reasonable allocation made by District Director.* If a nonpublicly offered regulated investment company does not make a reasonable allocation of affected RIC expenses to its affected investors as required by paragraph (k)(1) of this section, a reasonable allocation shall be made by the District Director of the internal revenue district in which the principal place of business or principal office or agency of the nonpublicly offered regulated investment company is located.

(4) *Examples.* The provisions of this paragraph (k) may be illustrated by the following examples:

Example (1). Nonpublicly offered regulated investment company M, in calculating its investment company taxable income, claims a dividends paid deduction for a portion of redemption distributions (to which section 302(a) applies) to shareholders, as well as for nonredemption distributions. M allocates affected expenses among shareholders who have received nonredemption distributions by multiplying the amount of nonredemption distributions distributed to each shareholder by a fraction, the numerator of which is the affected RIC expenses of M and the denominator of which is M's investment company taxable income, determined on a calendar year basis and without regard to deductions described in section 852(b)(2)(D). No affected RIC expenses are allocated with respect to the redemption distributions. This allocation method can be expected to have the effect of allocating among the shareholders an amount of expenses that is less then the total amount of affected RIC expenses of M. Accordingly, the allocation method is not reasonable.

Example (2). Nonpublicly offered regulated investment company N has two classes of stock, a "capital" class and an "income" class. Owners of the capital class receive the benefit of all capital appreciation on the stocks owned by N, and bear the burden of certain capital expenditures of N; owners of the income class receive the benefit of all other income of N, and bear the burden of all expenses of N that are deductible under section 162. M allocates all affected RIC expenses among shareholders of the income class shares under a method that would be reasonable if the income class were the only class of N stock. Corporations and other shareholders that are not affected investors own a higher proportion of income class shares than of capital class shares. The affected RIC expenses of N are properly allocated among the shareholders who bear the burden of those expenses. Accordingly, the allocation method does not have the effect of allocating a disproportionately high share of the affected RIC expenses of N to shareholders that are not affected investors merely because a disproportionate share of income class shares are owned by shareholders that are not affected investors. The allocation method is reasonable.

Example (3). Nonpublicly offered regulated investment company O has two classes of stock, Class A and Class B. Shares of Class A, which may be purchased without payment of a sales or brokerage commission, are charged with the expenses of a Rule 12b–1 distribution plan of O. Shares of Class B, which may be purchased only upon payment of a sales or brokerage commission, are not charged with the expenses of the Rule 12b–1 distribution plan of O. O allocates all affected RIC expenses among shareholders of Class A and Class B shares under a method that would be reasonable if Class A or Class B shares, respectively, were the only class of O stock. The affected RIC expenses attributable to the Rule 12b–1 plan are allocated to the shareholders of Class A shares. Shareholders that are not affected investors own a higher proportion of Class A shares than of Class B shares. The affected RIC expenses of O are properly allocated among the shareholders who bear the burden of those expenses. Accordingly, the allocation method does not have the affect of allocating a disproportionately high share of the affected RIC expenses of O to shareholders that are not affected investors merely because a disproportionately high share of Class A shares are owned by persons that are not affected investors. The allocation method is reasonable.

Example (4). Assume the facts are the same as in example (3) except that a portion of the affected RIC expenses attributable to the Rule 12b–1 plan are allocated to the shareholders of Class B shares, and shareholders that are not affected investors own a higher proportion of Class B shares than of Class A shares. Thus, the affected RIC expenses are not allocated among the class of shareholders that bear the burden of the expenses. Accordingly, the allocation method has the effect of allocating a disproportionate share of the affected RIC expenses of O to the shareholders of Class B shares. Because shareholders that are not affected investors own a higher proportion of Class B shares than Class A shares, the method can be expected to allocate a disproportionately high share of the affected RIC expenses of O to shareholders that are not affected investors. Accordingly, the allocation method is not reasonable.

(l) *Affected RIC expenses not subject to backup withholding.* The amount of dividend income that an affected investor in a nonpublicly offered regulated investment company is treated as having received or accrued under paragraph (e)(1)(ii) of this section is not subject to backup withholding under section 3406.

(m) *Reliance by nominees and pass-through investors on notices*—(1) *General Rule.* Persons described in paragraph (m)(3) of this section may, for the purposes described in that paragraph (m)(3), treat an affected investor's allocable share of the affected RIC expenses of a nonpublicly offered regulated investment company as being equal to an amount determined by the nonpublicly offered regulated investment company on the basis of a reasonable estimate (*e.g.*, of allocable expenses as a percentage of dividend distributions or allocable expenses per share) that is (i) reported in writing by the nonpublicly offered regulated investment company to the person or (ii) reported in a newspaper or financial publication having a nationwide circulation (*e.g.*, the *Wall Street Journal* or *Standard and Poor's Weekly Dividend Record*).

(2) *Estimates must be reasonable.* In general, for purposes of paragraph (m)(1) of this section, estimates of affected RIC expenses of a nonpublicly offered regulated investment company will be treated as reasonable only if the nonpublicly offered regulated investment company makes a reasonable effort to offset material understatements (or overstatements) of affected RIC expenses for a period by increasing (or decreasing) estimates of affected RIC expenses for a subsequent period. Understatements or overstatements of affected RIC expenses that are not material may be corrected by making offsetting adjustments in future periods, provided that understatements and overstatements are treated consistently.

(3) *Application.* Paragraph (m)(1) of this section shall apply to the following persons for the following purposes:

(i) A nominee who, pursuant to section 6042(a)(1)(B) and paragraph (n)(2) of this section, is required to report dividends paid by a nonpublicly offered regulated investment company to the Internal Revenue Service and to the person to whom the payment is made, for purposes of reporting to the Internal Revenue Service and the person to whom the payment is made the amount of affected RIC expenses allocated to such person.

(ii) An affected investor to whom a nominee (to which paragraph (m)(3)(i) of this section applies) reports, for purposes of calculating the affected investor's taxable income and the amount of its affected expenses.

(iii) A shareholder that is a pass-through entity, for purposes of calculating its taxable income and the amount of its affected expenses.

(n) *Return of information and reporting to affected investors by a nonpublicly offered regulated investment company.*—(1) *In general*—(i) *Return of information.* A nonpublicly offered regulated investment company shall make an information return (*e.g.*, Form 1099–DIV, Dividends and Distributions, for 1987) with respect to each affected investor to which an allocation of affected RIC expenses is required to be made pursuant to paragraph (k) of this section and for which the nonpublicly offered regulated investment company is required to make an information return to the Internal Revenue Service pursuant to section 6042 (or would be required to make such information return but for the $10 threshold described in section 6042 (a)(1) (A) and (B). The nonpublicly offered regulated investment company shall make the information return for each calendar year and shall state separately on such return—

(A) The amount of affected RIC expenses required to be allocated to the affected investor for the calendar year pursuant to paragraph (k) of this section,

(B) The sum of—

(*1*) The aggregate amount of the dividends paid to the affected investor during the calendar year, and

(*2*) The amount of the affected RIC expenses required to be allocated to the affected investor for the calendar year pursuant to paragraph (k) of this section, and

(C) Such other information as may be specified by the form or its instructions.

(ii) *Statement to be furnished to affected investors.* A nonpublicly offered regulated investment company shall provide to each affected investor for each calendar year (whether or not the nonpublicly offered regulated investment company is required to make an information return with respect to the affected investor pursuant to section 6042), a written statement showing the following information:

(A) The information described in paragraph (n)(1)(i) of this section with respect to the affected investor;

(B) The name and address of the nonpublicly offered regulated investment company;

(C) The name and address of the affected investor; and

(D) If the nonpublicly offered regulated investment company is required to report the amount of the affected investor's allocation of affected RIC expense to the Internal Revenue Service pursuant to paragraph (n)(1)(i) of this section a statement to that effect.

(iii) *Affected investor's shares held by a nominee.* If an affected investor's shares in a nonpublicly offered regulated investment company are held in the name of a nominee, the nonpublicly offered regulated investment company may make the information return described in paragraph (n)(1)(i) of this section with respect to the nominee in lieu of the affected investor and may provide the written statement described in paragraph (n)(1)(ii) of this section to such nominee in lieu of the affected investor.

(2) *By a nominee*—(i) *In general.* Except as otherwise provided for in paragraph (n)(2)(iii) of this section, in any case in which a nonpublicly offered regulated investment company provides, pursuant to paragraph (n)(1)(iii) of this section, a written statement to the nominee of an affected investor for a calendar year, the nominee shall—

(A) If the nominee is required to make an information return pursuant to section 6042 (or would be required to make an information return but for the $10 threshold described in section 6042(a)(1) (A) and (B), make an information return (*e.g.*, Form 1099–DIV, Dividends and Distributions, for 1987) for the calendar year with respect to each affected investor and state separately on such information return the information described in paragraph (n)(1)(i) of this section, and

(B) Furnish each affected investor with a written statement for the calendar year showing the information required by paragraph (n)(2)(ii) of this section (whether or not the nominee is required to make an information return with respect to the affected investor pursuant to section 6042).

(ii) *Form of statement.* The written statement required to be furnished for a calendar year pursuant to paragraph (n)(2)(i)(B) of this section shall show the following information:

(A) The affected investor's proportionate share of the items described in paragraph (n)(1)(i) of this section for the calendar year,

(B) The name and address of the nominee,

(C) The name and address of the affected investor, and

(D) If the nominee is required to report the affected investor's share of the allocable investment expenses to the Internal Revenue Service pursuant to paragraph (n)(2)(i)(A) of this section, a statement to that effect.

(iii) *Return not required.* A nominee is not required to make an information return with respect to an affected investor pursuant to paragraph (n)(2)(i)(A) of this section if the nominee is excluded from the requirements of section 6042 pursuant to § 1.6042–2(a)(1)(ii) or (iii).

(iv) *Statement not required.* A nominee is not required to furnish a written statement to an affected investor pursuant to paragraph (n)(2)(i)(B) of this section if the nonpublicly offered regulated investment company furnishes the written statement to the affected investor pursuant to an agreement with the nominee described in § 1.6042–2(a)(1)(iii).

(v) *Special rule.* Paragraph (n)(1)(i) and (ii) of this section applies to a nonpublicly offered regulated investment company that agrees with the nominee to satisfy the requirements of section 6042 as described in § 1.6042–2(a)(1)(iii) with respect to the affected investor.

(3) *Time and place for furnishing returns.* The returns required by paragraph (n)(1)(i) and (2)(i)(A) of this section for any calendar year shall be filed at the time and place that a return required under section 6042 is required to be filed. See § 1.6042–2(c) .

(4) *Time for furnishing statements.* The statements required by paragraph (n)(1)(ii) and (2)(i)(B) of this section to be furnished by a nonpublicly offered regulated investment company and a nominee, respectively, to an affected investor for a calendar year shall be furnished to such affected investor on or before January 31 of the following year.

(5) *Duplicative returns and statements not required*—(i) *Information return.* The requirements of paragraph (n)(1)(i) and (2)(i)(A) of this section for the making of an information return shall be met by the timely filing of an information return pursuant to section 6042 that contains the information required by paragraph (n)(1)(i).

(ii) *Written statement.* The requirements of paragraph (n)(1)(ii) and (2)(i)(B) of this section for the furnishing of a written statement (including the statement required by paragraph (n)(1)(ii)(D) and (2)(ii)(D) of this section) shall be met by furnishing the affected investor a copy of the information return to which section 6042 applies (whether or not the nonpublicly offered regulated investment company or nominee is required to file an information return with respect to the affected investor pursuant to section 6042) that contains the information required by paragraph (n)(1)(ii) or (2)(ii), whichever is applicable, of this section. Nonpublicly offered regulated investment companies and nominees may use a substitute form that contains provisions substantially similar to those of the prescribed form if the nonpublicly offered regulated investment company or nominee complies with all revenue procedures relating to substitute forms in effect at the time. The statement shall be furnished either in person or in a statement mailed by first-class mail that includes adequate notice that the statement is enclosed. A statement shall be considered to be furnished to an affected investor within the meaning of this section if it is mailed to such affected investor at its last known address.

(o) *Return of information by a common trust fund.* With respect to each affected investor to which paragraph (d) of this section applies, the common trust fund shall state on the return it is required to make pursuant to section 6032 for its taxable year, the following information:

(1) The amount of the affected investor's proportionate share of the affected expenses for the taxable year as described in paragraph (d)(1)(ii) of this section.

(2) The amount of the affected investor's proportionate share of ordinary taxable income or ordinary net loss for the taxable year determined pursuant to paragraph (d)(1)(i) of this section, and

(3) Such information as may be specified by the form or its instructions.

(p) *Publicly offered regulated investment companies.* [Reserved]

§ 1.67–4T Allocation of expenses by nongrantor trusts and estates (temporary). [Reserved]

Par. 4. Section 1.162–1 is amended by adding a new paragraph (b)(7) to read as set forth below.

§ 1.162–1 Business expenses.

* * * * *

(b) *Cross references.* * * *

(7) For limitations on the deductibility of miscellaneous itemized deductions, see section 67 and §§ 1.67–1T through 1.67–4T.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 5. The authority for Part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

§ 602.101 [Amended]

Par. 6. Paragraph (c) of § 602.101 is amended by inserting in the appropriate place in the table

"§ 1.67–2T .... 1545–0110".

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

Approved:

O. Donaldson Chapoton,

Assistant Secretary of the Treasury.

March 8, 1988.

[FR Doc. 88–6471 Filed 3–25–88; 8:45 am]

BILLING CODE 4830-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 904

Approval of Permanent Regulatory Program Amendments for the State of Arkansas

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: OSMRE is announcing the approval, with certain exceptions, of proposed amendments submitted by the State of Arkansas as modifications to its permanent regulatory program (hereinafter referred to as the Arkansas program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments contain additions and/or revisions to parts of the Arkansas Surface Coal Mining and Reclamation Code (ASCMRC)

Subchapter A, General; Subchapter F, Areas Unsuitable for Mining; Subchapter G, Surface Coal Mining and Reclamation Operations, Permits and Coal Exploration Procedures Systems; Subchapter J, Bond and Insurance Requirements for Surface Coal Mining and Reclamation Operations; and Subchapter K, State Program Performance Standards that includes the inspection, enforcement, and civil penalty provisions of the Arkansas program.

EFFECTIVE DATE: March 28, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. James Moncrief, Director, Tulsa Field Office, Office of Surface Mining Reclamation and Enforcement, 5100 E. Skelly Drive, Suite 550, Tulsa, Oklahoma 74135, Telephone: (918) 581–6430.

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of the Interior approved the Arkansas program on November 21, 1980. Information pertinent to the permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions approval, can be found in the November 21, 1980 Federal Register (45 FR 77003). Subsequent actions concerning program amendments are identified at 30 CFR 904.10 and 904.15.

II. Submission of Program Amendments

On April 17, 1985, in accordance with the provisions of 30 CFR 732.17 (d), (e) and (f), OSMRE notified Arkansas of the changes necessary to ensure that the approved regulatory program was in accordance with SMCRA and no less effective than its implementing regulations, as revised since November 21, 1980, when the Arkansas program was originally approved. To comply with this letter, the State of Arkansas submitted proposed program amendments to OSMRE on March 18, 1986 (Administrative Record AR–302).

OSMRE announced receipt of the amendments in the April 15, 1986, Federal Register (51 FR 12713) and in the same notice, initiated a 30-day public comment period and provided an opportunity for a public hearing on the substantive adequacy of the proposed amendments. No public comments were received by May 15, 1986, the close of comment period, and because no one requested an opportunity to testify, no public hearing was held. During review of these amendments, OSMRE identified several concerns. A letter dated September 3, 1986, was sent to the State identifying substantive changes that were required for the Director to approve the amendments. In response to the letter, the State submitted a revised amendment to OSMRE on October 17, 1986 (Administrative Record No. AR–312). Because the resubmission contained several differences from the initial set of rules that were submitted on March 18, 1986, OSMRE reopened the public comment period on November 24, 1986 (51 FR 41128). No public comments were received by December 9, 1986, the close of the extended comment period.

Following a review of the Arkansas amendments, OSMRE notified the State on February 23, 1987, of its concerns regarding its amendments. A number of OSMRE concerns were based on the U.S. District Court for the District of Columbia decisions in *In Re: Permanent Surface Mining Regulation Litigation II*, Civil Action No. 79–1144 (hereinafter referred to as PSMRL II).

Arkansas, in a letter (Administrative Record AR–318) dated May 1, 1987, submitted the necessary changes, and additional changes in three sections. Due to the submission of the new sections, OSMRE again reopened a 30-day public comment period and provided opportunity for a public hearing on the new sections on July 21, 1987 (FR 27419). No public comments were received by August 20, 1987, the close of the comment period, and since no one requested to testify, no public hearing was held.

The amendment contains additions and/or revisions to the ASCMRC at the following Parts:

701	State program
761	Areas designated by Act of Congress
762	Criteria for designating areas as unsuitable for surface coal mining operations
764	State processes for designating areas unsuitable for surface coal mining operations
771	General requirements for permits and applications
772	Surface coal mining and reclamation operations affecting two acres or less
776	General requirements for coal exploration operations
779	Surface mining permit applications—minimum requirements for information on environmental resources
780	Surface mining permit applications—minimum requirement for reclamation and operation plan
784	Underground mining permit applications—minimum requirements for reclamation and operation plan
785	Requirements for permits for special categories of mining
786	Review, public participation, and approval or disapproval of permit applications and permit terms and conditions
788	Permit reviews, revisions, and renewals, and transfer, sale, and assignment of rights granted under permits
795	Small operator assistance
800	General requirements for bonding of surface coal mining and reclamation operations under the State program
805	Amount and duration of performance bond
806	Form, conditions, and terms of performance bonds and liability insurance
807	Procedures, criteria, and schedule for release of performance bond
808	Performance bond forfeiture criteria and procedures
815	State program performance standards—coal exploration and operations affecting 2 acres or less
816	Permanent program performance standards
819	Special State program performance standards—auger mining
823	Special State program performance standards—operations on prime farmland
826	Special State program performance standards—operations on steep slopes
827	Special State program performance standards—coal processing plants and support facilities not located at or near the minesite or not within the permit area for a mine
842	Inspections
843	Enforcement
845	Civil penalties
1000	Suspension notices

III. Director's Findings

Set forth below, pursuant to SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17, are the Director's findings concerning the amendments submitted by Arkansas on May 1, 1987. Only those revisions of particular interest are discussed. Any amendments not specifically discussed below are found to be no less stringent than SMCRA and no less effective than the Federal rules. Amendments that are not discussed contain language similar to the corresponding Federal rules, concern nonsubstantive wording changes, or involve provisions that lack a Federal counterpart and that do not adversely affect other aspects of the program. In the future, the Director may require further changes to these rules, or any other rules in the program, as a result of Federal regulatory revisions and court

decisions, and OSMRE's ongoing review of the Arkansas program.

Finding No. 1: ASCMRC Part 772, 2-Acre Exemption

The Arkansas regulations at ASCMRC Part 772 established the minimum general criteria for permits and permit application requirements for operations affecting 2 acres or less. On November 26, 1985, in accordance with the provisions of 30 CFR 732.17(f)(1), OSMRE notified Arkansas of changes necessary to ensure ASCMRC 772.2 was no less effective than the then current Federal requirements at 30 CFR 700.11 (b) and (c), regarding operations under the 2-acre exemption in section 528 of SMCRA. Arkansas made the required changes in its October 17, 1986 submission of proposed program amendments. Thereafter, Public Law 100–34 was signed into law on May 7, 1987, repealing the 2-acre exemption of section 528 of SMCRA, thereby pre-empting the Federal 2-acre exemption regulation and any State law or regulation that permits surface coal mining operations for commercial purposes on sites of 2 acres or less without satisfying the requirements of SMCRA. The Arkansas regulations addressing the 2-acre exemption were pre-empted by Pub. L. 100–34 and may no longer be enforced. Therefore, the Director is disapproving the amendments to ASCMRC 772.

Finding No. 2: ASCMRC Section 816.116(b)(3)(ii), Trees and Shrubs

Both Arkansas and OSMRE programs require that the period of responsibility for successful revegetation shall begin after the last year of augmented seeding, fertilizing, irrigation, or other work, except approved normal husbandry practices.

The District Court ruled (PSMRL II), that the administrative record did not show that the replanting of trees and shrubs is a normal husbandry practice. Consequently, replanting would either restart the period of responsibility for successful revegetation, or trees and shrubs replanted during the period could not be counted in determining the success of revegetation. In response to the court ruling, OSMRE suspended 30 CFR 816.116(b)(3)(ii) and 817.117(b)(3)(ii) on November 20, 1986, insofar as they authorized the counting of trees and shrubs which have been in place less than the full period of responsibility in determining the success of revegetation (51 FR 41952).

ASCMRC section 816.116(b)(3)(ii) provided, in part, that trees and shrubs in place for less than the full 5 year period of revegetation responsibility may be counted in determining success of tree and shrub stocking. The Director finds the Arkansas regulation ASCMRC section 816.116(b)(3)(ii) less effective than the Federal requirements and is disapproving the regulation. Arkansas must amend its regulations to be consistent with the Court's decision and subsequent actions taken by OSMRE, or resubmit the regulation with sufficient documentation in the record to show the replanting of trees and shrubs is a normal husbandry practice in Arkansas.

Finding No. 3: ASCMRC section 816.116(c)(4), Rills and Gullies

ASCMRC section 816.116(c)(4) allows approval of selective husbandry practices on reclaimed land without extending the period of responsibility for revegetation success or bond liability. Along with other requirements in the rule, the practices must be normal conservation practices for unmined lands of similar use in the region. The wording of the Arkansas regulation closely parallels the wording of OSMRE regulation 30 CFR 816.116(c)(4) and the Arkansas regulation is as effective as the OSMRE regulation.

OSMRE promulgated 30 CFR 816.116(c)(4) on September 2, 1983 (48 FR 40160). The preamble to the final rule explained that the practice of repair of rills and gullies, including reseeding or transplanting, could be approved under the rule without extending the period of responsibility for revegetation success. The practice could be approved only if it met applicable requirements in the regulation, including the requirement that it be a normal conservation practice in the region. The regulation was challenged and the District Court ruled in PSMRL II, that the record did not support the proposition that repair of rills and gullies is a normal conservation practice in any region of the country. In response to the court action, OSMRE suspended 30 CFR 816.116(c)(4) insofar as it permits the repair of rills and gullies without restarting the period of responsibility (51 FR 41962).

The Director is approving ASCMRC 816.116(c)(4) with the understanding that Arkansas will implement the rule with the same interpretation as the corresponding Federal regulation and prohibit the repair of rills and gullies without restarting the responsibility period. Therefore, the State of Arkansas cannot allow the repair of rills and gullies without restarting the responsibility period and the Director finds the Arkansas rule at ASCMRC 816.116(c)(4) is no less effective than the Federal rule.

Finding No. 4: ASCMRC 1000, Removal of Affirmative Disapprovals

On November 21, 1980 the Secretary gave conditional approval to the Arkansas program (FR 45 7703). In accordance with the decision of the U.S. District Court for the District of Columbia in *In Re: Permanent Surface Mining Regulation Litigation I* (Civil Action No. 79–1144) date May 16, 1980, the Secretary affirmatively disapproved, to some extent, Arkansas regulations at ASCMRC 761.11(c), 761.12(f)(1), 779.20, 780.16, 783.20 and 784.21. The affirmative disapproval was codified at 30 CFR 904.10(b) 5, 7, and 30.

ASCMRC 1000(6) originally suspended those provisions of ASCMRC 761.11(c) and 761.12(f)(1) that limit or prohibit mining that would adversely affect publicly owned parks and privately owned sites listed on the National Register of Historic Places. To be no less effective than the Federal rules at 30 CFR 761.11(c) and 761.12(f)(1), which extend protection to these areas, Arkansas reinstated the suspended provisions. Specifically, Arkansas deleted ASCMRC 1000(6). The Director finds the regulations to now be no less effective than 30 CFR 761.11(c) and 761.12(f)(1). OSMRE will revise 30 CFR 904.10(b)(5) to remove the affirmative disapproval originally placed on these State provisions.

On February 21, 1985, OSMRE reinstated its permitting requirements for fish and wildlife resource information and protection plans (50 FR 7278). To be no less effective than the reinstated Federal rules at 30 CFR 779.20, 780.16, 783.20, and 784.21, Arkansas revised ASCMRC Part 1000 to remove its suspension of the corresponding State rules, ASCMRC 779.20, 780.16, 783.20, and 784.21. Specifically, Arkansas deleted ASCMRC 1000(10), (13), (16), and (19). The Director finds the regulations now to be no less effective than 30 CFR 779.20, 780.16, 783.20, and 784.21. OSMRE will revise 30 CFR 904.10(b)(7) to remove the affirmative disapproval originally placed on these rules.

Finding No. 5: ASCMRC 1000, Crop Production

ASCMRC 1000(50) and (51) suspend ASCMRC 823.11(c) and 823.15 (b) and (c) insofar as they require actual crop production from reclaimed prime farmlands. However, the Federal regulations at 30 CFR 785.17(e)(1) allow the issuance of a permit for the mining and reclamation of prime farmland only if the approved postmining land use is cropland. Furthermore, revised 30 CFR

OL
53
SS
59
MR
28
988
MI

823.15(b) requires that prime farmland soil productivity restoration be measured on all or a representative sample of the reclaimed lands using actual crop yields. Therefore, to be no less effective that the Federal rules, Arkansas was required to remove the suspension of ASCMRC 823.11(c), 823.15 (b) and (c) described in ASCMRC 1000(50) and (51).

In preparation of the issue letter of September 3, 1986 (AR-332), OSMRE inadvertently overlooked the requirement to remove ASCMRC 1000(50). Arkansas did remove ASCMRC 1000(51) and that action is approved in this final rule. However, the Director finds the ASCMRC 1000(50) suspension of Arkansas regulation ASCMRC 823.11(c) less effective than the Federal requirements and Arkansas must remove the rule suspension at ASCMRC 1000(50) as well. OSMRE will then revise 30 CFR 904.10(b)(30) to reflect the deletion of ASCMRC 1000(51) and remove the affirmative disapproval originally placed on these Arkansas provisions.

IV. Public Comment

The Director solicited public comment on the proposed amendment and provided opportunity for a public hearing. No comments were received. Because no one requested an opportunity to testify at a public hearing, no hearing was held. Pursuant to section 503(b) of SMCRA and 30 CFR 732.17(h)(10)(i), comments were also solicited from various State and Federal agencies. No comments were received.

V. EPA Concurrence

OSMRE requested the concurrence of Environmental Protection Agency (EPA) on those aspects of the amendments submitted by Arkansas which relate to air or water quality standards promulgated under the authority of the Clean Water Act, as amended (33 U.S.C. 1251 *et seq.*) and the Clean Air Act, as amended (42 U.S.C. 7401 *et seq*). In accordance with section 503(b) of SMCRA, OSMRE is required to obtain the concurrence of the EPA. OSMRE received EPA's letter of concurrence dated June 15, 1987 and has entered it in the Administrative Record as AR-322.

VI. Director's Decision

Based on the above findings, and with the exception of those provisions determined to be inconsistent with SMCRA or the Federal regulations, the Director is approving the proposed amendments submitted to OSMRE by Arkansas on May 1, 1987, provided that Arkansas promulgates these regulations in a form identical, with the exception of typographical errors, to that May 1, 1987 submission.

The Director is disapproving the following provisions of the proposed amendments:

(1) As discussed in finding number 1, ASCMRC Part 772, concerning the 2-acre exemption rule.

(2) As discussed in finding number 2, ASCMRC section 816.116(b)(3)(ii), concerning the counting of trees and shrubs in determining revegetation success.

The Director is requiring the following amendments:

(1) Arkansas must amend its regulations at ASCMRC section 816.116(b)(3)(ii) to be consistent with OSMRE's actions, or resubmit the regulation at ASCMRC 816.116(b)(3)(ii) with sufficient documentation in the record to show the replanting of trees and shrubs is a normal husbandry practice in the State of Arkansas.

(2) Arkansas must amend its regulations at ASCMRC 1000(51) to remove the suspension of ASCMRC 823.11(c).

The Director is amending Part 904 of 30 CFR Chapter VII to implement this decision.

VII. Procedural Requirements

1. *Compliance with the National Environmental Policy Act*

The Secretary has determined that pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act*

On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of a State regulatory program. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review of OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq*). This rule would not impose any new requirements; rather it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act*

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 904

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Date: March 17, 1988.

Brent Walquist,

Acting Deputy Director, Operations and Technical Services, Office of Surface Mining Reclamation and Enforcement.

For the reasons set out in the preamble, Title 30, Chapter VII, Subchapter T, of the Code of Federal Regulations is amended as set forth below:

PART 904—ARKANSAS

1. The authority citation for Part 904 continues to read as follows:

Authority: Pub. L. 95-87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq*).

2. Section 904.10 is amended by revising paragraphs (a) (1), (2) and (3), and (b)(30) and by removing and reserving paragraphs (b)(5) and (b)(7) as follows:

§ 904.10 State regulatory program approval.

(a) * * *

(1) Arkansas Department of Pollution Control and Ecology, Mining Reclamation Division, 8001 National Drive, Little Rock, Arkansas 72209, Telephone (501) 562-7444.

(2) Office of Surface Mining Reclamation and Enforcement, Tulsa Field Office, 5100 E. Skelly Drive, Suite 550, Tulsa, Oklahoma 74135, Telephone (918) 581-6430.

(3) Office of Surface Mining Reclamation and Enforcement, 1100 L Street NW., Room 5131, Washington, DC 20240, telephone (202) 343-5447.

(b) * * *

(30) Section 823.11(c) to the extent it requires an operator on prime farmland to actually return the land to crop production.

* * * * *

3. Section 904.12 is added to read as follows:

§ 904.12 State program provisions and amendments disapproved.

The following amendments to the Arkansas Surface Coal Mining and Reclamation Code as submitted to OSMRE on May 1, 1987, are hereby disapproved:

(a) ASCMRC Part 772, all revisions and additions which address surface coal mining and reclamation operations previously exempted under the 2-acre exemption rule of section 528 of SMCRA.

(b) ASCMRC section 816.116(b)(3)(ii), revisions to the extent that they allow trees and shrubs in place for less than the liability period to be used in determining the success of stocking and the adequacy of plant arrangement.

4. Section 904.15 is amended by adding a new paragraph (d) as follows:

§ 904.15 Approval of amendments to State regulatory program.

* * * * *

(d) The following amendments to the Arkansas Surface Mining and Reclamation Code, as submitted to OSMRE on May 1, 1987, are approved effective March 28, 1988. Revisions to Arkansas regulations at Sections:

701.5

This approval is contingent upon the State's promulgation of the proposed regulations in the identical form submitted for OSMRE's review and approval with the exception of typographical errors.

5. Section 904.16 is amended by removing the reserved status and adding the following:

§ 904.16 Required program amendments.

Pursuant to 30 CFR 732.17 Arkansas is required to make the following program amendments:

(a) By May 27, 1988, Arkansas shall amend its regulations at ASCMRC section 816.116(b)(3)(ii) to be consistent with OSMRE's actions, or resubmit the proposed regulation at ASCMRC 816.116(b)(3)(ii) with sufficient documentation in the record to show the replanting of trees and shrubs is a normal husbandry practice in the State of Arkansas.

(b) By May 27, 1988, Arkansas shall revise its regulations at ASCMRC 1000(51) to remove the suspension of ASCMRC 823.11(c).

6. Section 904.20 is revised as follows:

§ 904.20 Approval of Arkansas abandoned mine land reclamation plan.

The Arkansas Reclamation Plan, as submitted on July 7, 1982, is approved. Copies of the approved program are available at:

---

30 CFR Part 944

Approval of Amendment to Utah Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: OSMRE is announcing approval of an amendment to the Utah permanent regulatory program (hereinafter referred to as the Utah program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or "the Act"). The amendment pertains to civil penalty assessments.

EFFECTIVE DATE: March 28, 1988.

FOR FURTHER INFORMATION CONTACT: Robert H. Hagen, Director, Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 625 Silver Avenue, SW., Suite 310, Albuquerque, NM 87102 (Telephone (505) 766-1486).

SUPPLEMENTARY INFORMATION:

I. Background

The Utah program was conditionally approved by the Secretary of the Interior, effective January 21, 1981, by notice published in the **Federal Register** (46 FR 5913). Information regarding the general background, revisions, modifications, and amendments to the Utah program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Utah program, can also be found in the January 21, 1981 **Federal Register**. Actions taken subsequent to the approval of the Utah program may be found at 30 CFR 944.15 and 944.16.

II. Discussion of the Amendments

On February 17, 1987, Utah submitted a proposed amendment to the Utah regulations for OSMRE's review and approval (Administrative Record No. UT-436). The amendment would add a paragraph at SMC/UMC 845.15(b)(2) providing that a penalty for failure to abate a violation shall not be assessed

BEST COPY AVAILABLE

for more than 30 days for each violation and that, if the permittee has not abated a violation within the 30-day period, the Division of Oil, Gas and Mining (Division) will, within 30 days, appeal such noncompliance to the Board of Oil, Gas and Mining ("the Board") for resolution under Utah H.B. 138, Chapter 10, Sections 40–10–20(5) (criminal penalties), 40–10–20(6) (individual civil penalties), 40–10–22(1)(d) (permit suspension or revocation), 40–10–22(2) (civil action), or by other appropriate means.

On March 27, 1987, OSMRE published a notice in the **Federal Register** announcing receipt of the proposed amendment and inviting public comment (52 FR 9891, Administrative Record No. UT–445). The notice stated that a public hearing would be held on April 21, 1987, only if requested. Since there were no requests for a hearing, a hearing was not held. The comment period closed on April 27, 1987. After reviewing the proposed amendment and all comments received, OSMRE notified Utah on June 10, 1987, of a provision that appeared to be inconsistent with the Federal regulations (Administrative Record No. UT–453). By letter dated July 7, 1987, Utah provided clarification (Administrative Record No. UT–455). OSMRE requested additional clarification by letter to Utah dated August 7, 1987 (Administrative Record No. UT–456). Utah responded to this request by letter dated August 31, 1987, by proposing revised language and providing further clarification of the amendment provisions (Administrative Record No. UT–457).

OSMRE therefore reopened and extended the comment period to allow the public an opportunity to comment on the additional material (52 FR 41738, October 30, 1987). The comment period closed on November 16, 1987. No substantive comments were received. On January 8, 1988, Utah submitted final rules SMC/UMC 845.15(b)(2) for review (Administrative Record No. UT–480). The final rule was not substantially different from the proposed rule (Administrative Record No. UT–457).

III. Director's Findings

The Director finds, in accordance with SMCRA, 30 CFR 732.15, and 30 CFR 732.17, that the program amendment submitted by Utah on February 17, 1987, subsequently revised and clarified on August 31, 1987, and submitted in final form on January 8, 1988, meets the requirements of SMCRA and 30 CFR Chapter VII as discussed below. The Director is approving the rules with the provision that they be implemented in a manner that is no less effective than the Federal regulations and no less stringent than SMCRA.

Utah proposes to amend section SMC/UMC 845.15 of its regulations by redesignating the current contents of paragraph (b)(2) as (b)(1)(ii) and adding a new paragraph (b)(2). As amended, SMC/UMC 845.15(b)(2) provides that any daily penalty for failure to abate a violation shall not be assessed for more than 30 days for each violation. The proposed amendment further provides that, if the violation remains unabated after 30 days, the Division of Oil, Gas and Mining will be required within 30 days thereafter to appeal such noncompliance to the Board of Oil, Gas and Mining for resolution under Utah H. B. 136, Chapter 10, Sections 40–10–20(5) (criminal penalties), 40–10–20(6) (individual civil penalties), 40–10–22(1)(d) (permit suspension or revocation), 40–10–22(2) (civil action), or by other appropriate means.

The corresponding Federal regulations at 30 CFR 845.15(b)(2) also provides a 30-day cap on civil penalties and requires, if the violation remains unabated after 30 days, that alternative enforcement action be initiated within 30 days. The Federal regulation specifies that such action is to be taken pursuant to section 518(e) (criminal penalties), 518(f) (individual civil penalties), 521(a)(4) (permit suspension or revocation), or 521(c) (civil action) of SMCRA.

The requirements of the Utah and Federal rules are the same with one exception. The Federal rule limits alternative enforcement actions or remedies to those enumerated, while the Utah rule allows the use of other appropriate means. By letter dated August 31, 1987, Utah provided a written opinion dated August 28, 1987, from the Office of the Utah Attorney General (Administrative Record No. UT–457) to support its inclusion of the phrase "or by other appropriate means." This opinion: (1) Reiterates the statutory provisions of section 518(i) of the Act that allows States to implement additional enforcement rights or procedures that are not specifically enumerated in the Act; (2) states that the proposed language does not allow Utah the latitude to select alternative remedies that are less effective than the Federal regulations, and that, "* * * since Utah may apply the rule in an 'as effective as' manner, the rule should stand as written unless it is later determined that it has been applied less effectively;" and (3) identifies two additional unenumerated remedies available to the State as being no less effective than the Federal rule.

OSMRE agrees with the Assistant Attorney General that States may implement additional enforcement rights or procedures that are not specifically enumerated in the State or Federal program. Utah may, without program amendment, adopt additional enforcement rights and procedures, such as the two discussed in the Assistant Attorney General's opinion, beyond the four statutory remedies enumerated in the State and Federal programs. On the other hand, Utah cannot adopt enforcement rights and procedures in lieu of the enumerated statutory remedies without program amendment. Any approved alternative to these statutory remedies must be no less stringent than the statutory sanctions and must be no less effective in achieving the purpose of 30 CFR 845.15(b)(2), namely, ensuring abatement of the violation or that there will not be a recurrence of the failure to abate. Therefore, the Director finds that the amendment is no less effective than the Federal requirements, provided that Utah submits any alternative enforcement remedies in lieu of those specifically enumerated in the State and Federal programs, for OSMRE review and approval prior to implementation.

IV. Public Comments

No public comments were received and all agencies responding to these proposed regulations had no comment. Acknowledgements were received from the following Federal agencies: The Fish and Wildlife Service, the Bureau of Mines, the Soil Conservation Service, and the Environmental Protection Agency. This disclosure of Federal agency comments is made pursuant to section 503(b)(1) of SMCRA and 30 CFR 732.17(h)(10(i).

V. Director's Decision

The Director, based on the above findings, is approving the amendments as submitted by Utah on February 17, 1987, revised and clarified on August 31, 1987, and submitted in final form on January 8, 1988. The Director is amending Part 944 of Chapter VII to reflect approval of the State program amendments. This final rule is being made effective immediately to expedite the State program amendment process and to encourage States to conform their programs to the Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

VI. Procedural Matters

1. Compliance with the National Environmental Policy Act

The Secretary has determined that pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Executive Order No. 12291 and the Regulatory Flexibility Act

On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 944

Coal mining, Intergovernmental relations, Surface Mining, Underground Mining.

Date: March 17, 1988.

Brent Walquist,

Acting Deputy Director, Operations and Technical Services, Office of Surface Mining Reclamation and Enforcement.

For the reasons set out in the preamble, Title 30, Chapter VII, Subchapter T of the Code of Federal Regulations is amended as set forth below.

PART 944—UTAH

1. The authority citation for Part 944 is revised to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. Section 944.15 is amended by adding a new paragraph (l) to read as follows:

§ 944.15 Approval of amendments to State regulatory program.

* * * * *

(l) The following amendment is approved effective March 28, 1988: Modification to the Utah State Program regulations submitted to OSMRE by Utah on January 8, 1988. The modification was as follows: redesignation of the existing SMC/UMC 845.15 (b)(2) as (b)(1)(ii) and adding a new paragraph (b)(2) to provide for a 30-day cap on civil penalty assessments.

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD5-87-055]

Drawbridge Operations Regulations; Kent Island Narrows, MD

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the Maryland Congressional Delegation, the Governor of Maryland, and the Maryland Department of Transportation, the Coast Guard is changing the regulations governing operation of the drawbridge on U.S. Route 50/301 across Kent Island Narrows near Grasonville, Maryland, by eliminating bridge openings during peak vehicular traffic periods on weekends during the summer months. This amendment also adds one afternoon opening on Sundays and Monday holidays, and extends the Saturday opening schedule to Fridays, when Friday is a holiday. The Friday schedule will be in effect on the Thursdays before Friday holidays. This action will relieve some of the serious traffic conditions that result on summer weekends, while providing for the reasonable needs of navigation.

EFFECTIVE DATE: These regulations become effective on May 1, 1988.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, (804) 398-6222.

SUPPLEMENTARY INFORMATION: On May 8, 1987, a notice of proposed rulemaking was published in the **Federal Register** (52 FR 17413) concerning this bridge. The Commander, Fifth Coast Guard District, also published the proposal as a Public Notice dated May 1, 1987.

On July 7, 1987, a supplemental notice of proposed rulemaking was published in the **Federal Register** (52 FR 25386). The Commander, Fifth Coast Guard District, also published the supplemental proposal as a Public Notice dated July 10, 1987. In both notices, interested persons were given until November 30, 1987, to submit comments. On June 4, 1987, a public hearing was held in Stevensville, Maryland, to receive additional public comments.

Temporary regulations were issued in response to both the original notice of proposed rulemaking and the supplemental notice of proposed rulemaking in order to evaluate the proposals and alternative schedules. These temporary rules were published in the **Federal Register** on May 14, 1987 (52 FR 18229) and July 14, 1987 (52 FR 26341), respectively.

Drafting Information

The drafters of these regulations are Ann B. Deaton, Project Officer, and CDR Robert J. Reining, Project Attorney.

Discussion of Comments

The Coast Guard received 52 written comments in response to the notice of proposed rulemaking. These comments and the results of the public hearing were discussed in the supplemental notice of proposed rulemaking published.

Three comments were received in response to the supplemental notice of proposed rulemaking. One was from a private boat owner applauding the addition of the 3:30 p.m. opening on Sundays, stating that this opening will be of substantial assistance to boaters. Another comment was from a motorist who believes that the change will substantially improve highway traffic conditions on U.S. 50/301 during the summer. The final comment from the Boat Owners Association of the United States objected to any further restrictions on the opening of this bridge. Their position was that the elimination of a few openings will do little to improve weekend traffic jams that are simply caused by too many cars on an inadequate roadway.

The results of our contacts with marine-related businesses in the area and boat owners who routinely transit Kent Narrows show that the majority of these interests accept the elimination of the 9:00 a.m. opening on Saturdays, and are pleased with the 3:30 p.m. opening on Sunday, as compared to no opening on Sunday afternoons or evenings as originally proposed by the State of Maryland. In addition, all of our data showed that highway traffic along U.S. 50/301 is particularly heavy at 9:00 a.m. on Saturdays and 8:00 p.m. on Sundays. Openings at these times are being eliminated. The data further showed that highway traffic counts on Sundays were lower at 3:30 p.m., than at other times that would provide meaningful access to boaters. The results of tests

OL
53
ISS
59
MR
28
988
MI

run during the summer of 1987 show that the schedule being adopted does show some improvement in highway traffic flow over the previous opening schedule.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under the Department of Transportation's regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. This conclusion is based on the fact that the regulations will have no effect on commercial navigation or on any industries that depend on waterborne transportation. The economic impact on marinas and other small, water-related businesses in the Kent Island area has been found not to be significant. Since the economic impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

Bridges.

Regulations

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499, 49 CFR 1.46; 33 CFR 1.05-1(g).

2. In § 117.561, the introductory paragraph, paragraphs (b) (1) through (4) and the introductory text of paragraph (b), and paragraph (c) are revised to read as follows:

§ 117.561 Kent Island Narrows

The draw of the U.S. Route 50/301 bridge, mile 1.0, Kent Island Narrows, operates as follows:

* * * * *

(b) From May 1 through October 31:

(1) On Monday (except when Monday is a holiday) through Thursday (except when Thursday is the day before a Friday holiday), the draw shall open on signal on the hour from 7 a.m. to 7 p.m., but need not be opened at any other time.

(2) On Friday (except when Friday is a holiday) and on Thursday when it is the day before a Friday holiday, the draw shall open on signal on the hour from 6 a.m. to 3 p.m. and at 8 p.m., but need not be opened at any other time.

(3) On Saturday and on a Friday holiday, the draw shall open on signal at 6 a.m. and 12 noon and on signal on the hour from 3 p.m. to 8 p.m., but need not be opened at any other time.

(4) On Sunday and on a Monday holiday, the draw shall open on signal on the hour from 6 a.m. to 1 p.m. and at 3:30 p.m., but need not be opened at any other time.

* * * * *

(c) The draw shall open on signal for public vessels of the United States, State, or local government vessels used for public safety purposes, commercial vessels, and vessels in distress.

Dated: March 18, 1988.

R.M. Polant,

Captain, U.S. Coast Guard, Acting Commander, Fifth Coast Guard District.

BILLING CODE 4910-14-M

POSTAL SERVICE

39 CFR Part 111

New Domestic Mail Manual Regulations To Implement Changes in Rates, Fees and Classifications

AGENCY: Postal Service.

ACTION: Final rule and request for comments.

SUMMARY: As announced elsewhere in today's issue of the **Federal Register**, new domestic postal rates, fees, and classifications are scheduled to take effect on April 3, 1988, at 12:01 a.m. Implementing regulations for these rate, fee, and classification changes have been developed and are set forth below. Although they are to take effect on April 3, 1988, except for regulations on the computation of nonsubscriber and nonrequester copy limits, which are effective on January 1, 1989, comments on these regulations are solicited, and any proposed changes will be considered and acted upon as appropriate. In addition, the interim regulations that became effective October 25, 1987, allowing registered mail service and merchandise return service to be used with each other, and allowing special handling and merchandise return service to be used with each other are adopted in final form without change.

EFFECTIVE DATES: April 3, 1988, except the regulations on the computation of nonsubscriber and nonrequester copy limits, which become effective January 1, 1989. *Comment Date:* Written comments on these implementing regulations should be received on or before May 3, 1988.

ADDRESS: Written comments should be directed to the Director, Office of Classification and Rates Administration, Rates and Classification Department, U.S. Postal Service, 475 L'Enfant Plaza West SW., Washington, DC 20260-5360. Copies of written comments received will be available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in Room 8430, 475 L'Enfant Plaza West SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Lynn Martin, (202) 268-5176.

SUPPLEMENTARY INFORMATION: In addition to incorporating in the Domestic Mail Manual the new rates and fees approved by the Governors of the Postal Service, these implementing regulations also include new provisions that are necessary to implement the various mail classification changes also approved by the Governors. The following is a summary of the changes made to the Domestic Mail Manual as a result of the rate, fee, and classification changes.

A. First-Class Mail

1. *General.* All rates, except Priority Mail, will change.

NOTE: All rates in the Domestic Mail Manual (DMM) are now expressed in dollars (as opposed to being expressed in cents). Do NOT Move the decimal two places to the left before computing postage.

2. *Single Piece Rate First-Class Mail (Other than Cards).* There is a change in the rate structure. These rates will apply only to pieces weighing 11 ounces or less.

3. *Presorted First-Class Rate.* There is a change in the rate structure. For pieces weighing over two ounces, a lower rate for the first ounce is prescribed. See Exhibit 310.

4. *ZIP + 4 Presort Rate.* The tolerance for the placement of the barcode in the barcode clear zone, for those wishing to barcode as an option in a ZIP + 4 Presort mailing, has been relaxed.

5. *ZIP + 4 Barcoded Rate.* A new ZIP + 4 Barcoded rate is established. See DMM 325.

6. *Carrier Route First-Class Rate.* There is a change in the rate structure. For pieces weighing over two ounces, a lower rate for the first ounce is prescribed. See Exhibit 310.

7. *Priority Mail Nonmenclature.* The name "Zone Rate (Priority) First-Class Mail" is changed to "Priority Mail." Priority Mail rates will now apply to all single piece First-Class pieces weighing more than 11 ounces. (Pieces at lower

weights may also be mailed at Priority Mail rates at the mailer's option.)

8. *Nonstandard Surcharge.* A lower surcharge of $0.05 per piece has been established for nonstandard pieces mailed at the Presorted First-Class and Carrier Route First-Class rates. The surcharge remains at $0.10 for nonstandard size pieces at the single piece rates.

B. Express mail

1. *General.* All rates change.

2. *Rate Structure Changes.* a. A new lower letter rate for up to ½ pound is now available for all service options. The Post Office to Addressee letter rate is $8.75.

b. Zones are eliminated for all weights.

c. Custom Designed Service rates are lowered.

3. *Pick-up Service.* On-call pickup service may be provided in addition to scheduled pickup at designated postal facilities. A new pickup fee of $4.00 per stop is available for all service options.

4. *Second-Day Service Added.* A Second-Day Express Mail Service to resolve off-net problems is added.

5. *Noon Delivery.* Postage refund guarantee is extended to include noon delivery within the major market network.

C. Second-Class Mail

1. *General.* All rates change.

Note: All rates in the DMM are now expressed in dollars (as opposed to being expressed in cents). To compute second-class postage, multiply the applicable postage (which is in dollars) times the appropriate number of pounds or pieces. DO NOT move the decimal two places to the left before computing postage.

2. *Rate Structure Change.* The outside county per piece discount for the nonadvertising portion of publications (the nonadvertising adjustment) is increased for regular rate and science-of-agriculture rate publications, and a nonadvertising adjustment is added for special nonprofit and classroom rate publications.

3. *Mailing Statement Submission for Combined Mailings.* For mailings that include more than one second-class publication and/or edition, separate mailing statements for each publication and/or edition in the mailing will be required. See 468.4.

4. *Computation of Nonsubscriber and Nonrequester Copy Limits.* Effective January 1, 1989, the 10 percent limits on (a) the number of nonsubscriber copies eligible for preferred rates, and (b) the number of nonsubscriber/nonrequester copies eligible for subscriber/requester rates without being commingled with subscriber or requester copies, will be applied to the number of copies, as opposed to the weight of copies, mailed to subscribers/requesters during the calendar year.

D. Third-Class Mail

1. *General.* All rates change.

Note: All rates in the DMM are now expressed in dollars (as opposed to being expressed in cents). DO NOT move the decimal two places to the left before computing postage.

2. *Sorting Requirements for 5-Digit Presort Level Rate.* Third-class 5-digit presort level rate sorting requirements are revised to eliminate the requirement that there be at least 10 pounds or 50 pieces for any 5-digit ZIP Code separation in non-unique 3-digit sacks. Packages of 10 or more pieces to a 5-digit ZIP Code in a 3-digit sack will qualify for this rate in accordance with 667.42.

3. *New Basic ZIP + 4 Rate.* A new basic ZIP + 4 rate is established. See DMM 622.14 and 662.4.

4. *New 5-Digit ZIP + 4 Rate.* A new 5-digit ZIP + 4 rate is established. See DMM 622.15 and 662.5.

5. *New ZIP + 4 Barcoded Rate.* A new ZIP + 4 barcoded rate is established. See DMM 622.16 and 662.6.

6. *Required Marking for Special Bulk Third-Class Rates.* The option to show the Marking "Nonprofit" instead of "Nonprofit Org." on pieces mailed by organizations authorized the special bulk third-class rates has been added to DMM 662.2b.

E. Fourth-Class Mail

1. *General.* All rates change.

Note: All rates in the DMM are now expressed in dollars (as opposed to being expressed in cents). DO NOT move the decimal two places to the left before computing postage.

F. Special Services

1. *General.* All fees are increased except for: Merchandise Return Service fees which are reduced, Money Order Fees (see also change noted in item 5), corrections to mailing lists (including lists corrected in conjunction with sequencing of address cards), and address changes provided to election boards and registration commissions, which remain the same.

2. *New Business Reply Mail Discount Category (BRMAS).* A new discount category is available for ZIP + 4 prebarcoded business reply mail paid for through a business reply account (requires payment of a permit and accounting fee). See 917.14, 917.213, 917.343a, 917.525, 917.528, and 917.6.

3. *Merchandise Return Service.* Temporary changes adding registry service and special handling as service options in conjunction with merchandise return service are made permanent. Interim regulations implementing these new service options were put into effect on October 25, 1987 (52 FR 38407). These interim regulations are adopted without change as final regulations. Since they are already in the Domestic Mail Manual, they are not being republished here.

4. *Insured Mail.* The fee structure is changed. A $0.70 fee will insure items valued at $50 or less.

5. *Money Orders.* The upper dollar value limit for the first category of money order fees changes from $25 to $35.

6. *New Return Receipt for Merchandise Service.* A new return receipt service, that may be obtained without any other special service, is added for merchandise mailed at Priority Mail, third-class, and fourth-class parcel post rates.

H. Stamped Envelopes

1. *Sizes.* Additional sizes are added to all product lines.

2. *New Double Window Envelopes.*

3. *Envelopes in "Household Quantities."* Printed envelopes (both regular and window) will be available in quantities of 50. A double window envelope will also be available in quantities of 50.

I. Annual Fees

1. *General.* All annual fees increase.

2. *Fee Payment Structure.* The fee payment structure for all annual fees changes from once each calendar year to once each year effective with the month and day of payment. The following fees are affected by this change.

a. Annual Presort Fee (First-Class).

b. Annual Bulk Mailing Fee (Third Class).

c. Annual Presorted Special Fourth-Class Mailing Fee.

d. Annual Business Reply Mail Permit Renewal Fee.

e. Annual Business Reply Mail Accounting Fee.

f. Annual Merchandise Return Service Permit Fee.

Although exempt from the requirements of the Administrative Procedure Act (5 U.S.C. 553(b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), the Postal Service ordinarily invites comment from the public whenever it proposes a new or amended regulation which might have a substantive effect on the public. In this instance, however, the Governor's decision approving the underlying mail classification changes reflected in the new or amended regulations set forth below followed ten months of on-the-record hearings at the Postal Rate Commission (Docket No. R87–1, see 39 U.S.C. 3624). Interested parties had a full opportunity to comment on those changes during the course of those hearings.

Accordingly, the Postal Service finds it unnecessary to follow its customary practice of publishing the rules set forth below as proposed rules for comment before they become effective. See 5 U.S.C. 553(d). However, we reiterate that comments are welcomed on the published rules, and that any proposed changes will be considered and acted upon as appropriate.

A transmittal letter making these changes in the pages of the Domestic Mail Manual will be published and will be transmitted to subscribers automatically. These changes will be published in the Federal Register as provided in 39 CFR 111.3.

In view of the considerations discussed above, the Postal Service hereby adopts the following revisions to the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 111.1.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

PART 111—[AMENDED]

1. The authority citation for 39 CFR Part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 403, 404, 3001–3011, 3201–3219, 3403–3406, 3621, 5001.

2. The Domestic Mail Manual is amended to read as follows:

BILLING CODE 7710-12-M

Chapter 1
Domestic Mail Services

* * * * *

137 Official Mail

* * * * *

137.2 Penalty Mail - Executive and Judicial Officers

* * * * *

.26 Services, Classes, Rates and Preparation Requirements

* * * * *

.263 Mail Preparation

* * * * *

b. Bulk Rate Mailings

* * * * *

(3) Rate Eligibility and Presort. Mailings at the First-Class ZIP + 4 nonpresort rate; Presort First-Class rates (ZIP + 4 Presort, ZIP + 4 Barcoded, First-Class carrier route, Presorted First-Class); second-class rates; bulk third-class rates (basic, 5-digit, carrier route presort, basic ZIP + 4, 5-digit ZIP + 4, ZIP + 4 Barcoded); presorted special fourth-class rates, bulk bound printed matter rates, and carrier route bulk bound printed matter rates must meet the same eligibility requirements for these rates as mail of other mailers (see 323, 324, 325, 420, 622, 723, and 724) and must be prepared under 360, 460, 660, or 760, respectively. The postmaster will furnish appropriate sack or tray labels with which to identify the various types of mail. Penalty mail must be presented for acceptance and verification at the entry post office in accordance with the same instructions and requirements as for other mailers. (See 137.42.)

* * * * *

(5) Rate Documentation. In accordance with the same requirements other mailers must meet, agencies or their contractors must provide the appropriate documentation for pieces mailed at First-Class carrier route, ZIP + 4 presort, and ZIP + 4 barcoded rates; and third-class carrier route, 5-digit presort, basic ZIP + 4, 5-digit ZIP + 4, and ZIP + 4 barcoded rates. (See the specific requirements applicable to the respective classes of mail.)

* * * * *

.27 Penalty Mail Indicia Formats

* * * * *

.276 Penalty Reply Mail

* * * * *

g. Penalty Business Reply

* * * * *

(3) Payment of Postage and Fees. Agencies will be charged a permit fee once each 12-month period in accordance with 917.22 and 917.33. In addition, the business reply mail permit and accounting fee will be charged once each 12-month period for each permit issued, as described in 917.343b. However, post offices will not collect money from agencies in connection with the issuance of penalty business reply permits, accounting fees, or for postage and fees due on such mail. Agencies will pay permit fees, accounting fees, postage, and business reply fees in accordance with the reimbursement procedures of 137.22.

* * * * *

h. Penalty Merchandise Return

* * * * *

(c) The agency must review the license by the expiration date of the permit by providing the post office with a renewal request letter that contains up-to-date local contact information for the agency and the annual fee payment in accordance with 137.276h(8)(c).

* * * * *

(8) Payment of Postage and Fees

(a) Agencies will be charged a merchandise return permit fee of $60 once each 12-month period for each post office to which merchandise return matter is returned.

(b) The amount to be paid for penalty mail merchandise return matter is the appropriate postage for the class of service requested plus a fee of $0.20 per parcel. The registered fee, special handling fee, or insurance fee is additional, where applicable.

* * * * *

140 Postage

141 Stamped Envelopes, Postal Cards, Aerogrammes

141.1 Plain Stamped Envelopes

141.11 Envelopes Available at Post Offices

			Price		
Kind	Size	Denomination	Each (less than 500)	500	1,000
Regular Regular	6-3/4 10 [1]	$0.25 0.25	$0.30 0.30	$131.40 133.40	$262.80 266.80
Window Window	6-3/4 10 [1]	$0.25 0.25		$132.00 134.00	$264.00 268.00
Double Window	10 [1]	$0.25		$137.00	$274.00
Nonprofit Regular Nonprofit Regular	6-3/4 10 [1]	$0.09 .09		51.40 53.40	102.80 106.80
Nonprofit Window Nonprofit Window	6-3/4 10 [1]	$0.09 .09		52.00 54.00	104.00 108.00

[1] Applies to all intermediate sizes up to and including 10.

141.12 Sales at Post Offices. Only sizes 6-3/4 and 10 regular are sold in less than full box lots. Boxes contain 500 envelopes.

141.13 Nonprofit Envelopes. Only nonprofit organizations and political committees that have obtained authorizations to mail at the special bulk third-class rates (see 623) may purchase nonprofit envelopes. Sales are made in full box lots only, except at philatelic outlets (see 141.15). Nonprofit envelopes are precanceled.

141.14 Window Envelopes.

141.141 Sale. Window envelopes are sold in full box lots only, except at philatelic outlets (see 141.15).

141.142 Standard Window Sizes. Standard windows are 1-1/8 inches high and 4-3/4 inches wide and are located 1/2 inch from the bottom of the envelope. In size 6-3/4 envelopes, the window is located 7/8 inch from the left edge; in size 10 envelopes, it is 3/4 inch from the left edge. On double window envelopes, the second window (designed for a return address) is located 1/2 inch from the top and left edges, and measures 3/4 inch high and 2-1/2 inches wide.

141.143 Other Window Sizes. Other window sizes and locations occasionally may be produced. Window sizes cannot exceed 1-1/2 inches high and 5 inches wide, window location cannot be nearer than 3/8 inch to any edge of the envelope, and must conform to general Postal Service mail addressing guidelines.

141.15 Envelope Sales at Philatelic Centers. Window and nonprofit stamped envelopes may be sold at philatelic outlets in less than full box lots of 500. The selling price of a single window or nonprofit stamped envelope will be the price listed for each appropriate size and type on the current issue of Form 3300, *Philatelic Catalog.* Philatelic outlets will not sell full box lots of window and nonprofit stamped envelopes.

141.16 Envelope Dimensions

141.161 Regular Sizes. Dimensions may vary 1/16 inch, as follows:

a. Size 6-3/4: 3-5/8 by 6-1/2 inches.

b. Size 10: 4-1/8 by 9-1/2 inches.

141.162 Intermediate Sizes. Intermediate sizes are those between 6-3/4 and 10 (as determined by surface area in square inches). Guidelines include:

a. Length: No greater than 9-1/2 inches nor less than 6-1/2 inches;

b. Height: No greater than 5 inches nor less than 3-5/8 inches;

c. Surface Area: No greater than 39 square inches; and

d. Length divided by height: Between 1.3 and 2.5, inclusive.

141.17 Private Printing of Return Addresses. Stamped envelopes may be privately printed in any style, provided there is at least 3-1/2 inches of clear space left at the right end of the address side of the envelope.

141.2 Printed Stamped Envelopes (Special Request)

141.21 Printed Stamped Envelopes Available (by Mail Order)

Kind	Size	Denomination	Price 50	Price 500	Price 1,000
Regular	6-3/4	$0.25	$15.00	$134.90	$269.80
Regular	10[1]	.25	15.20	136.80	273.50
Window	6-3/4	$0.25	$15.10	$135.50	$271.00
Window	10[1]	.25	15.30	137.50	275.00
Nonprofit Regular	6-3/4	$0.09	--	$54.90	$109.80
Nonprofit Regular	10[1]	.09	--	56.90	113.80
Nonprofit Window	6-3/4	$0.09	--	$55.50	$111.00
Nonprofit Window	10[1]	.09	--	57.50	115.00

[1] Applies to all intermediate sizes up to and including 10.

* * * * *

141.23 Style of Printing Return Addresses. All lines of the return address will be printed in capital and lower case letters with flush left margin, using 8-point Helvetica type, with the firm or main line(s) printed in bold type, as shown in this sample.

Mr. and Mrs. John Doe (bold sanserif)
475 L'Enfant Plaza, SW (light
Washington, DC 20260-9998 sanserif)

* * * * *

141.3 Postal Cards Available

Denomination	Description
$0.15	Domestic regular or commemorative cut single cards.
0.15	Domestic regular, sheet of 40. (See note below.)
0.30	Domestic regular double reply-paid cards.
0.28	International surface rate cut single cards.
0.36	International airmail rate cut single cards.

Note: Postal cards in sheets for use in printing must be cut to regulation size, 3-1/2 x 5-1/2 inches, so that the stamp appears in the upper right corner. Cases of sheet postal cards may be broken for sale. Each sheet sells for $6. Return addresses are not printed on postal cards by the Postal Service.

141.4 Aerogrammes: See the *International Mail Manual* (IMM). Aerogrammes, also known as air letter sheets, sell for face value at $0.39 each.

142 Adhesive Stamps

142.1 Availability and Use

142.11 Types

Purpose	Form	Denominations
Regular Postage	Single or Sheet (panes of 100)	$0.01, .02, .03, .04, .05, .06, .07, .08, .09, .10, .11, .14, .15, .17, .18 .19, .20, .21, .22, .23 .25, .28, .30, .40, .45, .50, .56; $1.00, 2.00
Regular Postage	Panes of 20	$5.00, 8.75, 12.00
Airmail	Panes of 50	$0.36 and .45 (for international airmail use)
Commemorative	Panes of up to 50	$0.25 or other denominations, including airmail, as announced
Regular postage	6-, 12-, or 20-stamp booklets	$0.25 ($1.50, 3.00 or 5.00 booklets)
Commemorative	20-stamp booklet	$0.25 ($5.00 booklets)
Regular Postage	Coils of 3000	$0.01, .02, .03, .04, .05, .06, .08, .10, .11, .12, .14, .15, .17, .18, .20, .21, .22, .25; $1.00
Regular Postage	Coils of 500	$0.01, .02, .03, .04, .05, .06, .08, .10, .11, .12, .14, .15, .17, .18, .20, .21, .22, .25; $1.00
Regular Postage	Coils of 100	$0.17, .20, .22, .25 (Dispensers and stamp affixers for use with these coils are also available.)
Precanceled Postage	Single or sheet coils of 500 & 3000	Various denominations, available only to permit holders (see 143).

142.12 Use. Affix stamps firmly in the upper right corner of the address side of the mail cover. Any stamp partly concealed by an overlapping stamp may not be counted as postage. Postal employees (other than rural carriers as prescribed in 156.41) are not required to affix stamps to mail.

* * * * *

142.14 Reuse Prohibited. Reuse of stamps with intent to cause loss to the Government or the Postal Service is punishable by fine and imprisonment.

* * * * *

143 Precanceled Stamps

* * * * *

143.2 Philatelic Sales

143.21 Nonpermit Holders

* * * * *

143.212 Precanceled stamps are available at post offices which have them on hand or have a handstamp for precanceling purposes. Post offices may not acquire a precancel handstamp solely to meet philatelic demand. Precancelations may be applied only to regular-issue stamps, not commemoratives, and only to those denominations which see legitimate use by local mailers. The creation of philatelic oddities, or the precanceling of issues or denominations which would not otherwise see legitimate mail use, is not permitted. Handstamps, once acquired, may be retained by post offices to fill requests from philatelists.

143.213 Postmasters will comply with requests for imprints of a precanceling device on their own stamp stock, but not for imprints on blank sheets of paper or on stamps submitted by a collector or other individual. Care should be exercised when precanceling stamps for collectors to ensure legible and well-centered impressions. Permanent ink must be used for precanceling.

* * * * *

143.4 Stamps Precanceled by Postal Service

* * * * *

143.42 Required Format

* * * * *

143.424 Stamps Precanceled with Presorted First-Class Legend

a. Endorsement. Precanceled stamps can be requisitioned with the "Presorted First-Class" legend preprinted as the precancellation device. Precancellation is accomplished by the printed legend as opposed to the legend and parallel horizontal lines as in the past. These stamps can be used only for the first ounce presort rate with postcards and mail of letter size mailed as part of a qualifying Presort First-Class mailing. Mailpieces bearing the "Presorted First-Class" precancellation legend must include the return address. If the return address is not within the delivery area of the post office of mailing, the mailer must place a cancellation endorsement on the piece or submit information to the post office shown in the return address as required by 143.421.

* * * * *

143.441 Small Quantities Precanceled by Handstamp. Small quantities of regular-issue stamps may be precanceled by handstamp designed to precancel 10 stamps at each impression.

* * * * *

144 Postage Meters and Meter Stamps

* * * * *

144.3 Setting Meters

* * * * *

144.36 On-Site Meter-Setting Program

144.361 General

* * * * *

c. Fees for on-site meter settings are:

VOL
53
ISS
59
MR
28
1988
UMI

On a scheduled basis:	$25 for the first meter, plus $4 for each additional meter. OR
On an unscheduled basis:	$28 for the first meter, plus $4 for each additional meter - PLUS -
For each meter checked in or out of service: $5	

d. The on-site meter setting fees listed in 144.351c apply to meters set either at a customer's place of business or at a meter company's offices.

e. The $5 surcharge must be paid for each meter checked in or out of service, *in addition* to the on-site fee.

* * * * *

144.355 Setting Meters at Meter Company Branch Offices

a. Installation of New Meter

(1) If the customer has no postage meter license, a license may be issued after telephoning the licensing post office to confirm the approval. Ensure that the customer does not already have a postage meter license at that post office and that no postage meter license has been previously revoked. See 144.351 for the applicable fees to be collected.

* * * * *

b. Checking Meters Out of Service

* * * * *

(8) See 144.351 for the applicable fees to be collected.

c. Transferring Postage from One Meter to a New Meter.

* * * * *

(6) See 144.351 for the applicable fees to be collected.

* * * * *

144.4 Meter Stamps

* * * * *

144.49 Ad Plates

* * * * *

144.492 Postal markings related to the class or category of mail such as "First-Class," "Presorted First-Class," "Priority Mail," "ZIP + 4," "ZIP + 4 Presort," "ZIP + 4 Barcoded," "Third-Class," "Blk. Rt.," "Nonprofit Org.," "Carrier Route Presort," "Basic ZIP + 4," "5-Digit ZIP + 4," "Fourth-Class," "Fourth-Class Bulk Rates," "Special Fourth-Class Rate," "Presorted Special Fourth-Class Rate," "Bound Printed Matter," and "Library Rate," are permissible. If a postal marking is to appear in the ad plate area, no other matter is to be printed. The marking must fill the entire ad plate area to the extent practicable. All words must be in bold capital letters which are at least 1/4 inch in height or 18-point type, and legible at 2 feet. Exceptions for small ad plates which will not accommodate any of the above markings will not be considered.

* * * * *

145 Permit Imprints (Mail Without Affixed Postage)

* * * * *

145.2 Permit

145.21 Application. A permit to use permit imprints and pay postage in cash at the time of, or in advance of, mailing may be obtained by submitting Form 3601, *Application to Mail Without Affixing Postage Stamps*, with a fee of $60, to the post office where mailings will be made. The postmaster will give the applicant a receipt for the fee on Form 3544. There is no other fee for the use of permit imprints, as long as the permit remains active.

Note: The applicant must also pay an annual bulk mailing fee if matter will be mailed at Presort First-Class rates, third-class bulk rates, or Presorted Special Fourth-Class rates. (See Exhibit 310, D through H, 341, 512.1, 641, and 712.1.)

* * * * *

145.4 Content of Permit Imprints

145.41 First-Class Mail. Permit imprints must show city and state; "First-Class Mail," or "Priority," or "Priority Mail"; "U.S. Postage Paid;" and permit number. They may show the mailing date, amount of postage paid, or the number of ounces for which postage is paid. (See Exhibit 145.5a.) The ZIP Code of the permit holder may be shown immediately following the name of the state or in a separate inscription reading *ZIP Code 00800*, when it is possible to include the ZIP Code without creating uncertainty as to the permit holder's correct address or permit number. Instead of printing the city and state of mailing in the permit imprint, mailers may print the endorsement *Mailed from ZIP Code* followed by the 5-digit ZIP Code assigned to the postmaster at the office of mailing. The permit imprint indicia may also include the markings required by 362.

Note: Only the postmaster's ZIP Code listed in Publication 65, *National Five-Digit ZIP Code and Post Office Directory*, may be printed in the permit imprint.

145.42 Second-Class Mail. There is no permit imprint for second-class mail. Second-class publications mailed by publishers or news agents must be prepared with the second-class imprint and other markings as prescribed in 453.2 and 455. The second-class imprint is not a permit imprint. Copies of second-class publications not mailed by publishers or news agents or otherwise not eligible for the publisher's second-class rates in 411.2 and/or 411.3 must be mailed at applicable rates other than second-class (Express Mail, or First-, third-, or fourth-class). (See 411.4.)

* * * * *

(Renumber present 145.43 and 145.44 as 145.44 and 145.45, respectively; add new 145.43 as follows:)

145.43 Third- and Fourth-Class Mail. Third- and fourth-class mail permit imprints must contain the same information as required in First-Class Mail imprints, except the date and the words "First-Class," or "Priority," or "Priority Mail," must be omitted. Permit indicia may include the amount of postage paid, weight of piece, and markings required by 662, 725.1, or 760.

* * * * *

145.5 Format of Permit Imprints Permit imprints must be prepared in one of the following formats. Any of the formats may be used to display the information prescribed by 145.4. The addition of extraneous matter is not permitted. See Exhibits 145.5a through 145.5i.

145.6 Mailings with Permit Imprints

145.61 Minimum Quantity. Permit imprint mailings must consist of a minimum of 200 pieces or 50 pounds, except as provided in 145.62. Minimum quantities of mail necessary to mail at the nonpresort ZIP + 4 rate, or at any of the First-Class presort rates, the fourth-class bulk zone rate, the special fourth-class presort rate and the bulk bound printed matter rates, are higher. See the appropriate chapter for the class of mail in question.

* * * * *

145.63 Preparation of Mailing. The mailer must arrange all pieces with the address side facing the same way. It is recommended that the mailer separate the pieces to the finest extent possible in the manner prescribed in 360, 460, 660, and 724, and 760. Each class of mail must be presented with a separate Form 3602, *Statement of Mailing with Permit Imprints*, or Form 3605, *Statement of Mailing - Bulk Zone Rates*. Pieces in fourth-class mailings on which postage is paid at different zone rates must be separated by zone.

* * * * *

145.65 Mailing Statement. A Form 3602 or 3605 must be prepared and signed by the mailer for each mailing. The statement must be prepared by typewriter, ink, or indelible pencil to show the mailer's address, permit number, class of mail, number of pieces in the mailing, weight of a single piece, and any additional information required by the respective mailing statements. If a receipt is desired, the mailer must present a duplicate copy of Form 3602 or 3605, which will be initialed by the accepting employee after verification and returned to the mailer.

145.66 Prepayment of Postage Required. The mailer must pay for each mailing when it is presented at the post office, or make an advance deposit sufficient to cover more than one mailing. Payments for postage or deposits must be made at points designated by the postmaster. These payments will not be accepted by employees handling the mail. When the deposit becomes less than enough to pay for an entire mailing, an additional amount must be deposited before any mailings are made. Credit for postage is not allowed. Postage may not be paid partly in money and partly by postage stamps, except as provided in 681.221d. Whenever the computation of postage results in a fraction of a cent in the total, the total must be rounded up to the next whole cent.

Note: Add: $4.00 for each pickup stop. $4.00 for each Custom Designed delivery stop.

211 General Rate Information

* * * * *

211.2 Express Mail postage rates are applied to each piece according to weight and service option utilized.

211.3 Express Mail Military Service postage rates are the rates for the appropriate type of service requested (see Exhibit 210) and are determined in accordance with 211.2.

211.4 For each pickup stop, charge the customer $4.00 no matter how many items from the same customer are picked up, or how many of the same customer's post office boxes are checked in the same post office box unit at the same time. If the pickup is scheduled (see 224.33), there is no pickup charge if the mailer notifies the originating office not to make the pickup stop prior to the dispatch of the postal employee making the pickup.

212 Express Mail Same Day Airport Service Rates

This service was formerly called Airport to Airport Service. (See Exhibit 210 for rates.)

213 Express Mail Custom Designed Service Rates

213.1 This service was formerly called Programmed Service. (See Exhibit 210 for rates.)

213.2 The rates for Express Mail Custom Designed Service are set forth in Exhibit 210. These rates are subject to the following:

a. Add $4.00 for each delivery stop for item(s) tendered for delivery to addressee.

b. For each pickup stop, add $4.00 per occurrence.

214 Express Mail Next Day and Second Day Services Rates

The rates for Express Mail Next Day and Second Day Services are set forth in Exhibit 210. They are subject to the following: For each pickup stop, add $4.00 per occurrence.

* * * * *

220 Classification

221 Description

221.1 Availability of Service

221.11 Express Mail is a service available to mailers for shipment of any mailable matter (see 123, 124, and 127) that is tendered to the Postal Service properly prepared and in accordance with the terms of this chapter. In addition, Express Mail Custom Designed Service, Express Mail Next Day Service, or Express Mail Second Day Service may be used to expedite movement of any other class of mail from one domestic postal facility to another in accordance with the Express Mail drop-ship procedures in 136.7.

* * * * *

221.2 Service Offerings. Express Mail provides a high-speed, high-reliability service. Five basic service offerings are available:

a. Express Mail Same Day Airport Service (see 222);

b. Express Mail Custom Designed Service (see 223);

c. Express Mail Next Day Service (see 224);

d. Express Mail Second Day Service (see 225);

e. Express Mail Military Service (see 226).

* * * * *

224 Express Mail Next Day Service

224.1 Availability of Service

224.11 Acceptance. Next Day Service is available at designated postal facilities, designated Express Mail collection boxes, or by picking up the item, for overnight service to designated destination three-digit ZIP Code delivery areas, facilities, or locations.

* * * * *

224.13 Next Day Service Directories. Each designated facility provided for in 224.11 must maintain an Express Mail Next Day Service directory showing, for the three-digit ZIP Code area in which the facility is located, the following information:

a. The five-digit ZIP Code areas to which next-day delivery service by noon is offered;

b. The three-digit ZIP Codes areas to which next-day delivery service by 3:00 p.m. is offered;

c. The Express Mail zone from the origin to each destination three-digit ZIP Code area;

d. The retail facilities at which Next Day Service mail may be tendered;

e. The acceptance times for each such facility;

f. A list of facilities at which Next Day Service mail may be claimed; and

g. The locations of Express Mail collection boxes.

224.14 Service Limitation. Service to or from three-digit ZIP Code areas, facilities, or offices, or at times not listed in the Next Day Service directory for a designated facility provided for in 224.11 is prohibited. See 255.1 if a destination is not listed.

224.2 Types of Service Available

* * * * *

224.22 Post Office to Addressee Service

224.221 Description. Items tendered in accordance with 224.1 will be delivered to an addressee within the designated delivery area of the destination facility by noon or 3:00 p.m. of the next day. See 224.13a and b.

224.222 Second Attempt Delivery.

* * * * *

b. Form 3849, *Delivery Notice/Reminder/Receipt*, or Form 3849-C, *Express Mail--Notice of Attempted Delivery* (card), will be left at the address, indicating that the shipment is being held awaiting pickup.The name and telephone number of the delivery facility where the shipment is held must be entered on the form. If the shipment is transferred to another facility, the initial delivery facility must be prepared to answer an inquiry by supplying the customer with the appropriate information, such as the name and telephone number of the facility to which the shipment has been transferred. If Form 3849 or Form 3849-C cannot be left, (no mail receptacle, slot, etc.), the addressee should be telephoned and informed (1) that a delivery was attempted, (2) where the shipment may be picked up, and (3) when the next regular delivery trip will be made. The date of the telephone attempt or contact must be entered on Label 11-B or 11-F.

* * * * *

224.3 Pickup Service.

224.31 General. Pickup service is available at designated postal facilities by requesting an On-Call pickup or by Scheduled Pickup Service on a regular basis.

224.32 On-Call Pickup Service. Pickup service is available by contacting the facility listed in the Next Day Service directory by the call cut-off time for pickup the same day.

224.33 Scheduled Pickup Service. Pickup service is available on a scheduled basis pursuant to a service agreement (Form 5631, *Express Mail Service Agreement,*) between the Postal Service and the mailer. The service agreement must specify the time, place, day or date, and frequency of such service.

* * * * *

(Renumber existing section 225 as 227; add new 225 as follows:)

225 Express Mail Second Day Service

225.1 Availability of Service

225.11 Acceptance. Express Mail Second Day Service is accepted at designated postal facilities, at Express Mail collection boxes, and by picking up the item.

225.12 Acceptance Times. Express Mail Second Day Service shipments must be tendered by 5:00 p.m., or such later time or times as authorized by the postmaster.

225.13 Second Day Service Directories. Express Mail Second Day Service is available to any three- or five-digit ZIP Code destination that is not listed in the Next Day Service directory provided for in 224.13.

225.2 Types of Service Available

225.21 Post Office-to-Post Office Service. Items tendered in accordance with 225.12 will be available for claim by the addressee at the destination facility by 10:00 a.m. of the second day that the destination office is open for retail business.

225.22 Post Office-to-Addressee Service. Items tendered in accordance with 225.12 will be delivered to an addressee within the designated delivery area of the destination facility by noon or 3:00 p.m. of the second day. See 224.222 for second attempt delivery.

225.3 Pickup Service. See 224.3.

225.4 Refund of Postage. The Postal Service will refund postage under the provisions in 296 for an item not available for claim or for which delivery was not attempted (see 230), in accordance with 225.2, unless the item was delayed by strike or work stoppage, or if the item was available for claim, or delivery was attempted within the specified times in 224.2, and then the item was delayed because forwarding or return service was provided.

226 Express Mail Military Service

* * * * *

(Renumber existing 226.3 as 226.4 and add new 226.3 as follows:)

226.3 Pickup Service. See 224.3.

* * * * *

227 Express Mail Reship Service

* * * * *

b. (Replace $5.60 with $4.00.)

* * * * *

e. (Replace *reshipment* with *reship service*.)

* * * * *

230 Service Guarantee

(In the first sentence, change the references to read 222.2, 223.3, 224.4, 225.4, and 226.4. In the last sentence, change the references to read 221.1, 223.2 (see individual service agreement), 224.2, and 226.2.)

* * * * *

240 Authorizations and Permits

241 Service Agreements

A service agreement is required before mailings may be made under Express Mail Custom Designed Service (see 223.2). Prior authorization or prearrangement is not required for other types of Express Mail Service.

242 Express Mail Corporate Accounts

A written application is required before mailings are made under an Express Mail Corporate Account, as described in 280.

* * * * *

260 Preparation Requirements

* * * * *

263 Express Mail Next Day, Second Day, and Military Services

* * * * *

263.2 Customers sending Express Mail shipments may instruct the Postal Service to deliver Express Mail Next Day, Second Day, or Military Service shipments without obtaining the signature of the addressee or the addressee's agent by signing a waiver on Label 11-B/F, *Express Mail Next Day Service Post Office to Addressee*. Completion of the waiver authorizes the delivery employee to sign for the delivery of the article. If, in the judgement of the delivery employee, the article can be left in a secure location, the signature of the delivery employee will constitute valid proof of delivery. Waiver of signature is not available for Express Mail COD shipments or Express Mail Military Service shipments.

263.3 Next Day Service Pickup

263.31 On-Call Pickup Service. For items picked up pursuant to 224.32, the customer must complete the appropriate Label 11 for each article. If two or more articles are picked up, the customer must, in addition, complete Form 5625-BX, *Express Mail Service Pickup Statement*, Form 5625-B, *Mailing Statement for Next Day and Same Day Airport Express Mail Service*, or Form 3877 (see 263.6) for each pickup.

263.32 Scheduled Pickup Service. For items picked up pursuant to 224.33, other than Express Mail reship service, the customer must complete Form 5625-B, or Form 3877 (see 263.6), for each pickup. Customers must also complete the appropriate Label 11 for each article, enter the service agreement number in the "Customer Number" or "Account Number" block, and affix Label 11 to each article. Volume mailers must tender the mail in containers provided or approved by the Postal Service.

263.4 For Next Day Service items deposited in accordance with 273.22, in addition to complying with 263.1 and 263.3, the customer must determine that the item is destined to a three-digit ZIP Code area to which Next Day or Military Service is offered from the point of origin. (See 224.14 and 226.13.) If the destination is not listed, the customer must use Second Day Service.

* * * * *

270 Mailing

* * * * *

---

273 Express Mail Next Day and Second Day Services

273.1 General. Express Mail Next Day and Second Day Service items must be deposited at locations and times designated by the Postmaster. (See 224.1.)

273.2 Locations

273.21 Express Mail Next Day and Second Day Services items may be deposited at designated post offices, branches, or stations.

273.22 Prepaid shipments, with the completed mailing label and postage affixed, may be deposited in Express Mail collection boxes, handed to delivery and collection personnel in the course of their normal delivery and collection duties, or picked up in accordance with 224.3, 225.3, or 226.3.

273.3 Time of Mailing

273.31 Express Mail Next Day and Second Day Service items must be tendered at the time or times authorized by the postmaster.

273.32 The time and date of mailing for Express Mail Next Day and Second Day Service items deposited at designated post offices, branches, or stations is the time and date the item is tendered and accepted.

273.33 The time and date of mailing for Express Mail Next Day and Second Day Service items deposited in accordance with 273.22 is the time and date the item is brought to the Express Mail acceptance unit. Items deposited in Express Mail collection boxes by the time posted will be available for claim or delivered the next day in accordance with 224.2, or the second day in accordance with 225.2. Items handed to delivery or collection personnel or picked up in accordance with 273.22 must be collected or picked up in time so that they can be brought to the acceptance unit by the authorized acceptance time. Items so deposited will be available for claim or delivered the next day in accordance with 224.2, or the second day in accordance with 225.2.

273.34 Next Day Service items mailed after the time or times authorized by the postmaster will be accepted and delivered on the second day after mailing, in accordance with 224.2 and 224.4.

(Renumber 273.35 as 273.36 and add new 273.35 as follows:)

273.35 Second Day Service items mailed after the time or times authorized by the postmaster will be accepted and delivered on the third day after mailing, in accordance with 225.2 and 225.4.

273.4 Verification

273.41 All Express Mail Next Day and Second Day Services items (Remainder of section is unchanged.)

273.42 All Express Mail Next Day and Second Day Services items (Remainder of section is unchanged.)

280 Payment of Postage

* * * * *

285 Pickup Charges

The appropriate charge will be made for all pickups scheduled in a service agreement (see 223.2 and 224.33), unless the scheduled service is not required and the customer notifies the Postal Service prior to the dispatch of the pickup employee. The appropriate charge will be made for all pickups requested pursuant to 224.32.

286 Insufficient Prepayment

286.1 Express Mail Next Day, Second Day, Military, and Same Day Airport Services. If an Express Mail Next Day, Second Day, Military, or Same Day Airport Service item is received at the office of mailing without sufficient postage, the item will be handled as follows:

* * * * *

290 Ancillary Services

* * * * *

294 Evidence of Mailing

* * * * *

(In the third sentence, replace *Form 5625-B* with *Form 5625-B or 5625-BX.*)

Chapter 3
First-Class Mail

310 Rates and Fees

A. Single Pieces 11 ounces or less (Other Than Postal Cards or Postcards):

This applies to First-Class pieces other than postal or post cards that do not exceed 11 ounces:

First ounce or fraction of an ounce	$0.25
Each additional ounce or fraction of an ounce	0.20

Weight Not Exceeding (Ounces)	Rate
1	$0.25
2	0.45
3	0.65
4	0.85
5	1.05
6	1.25
7	1.45
8	1.65
9	1.85
10	2.05
11	2.25

B. Cards:

Postal cards are stamped cards sold by the USPS. Postcards are sold commercially and need to have stamps added. Rates:

Postal cards:

Single	$.15 each
Double	$.30 ($.15 each part)

Postcards:

Single	$.15 each
Double	$.30 ($.15 each part)

(Reply part does not have to bear postage when originally mailed.)

C. Nonpresorted ZIP + 4 First-Class Mail:

Rates for matter other than cards: $0.241 for the first ounce, and $0.20 for each additional ounce or fraction.

Rates for Cards: $0.141 each.

D. Presorted First-Class Mail:

To mail at Presorted First-Class rates, the annual presort fee of $60 must first be paid. (Payment of one $60 fee allows the mailer to mail qualifying matter at all First-Class presort rates including Carrier Route First-Class, ZIP + 4 Presort, and ZIP + 4 Barcoded.)

Rates Per Piece for Matter Other than Cards:

Pieces weighing two ounces or less: $0.21 for the first ounce or fraction and $0.20 for the second ounce or fraction.

Pieces weighing over two ounces: $0.17 for the first ounce or fraction and $0.20 for each additional ounce or fraction.

Rates Per Piece for Cards: $0.13

E. ZIP + 4 Presort First-Class Mail

To mail at the ZIP + 4 Presort rate, the annual presort fee of $60 must be paid. (Payment of one $60 fee allows the mailer to mail qualifying matter at all First-Class presort rates including Presorted First-Class, Carrier Route First-Class, and ZIP + 4 Barcoded.)

Rates Per Piece for Matter Other than Cards:

First Ounce or Fraction: $0.205

Each Additional Ounce or Fraction: $0.20

Rate Per Piece for Cards: $0.125

F. ZIP + 4 Barcoded First-Class Mail:

To mail at the ZIP + 4 Barcoded rate, the annual presort fee of $60 must be paid. (Payment of one $60 fee allows the mailer to mail qualifying matter at all First-Class presort rates including Presorted First-Class, Carrier Route First-Class, and ZIP + 4 Presort.)

Rates Per Piece for Matter Other than Cards:

First Ounce or Fraction: $0.20

Each Additional Ounce or Fraction: $0.20

Rate Per Piece for Cards: $0.12

G. Carrier Route First-Class Mail

To mail at the Carrier Route First-Class rate, the annual presort fee of $60 must first be paid. (Payment of one $60 fee allows the mailer to mail qualifying matter at all First-Class presort rates including Presorted First-Class, ZIP + 4 Presort, and ZIP + 4 Barcoded.)

Rates Per Piece for Matter Other than Cards:

Pieces weighing two ounces or less: $0.195 for the first ounce or fraction and $0.20 for the second ounce or fraction.

Pieces weighing over two ounces: $0.155 for the first ounce or fraction and $0.20 for each additional ounce or fraction.

Rate for Cards: $0.115

H. Nonstandard Surcharge

This applies to all First-Class Mail pieces weighing 1 ounce or less that exceed the size limits in 353.3, except for pieces mailed at the nonpresorted ZIP + 4, ZIP + 4 Presort, and ZIP + 4 Barcoded rates.

Rates: A surcharge of $0.10 is assessed on each piece of nonstandard First-Class Mail which is mailed at the single-piece rates for cards or for matter other than cards. A surcharge of $0.05 is assessed on each piece of nonstandard mail which is mailed at the Presorted First-Class or Carrier Route First-Class Rates.

I. Address Correction Service Fee:

The fee for address correction service is $0.30 per notice issued.

324 ZIP + 4 First-Class Mail

* * * * *

324.7 Pre-Barcoded Mail

* * * * *

324.73 Barcode Location. The location of the barcode must be on the address side of the mailpiece and within a clear space known as the "barcode read area," which must be free of any printing other than the barcode. The read area extends 5/8 inch from the bottom and at least 4-1/2 inches from the right edge of the mailpiece. Within the read area, the left-most bar of the barcode must be located between 3-1/4 inches and 4 inches from the right edge of the mailpiece. The bottom of the bars must be positioned 1/4 inch (plus or minus 1/16 inch) from the bottom edge of the mailpiece (see Exhibit 324.73), and the barcode must be completely contained within the solid rectangle shown in Exhibit 324.73.

(Renumber 325 as 326 and insert new 325 as follows.)

325 ZIP + 4 Barcoded Rate

325.1 General.

325.11 Description. First-Class ZIP + 4 Barcoded rate mailings must meet the requirements in 325.2 through 325.4. Only pieces that:

a. Bear a correct ZIP + 4 barcode prepared in accordance with 324.71c through 324.77, and 325.32b;

b. Meet the size requirements in 324.3 or 324.4;

c. Are sorted in accordance with 364.1 (are part of a group of 10 or more pieces for the same 5-digit ZIP Code destination); and

d. Are documented in accordance with 364.4;

may qualify for the First-Class ZIP + 4 Barcoded rate.

Pieces bearing a 5-digit barcode must not be included in a ZIP + 4 Barcoded rate mailing. Carrier Route First-Class Mail may not be included in a First-Class ZIP + 4 Barcoded rate mailing. To qualify for any of the rates listed in 325.12, the pieces must be documented in accordance with 364.4.

325.12 Applicable Rates by Sortation Category.

325.121 5-Digit Sortation. Pieces in a ZIP + 4 Barcoded mailing that are sorted in accordance with 364.1 (5-digit packages) may qualify for:

a. The ZIP + 4 Barcoded rate if they bear a ZIP + 4 barcode prepared in accordance with 324.71c through 324.77, and 325.32b.

READING THE ZIP + 4 BARCODE

The ZIP + 4 barcode consists of the nine digits plus a correction character used by the barcode reader to identify reading errors. The barcode consists of 52 bars as illustrated. Each of the 10 digits contained between the frame bars consists of 2 long bars (read as 1's) and 3 short bars (read as 0's).

Reading and understanding the bar code is simple. There are 10 combinations of 5 bars, each consisting of 2 long (1's) and 3 short (0's) bars. The digits 0 through 9 have been assigned to these combinations:

0=11000 1=00011 2=00101 3=00110 4=01001 5=01010 6=01100 7=10001 8=10010 9=10100

Within the group of 5 bars, each position has a different value: from left to right 7, 4, 2, 1, and 0. Addition of the values in the two positions occupied by 1 bars gives the value of the combination, except in the case of 11000 which totals 11 and has been assigned as zero.

In addition to the ZIP + 4 Code, each barcode contains a correction digit. This digit appears in the last position of the barcode. Its purpose is to ensure that the machine applying the barcode is working properly. The sum of the 10 digits in the barcode (the 9-digit ZIP + 4 Code plus the correction digit) must always be a multiple of 10. The value of the correction digit is therefore determined by adding the numbers in the 9-digit ZIP + 4 Code, and then determining what single-digit number must be added to that sum to make the total a multiple of 10 (end with a zero). In the Example, the sum of the nine digits of the ZIP + 4 Code is 45. Using a correction character of 5 makes the sum of all 10 characters 50, a multiple of 10. If the sum of the digits is not a multiple of 10, an error has been made and the barcode must not be used.

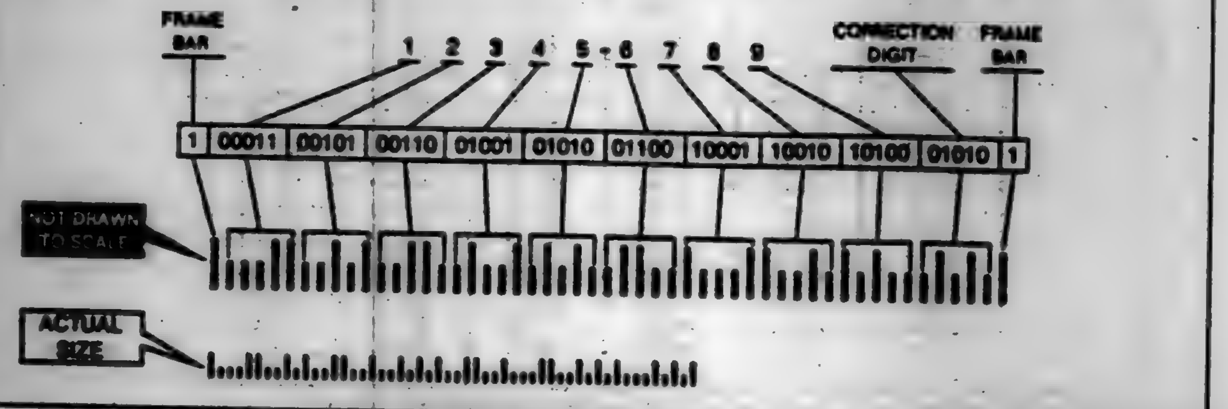

Exhibit 324.72, ZIP + 4 Barcode

b. The ZIP + 4 Presort rate if they do not bear a barcode but contain a correct ZIP + 4 code in the address and meet the barcode clear zone and OCR readability requirements of 324.5 and 324.6.

c. The Presorted First-Class rate if they do not bear a ZIP + 4 barcode and:

(1) They contain the 5-digit ZIP Code in the address; or

(2) They contain a ZIP + 4 code in the address, but do not meet the barcode clear zone and OCR readability requirements of 324.5 and 324.6 necessary to qualify for the ZIP + 4 presort rate.

325.122 3-Digit Sortation. Pieces in the mailing sorted in accordance with 364.2 (3-digit packages) may qualify for:

a. The ZIP + 4 Presort rate if they bear a correct ZIP + 4 code in the address and meet the barcode clear zone and OCR readability requirements of 324.5 and 324.6, or if they bear a ZIP + 4 barcode prepared in accordance with 324.71c through 324.77, and 325.32b.

b. The Presorted First-Class rate if they do not bear a ZIP + 4 barcode and contain the 5-digit ZIP Code in the address. The Presorted First-Class rate also applies to pieces containing a ZIP + 4 code in the address but which do not meet the barcode clear zone and OCR readability requirements of 324.5 and 324.6.

325.123 Residual Sortation. Pieces in the mailing sorted in accordance with 364.3 (residual pieces) may qualify for:

a. The nonpresorted ZIP + 4 rate if they bear a correct ZIP + 4 code in the address and meet the barcode clear zone and OCR readability requirements of 324.5 and 324.6, or if they bear a ZIP + 4 barcode prepared in accordance with 324.71c through 324.77, and 325.32b.

b. The single-piece First-Class rate.

325.2 Minimum Quantity. Each mailing must consist of at least 500 pieces that bear a correct ZIP + 4 barcode and otherwise qualify for the First-Class ZIP + 4 Barcode rate.

325.3 Requirements for at Least 85 Percent of the Pieces in Each Mailing.

325.31 General. At least 85 percent of the total pieces in each mailing must bear a ZIP + 4 barcode prepared in accordance with 324.71c through 324.77, and 325.32b. This 85 percent requirement is applied to the total number of pieces in all presort levels in the mailing, regardless of the rate claimed for an individual piece.

Exception: The 85 percent ZIP + 4 barcode requirement may be applied to a mailing list or cycle rather than an individual mailing under the conditions in 364.44.

Note: In all mailings there must be at least 500 pieces that bear a ZIP + 4 barcode prepared in accordance with 324.32, and that otherwise qualify for the ZIP + 4 Barcoded rate as required in 325.2.

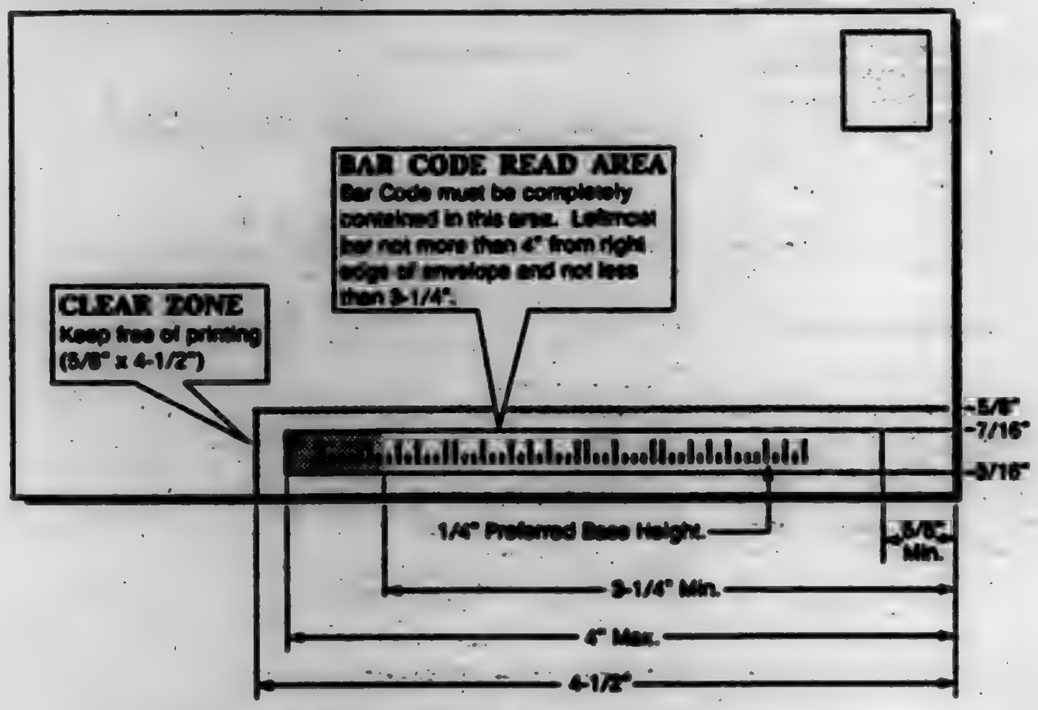
325.32 Barcode Requirements.

a. General. Barcodes must be prepared in accordance with 324.71c through 324.77. The ZIP + 4 barcode must accurately represent the correct 5-digit and sector segment codes for the address on the mailpiece. Pieces bearing default or fictitious add-on codes, e.g., 0000, 5000, 9999, etc., must not be included in a ZIP + 4 Barcoded rate mailing. Pieces bearing a 5-digit barcode must not be included in a ZIP + 4 Barcoded rate mailing (see 325.44). Barcodes may be printed on inserts that will appear through a window on an envelope provided the window on the envelope and the barcode on the insert meet the specifications that follow in 325.32b. An envelope with a window for a barcode insert may only be used when the insert actually contains the ZIP + 4 barcode.

b. Inserts. The barcode may be printed on an insert and appear through a barcode window on an envelope under the following conditions:

(1) Barcode Window Specifications:

(a) Windows must be covered with a clear plastic material, securely glued on all sides;



BAR CODE READ AREA
Bar Code must be completely contained in this area. Leftmost bar not more than 4" from right edge of envelope and not less than 3-1/4".
CLEAR ZONE
Keep free of printing (5/8" x 4-1/2")
5/8"
7/16"
3/16"
1/4" Preferred Base Height.
5/8" Min.
3-1/4" Min.
4" Max.
4-1/2"

Exhibit 324.73, Barcode Read Area

BEST COPY AVAILABLE

VOL. 53
ISS 59
MR 28
1988
UMI

(b) Envelopes with barcode windows may be used only when the ZIP + 4 barcode will be visible through the barcode window;

(c) Windows must extend fully to the lower edge of the envelopes and must be of wrap-around construction;

(d) The right edge of the window must be not less than 1/4 inch from the right edge of the envelope;

(e) The left edge of the window must be not less than 4 1/2 inches from the right edge of the envelope.

(2) Barcode Location Specifications. The barcode, as it shows through the window when inserted in the envelope, must meet all of the following specifications:

(a) The ZIP + 4 barcode must be located within the barcode clear zone which extends 5/8 inch from the bottom of the envelope and 4-1/2 inches from the right edge of the envelope;

(b) The barcode shall be at least 1/5 inch from the right edge of the window and 1/5 inch from the left edge of the window;

(c) No printing other than the ZIP + 4 barcode is permitted in the barcode clear zone;

(d) The left-most bar must be located 3-5/8 inches ± 3/8 inch from the right edge of the mailpiece, and from 3/16 inch to 7/16 inch from the bottom of the envelope. The baseline of all bars must be 1/4 inch ± 1/16 inch from the bottom edge of the mailpiece.

325.4 Requirements for All Pieces in the Mailing.

325.41 Size Requirements. Each piece in the mailing must meet the size requirements in 324.3 or 324.4.

325.42 ZIP Codes. Each piece, whether or not it bears a ZIP + 4 barcode, must bear either the correct ZIP + 4 code or the correct 5-digit ZIP Code in the address.

325.43 Markings. Each piece must bear an identifying marking as required in 362.5.

325.44 5-Digit Barcodes Prohibited. Pieces bearing a 5-digit barcode must not be included in a ZIP + 4 Barcoded mailing.

325.45 Presort. All the pieces in the mailing (ZIP + 4 barcoded and non-barcoded pieces) must be presorted together to the finest extent possible in accordance with 364.1. Pieces remaining after being sorted in accordance with 364.1 must be sorted in accordance with 364.2. This means all possible packages of 10 or more pieces to the same 5-digit ZIP Code destination must be prepared and trayed in accordance with 364.1 before preparing and traying 3-digit packages in accordance with 364.2. Pieces remaining after being sorted in accordance with 364.1 and 364.2 must be prepared in accordance with 364.3.

325.46 Documentation. Documentation must accompany each mailing as required by 364.4.

326 Priority Mail

326.1 Description. Priority Mail consists of First-Class Mail weighing more than 11 ounces and, at the option of the mailer, any other mail matter (including regular First-Class Mail) weighing 11 ounces or less. There is no minimum weight limitation for Priority Mail. The maximum weight limit is set forth in 351.

• • • • •

340 Authorizations and Permits

341 Annual Presort Fee

A Presort First-Class mailing fee must be paid once each 12-month period at each office of mailing by any person or organization entering mailings at Presorted First-Class, Carrier Route First-Class, ZIP + 4 Presort, and/or ZIP + 4 Barcoded First-Class rates. Payment of one fee allows a mailer to enter mail at all of the Presort rates. Persons or organizations paying this fee may enter mail of their clients as well as their own mail.

• • • • •

353 Nonstandard First-Class Mail

• • • • •

353.3 Surcharge. A surcharge of $0.10 is assessed on each piece of nonstandard First-Class Mail that is mailed at the single-piece rate for cards or the single-piece rates for matter other than cards. A surcharge of $0.05 per piece is assessed on each nonstandard piece mailed at the Presorted First-Class or Carrier Route First-Class rates.

• • • • •

360 Preparation Requirements

361 Addressing

• • • • •

361.2 Priority Mail. The return address must be shown on the address side of each piece of Priority Mail.

• • • • •

361.5 ZIP + 4 Barcoded First-Class Mail. The address of all pieces in a ZIP + 4 Barcoded mailing must contain either the correct 5-digit ZIP Code or the correct ZIP + 4 code. In addition, at least 85 percent of the pieces in ZIP + 4 Barcoded mailings must also contain a barcode prepared in accordance with 324.71c through 324.77, and 325.32b, that represents the correct ZIP + 4 code of the delivery address. Pieces bearing a 5-digit barcode must not be included in a ZIP + 4 Barcoded rate mailing (see 325.44).

362 Marking Requirements

362.1 Priority Mail. The words "Priority" or "Priority Mail" must be placed prominently on the address side of each piece of Priority Mail.

• • • • •

362.5 ZIP + 4 Barcoded First-Class Mail. The words "First-Class" and "ZIP + 4 Barcoded" must be printed or rubberstamped by the mailer either as part of or immediately adjacent to permit imprints, meter stamps, or precanceled stamps. Alternatively, the "ZIP + 4 Barcoded" endorsement may be located in the address area on either the line above the address or two lines above the address. (The preferred position is two lines above the address.) If the "ZIP + 4 Barcoded" endorsement is located in the address area, no other information may appear on the endorsement line other than carrier route information. The "First-Class" and "ZIP + 4 Barcoded" endorsements may be printed by a postage meter, special slug, ad plate, or other suitable means, including computer, which will ensure a legible endorsement.

Note: Pieces at the Carrier Route First-Class rates may not be included in a ZIP + 4 Barcoded rate mailing.

• • • • •

364 ZIP + 4 Barcoded First-Class Mail.

364.1 5-Digit Package Presort Requirements—Pieces Qualifying for the ZIP + 4 Barcoded, ZIP + 4 Presort, and Presorted First-Class rates. Only pieces in 5-digit packages containing at least 10 pieces may qualify for the ZIP + 4 Barcoded rate. See 325.1.

364.11 Packaging Requirements—5-Digit Packages Only. When there are 10 or more pieces addressed to the same 5-digit ZIP Code delivery unit, they must be prepared by the mailer in packages of 10 or more pieces. The pieces in the packages must be faced in the same direction and secured with one or two rubberbands around each package, as prescribed in 367.112, or physically separated by visible index tabs or separator cards to delineate each package. A package must not be more than 4 inches thick. A red Label D must be affixed to the lower left corner on the address side of the top piece in each package.

Exception: Pieces in 5-digit trays need not be prepared in packages.

364.12 Traying Requirements.

364.121 5-Digit Trays. When there are 500 pieces or at least 3/4 of a tray for the same 5-digit ZIP Code delivery unit, a direct 5-digit tray must be prepared. A tray label must be firmly affixed to the end of the tray. Direct 5-digit trays must be labeled in the following manner:

Line 1: City, State, 5-Digit ZIP Code
Line 2: FCM ZIP + 4 Barcoded
Line 3: Mailer, Mailer Location

Sample:

PHILADELPHIA PA 19118
FCM ZIP + 4 BARCODED
FR JC COMPANY BOSTON MA

It is recommended that a pressure sensitive red Label 9 be affixed to the lower right portion of the tray label before inserting it into the label holder.

Note: Trays that are less than 3/4 full must not be prepared.

364.122 Unique 3-Digit City Trays. When, after all possible 3/4-full to full 5-digit trays have been prepared, there are enough 5-digit packages remaining for a city with a unique 3-digit ZIP Code prefix to fill at least 3/4 of a tray, a unique 3-digit city tray must be prepared. Cities with unique 3-digit ZIP Codes are listed in Exhibit 122.63b. Unique 3-digit city trays must be labeled in the following manner:

Line 1: City, State, Unique 3-Digit ZIP Code Prefix
Line 2: FCM Z+4 BARCODED MXD 5-DG
Line 3: Mailer, Mailer Location

Sample:

PHILADELPHIA PA 191
FCM Z+4 BARCODED MXD 5-DG
FR JC COMPANY BOSTON MA

It is recommended that a pressure sensitive red Label 9 be affixed to the lower right portion of the tray label before inserting it into the label holder.

Note: Trays that are less than 3/4 full must not be prepared.

364.123 SCF Trays. When, after traying in accordance with 364.121 and 364.122, there are enough 5-digit packages remaining for the same SCF area to fill at least 3/4 of a tray, an SCF tray must be prepared. A list of SCFs serving one 3-digit ZIP Code area is in Exhibit 122.63c. A list of SCFs serving more than one 3-digit area and the 3-digit areas they each serve is in Exhibit 122.63d. SCF trays must be labeled in the following manner:

Line 1: Letters "SCF" followed by the city, two-letter state abbreviation, and SCF code for the SCF as shown in Exhibits 122.63c and 122.63d.
Line 2: FCM Z+4 BARCODED MXD 5-DG
Line 3: Mailer Name, Mailer Location

Sample:

SCF PHILADELPHIA PA 190
FCM Z+4 BARCODED MXD 5-DG
FR JC COMPANY BOSTON MA

It is recommended that a pressure sensitive red Label 9 be affixed to the lower right portion of the tray label before inserting it into the label holder.

Note: Trays that are less than 3/4 full must not be prepared.

364.124 Area Distribution Center Trays. When, after traying in accordance with 364.121 through 364.123, there are enough 5-digit packages remaining for the same Area Distribution Center (ADC) to fill at least 3/4 of a tray, an ADC tray must be prepared. A list of ADCs and the areas they serve is in Exhibit 122.63e. A tray label in the format shown below must be firmly affixed to the end of the tray:

Line 1: The letters "DIS", followed by the city, two-letter state abbreviation, and ADC code for the ADC as shown in Exhibit 122.63e.
Line 2: FCM Z+4 BARCODED MXD 5-DG
Line 3: Mailer, Mailer Location

Sample:

DIS PHILADELPHIA PA 190
FCM Z+4 BARCODED MXD 5-DG
FR JC COMPANY BOSTON MA

It is recommended that a pressure sensitive red Label 9 be affixed to the lower right portion of the tray label before inserting it into the label holder.

Note: Trays that are less than 3/4 full must not be prepared.

364.125 Mixed ADC Trays. 5-digit packages remaining after traying in accordance with 364.121, 364.122, 364.123, and 364.124 must be prepared in mixed ADC trays. A mixed ADC tray label in the following format must be firmly affixed to the end of the tray:

Line 1: The letters "DIS" followed by the city, two-letter state abbreviation, and code of the ADC that serves the entry post office as shown in Exhibit 122.63e.
Line 2: MXD ADC FCM BRCDED MXD 5-D
Line 3: Mailer, Mailer Location

Sample:

MXD ADC FCM BRCDED MXD 5-D
FR JC COMPANY BOSTON MA

It is recommended that a pressure sensitive red Label 9 be affixed to the lower right portion of the tray label before inserting it into the label holder.

364.2 3-Digit Package Presort Requirements – Pieces Qualifying for ZIP + 4 Presort and Presorted First-Class Rates.

364.21 General. Pieces remaining after packages and trays have been prepared in accordance with 364.1 must be sorted in accordance with 364.22. These pieces will qualify for the ZIP + 4 Presort rate if the pieces:

1) bear a ZIP + 4 code and meet the requirements in 324.5 and 324.6; or

2) bear a ZIP + 4 barcode in accordance with 324.71c through 324.77, and 325.32b.

Pieces in this portion of the mailing that do not meet the requirements for ZIP + 4 Presort rates will qualify for the Presorted First-Class rate. The pieces must be documented in accordance with 364.4.

364.22 Sortation. After all 5-digit packages are prepared and trayed in accordance with 364.1, remaining pieces must be packaged into groups of 50 or more pieces for the same 3-digit

VOL
53
ISS
59
MR
28
988
MI

ZIP Code prefix in accordance with 307.221 and 307.231. The one exception is that visible index tabs or separator cards may be used to delineate each package, instead of rubberbands. The 3-digit packages must then be trayed in accordance with 364.122 through 364.125, except that "MXD 5-DG" must be deleted from the contents line. This portion of the mailing must be completely separated from the 5-digit packaged portion of the mailing (sorted in accordance with 364.1) to facilitate verification.

Exception: When there are enough pieces for a unique 3-digit ZIP Code city to fill at least 3/4 of a tray, packages need not be prepared.

364.3 Preparation Requirements for the Residual Portion. Pieces remaining after all 5-digit packages have been trayed in accordance with 364.1 and all nonqualifying 3-digit packages have been trayed in accordance with 364.2 are residual pieces and are subject to either the nonpresorted ZIP + 4 rates or the full single-piece First-Class rate. At a minimum, the residual pieces must be sequenced by 5-digit ZIP Code or 3-digit ZIP Code prefix. Trays must bear a label that states "FCM ZIP + 4 BARCODED." The range of 5-digit or 3-digit ZIP Codes contained in each tray must also appear on each tray label. It is recommended, however, that residual pieces be additionally sorted by ADC. If there is a full tray to an ADC, the residual pieces should be placed in a tray marked to the ADC as follows:

Line 1:	The letters "DIS" followed by the name of the ADC and the code (see Exhibit 122.63a.)
Line 2:	FCM ZIP + 4 BARCODED RESID
Line 3:	Mailer, Mailer Location

When there is less that a full tray to an ADC, separator tabs should be used to identify groups of pieces in the tray to the same ADC.

Note: To qualify for the nonpresorted ZIP + 4 rates, pieces in the residual portion must bear a ZIP + 4 code and meet the requirements of 324.5 and 324.6, or bear a ZIP + 4 barcode.

364.4 Documentation and Postage Payment Requirements.

364.41 Required Documentation for Metered and Precanceled Stamp Mailings.

364.411 Correct Postage Affixed to Each Piece. Mailers who affix the appropriate postage to each piece in the mailing must submit, with each mailing, documentation that shows that the 85 percent commingling requirement in 325.3 has been met. The documentation must list the number of pieces that bear a ZIP + 4 barcode, and the number of pieces that do not contain a ZIP + 4 barcode by:

a. 5-digit separation,

b. 3-digit separation, and

c. for the residual portion, by 5-digit or 3-digit ZIP Code (see 364.3).

The total number of pieces with a ZIP + 4 barcode, and the total number of pieces not containing a ZIP + 4 barcode, for the entire mailing, must also be shown.

Exception: When all the pieces in the mailing bear a ZIP + 4 barcode prepared in accordance with 324.71c through 324.77, and 325.32b, documentation is not required.

364.412 Postage at ZIP + 4 Barcoded Rate Affixed to All Pieces. Mailers may affix postage at the ZIP + 4 Barcoded rate to all pieces in the mailing provided they submit with each mailing the following lists and summaries documenting that the 85 percent commingling requirement has been met, and the amount of postage owed:

a. Documentation for Pieces Sorted in Accordance with 364.1 (5-Digit Packages). List, for each 5-digit ZIP Code destination in the portion of the mailing sorted in accordance with 364.1, the:

(1) Number of Barcoded Pieces Qualifying for the ZIP + 4 Barcoded Rate. This is the number of ZIP + 4 barcoded pieces qualifying for the ZIP + 4 Barcoded rate (pieces bearing a ZIP + 4 barcode prepared in accordance with 324.71c through 324.77, and 325.32b);

(2) Number of Non-Barcoded Pieces Qualifying for the ZIP + 4 Presort Rate. This is the number of non-barcoded pieces qualifying for the ZIP + 4 Presort rate (non-barcoded pieces that bear a ZIP + 4 code, and that meet the bar code clear zone and OCR readability requirements of 324.5 and 324.6);

(3) Number of Non-Barcoded Pieces Qualifying for the Presorted First-Class Rate. This is the number of non-barcoded pieces that bear a ZIP + 4 code, but do not meet the requirements of 324.5 and 324.6, plus the number of non-barcoded pieces bearing a 5-digit ZIP Code;

(4) Cumulative Total. This is the total of all pieces listed on preceding lines for the 5-digit portion of the mailing plus the pieces for that 5-digit ZIP Code.

Total each of categories (1) through (3) to provide: (1)the total number of barcoded pieces qualifying for the ZIP + 4 Barcoded rate; (2) the total number of non-barcoded pieces qualifying for the ZIP + 4 Presort Rate; and (3) the total number of non-barcoded pieces qualifying for the Presorted First-Class rate.

The last entry in category (4) will show the total number of pieces in the 5-digit portion of the mailing.

b. Documentation for Pieces Sorted in Accordance with 364.2 (3-Digit Packages). List for each 3-digit separation in the portion of the mailing sorted in accordance with 364.2, the:

(1) Number of Barcoded Pieces Qualifying for the ZIP + 4 Presort Rate. This is the number of pieces bearing a ZIP + 4 barcode prepared in accordance with 324.71c through 324.77, and 325.32b;

(2) Number of Non-Barcoded Pieces Qualifying for the ZIP + 4 Presort Rate. This is the number of non-barcoded pieces bearing a ZIP + 4 code, that meet the barcode clear zone and OCR readability requirements of 324.5 and 324.6;

(3) Number of Non-Barcoded Pieces Qualifying for Presorted First-Class Rate. This is the number of non-barcoded pieces that bear a ZIP + 4 code, but do not meet the requirements of 324.5 and 324.6, plus the number of non-barcoded pieces that bear a 5-digit ZIP Code;

(4) Cumulative Total. This is the total of all pieces listed on preceding lines for the 3-digit portion of the mailing plus the pieces for that 3-digit ZIP Code.

Total each of categories (1) through (3) to provide: (1) the total number of barcoded pieces qualifying for the ZIP + 4 Presort rate; (2) the total number of non-barcoded pieces qualifying for the ZIP + 4 Presort rate; and (3) the total number of non-barcoded pieces qualifying for Presorted First-Class Rates. The last entry in category (4) will show the total number of pieces in the 3-digit portion of the mailing.

c. Documentation for Pieces Sorted in Accordance with 364.3 (Residual Portion). By 5-digit or 3-digit ZIP Code (see 364.3), list the:

(1) Number of Barcoded Pieces Qualifying for the Nonpresorted ZIP + 4 Rate. This is the number of pieces bearing a ZIP + 4 barcode prepared in accordance with 324.71c through 324.77, and 325.32b;

(2) Number of Non-Barcoded Pieces Qualifying for the Nonpresorted ZIP + 4 Rate. This is the number of non-barcoded pieces with a ZIP + 4 code, that meet the barcode clear zone and OCR readability requirements in 324.5 and 324.6;

(3) Number of Non-Barcoded Pieces Subject to the Single-Piece First-Class Rate. This is the number of non-barcoded pieces that bear a ZIP + 4 code, but do not meet

the requirements in 324.5 and 324.6, plus the number of non-barcoded pieces that bear a 5-digit ZIP Code.

(4) Cumulative Total. This is the total of all pieces listed on preceding lines for the residual portion of the mailing plus the pieces for that line entry.

Total each of categories (1) through (3) to provide: (1) the total number of barcoded pieces qualifying for the nonpresorted ZIP + 4 rate; (2) the total number of non-barcoded pieces qualifying for the nonpresorted ZIP + 4 rate; (3) the total number of non-barcoded pieces subject to single-piece first-class rates.

The last entry in category (4) will show the total number of pieces in the residual portion of the mailing.

d. Totals. Summarize the total number of pieces in each rate category in the mailing. For each category other than pieces qualifying for the ZIP + 4 Barcoded rate, multiply the total number of pieces in the rate category by the additional postage due per piece for that rate category. For example, multiply the total number of pieces eligible for the ZIP + 4 Presort rate by $0.005 (the difference between the ZIP + 4 Barcoded rate and the ZIP + 4 Presort rate). This will show the total postage due for each rate category in the mailing. Add the total amounts of postage due for each rate category to show the total amount of postage due. Also summarize, for the entire mailing, the total number of pieces that bear a properly prepared ZIP + 4 barcode and the total number of pieces that do not.

364.42 Required Documentation for Permit Imprint Mailings.

a. Documentation. For identical-weight permit imprint mailings, the lists and summaries indicated in 364.412a through 364.412c must be submitted with each mailing. A summary of the listings must be included as part of the required documentation as follows:

(1) Summarize the total number of pieces in each rate category in the mailing;

(2) For each rate category shown in 364.42a(1), above, compute the postage charges at that rate. (Multiply the number of pieces qualifying for each rate category times the applicable rate for that rate category);

(3) Add the total amounts of postage charges for each rate category to show the total amount of postage to be deducted from the permit imprint account;

(4) Summarize, for the entire mailing, the number of pieces that bear a properly prepared ZIP + 4 barcode (364.412a(1), 364.412b(1), and 364.412c(1)). Also show the total number of pieces that do not bear a properly prepared ZIP + 4 barcode.

Note: Mailings of nonidentical-weight permit imprint pieces may be made only if optional or alternative postage payment procedures have been authorized in accordance with 145.

b. Exception to Documentation. When all pieces in an identical-weight permit imprint mailing bear a ZIP + 4 barcode prepared in accordance with 324.71c through 324.77, and 325.32b, and the pieces in each of the sortation levels (364.1, 364.2 and 364.3) are physically separated from each other upon presentation to the post office, as required in 364, no documentation is required.

364.43 Summary Listing Documentation Option

364.431 General. Mailers may obtain authorization to submit only summary listings, rather than both summaries and listings by ZIP Code sortation as required in 364.41 and 364.42. The summary listing must show, by category of sortation (5-digit sorted pieces in accordance with 364.1, 3-digit sorted pieces in accordance with 364.2, and residual pieces in accordance with 364.3):

(1) the number of pieces with a ZIP + 4 barcode prepared in accordance with 324.71c through 324.77, and 325.32b;

(2) the number of non-barcoded pieces that bear a ZIP + 4 code and that meet the requirements of 324.5 and 324.6; and,

(3) the total of: the number of non-barcoded pieces that bear a ZIP + 4 code, but do not meet the requirements of 324.5 and 324.6; and the number of non-barcoded pieces bearing a 5-digit ZIP Code.

The mailer must also provide a summarized total, by presort level rate, of the amount of postage due when all pieces are metered at the lower rate, or, when permit imprint is used, the summarized total by presort level rate of the total postage charges for the mailing. The total number of pieces that bear a properly prepared ZIP + 4 barcode and the number of pieces that do not must also be provided.

364.432 Authorization. The General Manager, Rates and Classification Center, for the area where mailings will be submitted, may authorize summary listing documentation in accordance with the approval procedures in 364.434.

364.433 Application. The mailer must submit a request to the postmaster, at each post office of mailing, that must include:

a. the mailer's name, address, and telephone number;

b. the name of the post office where mailings will be presented;

c. the frequency of mailing;

d. the estimated volume per mailing;

e. an explanation of the reason the mailer is unable to comply with the listing requirements in 364.41 or 364.42;

f. an explanation of the procedures that will be used to develop the summary listing;

g. sample copies of documents such as computer print-outs and records of postage meter readings that can be reviewed to substantiate the mailer's claim;

h. a copy of any previous approval(s) by one or more Rates and Classification Centers.

364.434 Approval Process. The mailer's application, and the postmaster's recommendation and supporting documentation, will in turn be forwarded to the Management Sectional Center (MSC) Manager, Mailing Requirements, who will review the file, request additional documentation, and/or make an onsite visit, if necessary, before recommending approval or disapproval. The file will be forwarded to the General Manager, Rates and Classification Center (RCC) who will approve the application if it is determined that the summary listing will accurately reflect the composition of the mailing. If necessary, the General Manager, RCC, may request further evidence of documentation. When the General Manager, RCC, is satisfied that the documentation will accurately show the summary listing information required in 364.431, the mailer may be authorized to prepare a summary listing for each mailing. The authorization will be sent directly to the mailer, and copies will be sent to the MSC Manager, Mailing Requirements, and the postmaster of the office of mailing, as applicable. The authorization will remain valid for a period of 90 days.

364.435 Quarterly Inspections. The postmaster or designated representative will visit the mailer's premises on a quarterly basis to determine whether the mailer is following the approved procedures for determining the percentage of ZIP + 4 barcoded pieces in the mailing, and proper postage, and will submit a report to the RCC through the MSC. If the mailer is following the approved procedures, the authorization will be renewed for a period of 90 days.

364.436 New Application Upon Change in Mailer's Operation. The mailer must submit a new application, in accordance with 364.433, anytime there is a change in the method used to determine the percentage of qualifying ZIP + 4 barcoded pieces in mailings and the proper postage.

364.44 Exception to Submitting Documentation With Each Mailing (Documentation Based on a Mailing List or Cycle). When pieces for a mailing list or mailing cycle, as defined by the mailer, are mailed over a period of more than one day, but not exceeding one week (seven consecutive days), the mailer

OL
53
ISS
59
MR
28
988
MI

may submit documentation based on the mailing list or mailing cycle to prove that the 85 percent requirement has been met, and to show either the amount of postage due for mail metered at the ZIP + 4 Barcoded rate, or the total amount of postage to be deducted from the mailer's permit imprint account. The documentation for the entire list or cycle must, however, accompany the mailing statement submitted with the first mailing made from the list or cycle. Under this procedure, the mailer must indicate, on each mailing statement submitted, the mailing list or mailing cycle to which the pieces belong. The final mailing statement for the mailing list or cycle must accurately account for the full list or cycle. (The sum of the pieces reported on all the mailing statements submitted for the mailing list or cycle must equal the totals shown on the documentation submitted.) Under this procedure, a mailing may contain only pieces for a single mailing list or mailing cycle (i.e., a mailing may not contain pieces from more than one mailing list or cycle). If pieces from two different lists or cycles are submitted on the same day, separate mailings must be prepared, corresponding separate mailing statements must be submitted for the pieces for each list, and the mailing from the new list or cycle must be accompanied by the documentation for that list or cycle.

364.45 Mailing Statements. The mailer must submit a mailing statement with each mailing in accordance with 382.4. The Form 3602-PC must be submitted in duplicate if all pieces in a mailing are metered at the ZIP + 4 Barcoded rate and additional postage is paid through an advance deposit account in accordance with 382.31d or 382.33b.

* * * * *

370 Mailing

* * * * *

372 Matter Mailed at Carrier Route First-Class, Presorted First-Class, Nonpresorted ZIP + 4, ZIP + 4 Presort, and ZIP + 4 Barcoded Rates

372.1 Deposit of Mail. Matter mailed at the Carrier Route First-Class, Presorted First-Class, nonpresorted ZIP + 4, ZIP + 4 Presort, and ZIP + 4 Barcoded rates must be deposited at locations and times designated by the postmaster. Deposit of metered mail at other than those locations is considered a sufficient basis for revocation of postage meter licenses in accordance with 144.23. The Postal Service may collect Carrier Route First-Class, Presorted First-Class, nonpresorted ZIP + 4, ZIP + 4 Presort, and ZIP + 4 Barcoded mail at the customer's facility when one of the following conditions is met:

a. Acceptance and verification are accomplished at the customer's facility;

b. Postage is paid under an optional procedure;

c. Postage is paid by meter strips;

d. Postage is paid by precanceled stamps.

Note: Presort mailings paid by permit imprint, and not covered by optional procedures, are not to be collected from the customer's facility.

372.2 Approved Collection Service. In addition to the above requirements, the collection of Carrier Route First-Class, Presorted First-Class, nonpresorted ZIP + 4, ZIP + 4 Presort, and ZIP + 4 Barcoded mail, must be part of an approved collection service for other classes of mail, and space must be available on the transportation required for those classes. Separate or additional collection service for Carrier Route First-Class, Presorted First-Class, nonpresorted ZIP + 4, ZIP + 4 Presort, and ZIP + 4 Barcoded mail will not be established.

373 Priority Mail

Priority Mail must be deposited at a post office, branch, or station, or handed to a rural or highway contract route carrier.

Exception: A Priority Mail piece in a weight category for which the rates do not vary by zones may be deposited in any street collection box or other authorized mail collection receptacle. Mail that has postage paid by means of permit imprint may only be deposited where authorized by 145.

374 Presort Verification

374.1 Where Verified

374.11 Mailings Presented to the Accepting Post Office by the Customer

* * * * *

c. Nonpresorted ZIP + 4 and ZIP + 4 Presort mailings will be verified at the post office of acceptance to establish that each mailing is properly prepared, and, if mailed at the ZIP + 4 Presort rate, properly presorted in accordance with either 365 and 368.2, or 366 (optional sortation).

d. ZIP + 4 Barcoded mailings will be verified at the post office of acceptance to establish that each mailing at the ZIP + 4 Barcoded rate is properly prepared and presorted and qualifies for that rate.

374.12 Collected at Customer's Facility. Carrier Route First-Class, Presorted First-Class, nonpresorted ZIP + 4, ZIP + 4 Presort, and ZIP + 4 Barcoded mailings collected at the customer's facility (see 372.1) will be verified at a post office acceptance unit, unless complete acceptance and verification is accomplished at the customer's facility. If such a mailing, which has been collected at the customer's facility and brought to the appropriate acceptance unit, is found not to qualify due to makeup irregularities, improper postage, or other reasons, the mailer must come to the acceptance unit to resolve the discrepancies.

374.2 When a Carrier Route First-Class, Presorted First-Class, Nonpresorted ZIP + 4, ZIP + 4 Presort, or ZIP + 4 Barcoded Mailing is Disqualified

374.21 Options

a. When a Carrier Route First-Class, Presorted First-Class, Nonpresorted ZIP + 4, ZIP + 4 Presort, or ZIP + 4 Barcoded mailing is found not to qualify at the acceptance unit (or detached mail unit), the mailer has the option of taking corrective action or paying the full regular single-piece rate. When necessary, the return of such mailings to the customer's facility is the responsibility of the mailer. The mailer must correct discrepancies or pay the full single-piece First-Class postage before the mailing will be accepted.

b. When a Carrier Route First-Class mailing is found, through reports from the delivery unit, to have more than 5 percent error in the makeup to carrier routes in a 5-digit ZIP Code area, the pieces in the mailing to that 5-digit ZIP Code area do not qualify for the Carrier Route First-Class rate. Postage will be recalculated at the Presorted First-Class rate of postage on all pieces within that 5-digit ZIP Code area, providing the pieces meet the Presort First-Class Mail preparation requirements.

374.22 Correcting Preparation and Presort Problems. Mailers who elect to correct presort or preparation problems which resulted in disqualification of the mailing at the place where the mailing was presented for acceptance, will generally be unable to return metered mail to the acceptance unit (or detached mail unit) on the same day as it was originally presented. The date in the meter stamp or precanceled postmark will thus reflect an incorrect mailing date. If the mailing is presented on the day immediately following its initial presentation, and if it then meets all other acceptance requirements, the mailing will be accepted on a one-time-only basis when:

a. Its initial presort or other preparation deficiencies resulted from mailing equipment problems beyond the mailer's control, or

b. It is the customer's first mailing at the Carrier Route First-Class, Presorted First-Class, nonpresorted ZIP + 4, ZIP + 4 Presort, or ZIP + 4 Barcoded rate, and the improper presort or preparation resulted from misinformation or misunderstanding of the presort or preparation requirements.

* * * * *

380 Payment of Postage

* * * * *

382 Carrier Route First-Class, Presorted First-Class, Nonpresorted ZIP + 4, ZIP + 4 Presort, and ZIP + 4 Barcoded Rates

382.1 Method of Payment. Postage on mailings made at Carrier Route First-Class, Presorted First-Class, nonpresorted ZIP + 4, ZIP + 4 Presort and ZIP + 4 Barcoded rates, must be paid by meter stamps, permit imprints, or precanceled postage. Permit imprints may be used on mailings of nonidentical weight only under the provisions of 145.8 or 145.9

382.2 Exact Postage on Each Piece

* * * * *

382.23 ZIP + 4 Barcoded Rate. When precanceled postage or meter stamps are used, pieces must bear postage at the appropriate ZIP + 4 Barcoded, ZIP + 4 Presort, Presorted First-Class, nonpresorted ZIP + 4, or single-piece First-Class rate as appropriate, except as provided in 382.3 and 364.412.

382.3 Postage at Lowest Rate in Mailing Affixed to All Pieces in the Mailing

382.31 Identical Pieces

a. Presorted First-Class Mailings. When all pieces in a Presorted First-Class mailing paid by meter stamps or precanceled postage are of identical size and weight, the entire mailing may have postage affixed at the Presorted First-Class rate. Additional postage for residual pieces must be paid by means of a meter strip affixed to the back of the Form 3602-PC, *Statement of Mailing -- Bulk Rates*, that is required to accompany the mailing, or through an advance deposit account as provided for in Handbook F-1, *Post Office Accounting Procedures*, 524.

b. Carrier Route First-Class Mailings. When all pieces in a Carrier Route First-Class mailing paid by meter stamps or precanceled postage are of identical size and weight, the entire mailing may have postage affixed at the Carrier Route First-Class rate. Additional postage for pieces subject to the Presorted First-Class and full single piece First-Class rates must be paid by means of a meter strip affixed to the back of the Form 3602-PC, *Statement of Mailing -- Bulk Rates*, that is required to accompany the mailing, or through an advance deposit account as provided for in Handbook F-1, *Post Office Accounting Procedures*, 524.

c. ZIP + 4 Presort Mailings. When all pieces in a ZIP + 4 Presort mailing paid by meter stamps or precanceled postage are of identical size and weight, the entire mailing may have postage affixed at the ZIP + 4 Presort rate provided the requirements in 365.33 are met. The additional postage for pieces subject to Presorted First-Class, nonpresorted ZIP + 4, and single-piece First-Class rates must be paid by means of a meter strip affixed to the Form 3602-PC, *Statement of Mailing -- Bulk Rates*, that is required to accompany the mailing, or through an advance deposit account as provided for in Handbook F-1, *Post Office Accounting Procedures*, 524.

d. ZIP + 4 Barcoded Mailings. When all pieces in a ZIP + 4 Barcoded mailing paid by meter stamps or precanceled postage are of identical size and weight, the entire mailing may have postage affixed at the ZIP + 4 Barcoded rate provided the requirements in 364.412 are met. Additional postage, in the amount documented in accordance with 364.412d, for pieces subject to the ZIP + 4 Presort, Presort First-Class, nonpresorted ZIP + 4 and single-piece First-Class rates, must be paid by means of a meter strip affixed to the back of the Form 3602-PC, *Statement of Mailing -- Bulk Rates*, that is required to accompany the mailing, or through an advance deposit account as provided for in Handbook F-1, *Post Office Accounting Procedures*, 524.

382.32 Nonidentical Pieces at Presorted First-Class or Carrier Route First-Class Rates.

* * * * *

382.33 Nonidentical Pieces at ZIP + 4 Presort and ZIP + 4 Barcoded Rates.

a. ZIP + 4 Presort Mailings. ZIP + 4 Presort mailings of nonidentical-weight pieces may have postage at the ZIP + 4 Presort rate affixed to all pieces in the mailing provided the requirements in 365.33 are met. The additional postage for pieces subject to Presorted First-Class, nonpresorted ZIP + 4, and single-piece First-Class rates, must be paid by means of a meter strip affixed to the back of the Form 3602-PC, *Statement of Mailing -- Bulk Rates*, that must accompany the mailing, or through an advance deposit account as provided for in Handbook F-1, *Post Office Accounting Procedures*, 524.

b. ZIP + 4 Barcoded Mailings. ZIP + 4 Barcoded First-Class mailings of nonidentical-weight pieces may have postage at the ZIP + 4 Barcoded rate affixed to all pieces in the mailing provided the documentation requirements in 364.412 are met. Additional postage in the amount documented in accordance with 364.412d for pieces subject to the ZIP + 4 Presort, Presort First-Class, nonpresorted ZIP + 4 and single-piece First-Class rates must be paid by means of a meter strip affixed to the back of the Form 3602-PC, *Statement of Mailing -- Bulk Rates*, that must accompany the mailing, or through an advance deposit account as provided for in Handbook F-1, *Post Office Accounting Procedures*, 524.

* * * * *

382.4 Mailing Statement. Mailers who qualify for Carrier Route First-Class, Presorted First-Class, nonpresorted ZIP + 4, ZIP + 4 Presort, or ZIP + 4 Barcoded rates, must complete and submit one of the following mailing statements (signed by the mailer or an authorized agent) with each mailing:

a. Form 3602, *Statement of Mailing With Permit Imprints*, for mail with permit imprints. Editions of the form earlier than April 1985 must not be used.

b. Form 3602-PC, *Statement of Mailing -- Bulk Rates*, for mail bearing meter stamps or precanceled stamps. Editions of the form earlier than April 1985 must not be used.

Note: Form 3602-PC must be submitted in duplicate for mailings metered at the lowest rate for which the difference between postage affixed and the applicable rate is paid through an advance deposit account, as provided in Handbook F-1, *Post Office Accounting Procedures*, 524.

383 Priority Mail Rates (See Exhibit 310)

Mailers of Priority Mail may pay postage by adhesive stamps, meter stamps (see 144), or permit imprint (see 145).

390 Ancillary Services

391 Forwarding

All First-Class Mail, including Priority Mail, and postal and post cards, is forwarded at no charge for a period of one year when the new address is known.

UMI

Chapter 4
Second-Class Mail

410 Rates and Fees

411 Rates

411.1 Rate Elements. The postage charged for mailing second-class matter is based on the application of the following rate elements to the mailing:

411.11 Per-Pound Charges. The total weight of the mailing in pounds is multiplied by the applicable per-pound rates. There are outside county pound rates that are zoned for the advertising portion of a publication and an unzoned rate for the nonadvertising portion. There is also an in-county pound rate.

411.12 Per-Piece Charges. Each piece in the mailing is multiplied by the applicable per-piece rate. There are different per-piece rates for outside county pieces and for in-county pieces based on level of presort. An individually addressed copy or package of unaddressed copies is considered a piece. A firm package, consisting of individually addressed copies or unaddressed copies for the same address is also considered one piece. A firm package must bear a blue Label F or the optional endorsement line "FIRM" followed by the five-digit ZIP Code as prescribed in 464.242.

411.13 Piece Charge Adjustments.

a. A nonadvertising adjustment is deducted from the outside county per-piece rate charges.

b. An SCF adjustment, when applicable, is deducted from the outside county per-piece charges.

Note: The postage to be paid for a mailing is the sum of the charges determined by applying the applicable per-pound rates and the charges determined by applying the applicable per-piece rates, less the applicable adjustments.

411.2 Regular Rates.

411.21 General. The rates in 411.22 through 411.25 apply to all presorted copies of publications mailed by publishers or news agents except for:

a. Copies that qualify for one of the preferred rates contained in 411.3; and

b. Nonrequester and nonsubscriber copies that exceed the 10 percent allowance in 411.411 and 411.412, and that are not presorted and commingled in a mailing that contains requester or subscriber copies. (See 411.422 for applicable rates for noncommingled nonrequester and noncommingled nonsubscriber copies exceeding the 10 percent allowance.)

411.22 Per-Pound Rates. Rates per pound or fraction of a pound:

	Dollars
Nonadvertising portion	$0.124
Advertising portion:	
Zones 1 and 2	$0.165
Zone 3	$0.174
Zone 4	$0.191
Zone 5	$0.216
Zone 6	$0.243
Zone 7	$0.275
Zone 8	$0.302

411.23 Per-Piece Rates. The three per-piece rates reflect the levels of presort. The sortations which must be accomplished, and the documentation requirements to qualify for the rates, are prescribed in 468.

	Dollars
Level A--Basic. Pieces not qualifying for Level B, (5-Digit), or Level C, (Carrier route) rates. (Pieces in 3-digit sacks that are not for unique 3-digit cities, or in SCF, SDC, State, or Mixed States sacks.)	$0.160
Level B--5-Digit. Pieces in 5-digit, optional city, or unique 3-digit packages that contain at least six pieces and that are placed in 5-digit, optional city, or unique 3-digit sacks. See Exhibits 122.63a and 122.63b.	$0.124
Level C--Carrier-route. Pieces in carrier-route packages of six or more pieces that are placed in carrier-route or carrier-routes sacks.	$0.099

411.24 Intra-SCF Rate. Pieces for delivery within the SCF of mailing may qualify for the intra-SCF rate. This rate equals the applicable per-piece rate, minus $0.01 per addressed piece. SCFs and the areas served by each are listed in Exhibits 122.63c and 122.63d.

411.25 Nonadvertising Adjustment. The nonadvertising adjustment applies to outside-county per-piece charges. It is determined in the following manner:

a. Divide the nonadvertising percent by 100;

b. Multiply the decimal thus obtained by $0.04 and round the result up to four decimal places;

c. Multiply this rounded nonadvertising factor by the number of addressed pieces mailed at the outside-county per-piece rates in 411.24, and round the result up to two decimal places. This nonadvertising adjustment amount is subtracted from the subtotal of the outside-county piece charges to determine the total outside-county per-piece postage charge.

411.3 Preferred Rates

411.31 General. There are four preferred rates. They are:

a. In-County

b. Special Nonprofit

c. Classroom

d. Science-of-Agriculture

411.32 In-County Rates

* * * * *

411.322 Nonsubscriber Copies. (Effective January 1, 1989, the note at the end of this section will read: The number of nonsubscriber copies mailed at in-county rates must be included in the determination of the overall 10 percent nonsubscriber allowance in 411.413 and 411.414.)

* * * * *

411.325 Rates. In-County rates are:

	Dollars
Per Pound	$0.094
Per Piece:	
Level J--Not Presorted to Carrier Route.	$0.057
Level K--Presorted to Carrier Route. Pieces in carrier-route packages of six or more pieces that are placed in carrier-route or carrier-routes sacks	$0.032

411.33 Special Nonprofit Rates

411.331 Per-Pound Rates. Rates per pound or fraction of a pound:

	Dollars
Nonadvertising portion	$0.086
Advertising portion:	
Zones 1 and 2	$0.114
Zone 3	$0.120
Zone 4	$0.133
Zone 5	$0.153
Zone 6	$0.174
Zone 7	$0.199
Zone 8	$0.221

Note: The advertising zone rates are applicable to issues in which the advertising portion exceeds 10 percent. Issues containing 10 percent or less advertising will be computed at the nonadvertising rate.

411.332 Per-Piece Rates. The three per-piece rates reflect the levels of presort. The sortations that must be accomplished to qualify for these rates are prescribed in 468.

	Dollars
Level G--Basic. Pieces not qualifying for Level H (5-Digit) or Level I (Carrier-route) rates. (Pieces in 3-digit sacks that are not for unique 3-digit cities, or in SCF, SDC, State or Mixed States sacks.)	$0.125
Level H--5-Digit. Pieces in 5-digit, optional city, or unique 3-digit packages that contain at least six pieces, and that are placed in 5-digit, optional city or unique 3-digit sacks. See Exhibits 122.63a and 122.63b.	$0.089
Level I--Carrier-route. Pieces in carrier-route packages of six or more pieces that are placed in carrier-route or carrier-routes sacks.	$0.068

411.333 Intra-SCF Rate. Pieces for delivery within the SCF of mailing may qualify for the intra-SCF rate. This rate equals the applicable per-piece rate, minus $0.01 per addressed piece. SCFs and the areas served by each are in Exhibits 122.63c and 122.63d.

411.334 Nonadvertising Adjustment. The nonadvertising adjustment applies to outside-county per-piece charges. It is determined in the following manner:

a. Divide the nonadvertising percent by 100;

b. Multiply the decimal thus obtained by $0.02 and round the result up to four decimal places;

c. Multiply this rounded nonadvertising factor by the number of addressed pieces mailed at the outside-county per-piece rates in 411.332 and round the result up to two decimal places. For issues or editions in which the nonadvertising portion is 90 percent or greater, it is determined by multiplying $0.02 times the number of addressed pieces mailed at the outside-county per-piece rates in 411.332. This nonadvertising adjustment amount is subtracted from the subtotal of the outside-county per-piece charges to determine the total outside county per-piece postage charge.

411.34 Classroom

411.341 Per-Pound Rates. Rates per pound or fraction of a pound:

	Dollars
Nonadvertising portion	$0.087
Advertising portion:	
Zones 1 and 2	$0.089
Zone 3	$0.094
Zone 4	$0.102
Zone 5	$0.114
Zone 6	$0.126
Zone 7	$0.141
Zone 8	$0.154

411.342 Per-Piece Rate. The per-piece rate is $0.123.

411.343 Intra-SCF Rate. Pieces for delivery within the SCF of mailing may qualify for the intra-SCF rate. This rate equals the applicable per piece rate, minus $0.01 per addressed piece. SCFs and the areas served by each are in Exhibits 122.63c and 122.63d.

411.344 Nonadvertising Adjustment. The nonadvertising adjustment applies to outside-county per-piece charges. It is determined in the following manner:

a. Divide the nonadvertising percent by 100;

b. Multiply the decimal thus obtained by $0.04 and round the result up to four decimal places;

c. Multiply this rounded nonadvertising factor by the number of addressed pieces mailed at the outside-county per-piece rates in 411.342, and round the result up to two decimal places. This nonadvertising adjustment amount is subtracted from the subtotal of the outside-county per-piece charges to determine the total outside county per-piece postage charge.

411.35 Science-of-Agriculture

411.351 General. The science-of-agriculture rates apply to copies of publications which will be delivered to addresses outside the county where published and entered, and on copies mailed at an office of additional entry located outside the county where published and entered, when the total number of copies furnished during any 12-month period to subscribers residing in rural areas consists of at least 70 percent of the total number of copies distributed by any means for any purpose.

411.352 Per Pound Rates. Rates per pound or fraction of a pound:

	Dollars
Nonadvertising portion	$0.124
Advertising portion:	
Zones 1 and 2	$0.114
Zone 3	$0.174
Zone 4	$0.191
Zone 5	$0.216
Zone 6	$0.243
Zone 7	$0.275
Zone 8	$0.302

411.353 Per-Piece Rates. The three per-piece rates reflect the levels of presort. The sortations that must be accomplished to qualify for these rates are prescribed in 468.

	Dollars
Level A--Basic. Pieces not qualifying for Level B, (5-Digit) or Level C,(Carrier-route) rates. (Pieces in 3-digit sacks that are not for unique 3-digit cities, or in SCF, SDC, State, or Mixed States sacks.)	$0.160
Level B--5-Digit. Pieces in 5-digit, optional city, or unique 3-digit packages that contain at least six pieces, and that are placed in 5-digit, optional city, or unique 3-digit sacks. See Exhibits 122.63a and 122.63b.	$0.124
Level C--Carrier-route. Pieces in carrier-route packages of six or more pieces that are placed in carrier-route or carrier-routes sacks.	$0.099

411.354 Intra-SCF Rate. Pieces for delivery within the SCF of mailing may qualify for the intra-SCF rate. This rate equals the applicable per-piece rate minus $0.01 per addressed piece. SCFs and the areas served by each are in Exhibits 122.63c and 122.63d.

411.355 Nonadvertising Adjustment. The nonadvertising adjustment applies to outside-county per-piece charges. It is determined in the following manner:

a. Divide the nonadvertising percent by 100;

b. Multiply the decimal thus obtained by $0.04 and round the result up to four decimal places;

VOL 53 ISS 59 MR 28 1988 UMI

c. Multiply this rounded nonadvertising factor by the number of addressed pieces mailed at the outside-county per-piece rates in 411.353, and round the result up to two decimal places. This nonadvertising adjustment amount is subtracted from the subtotal of the outside-county per-piece charges to determine the total outside county per-piece postage charge.

* * * * *

411.4 Nonsubscriber and Nonrequester Copies Mailed by Publishers and Newsagents

* * * * *

Note: Effective January 1, 1988, the 10 percent limit on nonsubscriber or nonrequester copies will be computed based upon the total number of copies mailed to subscribers or requesters during the calendar year as opposed to the total weight of copies mailed to subscribers or requesters during the calendar year.

* * * * *

412 Fees

412.1 Application Fees for Second-Class Privileges. The fees to accompany applications for second-class original entry, reentry, additional entry, or for registration as a newsagent, are:

Kind of Application	Amount
a. Original Entry	$265.00
b. Newsagent Registry	$40.00
c. Reentry (because of change in title, qualification category, frequency of issuance, office of publication, modification or cancellation of an additional entry (see 412.1d) or other reason)	$40.00
d. Additional Entry (Only one fee is collectable for an application for additional entry, even if the additional entry for which application is made modifies another previously approved additional entry.)	$70.00

Note: If an application is not approved, no part of the fee is returned to the applicant. No fee is required to accompany applications for special nonprofit, classroom, or science-of-agriculture rates.

412.2 Fee for Address Correction Service. The fee for address correction service is $0.30 cents per notice issued.

* * * * *

468 Special Preparation Requirements or Options for Presort-Level Discount-Rated Pieces (Levels B, C, H, I, and K)

* * * * *

468.4 Combining More Than One Second-Class Publication or Edition.

468.41 Definition. A combined mailing is a mailing in which two or more second-class publications or editions are merged into a single mailing stream, either during production or after finished copies have been produced, and all copies of all the publications or editions are presorted together into packages that achieve the finest level of presort possible for the combined mailing. For example, when three second-class publications will be prepared as a combined mailing and there are two copies of each publication for a single 5-digit ZIP Code destination, a single 5-digit package containing six pieces must be prepared.

468.42 Rate Qualification. More than one second-class publication, or edition of a publication, may be combined to meet the volume per sack or bundle requirement for the presort-level discount piece rates. To qualify for levels B and C piece rates, the copies of each issue or edition in the combined mailing must be mailed to destinations outside the county of publication or be a requester publication. To qualify for the levels H (5-digit) and I (carrier-route) rates, each publication or edition must be authorized the special nonprofit rate. To qualify for the level K (carrier-route) rate, the copies of each publication in the mailing must be eligible for the in-county rates at the post office of mailing.

468.43 Presort Level Documentation. The lists and records provided by publishers in accordance with 468.3 must also declare the total number of addressed pieces and copies of each publication or edition mailed to each carrier route, 5-digit, optional city (see Exhibit 122.63a), and unique three-digit ZIP-Coded city (see Exhibit 122.63b) destination. The publisher must also provide a list, by three-digit ZIP Code prefix, of the number of copies (and pieces) of each publication or edition which qualify for the intra-SCF rate.

Note: For mailings presented on pallets in accordance with 467.2, it is recommended that the above listings be broken down by pallet, and that subtotals by pallet of the number of pieces qualifying for each presort-level rate and the intra-SCF rate be given, in addition to a summary listing of such information for the entire mailing.

468.44 Mailing Statements. Separate mailing statements must be prepared for each publication or edition which is part of the combined mailing. The name and issue date of the publications with which each publication or edition was combined must be noted on, or attached to, the mailing statements. Postal employees must note the publication with which the documentation was filed.

* * * * *

483 Marked Copy

* * * * *

483.2 Payment of Advertising Rates on Reading Portions. If desired, the publisher may pay postage at the advertising zone rates on both the advertising and the nonadvertising portions of the publication and waive the nonadvertising adjustment, instead of marking a copy of each issue to show the advertising and nonadvertising portions. When the amount of advertising exceeds 75 percent, the copies submitted to the postmaster must be marked "Advertising over 75 percent." When the amount of advertising does not exceed 75 percent, the copies submitted to the postmaster must be marked, "Advertising not over 75 percent" on the first page. The words "Over 75 percent" or "Not over 75 percent," whichever are applicable, must be entered on the Form 3541 or 3541-A. The word "Waived" must be written in the space provided for the weight of the nonadvertising portion and in the space provided for the nonadvertising adjustment on Forms 3541 or 3541-A.

Note: Requester publications with a notation of "Over 75 percent advertising" are not eligible for second-class rates. Appropriate First-, third-, or fourth-class postage must be paid for copies of such publications.

Exception: This option does not apply if the advertising rate is lower than the rate for nonadvertising.

Chapter 6
Third-Class Mail

610 Rates and Fees

611 Rates

611.1 Single-Piece Rates

611.11 General. The single-piece rates are applied to each piece according to its weight. The single-piece rates are:

0 to 1 oz.	$0.25
Over 1 to 2 ozs.	0.45
Over 2 to 3 ozs.	0.65
Over 3 to 4 ozs.	0.85
Over 4 to 6 ozs.	1.00
Over 6 to 8 ozs.	1.10
Over 8 to 10 ozs.	1.20
Over 10 to 12 ozs.	1.30
Over 12 to 14 ozs.	1.40
Over 14 but less than 16 ozs.	1.50

611.12 Exception. When the postage rate computed at the single-piece third-class rate is higher than *any* fourth-class rate, for which the matter and mailing could qualify except for *weight*, the lower fourth-class rate should be paid.

Example 1: A third-class parcel containing merchandise weighing between 14 and 16 ounces may be mailed at the parcel post rate if that rate is lower.

Example 2: A catalog weighing less than 1 pound, which otherwise meets all prescribed requirements of fourth-class bound printed matter except for weight, may be mailed at the applicable fourth-class bound printed matter rate.

611.2 Bulk Rates. (See Exhibits 611.21a-b and 611.22a-b.)

611.21 Regular Rates. (See Exhibits 611.21a and b.)

611.211 Minimum Per-piece Rate. Pieces which weigh 3.3667 ounces (.21042 pound, 95.446 grams) or less must be paid at the prescribed minimum per-piece rate for the applicable presort level.

611.212 Per-Pound Rate. Pieces which weigh more than 3.3667 ounces (.21042 pound, 95.446 grams) must be paid at the per-pound rate for the applicable presort level. If such pieces are mailed at the basic or 5-digit presort level rates, an additional per-piece charge must also be paid.

611.22 Special Rates for Authorized Nonprofit Organizations. (See Exhibits 611.22a and b.)

611.221 Minimum Per-piece Rate. Pieces which weigh 3.3920 ounces (.21200 pound, 96.163 grams) or less must be paid at the prescribed minimum per-piece rate for the applicable presort level.

611.222 Per-Pound Rate. Pieces which weigh more than 3.3920 ounces (.21200 pound, 96.163 grams) must be paid at the per-pound rate for the applicable presort level. If such pieces are mailed at the basic or 5-digit presort level rates, an additional per-piece charge must also be paid.

611.223 Use. Organizations wishing to use the special rates must be specifically authorized by the Postal Service based on the requirements in 623.

611.3 Computation of Postage—Bulk Rates.

611.31 Minimum Bulk-Rate Postage. The total postage paid on any bulk mailing may not be lower than the amount determined by multiplying the appropriate minimum per-piece rate by the total number of pieces in the mailing. If the total postage computed at pound rates, after adding any adjustment for presort level, is less than the minimum postage charge, postage must be computed at the minimum per-piece rate.

611.32 Individually Metered Pieces—Bulk Rate Postage. To compute postage at the third-class bulk rates for pieces subject to the pound rates of postage:

a. Multiply the weight of the piece (in pounds) by the applicable per-pound rate;

b. Add the applicable per-piece charge (if subject to basic level or 5-digit presort level rates); and

c. Round the sum upward to the next tenth of a cent (or next whole cent if the meter cannot print fractional amounts). The result must be higher than the minimum per-piece charge for the appropriate presort level rate. If the result is lower than the minimum per-piece charge, the minimum per-piece charge must be paid.

611.4 Keys and Identification Devices. Keys and identification devices, such as identification cards or identification tags which are without cover, may be mailed at third-class rates if they bear, contain, or have securely attached, the name and complete post office address of a person, organization, or concern, with instructions to return to such address, and a statement guaranteeing the payment of the postage due upon delivery. The charge is $0.85 for the first 2 ounces or fraction and $0.47 for each additional 2 ounces or fraction thereof.

611.5 Exception. When the postage computed at the bulk third-class rates is higher than a fourth-class rate, for which the matter and the mailing could qualify, except for *weight*, the fourth-class rate may be paid without the necessity of adding needless additional weight. For example, a catalog weighing less than 1 pound which meets all prescribed requirements of fourth-class bound printed matter, except for weight, may be mailed at the fourth-class bound printed-matter rate. All other requirements for bulk third-class mail remain applicable.

612 Fees

612.1 Annual Bulk Mailing Fee. The annual bulk mailing fee is $60.

612.2 Address Correction Service Fee. The fee for address correction service is $0.30 per notice issued.

* * * * *

Regular Bulk Rates

Presort level:	Per pound or fraction (dollars)	Minimum rate per piece (dollars)
Basic	$0.48 Plus $0.086 per piece	$0.167
Basic ZIP + 4		$0.162
5-digit	$0.48 Plus 0.031 per piece	$0.132
5-digit ZIP + 4		$0.127
ZIP + 4 Barcoded		$0.122
Carrier route	$0.48	$0.101

Pieces which weigh more than 3.3667 ounces, (or 0.21042 pound, or 95.446 grams), and are mailed at the 5-digit or basic rate, are subject to both the per-pound rate and the applicable per-piece rate. Pieces which are equal to or weigh less than 3.3667 ounces, (or 0.21042 pound, or 95.446 grams), must be paid at the prescribed minimum per-piece rate for each presort level.

Exception: When the postage computed at the bulk third-class rate is higher than a fourth-class rate for which the matter and the mailing could qualify except for weight, the fourth-class rate may be paid without the necessity of adding needless additional weight. Example: A catalog weighing less than 1 pound, which meets all prescribed requirements for fourth-class bound printed matter, except for weight, may be mailed at the fourth-class bound printed matter rate. All other requirements of bulk third-class remain applicable.

Exhibit 611.21a, Third-Class (Regular Bulk Rates)

Special Bulk Rates for Authorized Nonprofit Organization Only–See 623.

Presort Level	Rate Per Pound or Fraction (dollars)	Minimum Rate Per Piece (dollars)
Basic	$0.25 Plus 0.031 per piece	$0.084
Basic ZIP + 4		$0.079
5-digit	$0.25 Plus $0.023 per piece	$0.076
5-digit ZIP + 4		$0.071
ZIP + 4 Barcoded		$0.066
Carrier Route	$0.25	$0.053

Pieces which weigh more than 3.3920 ounces (or 0.21200 pound, or 96.163 grams), and are mailed at the 5-digit or basic rate, are subject to both the per-pound rate and the applicable per-piece rate. Pieces which are equal to or weigh less than 3.3920 ounces, (or 0.21200 pound, or 96.163 grams), must be paid at the prescribed minimum per-piece rate for each presort level.

Exception: When the postage computed at the bulk third-class rate is higher than a fourth-class rate for which the matter and the mailing could qualify except for weight, the fourth-class rate may be paid without the necessity of adding needless additional weight. Example: A catalog weighing less than 1 pound, which meets all prescribed requirements for fourth-class bound printed matter, except for weight, may be mailed at the fourth-class bound printed matter rate. All other requirements for bulk third-class mail remain applicable.

(Postage for pieces of intermediate weights not listed may be computed as described in 611.32.)

---

622 Third-Class Bulk Mail

622.1 Eligibility

* * * * *

622.12 5-Digit Presort Level

a. Minimum Quantity. Each mailing must consist of at least 200 pieces or 50 pounds of qualifying mail presorted to 5-digit destinations. Each piece must be part of a package of 10 or more pieces to the same 5-digit ZIP Code destination and the packages must be placed in a 5-digit, unique 3-digit city or 3-digit sack as follows:

(1) 5-digit sacks must contain a minimum of 125 pieces or 15 pounds of mail.

Exception: 5-digit sacks containing 10 or more pounds of mail which are part of a machinable parcel mailing prepared in accordance with 667.2, will qualify for the 5-digit presort level rate.

(2) For 3-digit sacks (both unique and non-unique), mailers must place packages of 10 or more pieces for a 5-digit destination in a 3-digit sack containing only 5-digit packages of pieces having the same 3-digit ZIP Code prefix, under the following criteria:

(a) Each sack must contain at least 125 pieces or 15 pounds of qualifying mail, (5-digit packages of 10 or more pieces);

(b) 3-digit packages must NOT be included in the sack; and

(c) 125 pieces or 15 pounds of mail for a single 5-digit ZIP Code within the 3-digit ZIP Code area must be sacked separately.

Note.—Sacks containing fewer than 125 pieces or less than 15 pounds of mail will NOT be accepted.

b. Residual. Residual pieces (those not part of a group of 10 or more pieces to a particular 5-digit ZIP Code or not placed in a 5-digit or 3-digit sack that contains at least 125 pieces or 15 pounds of 5-digit packages) may be included in a 5-digit presort level rate mailing, subject to the following provisions:

(1) Residual pieces do not count toward the minimum quantity requirements for the 5-digit presort level rate;

(2) Residual pieces are not eligible for the 5-digit presort level rate and must have postage paid at the appropriate third-class basic level bulk rate; and

(3) Residual pieces must be prepared in accordance with the applicable provisions of 667.12 and 667.13.

c. Listing Required

(1) When a third-class 5-digit presort level rate mailing includes pieces to be mailed at the basic level rate, the mailer is required to provide the post office with a list of the number of qualifying pieces to each 5-digit ZIP Code destination, except as found in 622.12c(2).

(2) A list of the number of qualifying pieces mailed to each 5-digit ZIP Code destination is not required when all sacks containing identical-weight third-class 5-digit presort level rate pieces are physically separated at the time of mailing from all sacks containing identical-weight pieces to be mailed at the basic level rate.

READING THE ZIP + 4 BARCODE

The ZIP + 4 barcode consists of the nine digits plus a correction character used by the barcode reader to identify reading errors. The barcode consists of 52 bars as illustrated. Each of the 10 digits contained between the frame bars consists of 2 long bars (read as 1's) and 3 short bars (read as 0's).

Reading and understanding the bar code is simple. There are 10 combinations of 5 bars, each consisting of 2 long (1's) and 3 short (0's) bars. The digits 0 through 9 have been assigned to these combinations:

0=11000 1=00011 2=00101 3=00110 4=01001 5=01010 6=01100 7=10001 8=10010 9=10100

Within the group of 5 bars, each position has a different value: from left to right 7, 4, 2, 1, and 0. Addition of the values in the two positions occupied by 1 bars gives the value of the combination, except in the case of 11000 which totals 11 and has been assigned as zero.

In addition to the ZIP + 4 Code, each barcode contains a correction digit. This digit appears in the last position of the barcode. Its purpose is to ensure that the machine applying the barcode is working properly. The sum of the 10 digits in the barcode (the 9-digit ZIP + 4 Code plus the correction digit) must always be a multiple of 10. The value of the correction digit is therefore determined by adding the numbers in the 9-digit ZIP + 4 Code, and then determining what single-digit number must be added to that sum to make the total a multiple of 10 (and with a zero). In the Example, the sum of the nine digits of the ZIP + 4 Code is 45. Using a correction character of 5 makes the sum of all 10 characters 50, a multiple of 10. If the sum of the digits is not a multiple of 10, an error has been made and the barcode must not be used.

622.13 Basic Level. Mailings of at least 200 pieces or 50 pounds, presorted in accordance with 667.1 or 667.2 are eligible for the third-class basic level bulk rates.

622.14 Basic ZIP + 4 Rate.

622.141 General. Basic ZIP + 4 rate mailings must meet the requirements in 622.142 through 622.145. Only letter-size pieces that bear a correct ZIP + 4 code and meet the requirements of 622.144 may qualify for the basic ZIP + 4 rate. Pieces in a basic ZIP + 4 mailing that bear only a correct 5-digit ZIP code are subject to the basic level rate.

Note: Carrier-route presort level rate pieces must not be included in a basic ZIP + 4 rate mailing.

622.142 Minimum Quantity. Each basic ZIP + 4 rate mailing must consist of at least 200 letter-size pieces or 50 pounds of letter-size pieces that each bear a correct ZIP + 4 code and otherwise qualify for the basic ZIP + 4 rate.

622.143 Requirements for at least 85 Percent of the Pieces in Each Mailing. At least 85 percent of the total pieces in the mailing must bear a correct ZIP + 4 code. Pieces not bearing a correct ZIP + 4 code must bear a correct 5-digit ZIP Code. Only pieces that bear a correct ZIP + 4 code in the address qualify for the basic ZIP + 4 rate.

Exception: The 85 percent ZIP + 4 code requirement may be applied to a mailing list or cycle rather than an individual mailing under the conditions in 622.144f(2).

Note: In all cases, a mailing must include at least 200 pieces or 50 pounds of pieces that contain a correct ZIP + 4 code and otherwise qualify for the third-class basic ZIP + 4 rate as required in 622.142.

622.144 Requirements for All Pieces in the Mailing (Qualifying and Nonqualifying).

a. Size Requirements. Each piece in the mailing must meet the following size requirements:

(1) Its length must be at least 5 inches and not more than 11-1/2 inches;

(2) Its height must be at least 3-1/2 inches and not more than 6-1/8 inches;

(3) Its thickness must be at least .007 inch and not more than 1/4 inch; and

(4) Its length divided by height must fall between 1.3 and 2.5.

b. Barcode Clear Zone. Each piece must contain a barcode clear zone according to the following specifications. No printing or markings whatsoever, except for a properly prepared barcode in accordance with 622.165, can be placed within an imaginary rectangle on the front of the mailpiece formed by the following boundaries:

(1) 5/8 inch from the bottom edge;

(2) 4-1/2 inches from the right edge;

(3) The bottom edge; and

(4) The right edge.

Note: Envelopes with a window through which a barcode printed on the insert will show, may be used only when the insert actually contains the ZIP + 4 barcode and the envelope and the barcode are prepared in accordance with 622.165h(1)(b). If a properly prepared barcode does not show through the window insert placed in such envelopes, the piece will not be eligible for ZIP + 4 rates.

c. OCR Readability.

(1) Mandatory Requirements. Each piece in the mailing must meet the following requirements:

(a) The entire city/state/ZIP + 4 code line of the address must be visible and must be located within an imaginary rectangle, (the OCR Read area), on the front of the mailpiece, formed by the following boundaries:

1) 1 inch from the left edge;

2) 1 inch from the right edge;

3) 5/8 inch from the bottom edge (bottom line of rectangle); and

4) 2-1/4 inches from the bottom edge (top line of rectangle).

(b) No extraneous printing or markings (other than the address) shall be placed within the OCR read area below the delivery address line (e.g. the street address or post office box number);

(c) The address must be machine-printed with uniform character size and line spacing; and

(d) A reasonable degree of color contrast must be maintained between the address and the background of the mailpiece: Black ink on a white background is strongly preferred, but other color combinations may be used. Brilliant colors and reverse printing are not permitted.

Note: The Postal Service may treat as unacceptable any mailpiece with color combinations which do not provide a print reflectance difference of at least 40 percent, measured at a wavelength of 650 nanometers.

(2) Nonmandatory Guidelines. In order to ensure the highest degree of address readability, mailers are encouraged to conform with as many of the following guidelines as possible:

(a) Maintain a uniform left margin for the name and address;

(b) Use the standard two-letter state abbreviation;

(c) Do not use italic, artistic, cyrillic, and script-like fonts. Characters or numbers should not touch or overlap within a word or the ZIP + 4 code;

(d) Use uppercase characters;

(e) Use line spacing of six lines per inch;

(f) Use a character pitch in the range of 7 to 12 characters per inch; (**Note:** Total character space may be conserved by eliminating punctuation in the address);

(g) Use a uniform character height in the range of .08 (or 1.28/16 or 2.56/32 or 5.12/64) of an inch to .20 (or 3.2/16 or 6.4/32 or 12.8/64) of an inch;

(h) Use a character height-to-width ratio of 1.1:1 to 1.7:1;

(i) Use one to two character spaces between words and between the last character of the state name or abbreviation and the first digit of the ZIP + 4 code;

(j) Use a space between address lines no less than .025 of an inch (1 millimeter). The space is the vertical distance from the bottom-most point of either an uppercase or lowercase character to the highest point reached by the tallest character in the line below; and

(k) Maintain a character and line skew of the address relative to the bottom edge of the mailpiece of no more than ± 5 degrees.

(3) Exception. Pieces prepared with a ZIP + 4 barcode in accordance with 622.145 and 622.165 need not meet the OCR readability requirements in this section.

d. Presort. All pieces in the mailing (basic ZIP + 4 rate and basic presort level rate) must be presorted together to the finest extent possible in accordance with 667.1, except that, on the contents line of each sack label, the characters "3C" followed by the processing category must be replaced with "3C ZIP + 4."

Note: The state must also be shown on the contents line of SDC and state sacks, and the words MIXED STATES must also be shown on the contents line of mixed states sacks, as required by 667.132e, f, and g.

e. Marking. Each piece in the mailing must bear an identifying marking as required in 662.4.

f. Documentation.

(1) Documentation Submitted With Each Mailing. Except as provided in 622.144f(2), anytime less than 100 percent of the pieces in a mailing bear a ZIP + 4 code in the address, the mailing must be accompanied by a list of the number of pieces containing a ZIP + 4 code and the number of pieces without a ZIP + 4 code, by:

(a) 5-digit ZIP Code for pieces packaged to 5-digits and pieces packaged to optional city destinations; and

(b) 3-digit ZIP Code for other separations.

In addition, for each ZIP Code line entry on the list, a cumulative total of the number of pieces in the mailing must be shown. This is the total of all pieces listed on preceding lines plus the pieces for that line entry. A summary showing the total number of pieces with a ZIP + 4 code and the total number of pieces with a 5-digit ZIP Code must also be shown on the list. The last entry in the cumulative total column will show the total number of pieces in the mailing. If all pieces are metered at the basic ZIP + 4 rate, the total amount of postage due for pieces not containing a ZIP + 4 code must also be shown. (Multiply the number of pieces by the difference between the basic ZIP + 4 rate of postage and the basic level rate of postage). If the mailing is paid by permit imprint, show the the postage charges for the basic ZIP + 4 qualifying pieces and the postage charges for the basic level rate pieces.

(2) Documentation Submitted Based on a Mailing List or Cycle. When pieces for a mailing list or mailing cycle, as defined by the mailer, are mailed over a period of more than one day, but not exceeding one week (seven consecutive days), the mailer may submit documentation based on the mailing list or mailing cycle to prove that the 85 percent requirement has been met, and to show either the amount of postage due for mail metered at the basic ZIP + 4 rate, or the total amount of postage to be deducted from the mailer's permit imprint account. The documentation for the entire list or cycle must, however, accompany the mailing statement submitted with the first mailing made from the list or cycle. Under this procedure, the mailer must indicate, on each mailing statement submitted, the mailing list or mailing cycle to which the pieces belong. The final mailing statement for the mailing list or cycle must accurately account for the full list or cycle. (The sum of the pieces reported on all the mailing statements submitted for the mailing list or cycle must equal the totals shown on the documentation submitted.) Under this procedure, a mailing may contain only pieces for a single mailing list or mailing cycle. If pieces from two different lists or cycles are submitted on the same day, separate mailings must be prepared, corresponding separate mailing statements must be submitted for the pieces for each list, and the mailing from the new list or cycle must be accompanied by the documentation for that list or cycle.

622.145 Pieces Prepared With ZIP + 4 Barcodes. Barcodes representing the correct ZIP + 4 code for the address shown on each piece, prepared in accordance with 622.165, may appear on pieces in a basic ZIP + 4 mailing. Pieces bearing a ZIP + 4 barcode need not meet the OCR readability requirements in 622.144c to qualify for basic ZIP + 4 rates. Pieces bearing a ZIP + 4 barcode must however, bear a numeric ZIP + 4 code in the address to qualify for the basic ZIP + 4 rates. Pieces that bear a ZIP + 4 barcode but not a numeric ZIP + 4 code must bear a correct 5-digit ZIP Code in the address.

622.146 5-Digit Barcodes Prohibited. Pieces bearing a 5-digit barcode must not be included in a third-class Basic ZIP + 4 rate mailing.

622.15 5-Digit ZIP + 4 Rates.

622.151 General. 5-digit ZIP + 4 rate mailings must meet the requirements in 622.152 through 622.155. Only letter-size pieces that bear a correct ZIP + 4 code, and meet the sortation requirements of 622.154d(1) (are part of a package of 10 or more pieces to the same 5-digit ZIP Code destination, and are placed in a 5-digit or 3-digit sack that contains at least 125 pieces or 15 pounds of mail), may qualify for the 5-digit ZIP + 4 rate. Pieces that bear a 5-digit ZIP Code, and are sorted in accordance with 622.154d(1), may qualify for the 5-digit presort level rate. Residual pieces (see 622.154d(2)) that bear a ZIP + 4 code may qualify for the basic ZIP + 4 rate. Residual pieces that bear a 5-digit ZIP Code may qualify for the basic presort level rate.

Note: Carrier-route presort level rate pieces may not be included in a 5-digit ZIP + 4 rate mailing.

622.152 Minimum Quantity. Each mailing must consist of at least 200 letter-size pieces or 50 pounds of letter-size pieces that bear a correct ZIP + 4 code and otherwise qualify for the 5-digit ZIP + 4 rate.

622.153 Requirements for at Least 85 Percent of the Pieces in Each Mailing. At least 85 percent of the total pieces in the mailing must bear a correct ZIP + 4 code. Pieces not bearing a correct ZIP + 4 code must bear a 5-digit ZIP Code.

Exception: The 85 percent ZIP + 4 code requirement may be applied to a mailing list or cycle rather than an individual mailing under the conditions in 622.154f(3).

Note: In all mailings, there must be at least 200 pieces or 50 pounds of pieces that contain the correct ZIP + 4 code and otherwise qualify for the 5-digit ZIP + 4 rate as required in 622.152.

622.154 Requirements for All Pieces in the Mailing.

a. Size Requirements. Each piece in the mailing must meet the size requirements in 622.144a.

b. Barcode Clear Zone. Each piece in the mailing must contain a barcode clear zone in accordance with the requirements in 622.144b.

c. OCR Readability. Each piece in the mailing must meet the OCR readability requirements prescribed in 622.144c, except for pieces bearing ZIP + 4 barcodes in accordance with 622.155 and 622.165.

d. Presort.

(1) Pieces Qualifying for 5-Digit ZIP + 4 and 5-Digit Presort Level Rates. All pieces in the mailing (with and without a ZIP + 4 code) must be presorted together to the finest extent possible in accordance with 667.4, except that, the contents line of 5-digit sacks must show "3C ZIP + 4"; and the contents line of 3-digit sacks must show "3C Z+4 MXD 5-DG PKGS". Pieces remaining after sortation in accordance with 667.4 has been performed are residual pieces and do not qualify for 5-digit ZIP + 4 or 5-digit presort level rates. They may, however, be included in a 5-digit ZIP + 4 mailing in accordance with 622.154d(2) below. Alternatively, they may be presented as a separate basic ZIP + 4 or basic presort level rate mailing.

(2) Residual pieces. All pieces remaining after sortation in accordance with 622.154d(1) has been performed (residual pieces) must be sorted in accordance with 667.1, except that, on the contents line of each sack label, the letters "3C" followed by the description of processing category, must be replaced with "3C ZIP + 4."

Note: Residual pieces do not count towards the minimum quantity requirements in 622.152. However, residual pieces bearing a correct ZIP + 4 code do count towards the 85 percent ZIP + 4 Code requirement in 622.153. Residual pieces may qualify for the basic ZIP + 4 or basic level presort rate, as appropriate.

e. Marking. Each piece must bear identifying markings as required in 662.5.

f. Documentation for 5-Digit ZIP + 4 Rate Mailings.

(1) Documentation Submitted With Each Mailing. Except as provided in 622.154f(2) or (3), each mailing must be accompanied by the following documentation:

(a) Pieces Qualifying for 5-Digit ZIP + 4 and 5-Digit Presort Level Rates. The mailer must list, for each 5-digit ZIP Code destination, how many pieces bear a correct ZIP + 4 code and how many bear only a correct 5-digit ZIP Code. In addition, for each 5-digit ZIP Code line entry on the list, a cumulative total of the number of pieces in the mailing must be shown. This is the total of all the pieces listed on preceding lines plus the

VOL 53
ISS 59
MR 28
1988
UMI

pieces for that 5-digit line entry. A summary of the total number of ZIP + 4 coded pieces, the total number of 5-digit coded pieces, and the total number of all pieces in the 5-digit rated portion of the mailing, must be shown. (The last entry in the cumulative total section will show the total number of pieces in the 5-digit rated portion of the mailing.)

(b) Pieces Qualifying for Basic ZIP + 4 and Basic Level Rates. The mailer must list the number of pieces bearing a correct ZIP + 4 code and the number of pieces without a ZIP + 4 code by 5-digit ZIP Code destinations for pieces packaged to 5-digit and optional city destinations, and by 3-digit ZIP Code prefix for pieces packaged to other destinations. In addition, for each ZIP Code line entry on this portion of the list, a cumulative total of the number of pieces in the mailing, must be shown. This is the total of all pieces listed on preceding lines plus the pieces for that line entry. A summary of the total number of ZIP + 4 coded pieces, the total number of 5-digit ZIP Coded pieces, and the total number of all pieces in the residual portion, must be shown. (The last entry in the cumulative total column will show the total number of pieces in the residual portion.)

(c) Totals. Summarize the total number of pieces in each rate category in the mailing. If metered postage at the 5-Digit ZIP + 4 rate is affixed to each piece in the mailing, also show the additional postage due for each rate category (except for the 5-Digit ZIP + 4 pieces), and the total postage due for the mailing. If postage is paid by permit imprint, show the total postage charges for the pieces in each rate category in the mailing, and the total postage charges. Also summarize, for the entire mailing, the total number of pieces that bear a ZIP + 4 code, the total number of pieces that bear a 5-digit ZIP Code, and the total number of all pieces in the mailing.

(2) Mailings Requiring No Documentation. The documentation required in 622.154f(1) is not required if:

(a) All pieces in the mailing bear a ZIP + 4 code, and each piece in the mailing has postage affixed at the rate for which it qualifies; or

(b) All pieces in the mailing bear a ZIP + 4 code, all the pieces in the mailing are of identical size and weight, and the residual portion of the mailing (if any) is physically separated from pieces qualifying for the 5-digit ZIP + 4 rate.

Note: Documentation is required any time that fewer than 100 percent of the pieces bear a ZIP + 4 code, regardless of the method of postage payment.

(3) Documentation Submitted Based on a Mailing List or Cycle. When pieces for a mailing list or mailing cycle, as defined by the mailer, are mailed over a period of more than one day, but not exceeding one week (seven consecutive days), the mailer may submit documentation based on the mailing list or mailing cycle to prove that the 85 percent requirement has been met, and to show either the amount of postage due for mail metered at the 5-Digit ZIP + 4 rate, or the total amount of postage to be deducted from the mailer's permit imprint account. The documentation for the entire list or cycle must, however, accompany the mailing statement submitted with the first mailing made from the list or cycle. Under this procedure, the mailer must indicate, on each mailing statement submitted, the mailing list or mailing cycle to which the pieces belong. The final mailing statement for the mailing list or cycle must accurately account for the full list or cycle. (The sum of the pieces reported on all the mailing statements submitted for the mailing list or cycle must equal the totals shown on the documentation submitted.) Under this procedure, a mailing may contain only pieces for a single mailing list or mailing cycle. If pieces from two different lists or cycles are submitted on the same day, separate mailings must be prepared, corresponding separate mailing statements must be submitted for the pieces for each list, and the mailing from the new list or cycle must be accompanied by the documentation for that list or cycle.

622.155 Pieces Prepared With ZIP + 4 Barcodes. Barcodes representing the correct ZIP + 4 code for the address shown on each piece, prepared in accordance with 622.165, may appear on pieces in a 5-digit ZIP + 4 mailing. Pieces bearing a ZIP + 4 barcode need not meet the OCR readability requirements in 622.154c to qualify for the 5-digit ZIP + 4 or basic ZIP + 4 rates. Pieces bearing a ZIP + 4 barcode must however, bear a numeric ZIP + 4 code in the address to qualify for the 5-digit or basic ZIP + 4 rates.

622.156 5-Digit Barcodes Prohibited. Pieces bearing a 5-digit barcode must not be included in a third-class 5-digit ZIP + 4 rate mailing.

622.16 ZIP + 4 Barcoded Rate.

622.161 General. Third-class ZIP + 4 Barcoded rate mailings must meet the requirements in 622.162 through 622.165. Only letter-size pieces that bear a correct ZIP + 4 barcode prepared in accordance with 622.165, and meet the sortation requirements of 622.164d(1) (are part of a package of 10 or more pieces to the same 5-digit ZIP Code destination, and are placed in a 5-digit or 3-digit sack that contains at least 125 pieces or 15 pounds of mail), may qualify for the third-class ZIP + 4 Barcoded rate. Pieces sorted in accordance with 622.164d(1), may qualify for:

a. The ZIP + 4 Barcoded rate if they bear a ZIP + 4 barcode prepared in accordance with 622.165;

b. The 5-digit ZIP + 4 rate if the pieces do not bear a ZIP + 4 barcode but contain a correct ZIP + 4 code in the address and meet the barcode clear zone and OCR readability requirements of 622.144b and 622.144c;

c. The 5-digit presort level rate if the pieces do not bear a ZIP + 4 barcode and:

(1) They contain the 5-digit ZIP Code in the address; or

(2) They contain a correct ZIP + 4 code in the address but do not meet the OCR readability and barcode clear zone requirements of 622.144b and 622.144c necessary to qualify for the 5-Digit ZIP + 4 rate.

Residual pieces sorted in accordance with 622.164d(2), may qualify for:

a. The basic ZIP + 4 rate if they bear a ZIP + 4 barcode prepared in accordance with 622.165, or if they bear a correct ZIP + 4 code and meet the barcode clear zone and OCR readability requirements in 622.144b and 622.144c; or.

b. The basic presort level rate if they do not bear a ZIP + 4 barcode and:

(1) They bear only a 5-digit ZIP Code; or,

(2) They bear a ZIP + 4 code, but do not meet the OCR readability and barcode clear zone requirements in 622.144b and 622.144c that are necessary to qualify for the basic ZIP + 4 rates.

Note: Carrier-route presort level rate pieces must not be included in a third-class ZIP + 4 barcoded rate mailing.

622.162 Minimum Quantity. Each mailing must consist of at least 200 letter-size pieces or 50 pounds of letter-size pieces that bear a correct ZIP + 4 barcode and otherwise qualify for the third-class ZIP + 4 Barcode rate.

622.163 Requirements for at Least 85 Percent of the Pieces in Each Mailing. At least 85 percent of the total pieces in the mailing must bear a correct ZIP + 4 barcode in accordance with 622.165. All pieces in the mailing must also bear either a correct ZIP + 4 code or correct 5-digit ZIP Code in the address. This 85 percent requirement is applied to the total number of pieces in all presort levels in the mailing, regardless of the rate claimed for an individual piece.

Exception: The 85 percent ZIP + 4 barcode requirement may be applied to a mailing list or cycle rather than an individual mailing under the conditions in 622.164f(5).

Note: All mailings must include at least 200 pieces or 50 pounds of pieces that bear a correct ZIP + 4 barcode and otherwise qualify for the ZIP + 4 barcode rate as required in 622.162.

622.164 Requirements for All Pieces in the Mailing.

a. Size Requirements. Each piece in the mailing must meet the size requirements in 622.144a.

b. ZIP Codes. Each piece, whether or not it bears a ZIP + 4 barcode, must bear either the correct ZIP + 4 code or the correct 5-digit ZIP Code in the address.

c. 5-Digit Barcodes Prohibited. Pieces bearing a 5-digit barcode must not be included in a ZIP + 4 Barcoded rate mailing.

d. Presort.

(1) Pieces Qualifying for ZIP + 4 Barcode, 5-Digit ZIP + 4 and 5-Digit Presort Level Rates. All pieces in the mailing (ZIP + 4 barcoded, ZIP + 4 coded, 5-digit ZIP Coded, and permissible combinations) must be presorted together to the finest extent possible in accordance with 667.4, except that, the contents line of 5-digit sacks must show "3C ZIP + 4 BARCODED"; and the contents line of 3-digit sacks must show "3C Z+4 BRCDED MXD 5-DG PKG." In addition, it is recommended that a pressure sensitive red Label 9 be affixed to the lower right portion of each sack label. The red Label 9 should be affixed in a manner that will not interfere with the ability to read the destination or contents lines of the sack label.

Pieces remaining after sortation in accordance with 667.4 has been performed are residual pieces and do not qualify for ZIP + 4 Barcoded, 5-digit ZIP + 4, or 5-digit presort level rates. They may however, be included in a ZIP + 4 Barcoded mailing in accordance with 622.154d(2). Alternatively, they may be prepared as a separate mailing.

(2) Residual pieces. All pieces remaining after sortation in accordance with 622.164d(1) has been performed (residual pieces) must be sorted in accordance with 667.1, except that, on the contents line of sack labels, the characters "3C" followed by the processing category, must be replaced with "3C ZIP + 4 BARCODED." It is recommended that a pressure sensitive red Label 9 be affixed to the lower right portion of each sack label in a manner that will not interfere with the ability to read the destination or contents lines. The contents line for Mixed States sacks may be shown as 3C Z+4 BARCODED-MXD STS.

Note: Residual pieces do not count towards the minimum quantity requirements in 622.162. However, residual pieces bearing a correct ZIP + 4 barcode prepared in accordance with 622.165, do count towards the 85 percent ZIP + 4 barcode requirement in 622.163. Residual pieces may qualify for the basic ZIP + 4 or basic level presort rate, as appropriate.

e. Marking. Each piece must bear an identifying marking as required in 662.6.

f. Documentation. Except as described in 622.164f(4) or (5), the documentation described in 622.164f(1) through (3) must be submitted with each mailing.

(1) Pieces Qualifying for the ZIP + 4 Barcoded, 5-Digit ZIP + 4, and 5-Digit Presort Level Rates. Except as provided in 622.164f(4) or (5), the mailer must submit a list with each mailing that shows, for each 5-digit ZIP Code destination, the:

(a) Number of Pieces Qualifying for the ZIP + 4 Barcode rate. This is the number of pieces that bear a correct ZIP + 4 barcode in accordance with 622.165;

(b) Number of Pieces Qualifying for the 5-Digit ZIP + 4 Rate. This is the number of non-barcoded pieces that bear a correct ZIP + 4 code and meet the OCR readability and barcode clear zone requirements of 622.144b and 622.144c;

(c) Number of Pieces Qualifying for the 5-Digit Presort Level Rate. This is the total of: (1) The number of non-barcoded pieces that bear a correct ZIP + 4 code but do not meet the the OCR readability and barcode clear zone requirements of 622.144b and 622.144c; and (2) The number of non-barcoded pieces that bear a correct 5-digit ZIP Code.

(d) Cumulative Total. This is the total of all pieces listed on preceding lines for the 5-digit portion of the mailing plus the pieces for that 5-digit ZIP Code.

Total each of the above categories to provide: (a) the total number of pieces qualifying for the ZIP + 4 Barcode rate; (b) the total number of pieces qualifying for the 5-Digit ZIP + 4 rate; and (c) the total number of pieces qualifying for the 5-digit presort level rate. The last entry in category (d) will show the total number of pieces in the 5-digit portion of the mailing.

(2) Pieces Qualifying for the Basic ZIP + 4 and Basic Level Rates. Except as provided in 622.164f(4) or (5) below, the mailer must submit documentation with each mailing that lists by 5-digit ZIP Code, for pieces packaged to 5-digit and optional city destinations, and by 3-digit ZIP Code, for pieces packaged to other destinations, the:

(a) Number of Barcoded Pieces Qualifying for the Basic ZIP + 4 Rate. This is the number of correctly barcoded pieces that bear either a correct ZIP + 4 code in the address or a correct 5-digit ZIP Code in the address;

(b) Number of Non-Barcoded Pieces Qualifying for the Basic ZIP + 4 Rate. This is the number of non-barcoded pieces that bear a correct ZIP + 4 code in the address and meet the OCR readability and barcode clear zone requirements in 622.144b and c;

(c) Number of Pieces Qualifying for the Basic Level Rate. This is the total of: (1) The number of non-barcoded pieces that bear a correct ZIP + 4 code but do not meet the the OCR readability and barcode clear zone requirements of 622.144b and 622.144c; and (2) The number of non-barcoded pieces that bear a correct 5-digit ZIP Code.

(d) Cumulative Total. This is the total of all pieces listed on preceding lines plus the pieces for that entry.

Total each of the above categories to provide: (a) the total number of barcoded pieces qualifying for Basic ZIP + 4 rates; (b) the total number of non-barcoded pieces qualifying for the Basic ZIP + 4 rate; and (c) the total number of pieces qualifying for the basic level rate. The last entry in category (d) will be the total number of pieces in this portion of the mailing (sorted in accordance with the basic level rate requirements).

(3) Totals. Summarize the total number of pieces in each rate category in the mailing. If metered postage at the ZIP + 4 Barcoded rate is affixed to each piece in the mailing, also show the additional postage due for each rate category (except for the ZIP + 4 Barcoded rate pieces) and the total postage due for the mailing. If postage is paid by permit imprint, show the total postage charges for the pieces in each rate category in the mailing, and the total postage charges. Also summarize, for the entire mailing, the total number of pieces that bear a ZIP + 4 barcode, the total number of pieces that do not bear a ZIP + 4 barcode, and the total number of all pieces in the mailing.

(4) Mailings Requiring No Documentation. The documentation in 622.164f(1) through (3) is not required if:

(a) All pieces in the mailing bear a ZIP + 4 barcode prepared in accordance with 622.165 and each piece in the mailing has postage affixed at the rate for which it qualifies.

(b) All pieces in the mailing bear a ZIP + 4 barcode prepared in accordance with 622.165, and all the pieces in the mailing are of identical size and weight, and the residual portion of the mailing (if any) is physically separated from pieces qualifying for the ZIP + 4 barcoded rate.

Note: Documentation is required any time that fewer than 100 percent of the pieces bear a ZIP + 4 barcode, regardless of the method of postage payment.

(5) Documentation Submitted Based on a Mailing List or Cycle. When pieces for a mailing list or mailing cycle, as defined by the mailer, are mailed over a period of more than one day, but not exceeding one week (seven consecutive days), the mailer may submit documentation based on the mailing list or

mailing cycle to prove that the 85 percent requirement has been met, and to show either the amount of postage due for mail metered at the ZIP + 4 Barcoded rate, or the total amount of postage to be deducted from the mailers permit imprint account. The documentation for the entire list or cycle must, however, accompany the mailing statement submitted with the first mailing made from the list or cycle. Under this procedure, the mailer must indicate, on each mailing statement submitted, the mailing list or mailing cycle to which the pieces belong. The final mailing statement for the mailing list or cycle must accurately account for the full list or cycle. (The sum of the pieces reported on all the mailing statements submitted for the mailing list or cycle must equal the totals shown on the documentation submitted.) Under this procedure, a mailing may contain only pieces for a single mailing list or mailing cycle. If pieces from two different lists or cycles are submitted on the same day, separate mailings must be prepared, corresponding separate mailing statements must be submitted for the pieces for each list, and the mailing from the new list or cycle must be accompanied by the documentation for that list or cycle.

622.165 Barcode Requirements.

a. Correct ZIP + 4 Barcode. The barcode must accurately represent the correct 5-digit and sector-segment codes for the address on the mailpiece. Pieces bearing default or fictitious add-on codes, e.g., 0000, 5000, 9999, etc., must not be included in a ZIP + 4 Barcoded rate mailing.

b. General Preparation. A ZIP + 4 barcode is made up of a single field of 52 bars. The information content of the barcode is distinguished by the height of the bars, either tall (full) or short (half) bars, which represent a "one" or a "zero" to a USPS barcode sorter. These bars, when separated into groups of five, represent each of the nine digits of a ZIP + 4 code, plus a tenth digit designated as the "correction digit." The first and last bars of the barcode are "frame bars" and must always be full bars. (See Exhibit 622.165b.) The sequence of bars must represent the ZIP + 4 code (including the appropriate correction character) in the address of the piece, according to the code defined in Exhibit 622.165b.

c. Barcode Location. The location of the barcode must be on the address side of the mailpiece and within a clear space known as the "barcode read area," which must be free of any printing other than the barcode. The read area extends 5/8 inch from the bottom and at least 4-1/2 inches from the right edge of the mailpiece. Within the read area, the left-most bar of the barcode must be located between 3-1/4 inches and 4 inches from the right edge of the mailpiece. The bottom of the bars must be positioned 1/4 inch (± 1/16 inch) from the bottom edge of the mailpiece (see Exhibit 622.165c), and the barcode must be completely contained within the solid rectangle shown in Exhibit 622.165c.

d. Barcode Dimensions and Spacing. A full bar must be .125 ± .010 inch in height. A half bar must be .050 ± .010 inch in height. The width of all bars must be equal and must be .020 ± .005 inch. Horizontal spacing of the bars must be 21 ± 1 bar per inch. Pitch (a bar and a space) must be limited to .045 inch minimum and .050 inch maximum.

e. Background Contrast. A print reflectance difference (envelope reflectance minus print reflectance) of at least .30 is required between the background material of the mailpiece and the bar code, when measured in the red portion of the spectrum at 660 nanometers.

f. Skew and Baseline Shift. The combined effects of positional and rotational skew (slant) of the bar code must be limited to a maximum rotation of the bars of ± 5 degrees from a perpendicular to the bottom edge of the mailpiece. The bottom of any bar must not be more than .005 inch from the bottom of each adjacent bar.

g. Printing Irregularities. Attached extraneous ink (connected to a bar) must not cause any bar to exceed the maximum height or width dimensions. Detached extraneous ink (not connected to any bar or bars) in the bar code read area must not exceed .003 inch in any dimension or cause the space-to-background print reflectance difference to exceed 10 percent. Individual bars must not contain ink voids which reduce bar width to less than .010 inch or remove more than .010 inch along the bar height.

h. Inserts. The barcode may be printed on an insert and appear through a barcode window on an envelope under the following conditions:

(1) Barcode Window Specifications.

(a) Windows must be covered with a clear plastic material, securely glued on all sides;

(b) Envelopes with barcode windows may be used only when the ZIP + 4 barcode will be visible through the barcode window;

(c) Windows must extend fully to the lower edge of the envelopes and must be of wrap-around construction;

(d) The right edge of the window must be not less than 1/4 inch from the right edge of the envelope; and

(e) The left edge of the window must be not less than 4 1/2 inches from the right edge of the envelope.

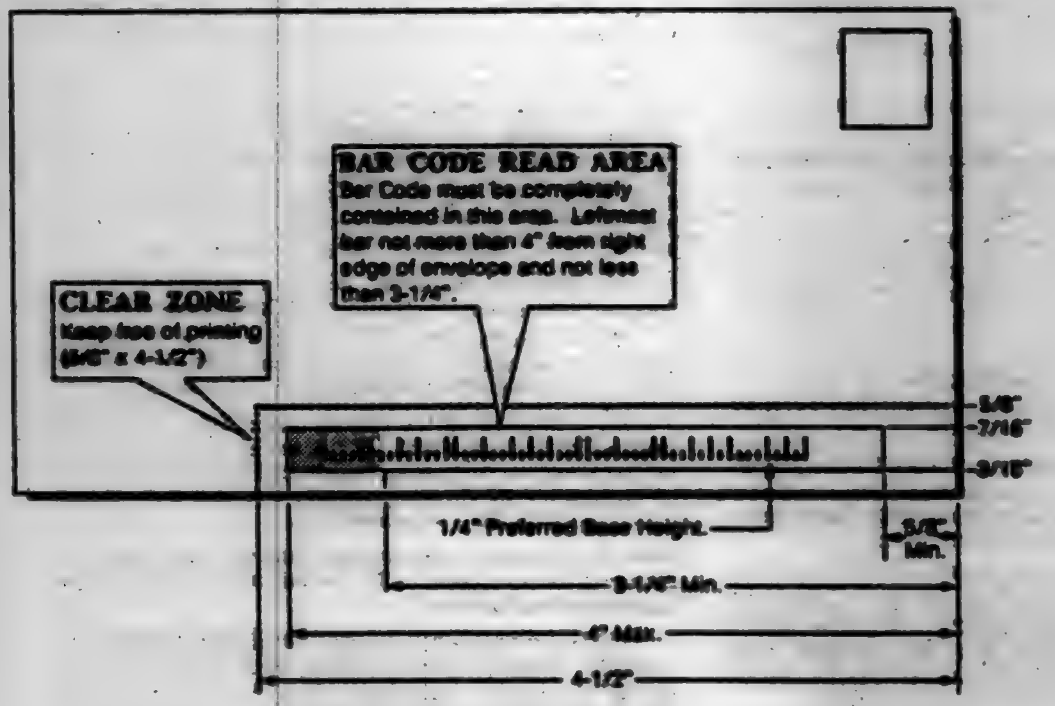
(2) Barcode Location Specifications. The barcode, as it shows through the window when inserted in the envelope, must meet all of the following specifications:

(a) The ZIP + 4 barcode must be located within the barcode clear zone which extends 5/8 inch from the bottom of the envelope and 4-1/2 inches from the right edge of the envelope;

(b) The barcode must be at least 1/5 inch from the right edge of the window and 1/5 inch from the left edge of the window;

(c) No printing other than the ZIP + 4 barcode is permitted in the barcode clear zone; and

(d) The left-most bar must be located 3-5/8 inches ± 3/8 inch from the right edge of the mailpiece and from 3/16 inch to 7/16 inch from the bottom edge of the envelope. The baseline of all bars must be 1/4 inch ± 1/16 inch from the bottom edge of the mailpiece.



BAR CODE READ AREA
Bar Code must be completely contained in this area. Leftmost bar not more than 4" from right edge of envelope and not less than 3-1/4".
CLEAR ZONE
Keep free of printing (5/8" x 4-1/2")
5/8"
7/16"
3/16"

4" Max.
4-1/2"

Exhibit 622.165c, Barcode Read Area

622.17 Processing Category. Irregular and machinable mail may be commingled in 5-digit and optional city sacks. All other pieces in a bulk rate mailing must be of the same characteristic type as defined in 128 (i.e., letter-size, flats, machinable parcels, or irregular parcels). Not all processing categories may qualify for every bulk third-class rate.

* * * * *

640 Authorizations and Permits

641 Annual Fee—Bulk Rates

Except when a third-class bulk mailing is made under the permit imprint system, each person or organization that enters mailings at the regular or special bulk third-class rates must pay an annual bulk mailing fee once each 12-month period, at each post office of mailing (see 612.1). Persons or organizations paying this fee may enter mail of their clients as well as their own mail. When a third-class bulk mailing is made under the permit imprint system, the person or organization whose permit imprint is on the mailpiece must put that permit number on the mailing statement and must pay the annual bulk mailing fee once each 12-month period for that permit.

Note: This fee is separate from the fee that must be paid for a permit to mail under the permit imprint system (see 145.2).

* * * * *

662 Marking

662.1 Single-Piece Rate. Each sealed piece mailed at the single-piece third-class postage rate provided for by 611.1 must be legibly marked on the address side, preferably below the postage and above the name of the addressee, with the words "Third-Class." The marking may be included as part of a permit imprint, and it may be printed adjacent to the meter stamp by a postage meter. The marking will not be considered adequate if it is included as part of a decorative design or advertisement.

662.2 Bulk Rates. The following identifying words must be printed or rubberstamped by the mailer either as part of or immediately adjacent to the permit imprint, meter stamps, or precanceled stamps:

a. "Bulk Rate" or the abbreviation "Blk. Rt." (by mailers other than authorized special-rate organizations); or

b. "Nonprofit Organization" or one of the shorter forms, "Nonprofit" or "Nonprofit Org." (by authorized special-rate organizations).

* * * * *

662.4 Basic ZIP + 4 Mail. In addition to the endorsement required in 662.2, the identifying endorsement "ZIP + 4" must be printed or rubberstamped by the mailer either as a part of or immediately adjacent to the permit imprint, meter stamps, or precanceled stamps on pieces entered at the third-class basic ZIP + 4 rate. Alternatively, the "ZIP + 4" endorsement may be located in the address area on the line either immediately above the address or two lines above the address. (The preferred position is two lines above the address.) If the "ZIP + 4" endorsement is located in the address area, no other information may appear on the endorsement line except for carrier route information.

Note: Carrier-route presort level rate pieces must not be included in a basic ZIP + 4 rate mailing.

662.5 5-Digit ZIP + 4 Mail. All pieces in a 5-digit ZIP + 4 mailing must bear one of the endorsements required in 662.2 to identify it as a regular rate or special rate mailing. In addition to the endorsement in 662.2, all pieces sorted in accordance with 622.154d(1) must bear the identifying endorsement "5-Digit ZIP + 4." The "5-Digit ZIP + 4" endorsement must be printed or rubberstamped by the mailer either as part of or immediately adjacent to the permit imprint, meter stamps, or precanceled stamps. Alternatively, the "5-Digit ZIP + 4" endorsement may be located in the address area on the line either immediately above the address or two lines above the address. (The preferred position is two lines above the address.) If the "5-Digit ZIP + 4" endorsement is located in the address area, no other information may appear on the endorsement line except for carrier route information.

Note: Carrier-route presort level rate pieces must not be included in a 5-digit ZIP + 4 mailing.

662.6 ZIP + 4 Barcoded Rate. All pieces in a third-class ZIP + 4 Barcoded rate mailing must bear one of the endorsements required in 662.2 to identify it as a regular rate or special rate mailing. In addition to the endorsement in 662.2, all pieces sorted in accordance with 622.164d(1) must bear the identifying endorsement "ZIP + 4 Barcoded." The "ZIP + 4 Barcoded" endorsement must be printed or rubberstamped by the mailer either as a part of or immediately adjacent to the permit imprint, meter stamps, or precanceled stamps. Alternatively, the "ZIP + 4 Barcoded" endorsement may be located in the address area on the line either immediately above the address or two lines above the address. (The preferred position is two lines above the address.) If the "ZIP + 4 Barcoded" endorsement is located in the address area, no other information may appear on the endorsement line except for carrier route information.

Note: Carrier-route presort level rate pieces must not be included in a ZIP + 4 Barcoded rate mailing.

* * * * *

667.4 Preparation Requirements for 5-Digit Presort-Level Rate

* * * * *

667.42 Sacking

a. Sack Preparation. All packages of 10 or more pieces to the same 5-digit ZIP Code destination must be placed in sacks containing a minimum of 125 pieces or 15 pounds of mail and must be prepared in accordance with 667.421 through 667.422. Mailers must note on the mailing statement submitted with the mailing whether the 125 piece or 15 pounds minimum, or both

BEST COPY AVAILABLE

(for nonidentical-weight mailings), were used as the basis for preparation of the entire mailing in sacks. (The remainder of 667.42 is unchanged.)

• • • • •

(Delete current 667.422 and 667.423 and add new 667.422)

667.422 3-Digit Sacks. When, after preparing all required 5-digit sacks, there are 125 pieces or 15 pounds of qualifying 5-digit mail to different 5-digit ZIP Code destinations within a 3-digit ZIP Code area, it MUST be placed in a 3-digit sack and meet the following criteria:

a. Each sack must contain at least 125 pieces or 15 pounds of mail;

b. 3-digit packages must NOT be included in the sack; and

c. 125 pieces or 15 pounds of mail for a single 5-digit ZIP Code (within the 3-digit ZIP Code area) must be sacked separately.

3-digit sacks containing fewer than 125 pieces and less than 15 pounds of qualifying mail will not be accepted. Each 3-digit sack must be labeled in the following manner:

Line 1: City, 2-letter state abbreviation, and 3-digit ZIP Code prefix.
Line 2: Contents followed by the words "MIXED 5-DIGIT PKGS".
Line 3: Office of Mailing.

Sample:

BINGHAMTON NY 137
3C LTRS MXD 5-DG PKGS
PHILADELPHIA PA

Note: The following abbreviations may be used on the contents line of sack and pallet labels for 5-digit presort level rate mailings.

LETTERS	LTRS
FLATS	FLTS
MIXED	MXD
DIGIT	DG

680 Payment of Postage

681 Method of Payment

• • • • •

681.2 Bulk Mailings at Basic Presort Level, 5-Digit Presort Level, and Carrier Route Presort Level Rates

• • • • •

681.3 Bulk Mailings at Basic ZIP + 4, 5-Digit ZIP + 4, and ZIP + 4 Barcoded Rates.

.31 Permit Imprint. (See 145).

.311 Identical-Weight Pieces. Identical-weight mailings may have postage paid by means of permit imprint. Mailings at the basic ZIP + 4, 5-Digit ZIP + 4, and ZIP + 4 Barcoded rates must be accompanied by the documentation required in 622.144f, 622.154f, and 622.164f, respectively.

.312 Nonidentical-Weight Pieces. Nonidentical-weight pieces may be paid by permit imprint only under an optional or alternative postage payment procedure authorized by the General Manager, Rates and Classification Center (see 145.8 and 145.9).

.32 Meter Stamps. (See 144). Meters may be used to pay postage for mailings of both nonidentical-weight pieces and identical-weight pieces. Postage may be paid by any of the following methods:

a. Correct Postage Affixed to Each Piece.

(1) Basic ZIP + 4 Rate. Pieces qualifying for the basic ZIP + 4 rate are metered at that rate, while other pieces are metered at the basic presort level rate. See also 622.144f for documentation requirements.

(2) 5-Digit ZIP + 4 Rate. Pieces qualifying for the basic ZIP + 4 rate are metered at that rate, pieces qualifying for the 5-digit presort level rate are metered at that rate, pieces qualifying for the basic ZIP + 4 rate are metered at that rate, and pieces qualifying for the basic presort level rate are metered at that rate. See 622.154f for documentation requirements.

(3) ZIP + 4 Barcoded Rate. Pieces qualifying for the the ZIP + 4 Barcoded rate are metered at that rate, pieces qualifying for the 5-Digit ZIP + 4 rate are metered at that rate, pieces qualifying for the 5-digit presort level rate are metered at that rate, pieces qualifying for the basic ZIP + 4 rate are metered at that rate, and pieces qualifying for the basic presort level rate are metered at that rate. See 622.164f for documentation requirements.

b. Lowest Rate in the Mailing Affixed to Each Piece.

(1) Basic ZIP + 4 Rate. Basic ZIP + 4 rate mailings of identical weight may have metered postage affixed at the basic ZIP + 4 rate to each piece in the mailing. Additional postage for pieces subject to the basic presort level rate must be determined from the documentation required by 622.144f to be submitted with such mailings, and paid by means of a meter strip affixed to the back of Form 3602-PC, *Statement of Mailing--Bulk Rates*, or paid through an advance deposit account as provided for in Handbook F-1, *Post Office Accounting Procedures*, 524.

(2) 5-Digit ZIP + 4 Rate. 5-Digit ZIP + 4 rate mailings of identical weight may have metered postage affixed at the 5-Digit ZIP + 4 rate to each piece in the mailing. Additional postage for pieces subject to the 5-digit presort level rate, the basic ZIP + 4 rate, and the basic presort level rate, must be determined from the documentation required by 622.154f to be submitted with such mailings, and paid by means of a meter strip affixed to the back of Form 3602-PC, *Statement of Mailing--Bulk Rates*, or paid through an advance deposit account as provided for in Handbook F-1, *Post Office Accounting Procedures*, 524.

(3) ZIP + 4 Barcoded Rate. ZIP + 4 barcoded rate mailings of identical weight may have metered postage affixed at the ZIP + 4 Barcoded rate to each piece in the mailing. Additional postage for pieces subject to the 5-digit ZIP + 4 rate, the 5-digit presort level rate, the basic ZIP + 4 rate, and the basic presort level rate, must be determined from the documentation required by 622.164f, and paid by means of a meter strip affixed to the back of Form 3602-PC, *Statement of Mailing--Bulk Rates*, or paid through an advance deposit account as provided for in Handbook F-1, *Post Office Accounting Procedures*, 524.

.33 Precanceled Stamps or Precanceled Stamped Envelopes. (See 143.) Requirements prescribed for meter stamps in 681.32a and b also apply to mailings with precanceled postage.

• • • • •

682 Mailing Statement for Bulk Mailings

682.1 Type of Mailing Statement Required. The mailer must complete and submit the appropriate mailing statement with each mailing.

• • • • •

Note: All mailing statements are subject to verification by the Postal Service. Form 3602-PC must be submitted in duplicate for mailings metered at the lowest rate for which the difference between postage affixed and the applicable rate is paid through an advance deposit account, as provided Handbook F-1, *Post Office Accounting Procedures*, 524.

Chapter 7
Fourth-Class Mail

710 Rates and Fees

711 Rates

711.1 Parcel Post Rates.

711.11 Inter-BMC Rates - Machinable Parcels. (See Exhibit 711.11.) These rates apply to all parcel post mail that weighs 35 pounds or less or is not otherwise nonmachinable based on the criteria in 753, and which originates in the service area of a BMC/ASF (see Exhibit 722.1), Alaska, Hawaii, or Puerto Rico, and destinates outside that area.

711.12 Inter-BMC Rates - Nonmachinable Parcels. (See Exhibit 711.12.) These rates include the $1.15 nonmachinable surcharge and apply to all inter-BMC/ASF parcel post mail that weighs over 35 pounds or otherwise is nonmachinable as defined in 753.

711.13 Intra-BMC Rates - All Parcels. (See Exhibit 711.13.) These rates include the $0.20 discount and apply to all parcel post mail that originates in the service area of a BMC/ASF (see Exhibit 722.1), Alaska, Hawaii, or Puerto Rico, and destinates within the same area.

711.14 Bulk Parcel Post Rates. The rate applicable to each piece in a bulk parcel post rate mailing is the single piece rate for that zone for an item equal to the average weight per piece for all parcels in the mailing going to that zone, rounded up to the next whole pound, using Exhibit 711.11, 711.12 or 711.13, as appropriate.

711.2 Bound Printed Matter Rates.

711.21 Qualification. Pieces paid at the bound printed matter rates must meet the requirements of 721.1 and 723. Pieces paid at the bulk bound printed matter rates must also meet the requirements of 723.2.

711.22 Single Piece Zone Rates. (See Exhibit 711.22.)

711.23 Bulk Bound Printed Matter Rates. (See Exhibit 711.23.) The postage for bulk bound printed matter includes both a per-piece charge and a per pound charge.

711.24 Individually Metered Pieces - Bulk Bound Printed Matter Rates. (See Exhibit 711.24.) If the applicable piece rate is affixed to each piece, pieces of nonidentical weight may be mailed at the applicable bulk rates if the mailing meets all applicable bulk rate requirements. To compute the postage at the basic or carrier-route bulk bound printed matter rate for individual pieces to be paid by postage meter, multiply the weight of the piece by the applicable per-pound charge, add the applicable per-piece charge, and round the sum upward to the next tenth of a cent (or next whole cent if the meter being used cannot print fractional amounts). The per-pound postage for each piece cannot be less than the one-pound rate for that zone. Exhibit 711.24 illustrates the computed postage amounts for selected weight increments; the correct postage for pieces of other weights must be computed as described above.

711.3 Special Fourth-Class Rates.

711.31 Qualification. Pieces paid at special fourth-class rates must meet the requirements of 721.1 and 724. Pieces paid at the Level A or Level B presort rates must also meet the requirements of 724.2.

711.32 Rates. (See Exhibit 711.32.) Special fourth-class rates are based solely on weight without regard to zone.

711.4 Library Rate.

711.41 Qualification. Pieces paid at the library rate must meet the requirements of 721.1 and 725.

711.42 Rates. (See Exhibit 711.42.) The library rate is based solely on weight without regard to zone.

711.5 Addressed Pieces. Apply the rates shown in exhibits 711.11 through 711.42 to each individually addressed piece.

712 Fees

712.1 Special Fourth-Class Presort Mailing Fee. The special fourth-class presort mailing fee is $60 for each 12-month period (see 742).

712.2 Address Correction Fee. The fee for address correction service is $0.30 per notice issued.

• • • • •

Exhibit 722.1 – Within BMC (Intra-BMC/ASF) Rate ZIP Code Service Areas

(Change the footnote to read as follows:)

Note: Intra-BMC/ASF rates (see Exhibit 711.13) apply to parcel post mail that both originates within one of the BMC or ASF service areas described above, or within Alaska, Hawaii, or Puerto Rico, and destinates within the same area.

• • • • •

723.2 Bulk Bound Printed Matter

723.21 Requirements. The bulk bound printed matter rates are applied to mailings of 300 or more pieces of fourth-class bound printed matter of identical weight and size. Mailings may contain pieces of nonidentical weight only if postage is affixed to each piece (using the instructions in 711.24), or if the Rates and Classification Center, serving the office of mailing, has authorized payment of postage by permit imprint, in accordance with 145.8 or 145.9.

(Renumber existing 723.22 as 723.23; add new 723.22 as follows.)

723.22 Nonidentical-Weight Pieces with Postage Affixed. To determine the correct postage to be affixed to nonidentical-weight pieces paid at the bulk bound printed matter rates, see the instructions in 711.24.

• • • • •

742 Special Fourth-Class Presort Mailing Fee

• • • • •

A presort mailing fee (see 712.1) must be paid once each 12-month period at each office of mailing by or for any person who mails presorted special fourth-class mail, and by any person who engages a business concern or other individuals to mail presorted special fourth-class mail.

• • • • •

753 Nonmachinable Surcharge

753.1 General. The nonmachinable surcharge (see 711.12) applies only to the items listed in 753.2 if mailed at the inter-BMC/ASF parcel post rates. It is not applicable to those items or any other matter mailed at the intra-BMC/ASF parcel post rates, or at any other fourth-class rates, or if the mailer has paid the special delivery fee (see 915) or the special handling fee (see 916).

753.2 Applicable Items. Except as provided by 753.1, the nonmachinable surcharge applies to items that meet any of the following criteria:

VOL 53
ISS 59
MR 28
1988
UMI

Chapter 9
Special Services

910 Special Mail Services

911 Registered Mail

* * * * *

911.2 Fees and Liability

911.21 Fees. (See Exhibit 911.21.)

* * * * *

911.23 Postal Insurance Liability

* * * * *

911.232 With Commercial Insurance Containing a Deductible Amount.

(In the fifth sentence, replace *"25 cents"* with *"$0.35".)*

* * * * *

Certified Mail

* * * * *

912.3 Fees (in addition to postage.) The fees for certified mail are:

Fee	$ .85
Restricted delivery	2.00
Return receipts	
Requested at time of mailing:	
Showing to whom and date delivered	$0.90
Showing to whom, date, and address where delivered	1.20
Requested after mailing:	
Showing to whom and date delivered	$5.00

913 Insured Mail

* * * * *

913.2 Fees and Liability

913.21 Fees (in Addition to Postage). The fees for insuring mail are:

Liability	Fee
$0.01 to $50	$0.70
50.01 to 100	1.50
100.01 to 150	1.90
150.01 to 200	2.20
200.01 to 300	3.15
300.01 to 400	4.30
400.01 to 500	5.00

Liability for insured mail is limited to $500.

* * * * *

913.4 Mailing

* * * * *

913.43 Individual Receipts for Mailing. For each insured parcel mailed, the mailer is issued a receipt on one of the following forms:

a. Form 3813, *Receipt for Domestic Insured Parcel,* when the package is insured for $50 or less; or

b. Form 3813-P, *Receipt For Insured Mail Domestic/International,* when the package is insured for more than $50.

Note: The post office keeps no record of the mailing of insured packages. Mailers must enter the name and address of the addressee on the receipt and retain it. Mailers must exhibit the receipt if claim for loss is made. The receipt must be shown if an inquiry is filed. A temporary receipt showing only the total number of parcels accepted may be issued when a large number of articles are mailed. The permanent receipt will be issued as soon as possible.

(In sections 913.441a, 913.441b, 913.442, 913.461a, 913.461b, and 913.51, replace the figure *$25* with *$50.).*

* * * * *

916.4 Fees (in addition to postage.) The fees for special handling are:

Weight	Fee
10 pounds and less	$1.55
More than 10 pounds	2.25

917 Business Reply Mail (BRM)

917.1 General

* * * * *

917.14 Business Reply Mail Accounting System (BRMAS). Mailers may obtain a reduced fee for the return of their BRM cards and letters under the Business Reply Mail Accounting System (BRMAS). BRMAS provides an automated method of processing and rating BRM. The requirements for entry into the BRMAS system are as follows:

a. Mailers must pay for BRM through a business reply account as specified in 917.343 or 137.276g.

b. Mailers must obtain an authorization in accordance with 917.213. During the authorization process mailers will be assigned a unique ZIP + 4 code for each rate category of BRM that will be returned to them under the system (one for cards, one for letter-size pieces weighing one ounce or less, one for letter size pieces weighing over 1 ounce and up to and including 2 ounces).

c. The unique ZIP + 4 code assigned during the application process must appear in the address of each BRM piece distributed for return under this system. The ZIP + 4 code on each BRM piece must be the proper one assigned for the rate category of the piece upon its return. The ZIP + 4 codes assigned for this program must be used only on the appropriate BRM pieces of the organization.

d. A barcode, prepared in accordance with 917.528b, that corresponds to the unique ZIP + 4 code that appears in the address as described in 917.14c, must appear on each BRM piece distributed under the BRMAS system.

e. Each BRM card or letter under the BRMAS system must contain a FIM C.

f. Each BRM card or letter must meet the automation size and paper stock requirements of 917.6.

g. All other requirements for BRM must also be met.

917.2 Permits

917.21 Application

* * * * *

917.213 Business Reply Mail Accounting System. A mailer who wants to participate in the BRMAS system must submit a letter of request to the Postmaster or to the Manager, Mailing Requirements, at the post office to which the pieces will be returned, so that an account can be opened on the BRMAS system. The mailer will be provided with detailed instructions on how to correctly prepare BRM, including the ZIP + 4 codes to be used. The mailer is encouraged to provide for approval, pre-production sample BRM pieces that properly show the ZIP + 4 codes, barcodes, and other BRMAS and BRM requirements. A letter of authorization will be issued to the mailer.

Note: The mailer must have a valid business reply permit as required in 917.211 and 917.22, or 137.276g, and must pay the annual BRM permit and accounting fee as described in 917.343b for entry into the BRMAS system.

917.22 Annual Permit Renewals. An annual renewal notice will be furnished to each BRM permit holder. The permit holder must return the renewal notice and payment to the post office that issued the permit by the expiration date of the permit. Management sectional centers (MSCs) will provide renewal notices for use by their associate offices.

* * * * *

917.241 Acceptance Conditions

* * * * *

c. A separate permit and accounting fee must be paid at each post office where a business reply account is desired (see 917.343b).

917.242 Return Through More Than One Post Office

* * * * *

b. Exceptions:

* * * * *

(3) A separate permit and accounting fee must be paid at each post office where a business reply account is desired (see 917.343b).

* * * * *

917.3 Postage and Fees

917.31 General. There is an annual BRM permit fee charged once each 12-month period. First-Class postage and a BRM per-piece charge will be collected from the addressee upon delivery. An annual permit and accounting fee is required for establishment of a business reply account (see 917.343b).

* * * * *

917.33 Fees

a. The BRM annual permit and renewal fee is $60 (for mailers not maintaining a BRM account as described in 917.343).

b. The BRM annual permit and accounting fee is $260 (for mailers maintaining a business reply account as described in 917.343).

c. The applicable and full BRM fee(s) must be paid once each 12-month period.

* * * * *

917.34 Payment of Postage and Fees

* * * * *

917.342 Cash or Postage-Due Account. Payment may be paid in cash or through a regular postage-due account, as follows:

a. Amount Collected. The amount to be collected for cash or use of regular postage-due account transactions is the appropriate First-Class postage, plus a charge of $0.40 per piece.

* * * * *

917.343 Business Reply Account. A business reply account must only be used for payment of postage and fees on BRM as follows:

a. Amount Collected. The amount to be collected for business reply account transactions is the appropriate First-Class postage, plus a charge of $0.08 per piece. The amount to be collected for business reply account transactions for pieces prepared under the BRMAS system (see 917.14) is the appropriate First-Class postage, plus a charge of $0.05 per piece.

Exception: Business reply cards and letters returned under the BRMAS system that are rejected by USPS barcode sorters and are found not to meet the machinability, barcode, or other preparation requirements necessary for the BRMAS system will be charged the appropriate First-Class postage plus a charge of $0.08 per piece. In addition, if improper barcodes appear on BRM pieces returned under the BRMAS system (for example, if a barcode representing the card rate appears on a letter-size piece) the pieces will be subject to the appropriate First-Class postage plus a charge of $0.08 per piece.

b. Permit and Accounting Fee. An annual permit and accounting fee is charged for each business reply account at each post office where the mail is to be returned. The full permit and accounting fee must be paid once each 12-month period.

Note: BRM permit holders who want to begin using a business reply account at a time other than the anniversary date of their existing permit must pay the full $260 permit and accounting fee. However, such permit holders may apply (under the provisions of 147) for a refund of the unused portion of the current permit fee. Such refunds will be given based on a prorated schedule of $5 for each whole month the permit was not used.

Example: A mailer paid the $60 permit fee on January 1, and, on July 5 of that same year, decided to open a business reply account. On July 5, this permit holder would be required to pay the $260 annual business reply permit and accounting fee. However, the permit holder could apply for a refund of the unused portion of the original permit fee (paid on January 1) for the period from August through December. Since the refund is based upon whole months not used, a refund for the month of July is not given. The mailer would be eligible for a $25 refund for the months of August, September, October, November, and December ($5 per month times 5 months).

c. The following conditions apply to business reply accounts:

* * * * *

(3) When a permit holder with a business reply account desires a separation of charges, payment of a business reply permit and accounting fee is required for each billing prepared for each separation. If a business reply permit and accounting fee is not paid for each separation, the permit holder pays the appropriate First-Class postage, plus a charge of $0.40 per piece for each separation.

* * * * *

d. Insufficient Funds. When a business reply account contains insufficient funds to cover the amount due for postage and fees, the BRM is held and the permit holder notified by certified mail that the BRM is being held. If funds are not deposited within 3 days, the BRM is treated as a cash or postage-due account transaction, and the permit holder pays the appropriate First-Class postage, plus a charge of $0.40 per piece. If funds are deposited within 3 days, all BRM held during the 3 days will be charged First-Class postage, plus $0.08 per piece or, if under the BRMAS system, First-Class postage, plus $0.05 per piece.

e. BRM Addressed to Different Firms. BRM addressed to several different firms at the same delivery unit may be delivered to an agent authorized by a valid business reply permit holder. The agent will pay one business reply account fee for all the firms represented by the agent in the same delivery unit. If the agent, or any of the firms represented by the agent, desires a separation of charges then the conditions in 917.343c(3) are applicable.

* * * * *

917.35 BRM Bearing Stamps

* * * * *

917.352 Refunds

* * * * *

b. The $0.05 (for BRMAS), $0.08, or $0.40 per BRM piece charges are not refundable. * * * * *

* * * * *

917.5 Format

* * * * *

917.52 Format Elements.

* * * * *

917.525 Address. The complete address, including the name of the permit holder, street address, and/or post office box number, city, state, and ZIP Code must be printed directly on the mailpiece. For pieces distributed under BRMAS (see 917.14) the address must include a unique ZIP + 4 code that is preassigned for the BRM piece and which identifies the type of BRM, the applicable rate, and the individual permit holder.

Exception: * * * * *

* * * * *

917.528 Prebarcoded BRM.

a. Optional Use of Barcodes. Barcoding permits highly reliable sortation of mail through automated barcode sorters instead of manual or mechanized methods. Prebarcoding of BRM is optional. If BRM is prebarcoded, these requirements must be followed:

* * * * *

Renumber existing 917.528 a-e as 917.528a (1)-(5);)

* * * * *

(2) Each full bar must be .125 inch, ± .1 inch. Each half bar must be .05 inch high, ± .01 inch. All bars printed must be .02 inch wide, ± .005 inch. The horizontal spacing of all bars must be 21 bars per inch, ± 1 bar. (See Exhibit 917.528a(2).)

* * * * *

b. Required use of Barcodes for BRMAS System. (Free camera-ready Postnet barcodes are provided by the Postal Service.)

(1) FIM C. FIM C must be used for prebarcoded BRM under the BRMAS system (see 917.527).

(2) ZIP + 4 Barcodes. A ZIP + 4 barcode is made up of a single field of 52 bars. The information content of the barcode is distinguished by the height of the bars, either tall (full) or short (half) bars, which represent a "one" or a "zero" to a USPS barcode sorter. These bars, when separated into groups of five, represent each of the nine digits of a ZIP + 4 code, plus a tenth digit designated as a "correction digit." The first and last bars of the barcode are "frame bars" and must always be full bars. (See Exhibit 917.528a(2).) The sequence of bars must represent the ZIP + 4 code (including the appropriate correction character) in the address of the piece, according to the code defined in Exhibit 917.528a(2).

(3) Barcode Location. The location of the barcode must be on the address side of the mailpiece and within a clear space known as the "bar code read area," which must be free of any printing other than the barcode. The read area extends 5/8 inch from the bottom and at least 4-1/2 inches from the right edge of the mailpiece. Within the read area, the leftmost bar of the barcode must be located between 3-1/4 inches and 4 inches from the right edge of the mailpiece. The bottom of the bars must be positioned 1/4 inch (± 1/16 inch) from the bottom edge of the mailpiece (see Exhibit 917.528b(3)), and the barcode must be completely contained within the solid rectangle shown in Exhibit 917.528b(3).

(4) Barcode Dimensions and Spacing. A full bar must be .125 ± .01 inch in height. A half bar must be .05 ± .01 inch in height. The width of all bars must be equal and must be .02 ± .005 inch. Horizontal spacing of the bars must be 21 ± 1 bar per inch. Pitch (a bar and a space) must be limited to .045 inch minimum and .05 inch maximum.

(5) Background Contrast. A print reflectance difference (envelope reflectance minus print reflectance) of at least .3 (30% percent) is required between the background material of the mailpiece and the barcode when measured in the red portion of the spectrum at 650 nanometers.

(6) Skew and Baseline Shift. The combined effects of positional and rotational skew (slant) of the barcode must be limited to a maximum rotation of the bars of ± 5 degrees from a perpendicular to the bottom edge of the mailpiece. The bottom of any bar must not be more than .005 inch from the bottom of each adjacent bar.

(7) Printing Irregularities. Attached extraneous ink (connected to a bar) must not cause any bar to exceed the maximum height or width dimensions. Detached extraneous ink (not connected to any bar or bars) in the barcode read area must not exceed .003 inch in any dimension or cause the space-to-background print reflectance difference to exceed 10 percent. Individual bars must not contain ink voids which reduce bar width to less than .01 inch or remove more than .01 inch along the bar height.

(8) Inserts. The barcode may be printed on an insert and appear through a barcode window on an envelope under the following conditions:

(a) Barcode Window Specifications.

(i) Windows must be covered with a clear plastic material, securely glued on all sides.

(ii) Envelopes with barcode windows may be used only when the ZIP + 4 barcode will be visible through the barcode window.

(iii) Windows must extend fully to the lower edge of the envelopes and must be of wrap-around construction.

(iv) The right edge of the window must be not less than 1/4 inch from the right edge of the envelope.

(v) The left edge of the window must be not less than 4-1/2 inches from the right edge of the envelope.

(b) Barcode Location Specifications.

(i) The ZIP + 4 barcode must be located within the barcode clear zone which extends 5/8 inch from the bottom of the envelope and 4-1/2 inches from the right edge of the envelope.

(ii) The barcode must be at least 1/5 inch from the right edge of the window and 1/5 inch from the left edge of the window.

(iii) No printing other than the ZIP + 4 barcode is permitted in the barcode clear zone.

(iv) The leftmost bar must be located 3-5/8 inches ± 3/8 inch from the right edge of the mail piece and from 3/16 inch to 7/16 inch from the bottom of the envelope.

(Renumber existing 917.53 as 917.528b(9), and revise as follows:)

(9) BRM Format Review. Postal inspection of BRM before printing is desirable but not mandatory. Permit holders receiving written postal approval of BRM before printing could avoid the cost of either reprinting and distribution in the event of a nonmailable ruling, or being ineligible for the BRMAS rate. (Remainder of section unchanged.)

* * * * *

917.57 Self-Mailers.

(Add the following sentence to the end of the section:) See 917.6 for additional requirements for pieces entered under the BRMAS system.

917.58 BRM Cards.

(Add the following sentence to the end of the section:) See 917.6 for additional requirements for pieces entered under the BRMAS system.

917.59 Business Reply Labels

917.591 The minimum size of a label with the legend "Business Reply Label" is 2 inches x 3 inches. It is not necessary to print FIM or bar codes on BR labels; however, all other BRM format requirements must be met.

917.592 The series of horizontal bars on business reply labels must be at least 3/4 inch high.

917.593 Business reply labels must not be used on standard-size BRM cards and envelopes.

917.594 Business reply labels may not be distributed under BRMAS.

* * * * *

(Delete existing section 917.6 and replace with the following:)

917.6 BRMAS Automation Requirements.

917.61 Size Requirements.

917.611 Letter-Size Pieces. Each letter-size BRM piece must meet the following size requirements:

a. Its length must be at least 5 inches and not more than 11-1/2 inches;

b. Its height must be at least 3-1/2 inches and not more than 6-1/8 inches;

c. Its thickness must be at least .007 inch and not more than 1/4 inch;

d. Its length divided by height must fall between 1.3 and 2.5.

917.612 Postcards. Each business reply card must meet the following size requirements:

a. Its length must be at least 5 inches and not more than 6 inches;

READING THE ZIP + 4 BARCODE

The ZIP + 4 barcode consists of the nine digits plus a correction character used by the barcode reader to identify reading errors. The barcode consists of 52 bars as illustrated. Each of the 10 digits contained between the frame bars consists of 2 long bars (read as 1's) and 3 short bars (read as 0's).

Reading and understanding the bar code is simple. There are 10 combinations of 5 bars, each consisting of 2 long (1's) and 3 short (0's) bars. The digits 0 through 9 have been assigned to these combinations:

0=11000 1=00011 2=00101 3=00110 4=01001 5=01010 6=01100 7=10001 8=10010 9=10100

Within the group of 5 bars, each position has a different value: from left to right 7, 4, 2, 1, and 0. Addition of the values in the two positions occupied by 1 bars gives the value of the combination, except in the case of 11000 which totals 11 and has been assigned as zero.

In addition to the ZIP + 4 Code, each barcode contains a correction digit. This digit appears in the last position of the barcode. Its purpose is to ensure that the machine applying the barcode is working properly. The sum of the 10 digits in the barcode (the 9-digit ZIP + 4 Code plus the correction digit) must always be a multiple of 10. The value of the correction digit is therefore determined by adding the numbers in the 9-digit ZIP + 4 Code, and then determining what single-digit number must be added to that sum to make the total a multiple of 10 (end with a zero). In the Example, the sum of the nine digits of the ZIP + 4 Code is 45. Using a correction character of 5 makes the sum of all 10 characters 50, a multiple of 10. If the sum of the digits is not a multiple of 10, an error has been made and the barcode must not be used.

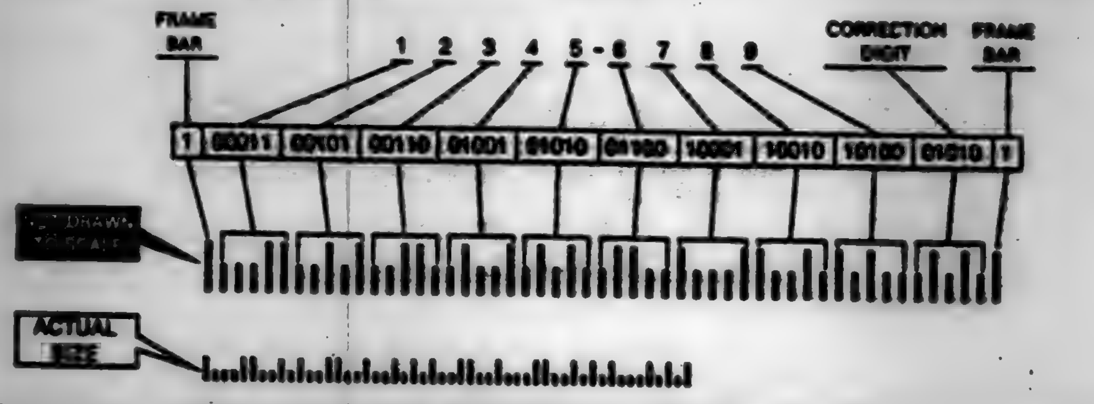

Exhibit 917.528a(2), ZIP + 4 Barcode

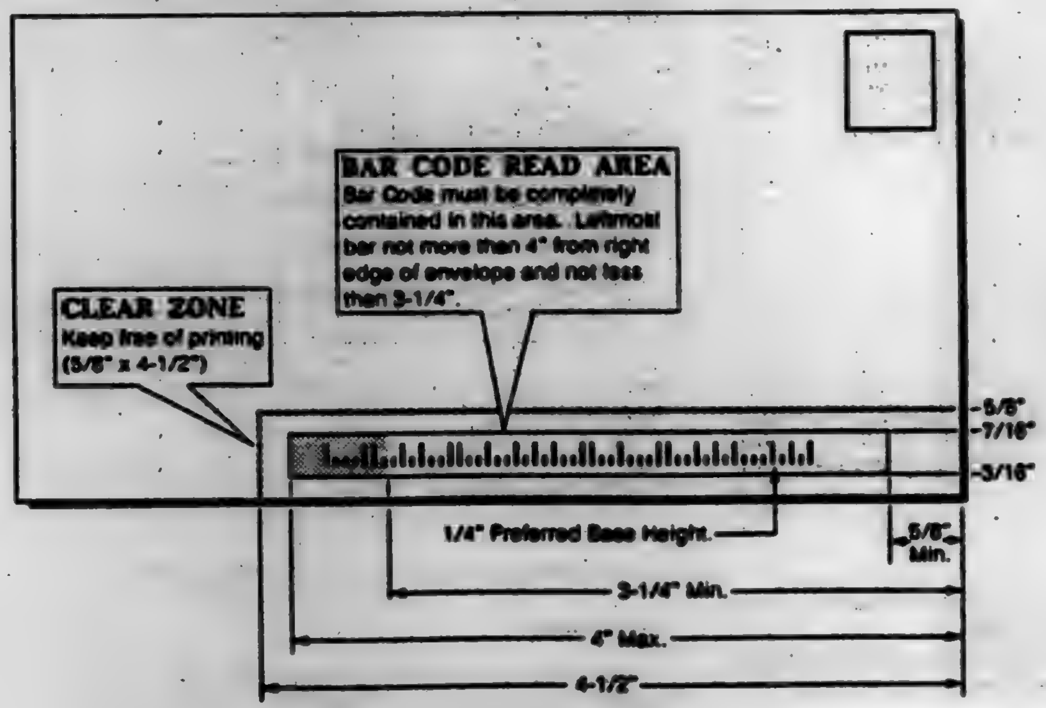

BAR CODE READ AREA
Bar Code must be completely contained in this area. Leftmost bar not more than 4" from right edge of envelope and not less than 3-1/4".
CLEAR ZONE
Keep free of printing (5/8" x 4-1/2")
5/8"
7/16"
3/16"
1/4" Preferred Base Height.
5/8" Min.
3-1/4" Min.
4" Max.
4-1/2"

Exhibit 917.528b(3), Barcode Read Area

b. Its height must be at least 3-1/2 inches and not more than 4-1/4 inches:

c. Its thickness must be at least .007 inch and not more than .0095 inch.

917.62 Additional Physical Requirements.

917.621 Self-Mailers. Self-mailers prepared under the BRMAS system must be fabricated from paper having a minimum base weight of 20 pounds, using a 17 inch by 22 inch sheet size and 500 sheets, in addition to meeting all other requirements for BRM.

917.622 Cards. Business reply cards prepared under the BRMAS system must be printed on paper stock with a minimum basis weight of 75 pounds for 500 sheets measuring 25 inches by 38 inches, and have a thickness of at least .007 inch and not more than .011 inch.

Note: Cards exceeding 4-1/4 inches in height, 6 inches in length, or .0095 inch in thickness, are subject to postage at the regular single-piece rate for matter other than cards in Exhibit 310A (see 322.2 and 322.4).

918 Parcel Airlift

* * * * *

918.4 Fees. In addition to the regular surface rate of postage, the fees for parcel airlift are:

Weight	Fee
Up to 2 pounds	$ 0.30
Over 2 up to 3 pounds	0.60
Over 3 up to 4 pounds	0.90
Over 4 pounds	1.20

* * * * *

919 Merchandise Return

919.1 Description

919.11 General. Merchandise return service allows authorized permit holders to pay the postage and fees on single-piece rate First-Class, Priority, third-class, and fourth-class (parcel post, special fourth-class, library rate, or bound printed matter) mail to be returned by their customers.

* * * * *

919.2 Permits

* * * * *

919.23 Processing Applications.

* * * * *

919.232 Annual Permit Renewals. The permit holder must renew the permit by sending the annual fee to the post office issuing the permit by the expiration date of the permit.

* * * * *

919.3 Postage and Fees

919.31 Annual Fee. A fee of $60 will be charged once each 12-month period for each permit issued.

919.32 Transaction Fee. The fee for each item returned is $0.20 per parcel, in addition to the postage and other applicable fees.

* * * * *

930 Supplemental Mail Services

931 Certificates of Mailing

* * * * *

931.2 Fees

* * * * *

931.23 Bulk Mailings. Identical pieces of First-Class and third-class mail paid with ordinary stamps, precanceled stamps, or meter stamps, are subject to the following fees:

Up to 1,000 pieces (1 certificate for total number)	$2.00
For each additional 1,000 pieces or fraction	.25
Duplicate Copy	.45

* * * * *

932 Return Receipts

932.1 Description.

932.11 Return Receipt with Special Service. Return receipt service furnishes a mailer with evidence of delivery. The service may only be obtained for mail that is sent COD or Express Mail, is insured for more than $50, or is registered or certified. After delivery, the Postal Service mails the return receipt to the sender. Return receipts may be requested either before or after mailing.

932.12 Return Receipt for Merchandise Service. Return receipt for merchandise service is available only for merchandise sent at Priority Mail, third-class, or parcel post rates of postage. See 934.

Note: For information about international return receipt service, see *International Mail Manual,* 340.

932.2 Fees (in addition to postage and other fees.) The fees for return receipts are:

REQUESTED AT TIME OF MAILING:	
Showing to whom (signature) and date delivered	$0.90
Showing to whom (signature), date, and address where delivered	$1.20
REQUESTED AFTER MAILING:	
Showing to whom and date delivered	$5.00
RETURN RECEIPT FOR MERCHANDISE (See 934)	
Showing to whom (signature) and date of delivery	$1.00
Showing to whom (signature), date, and address where delivered	$1.35

Note: The fee for a return receipt does not insure the article against loss or damage.

* * * * *

932.32 After Mailing

* * * * *

c. Mailer's may not request a return receipt after mailing for return receipt for merchandise mailings. See 934.1.

932.5 Duplicates

932.51 Failure to Receive Return Receipt. After a reasonable period of time, not longer than one year after the date of mailing, a mailer who did not receive return receipt service for which the mailer had paid, may request a duplicate.

a. The mailer must complete a Form 3811-A, *Request for Return Receipt (After Mailing),* at any post office. The clerk will assist the mailer in completing Form 3811-A, postmark it and mail it to the delivering post office. Or, the mailer may request in writing a copy of the actual delivery record for mail sent COD, numbered insured, Express or registered mail. Waive the fee if the mailer can produce a receipt showing the applicable return receipt fee was paid. Requests for duplicate return receipts or copies of delivery records for Express Mail must be filed within 90 days of the date of mailing.

b. A request for a duplicate receipt for certified mail may be filed without additional charge only if the original Form 3800, *Receipt for Certified Mail,* was date-stamped by a post office at the time of mailing. If the original Form 3800 was not date-stamped, the post office must charge the fee for a return receipt after mailing.

932.52 Request for Duplicate or Return Receipt After Mailing Form 3811-A. Procedures for a request for a duplicate of a return receipt after mailing a Form 3811-A, are as follows:

a. Records of delivery must be checked, and the date of delivery and the name of the individual or organization to whom delivered must be entered on the Form 3811-A.

b. If a signed receipt is not found for certified mail, send the addressee Form 1510, *Mail Loss/Rifling Report.* If the reply indicates that the addressee has received the certified mail, file the completed Form 1510 with the delivery records as a receipt. The delivery information contained on the Form 1510 will be used to complete the Form 3811-A. If the addressee does not return a completed Form 1510 within 14 days, the Form 3811-A must be completed to show no record of delivery and returned to the mailer.

c. Form 3811-A must be postmarked and the postage for receipt after mailing canceled. Draw a line through the address of the delivery post office on the front of the Form 3811-A and mail the form back to the mailer.

* * * * *

933 Restricted Delivery

933.1 Description. Restricted delivery service permits a mailer to direct delivery only to the addressee or the addressee's authorized agent. The addressee must be an individual (or natural person) specified by name. The service may only be obtained for COD mail, mail insured for more than $50, and for registered or certified mail.

933.2 Fee (in addition to postage and other fee.) The fee for restricted delivery fee is $2.00.

* * * * *

934 Return Receipt for Merchandise

934.1 Description

a. Return receipt for merchandise service is a form of return receipt service which provides the sender with a mailing receipt, a return receipt, and a record of delivery at the office of address. No record is kept at the office of mailing. Mail using this service will be dispatched and handled in transit as ordinary mail. No insurance coverage is provided. Restricted Delivery service is not available. No return receipt can be requested after mailing. This service may not be used on international mail.

b. Mailers may be authorized to use specially designed and privately printed Form 3804, *Return Receipt For Merchandise.* The return receipt for merchandise endorsement block must be printed in brown using the same size and format. The return receipt for merchandise number must begin with the letter N. Proposed labels must be submitted to the Office of Classification and Rates Administration, Rates and Classification Department, U.S. Postal Service Headquarters, Washington, D.C. 20260-5360, through the local postmaster.

c. The proper placement of the return receipt for merchandise endorsement is described in 121.44 and illustrated in Exhibit 121.4.

934.2 What May Be Sent With Return Receipt For Merchandise Service. Return receipt for merchandise service is available only for merchandise sent at the Priority, third-class or parcel post rates of postage. All articles must be mailable in accordance with postal regulations. Special Delivery service is available upon payment of the prescribed fees (except for bulk third-class). Special handling is available for third-class and parcel post.

934.3 Fees:

Showing to whom (signature) and date of delivery	$1.00
Showing to whom (signature), date, and address where delivered	$1.35

934.4 Mailing

934.41 Payment of Fee and Postage. The fee and postage may be paid by stamps, meter stamps, or by permit imprint. The fee and postage on official mail of federal government agencies and departments are collected under the reimbursement procedures in 137.

934.42 Points to Which Mailable. Return receipt for merchandise mail may be addressed for delivery only:

a. In the United States and its territories and possessions;

b. Through Army, Air Force (APO), and Navy (FPO) post offices; and

c. Through the United Nations, New York, Post Office.

934.43 Where To Mail. Mailers must mail articles at a post office, branch, or station, or give them to a rural carrier. They must not be deposited in mail drops at post offices nor in or on street mailboxes. They may be placed in, but not on, rural mailboxes.

934.44 How To Mail. Obtain both a Form 3804, *Return Receipt For Merchandise,* and a Form 3811, *Domestic Return Receipt,* at the post office or from rural mail carriers. Observe the following procedures:

a. Enter on the receipt portion of the return receipt for merchandise, the name and complete address of the person or firm to whom the mail is addressed;

b. Affix the numbered portion of the gummed label from Form 3804 to the mailpiece;

c. Endorse the mailpiece on the address side (near the return receipt for merchandise label) "Return Receipt Requested" or "Return Receipt Requested Showing Address Where Delivered." Enter the return receipt for merchandise number on the Form 3811, address it to yourself, and attach it to the front of the mailpiece -- if it will not cover the address. Otherwise, attach it to the back of the mailpiece. The name of the person to whom the return receipt is to be furnished must be the same as that of the sender. If the return receipt is to show the address where the article was delivered, check the block at the top of Form 3811;

d. Attach to the article, sufficient postage to pay for the rate of postage desired, the return receipt for merchandise fee, and the special delivery or special handling fee, as appropriate;

e. Attach the return receipt for merchandise label to the address side of the article and present the completed receipt to a postal employee. If asked to do so, the postal employee will show on the receipt the time the article was accepted for mailing. If given to a rural carrier, the carrier will return the postmarked receipt to the customer;

f. Customers may instruct the Postal Service to deliver without obtaining a signature by signing the waiver on Form 3804. This option allows the delivery employee to sign for the article on the first delivery attempt to the listed address, if the addressee or the addressee's agent is not available to accept the shipment. Customers who elect to waive the addressee's or the addressee's agent's signature must accept the delivery employee's signature and date of delivery as proof of delivery. To waive the signature, detach both portions of the gummed label and attach to the mailpiece.

934.5 Firm Mailing Books. If three or more articles are mailed at one time, the sender may use mailing books, Form 3877, which are furnished by the Postal Service without charge, or privately printed firm mailing bills. A series of numbers will be furnished to the sender by the local postmaster. The sheets of the book become the sender's receipts. The mailer must present the books with the articles to be mailed at a post office. Mailers must also obtain, at their expense, stamps to endorse the articles with the endorsement "return receipt for merchandise". The endorsement must be a facsimile or proportionate enlargement of the official endorsement shown in 934.1. Following are instructions for the use of firm mailing bills:

a. Write in "return receipt for merchandise";

b. The mailer must endorse and number the articles "Return Receipt Requested," "Return Receipt Requested Showing Address Where Delivered," or "Special Delivery," as appropriate. Prepare and attach the return receipt to the envelopes with the receipt side showing;

c. Show on the bill the number of each article and the name and address of addressee;

d. Enter only the amount of fees paid in the proper columns;

e. Affix necessary postage to the articles;

f. The accepting employee will count the items, postmark and receipt the bill for the total number, indicate time of mailing, if requested, and return the bill to the sender;

g. A postmarked receipt marked "Bulk Receipt" will be issued if the quantity mailings do not check out, or if they are not listed and arranged to permit issuance of a verified receipt.

934.6 Delivery

934.61 Procedures. Return receipt for merchandise mail for delivery by carriers will be taken out on the first trip after it is received, unless the addressee has requested that the postmaster hold the mail at the post office. Return receipt for merchandise mail will be delivered to the addressee or authorized representative. A signature must be obtained on Form 3849. If the mailer has indicated on the mailing label that the delivery is to be made without obtaining the signature of the addressee or the addressee's agent, sign the return receipt in the "Signature - Agent" block, sign Form 3849 in the "Received By" block and leave the article. Form 3849 should be initialed and dated in the "Delivered By" block. Similarly, when the addressee has properly authorized unprotected delivery, articles should be delivered in accordance with 153.82. The carrier should complete Form 3849 and the return receipt as above.

934.62 Rural Delivery. For delivery by rural carriers or at personnel and nonpersonnel rural units, see 156.

934.63 Highway Contract Route Delivery. Highway contract route carriers will deliver return receipt for merchandise mail, if required by the contract, but delivery will be made only at the customer's box or along the route.

934.64 Delivery Records. The delivery records will be held for 2 years. At the end of that period, the records will be destroyed.

934.65 Notice of Arrival. The carrier will leave a notice of arrival on Form 3849, *Delivery Notice Reminder/Receipt,* if he cannot deliver the return receipt for merchandise article for any reason. The article will be brought back to the post office and held for the addressee. If the article is not called for within 5 days, a second and final notice on Form 3849 will be issued. If the article is not called for or its redelivery requested, it will be returned at the expiration of the period stated by the sender, or after 15 days if no period is stated.

934.66 Delivery at Post Office. Hold return receipt for merchandise mail at a place convenient for the public to call, if addressed for box or general delivery or for firm callers or if a Form 3849 had been left for addressee to call. Place Form 3849 in post office boxes for box service customers. Use Form 3883 for firm or other customers who receive an average of three or more return receipt for merchandise articles at one delivery.

934.7 Carrier Controls

934.71 Assignment. Send return receipt for merchandise mail, including that for firms, to a unit or employee designated to assign it for delivery. Assign as follows:

a. Individual Pieces. Offices with 190 or more revenue units must use Form 3867, *Registered, Express Mail and Certified Matter Received for Delivery,* to show the total number of pieces given to each carrier. Use Form 3850, Record of Delivered Registered, Numbered Insured, Certified, and COD Mail, as the chargeout record at post offices with 189 or fewer revenue units. Obtain the signature of the carrier on Form 3867 or 3850.

b. Firm Mail. Prepare Form 3883, *Firm Delivery Book--Registered, Certified and Numbered Insured Mail,* in duplicate for addressees who receive an average of three or more pieces at one time.

c. Specials. Assign special delivery return receipt for merchandise separately for special delivery service, following the rules in 934.71a and b.

934.72 Clearance. The clearing clerk must clear carriers and messengers in the following manner:

a. Have carriers or messengers account in bulk for all return receipts for merchandise articles charged to them, either by signed receipts or returned articles. If any article or return receipt is not accounted for, make an immediate report to the supervisor. Endorse the chargeout record when clearing is complete.

b. Sign and give back to the carrier or messenger Form 3821, *Clearance Receipt,* which is prepared and submitted when accounting for certified and return receipt for merchandise articles and return receipts assigned for delivery.

c. If return receipt for merchandise articles returned undeliverable by a carrier or messenger are forwarded or returned, show disposition on Form 3867 and prepare a disposition record on Form 3849 including the name of the addressee. File the Form 3849 with the delivery receipts.

d. Examine all return receipts. Make sure that they are properly signed and that the date of delivery has been entered. If delivery was improper, have the carrier or messenger obtain the addressee's signature on another receipt card and destroy the original after the duplicate has been signed. Mail the receipts no later than the next working day.

e. It is the supervisor's responsibility to take prompt corrective action with the delivering employee if return receipts or delivery receipts have not been obtained or have been improperly completed.

f. If the mail is not delivered in 5 days, issue a second and final notice to the addressee on Form 3849 marked "FINAL NOTICE." Send it through regular channels with the addressee's ordinary mail.

934.73 Delivery to Military Installations. Return receipt for merchandise mail addressed for delivery at military installations within the continental United States must be delivered to the military installations in the same manner as numbered insured mail.

934.74 Filing Delivery Receipts. See 913.72 for instructions on filing delivery receipts.

934.75 Undeliverable. Handle return receipt for merchandise mail which is undeliverable or is to be forwarded in accordance with 159.3 and 159.4.

934.8 Acceptance Procedures

934.81 Individual Mailings. The window clerk should verify as follows:

a. Compare name and address of addressee on the article and on Form 3804, *Return Receipt for Merchandise;*

b. Make sure the article bears the proper endorsement;

c. Examine the return receipt card to determine whether appropriate blocks in instructions to delivering employee have been checked, and that the card is securely attached. Make sure address is properly completed by the sender;

d. Make certain that proper postal charges have been paid by stamps or meter strip affixed; endorse mail, if special delivery;

e. Postmark receipt portion and give to mailer. Initial by the entry on the receipt, in ink, the time the article was mailed, if requested to do so by sender;

f. Deposit article in mail. Do not return to the mailer.

934.82 Quantity Mailings. If the return receipt for merchandise mail numbers are listed on firm mailing bills in consecutive order and the mail is similarly arranged, verify quantity mailings as follows:

a. Count the pieces of mail and listings on the bill. They must agree;

b. Compare return receipt for merchandise mail numbers on first and last articles with the first and last numbers listed on the bill. They must agree;

c. Make a spot-check to determine that mailings are properly prepared and that postal charges have been fully prepaid;

d. Postmark receipt and give to mailer. Enter time articles were mailed, if requested to do so by the sender, placing your initials by the entry. Use ink to enter time and initials in the space for the name of accepting employee;

e. Deposit articles in mail. Do not return to mailer.

934.83 Verification of Delivery. Mailers may obtain a copy of the delivery record by sending a written request to the post office of address for a copy of the delivery record. The fee is $5 for each copy requested and must be sent with the request. Mailers may not obtain a return receipt after mailing.

* * * * *

940 Nonmail Services

941 Money Orders

941.1 Issuance

* * * * *

941.12 Amounts, Fees, and Payments

* * * * *

941.122 Fees

a. The fee for a postal military money order is $0.25. They are issued by military facilities authorized by the Department of Defense.

b. Fees for domestic money orders issued at other post offices, including those with branches or stations on military installations, are as follows:

Amount of money order	Amount of Fee
$0.01 to $35	$0.75
$35.01 to $700	1.00

* * * * *

941.4 Inquiries

* * * * *

941.43 Fee. The customer must pay a $2.00 fee for each money order inquiry submitted on a Form 6401. Each Form 6401 covers only one money order.

Exceptions: The $2.00 fee does not have to be paid by banks, other financial institutions, and Government agencies that process money orders directly with the Federal Reserve Bank, and for official post office business.

* * * * *

945 Mailing List Services

* * * * *

945.2 Sortation of Mailing Lists on Cards by Five-Digit ZIP Code

* * * * *

945.23 Multi-Five-Digit ZIP Code Post Offices

945.231 General. Under the following conditions, post offices will sort mailing lists consisting of addresses for the multi-five-digit ZIP Code post offices described in 122.632 (see also 122.633), according to five-digit ZIP Codes, at a charge of $42 per thousand addresses or fraction thereof, payable to the local postmaster upon submission of the list.

* * * * *

950 Alternate Delivery Services

951 Post Office Box (P.O. Box) Service

* * * * *

951.2 Fees

* * * * *

951.26 Fee Schedule

951.261 Fees are:

Group	Box size 1	2	3	4	5
	Per semiannual period				
1	$14.00	$19.50	$36.00	$60.00	$100.00
2	3.25	5.00	8.50	14.00	22.00
	Per annual period				
3	$2.00	2.00	2.00	2.00	2.00

* * * * *

952 Caller Service

* * * * *

952.2 Fees

952.21 Reserved Number Fee. The fee for each number reserved by a customer for future use is $20 per postal calendar year or any part of such a calendar year.

952.22 Caller Service Fees

* * * * *

952.222 Basic Caller Service Fee

a. General Rule. The basic fee for caller service is $170.00 for a semiannual period, to be applied to each caller number or separation used.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 265

[FRL-3355-3]

Interim Status Standards for Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities; Clarification

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of clarification.

SUMMARY: The Environmental Protection Agency is today clarifying the broad interpretation of the term "soil" in the preamble to regulations promulgated on March 19, 1987. These regulations provide conforming changes to the interim status requirements for closure of hazardous waste surface impoundments, to be equivalent to the requirements for permitted hazardous waste surface impoundments. The conforming regulation is found at 40 CFR 265.228, and was published at 52 FR 8704.

EFFECTIVE DATE: March 28, 1988.

FOR FURTHER INFORMATION CONTACT: RCRA Hotline at (800) 424-9346 (in Washington, DC, call 382-3000) or for technical information contact James T. Bachmaier, Office of Solid Waste [WH-565-E], U.S. Environmental Protection Agency, Washington, DC 20406, (202) 475-8859.

SUPPLEMENTARY INFORMATION: EPA published a final regulation on March 19, 1987, amending the interim status requirements in 40 CFR 265.228 for closure of hazardous waste surface impoundments (52 FR 8704, March 19, 1987). This amendment conformed the closure requirements for interim status surface impoundments to those requirements already in existence for permitted surface impoundments (40 CFR 264.228). The amendment specifies that all waste residues, contaminated containment system components, contaminated subsoils, and structures and equipment contaminated subsoils, and structures and equipment contaminated with waste and leachate, must be removed or decontaminated to achieve "clean closure" and avoid the need to perform post-closure care. The removal or decontamination of contaminated ground water to achieve clean closure of interim status surface impoundments was discussed in the preamble to the final rule. In that preamble, the Agency stated that the term "soil" includes both unsaturated and saturated soil, and therefore, that "uncontaminated ground water is * * * a requirement for 'clean closure' * * *". The Agency also stated that uncontaminated ground water had been a requirement for clean closure under previous regulations.

Subsequent to publication of this preamble, questions have been raised regarding the above statements that the Agency would now like to address. Such questions relate to the broad interpretation of the term "soil" to include ground water, and whether this interpretation has implications on use of "soil" elsewhere in the Part 264 or 265 regulations. The purpose of this notice is to clarify the Agency's position on the interpretations and policy statements made in the March 19, 1987, preamble, and to articulate the policy the Agency intends to follow in implementing closures of surface impoundments under 40 CFR 264.228(a)(1) and 265.228(a)(1). The Agency notes that these policies are also applicable to waste piles that close under 40 CFR 264.258(a) and 265.258(a).

First, the preamble discussion on cleanup of ground water at closure should have referred to EPA's use of the phrase "contaminated subsoils" in §§ 264.228(a)(1) and 265.228(a)(1) rather than to the phrase "underlying and surrounding soils," since the former term replaced the latter term as a result of the March 19, 1987 rulemaking. The term "contaminated suboils," in the context of closure of surface impoundments and waste piles by removal or decontamination, is interpreted to refer to any materials that may have been contaminated by hazardous wastes managed in the unit. Such contamination is evidenced by the presence of hazardous constituents at the time of closure. EPA does not now intend to interpret the term "soil" or "subsoil" to include the ground water contained in saturated or unsaturated soil or subsoil at any other place in the regulations where these terms may appear. At this time, the Agency's interpretation is limited to closure requirements for hazardous waste management units.

Second, the Agency's policy is that post-closure care is unnecessary if no hazardous wastes or waste residues remain at the site of the unit after closure (see §§ 264.228(a)(1) and 265.228(a)(1)). The term "waste residues" refers to any hazardous constituents derived from hazardous wastes that are present in the environment at or above levels of human health or environmental concern. Such levels are discussed in the March 19, 1987 preamble. The Agency has used the term "waste residue" in its closure regulations to cover any hazardous constituents released from a unit to the subsoils, for example, through escape from a liner, spills, over-topping at a surface impoundment, run-off, volatilization, or wind-blown releases to the atmosphere from a surface impoundment or waste pile. The term "waste residue" also includes any decomposition products of hazardous waste that contain hazardous constituents that are present in the environment at or above levels of human health or environmental concern, as discussed in the March 19, 1987 preamble. To remove or decontaminate these residues, the unit owner or operator must remove or decontaminate all contaminated materials, including liners and leachate collection devices, unsaturated soils, saturated soils, ground water, surface water, surface water sediments, and any other material containing hazardous constituents released from a hazardous waste management unit prior to completion of closure. Post-closure care is necessary where any of these or other waste residues, including any waste residues located in the ground water, remain at the site of the unit at or above levels of human health or environmental concern following completion of closure activities.

Third, it is the Agency's policy that in order to achieve clean closure of a hazardous waste management unit, the owner or operator must remove only those hazardous wastes or waste residues that are in the unit or have migrated from it, as shown by the factual circumstances in each case.

List of Subjects in 40 CFR Part 265

Hazardous materials, Packaging and containers, Reporting and recordkeeping requirements, Security measures, Surety bonds, Waste treatment and disposal, Water supply.

J.W. McGraw,

Acting Assistant Administrator for Solid Waste and Emergency Response.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

Federal Motor Vehicle Safety Standards; Denial of Petition for Rulemaking on Lamps, Reflective Devices, and Associated Equipment

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Denial of petition for rulemaking.

SUMMARY: NHTSA denies a petition for rulemaking from BMW of North America, Inc. requesting an amendment of the Federal motor vehicle safety standard on lighting. The petition asked that the definition of replaceable bulb headlamp be amended so that the lens reflector assembly need not be bonded, or alternatively to exclude ellipsoidal headlamps from the definition. The agency is denying the petition, consistent with its previous position with respect to the desirability for safety reasons of a bonded lens reflector assembly, because the petitioner presented no new information to justify its request.

EFFECTIVE DATE: March 28, 1988.

FOR FURTHER INFORMATION CONTACT: Marian Ulman, Office of Rulemaking, NHTSA (202-366-5890).

SUPPLEMENTARY INFORMATION: On December 4, 1987, BMW of North America, Inc., submitted a petition for rulemaking requesting that NHTSA amend Federal Motor Vehicle Safety Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment.* Paragraph S3 of the standard defines a "replaceable bulb headlamp" in pertinent part as "a headlamp comprising a bonded lens and reflector assembly * * *." BMW asked that the word "bonded" be deleted, or alternatively, that ellipsoidal-type headlamps now appearing on its cars, be excluded from the definition.

The effect of an amendment of this nature would be to allow separate lens and reflector components. In support of its petition, BMW argued that this would reduce costs so that broken headlamp lenses would be replaced in a timely manner. BMW recognized that the agency had previously denied a petition from General Motors to delete the bonding requirement (See 48 FR 44815) on the grounds that removable lenses introduce additional opportunities for aiming problems due to alignment inaccuracy; further, the opportunity exists for substitution of lenses designed for off-road vehicles and other U.S. beam patterns. In BMW's opinion, replaceable bulb headlamps can be designed so that these problems will not occur, citing features of its own ellipsoidal headlamp in support. As a general argument, it submitted that replaceable bulb headlamps are both left/right specific, and vehicle-specific, and that it was therefore unlikely that outside suppliers would introduce off-road lenses that would fit vehicles with on-road lamps. In addition, lenses for replaceable bulb headlamps would most likely be produced by the original manufacturer and available primarily through dealerships, where they most likely would be installed. BMW cites the statutory proscription against rendering inoperative original safety equipment (15 U.S.C. 1397(a)(2)(A) as a legal tool available for enforcement, mitigating against the likelihood of mismatched parts.

Both BMW and the agency agree on the importance of lens integrity to headlighting safety. A cracked lens can allow water to enter the chamber of a headlamp, dirtying the lens and reflector, eventually eroding the latter. As a result, the beam is altered. If the lens is separate from the reflector, there is less likelihood that the dirty or corroded reflector will be replaced or even cleaned when the lens is replaced. BMW, however, has not presented any information in support of its primary argument that lower replacement costs will lead to more frequent replacements. One could just as easily argue that for appearance reasons, or to avoid a possible legal citation, or to pass an upcoming annual inspection a vehicle owner will seek to replace a broken lens at the earliest feasible time. Given the lack of data related to the number of incidences where only the lens might be replaced and the numerical relationship between price and frequency of replacement, the petitioner cannot balance a possible increased frequency of replacement—a safety plus—against the possibility of increased misaim—a safety minus. Thus, the reason for the agency's denial of General Motors' petition remains.

Currently Standard No. 108 contains no performance requirements for lenses and reflectors, only that a replaceable bulb headlamp meet photometric and environmental requirements with the appropriate light source. It would be difficult and time-consuming for NHTSA to develop separate requirements covering aftermarket lenses and reflectors because there is no industry standard, such as an SAE Recommended Practice, available as a model. The attachment of the two pieces would have to be regulated in some fashion to ensure that lenses fit only one way to minimize misaim. A requirement would have to be adopted for providing DOT certification on the reflector. This would require additional regulations, at a time when the policy of the agency is to reduce regulation consistent with safety. For the same reason, the agency does not view with approbation the exclusion of ellipsoidal headlamps with replaceable bulbs from the bonding requirements applicable to all replaceable bulb headlamps; it would result in additional regulations, necessitating further Figures to a standard that already devotes 43 pages of the Code of Federal Regulations to them.

The agency has completed its technical review of BMW's petition, and has determined pursuant to 49 CFR 552.8 that there is not a reasonable possibility that the amendment requested in the petition will be issued at the conclusion of a rulemaking proceeding. Accordingly, the petition is denied.

(15 U.S.C 1410a; delegations of authority at 49 CFR 1.50 and 501.8)

Issued on March 22, 1988.

Barry Felrice,

Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 23

Procedural Change in Requesting Comments on Species Listings in Appendix III of the Convention on International Trade in Endangered Species of Wild Fauna and Flora

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of decision.

SUMMARY: The Convention on International Trade in Endangered Species of Wild Fauna and Flora (Convention) regulates international trade in certain species of animals and plants. Appendices I, II, and III to the Convention list those species for which trade is controlled. Appendix II includes species that any Party nation identifies as being subject to regulation within its jurisdiction for the purposes of preventing or restricting exploitation, and as needing the cooperation of other Parties in the control of trade. In certain situations, the U.S. Fish and Wildlife Service (Service) has decided to announce additions to Appendix II as final rules without first requesting comments on the issue of entering a reservation.
